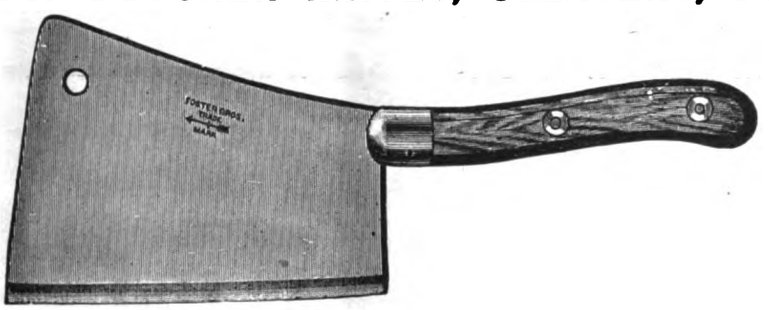
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chattillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us



has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York. U.S.A.

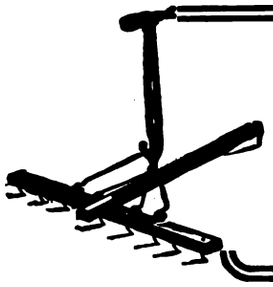
and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.

These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.



Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

ESTABLISHED 1835

JOHN CHATILLON & SONS, New York City.

85 to 93 CLIFF STREET and 12 JACOB STREET.

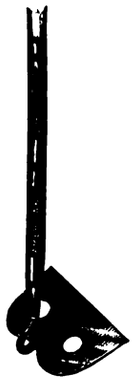
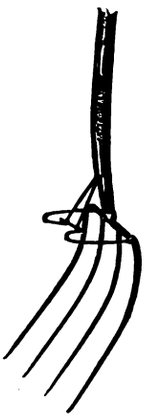
BRANDS of unquestioned high quality.

YEARS of success which have been earnestly employed by skillful manufacturers striving to produce the best in their field of endeavor.

They are the oldest and largest manufacturers in the world—men who have progressed from pioneers to modern experts in this industry.



TOOL USERS have learned to depend upon these brands for all that is desirable in good Farm and Garden Hand-Tools.



They ask for these brands and insist upon having them—*no substitute will answer.*

That is why you can sell them easily and can do a large business on them.

Apply for one of these brands this season, if you are not already fortunate enough to be handling one of them.

Write to us for our large catalog. **Order from your Jobber.**

WARNING!

To whom it may concern:-

We have been advised that the Automatic door closing device made by the American Hardware Mfg. Co., of Ottawa, Ill., and put on the market under the name of the American door catch, is an infringement on our rights under our letters patent, No. 652,828, dated July 3, 1900. We have accordingly brought suit for infringement against the American Hardware Mfg. Co. in the United States Court. All persons are hereby warned against making, selling or using the device known as the American Door Catch, as we shall vigorously protect our rights.

THE E. L. WATROUS MFG. CO.,
Des Moines, Iowa.

The Crystal Coffee Mill

The Gem Mop Head.

GET BUSY

That is the one secret of success in the Hardware trade. The rapid sales and quick turning over of capital that

A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 800 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

THE FAMOUS GEM is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE EIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

DIXON'S HANDY BLOTTERS.

The Joseph Dixon Cruicible Co., Jersey City, N. J., are distributing to their friends in the trade a unique blotter, with a monthly calendar embellishing the front. Seated on a spray of golden rod is the representation of a large Jersey mosquito, with a face "almost human," and an expression indicative of the joy of living. A nicely pointed Dixon pencil is seen in the background. This company, besides being engaged in the manufacture of graphite lead pencils, are also large manufacturers of silica graphite paint, pure flake lubricating graphite and graphite pipe-joint compound.

LISK'S MEMORABLE ANNUAL OUTING.

In a recent issue of the Rochester Sunday *Herald* were a number of large and elaborate half-tone illustrations displaying in an interesting manner how the numerous employes of the Lisk Manufacturing Co., of Canandaigua, N. Y., enjoyed their annual outing, which was held at Seneca Point, Canandaigua Lake, last month. From the display given of the innumerable frolics, it is certain the parties participating had the time of their lives, for the scenes depicted a happy state of affairs that we are sure will linger while memory holds the seat of honor in the brain that cherishes it.

FIRE AT CHARLES WEILAND'S.

On the night of Tuesday, October 2nd, a fire occurred in the Hardware and Cutlery establishment of Charles Weiland at 131 Reade Street, New York, which made such a rapid headway it had a good hold on the three upper stories when the first fire apparatus appeared, although an alarm had been turned in when the fire was only a slight blaze. The building is connected at the rear with 149 Chambers Street by bridges on every story except the first, which extends through both buildings from street to street. The firemen found these bridges points of vantage in directing their streams of water, and Chief Croker praised their usefulness in fighting the fire. The firemen prevented the fire from reaching the two lower floors, although goods in them were damaged by water. The flames left a mere shell of the three upper floors. The loss is estimated to be $25,000.

TRADE WITH BRAZIL.

NEW STEAMSHIP LINE—THE REDUCTION OF DUTIES.

In a dispatch to the State Department from Brazil, Ambassador Griscom summarizes the effect of the visit of the Secretary of State, and in the course of the dispatch says:

"It is fortunate that just at this moment, as telegraphed to you by me on the 20th instant, the Lloyd Brasileiro, the largest Brazilian steamship company, has just put in operation a new monthly steamship service between Rio and New York. The English company of Lamport and Holt have been running a monthly service with a practical monopoly, and without competition the freights have been prohibitive. It is hoped that we are entering upon an era more favorable to merchants who may desire to reach out for trade with Brazil. The crying need of our relations with Brazil is better steamship communications. Inquiry among our leading financiers and merchants indicates that encouragement by our National Government in the form of a small postal or other subvention would quickly bring about the establishment of a good line of American steamers between New York and Rio. Given a few facilities our trade with Brazil must inevitably go ahead at once with leaps and bounds."

Minister Griscom, who was fortunate in securing a reduction of 20 per cent in the duties imposed by Brazil on imports from the United States of flour, condensed milk, rubber type (tariff No. 1023), watches, paste (tariff No. 173), varnishes, typewriters, refrigerators, pianos, scales, and windmills, is said to feel some anxiety over the fact that the matter has not been sufficiently brought to the attention of exporters in the United States, as this reduction, unless extended, will end on December 31, next. This offers a splendid opportunity for exporters of such products to Brazil, and in connection with the new line of steamships established by Brazil, ought to very largely increase the exports to that country for the remainder of this year.

J. E. PORTER COMPANY'S NEW CATALOGUE.

We acknowledge the receipt of J. E. Porter Company's new pump catalogue, and wish to call attention to the very unique and attractive poster-effect of the cover, a dark green background with two silver pumps dispensing sparkling water over the globe. This is typical of the great and well-known excellence of the Porter pumps. They are so good and so manifold in their use that they can truthfully be said to water the earth. The catalogue illustrates the whole of the Porter Company's large line, including force and lift, single and double-acting, wind-mill regulating, tank, and spray pumps, as well as iron, brass and brass-lined cylinders. The catalogue is sent free, and such of our readers who have not received a copy should write for one to the manufacturers, J. E. Porter Co., Ottawa, Ill.

DEATH OF PHILIP FERDINAND KOBBE.

Mr. Philip Ferdinand Kobbe, Director and Assistant Secretary of the Westinghouse Electric & Mfg. Company, died at his summer home at Stockbridge, Mass., on Friday, September 21st, aged 64 years. Mr. Kobbe was one of the pioneers in the electrical business, his efforts having always been devoted to the financial end. In 1883 he was elected treasurer of the United States Electric Lighting Company, which position he held until 1890, when the United States Electric Lighting Company was absorbed by the Westinghouse Electric & Mfg. Company, at which time Mr. Kobbe was made Treasurer of the latter company. In 1896 Mr. Kobbe was made Vice President in addition to his duties as Treasurer, and in 1902 he became a director of the company.

Mr. Kobbe was born in New York October 24, 1842, and received his education in Germany. He was a man of broad culture, and of a charming personality that endeared him to all of his associates, so that they were always glad to consider him their friend. He served in the Civil War as a member of the Seventh Regiment. He was a member of the Calumet and Richmond Country Clubs and the Society of Colonial Wars. Surviving him are his widow, three daughters and two sons. Two brothers, Gen. William A. Kobbe, U. S. A., and Gustave Kobbe, author and journalist, of New York City, also survive.

THAT CARELESS SPEECH.

Insist upon it that your employees speak distinctly and set the example for them yourself so you will know that it is done. There are few more disagreeable topics of conversation to a person of culture than "what" with its more polite equivalents. A word misspoken, too, or not entirely understood has been responsible for more than one embarrassing situation as an obscure syllable has destroyed the force of many a telling argument. The rush of modern business life invites a haste of speech that brings its own disease, indistinctness. Along with this is growing up the kindred fault of inattention. Where is the use of trying to catch all the utterance with the first attempt when a repetition is so sure to be asked anyway that it is expected? The result of it all is a trained inattention to the spoken word and indistinctness with the speaker.

By standing near almost any group of young toilers just released from work one cannot but be impressed by the prevailing "What," "What did you say?" "I didn't understand you," until one almost believes the "what" habit rivals the gum habit with the girls and the cigarette craze with the boys.

One of these days these same young people will be called upon to take their places in positions where our patrons are accustomed to have their meaning understood without unreasonable repetitions, and expect to make out what is being said to them without wasting time in many questions. The fault may seem a trivial one to us; it is. All the easier then can it be overcome. At the same time taken in the aggregate it is so disagreeable as to be almost an abomination and it all comes through carelessness that we can overcome.

THE NEW YORK PUBLIC LIBRARY 319483 ASTOR, LENOX AND TILDEN FOUNDATIONS.

DEATH OF MRS. L. E. MacINTYRE.

Mrs. L. E. MacIntyre, President of the Hardware Publishing Co., publishers of HARDWARE, died at her residence in this city after a brief illness of appendicitis on September 24, 1906. She submitted to an operation a few days before, from which gangrene developed, which caused her death. Mrs. MacIntyre was at the time of her death the wife of Thomas Alexander MacIntyre, of the firm of T. A. MacIntyre & Co., 71 Broadway, New York, bankers and brokers. She is survived by three sons and one daughter who recently married Arnold Lawson, a son of Thomas W. Lawson, the Boston financier.

Editorial Trade Review

Trade continues the acme of excellence in every respect from all the reports obtainable, but the goods, the regular reception of which would make every one happy, are difficult to obtain even when they have been a long time ordered on a "take time by the forelock" programme. Notwithstanding manufacturers are straining their machinery to the utmost, still the output doesn't equal the conditions required to supply the customers' wants. A farther increase of creative power might be in contemplation but for the fear of overproduction at a later date should every manufacturer, under the present impetus, enter the list for an augmented production, which might later on result in a slump with all that the name implies. This fear holds the forces in check and it is decided that it is better to endure the ills we have than risk a future of uncertainty with ample facilities.

This fact is noticed in the five per cent. and seven and one half per cent. advances which seem to be the order of the day, and which fail to jar on the dealers' mentality, who feels grateful to know it is no worse. But it's mighty rough to know one of the principal causes is to be found in a lack of the raw material without which the hammers are compelled to lessen production and the mills to slacken the velocity of their rolls. The trend of the markets under such circumstances cannot fail to be of an upward character, but the country must keep the markets free from anything favoring experimental inflation of values.

This country seems to be the pacemaker for the rest of the world, our daily accessions to greater wealth making us fill the proud position, but the keystone of the whole fabric is the annually increasing crops upon which is founded our wonderful prosperity. The bountiful harvest of the past few years has made us strong in the commercial world, where every channel of industrial promise is made prolific, and gains of every sort assume a permanent shape. To aid in the transportation of our crops to the seaboard, thousands of freight cars are needed, and in a time of plenty like this, the scant facilities of the railroads are easily discovered. Crops widen and extend so many fields of industry, and make labor-saving machinery undertake the most progressive of possibilities.

The heavy rains prevailing in the West in many States have interfered with harvesting, causing more or less delay and lessening sales. This has also been the trouble in the Southern States, and the cotton crop has felt the effects of it.

Export trade is referred to as being unusually good, and in fine condition, with an advancing tendency in some important lines. It is difficult to keep up a supply of goods for export when advancing markets on this end of the traffic are reported, with a consequent scarcity coupled with a good demand in domestic channels. Our manufacturers are too prone to let the foreign markets "bide a wee," especially when they have to be held at prices that attract them only because lower in price.

THE STORE FRONT.

There is such a thing as carrying a good idea too far. Store window displays are the cheapest form of efficient advertising when kept in their proper place but when they come outside and spread themselves all over the sidewalk for a block or two, they become a public nuisance as well as a menace to the popularity of their owner. The average man, after he walks around a washing machine, falls over a couple of plows, takes an involuntary ride on a carpet sweeper, climbs over a baby carriage and knocks his hat off on a hammock, thinks things that his wife does not allow him to say and takes just about enough interest in the whole concern to kick it into the middle of the street unless he happens to run astride a pump-handle at the critical moment; then he thinks a little more. The object of window and front-door displays is, not to keep people out of the store or on the other side of the street, but to get them inside. The one thing that a big assortment of goods upon the sidewalk usually suggests more than anything else is confusion. The premises where front-yard disorder is permitted are never attractive to the lover of neatness. However attractive the interior may prove there is always the feeling of a junk pile to be gotten over before the outer world can again be reached. Besides it all seems like an intrusion on the public and if there is any one thing a man kicks against it is against any infringement on his free and unlimited pedestrial sway upon the street without being hampered by a thought of anything but himself.

Then what is more annoying to a woman than to have her dress all but wrenched from her by a projecting bolt or bit of wire that still holds a shipping tag in its place? Rather than take such chances, especially in a country town with its narrow walks, she takes the muddy street. Does she bestow a smile of approval at the window display or carry a favorable impression away with her?

Even more than the public, if anything, the Hardware dealer or any other business man, ought to object to any obstruction to the walk. There is the very place that he should do his part to keep clear and specially neat to favor his displays within. There is no attention quite so favorable to him as whole-hearted attention and that is what he cannot get so long as he surrounds his audience with a battlement of projecting bolts or broken packing crates with nails sticking out of them.

A well conducted store begins, not at the door, but at the curb; a disorderly one as far away as it can be seen. In nearly all towns there are authorities whose duty it is to keep the sidewalks passable; in a few of them it is done. Where it is not there is a splendid opportunity for an enterprising business man to distinguish himself from his fellows by keeping his own sidewalk clean and his own side of the street attractive, as though the public's right-of-way ran through the store itself instead of past its front.

THE LONG DATING TEMPTER.

Never let long datings tempt you into purchases that are not needed. The commercial man is with you to sell his own goods and will try and get you to bank upon the credit of future sales; in his enthusiasm for his *one* line he may be sincere in thinking as he says, but it is not safe to depend on. He is selling only one line of goods and you have many to unload. Where he could devote his entire energies to commercial fertilizers, or stock food, or some novelty in the building Hardware line, and could doubtless really make the sales he claims, you must regard that as a side line most of the time, and see that other things don't drag. Under such conditions it would be very unsafe to expect sales equal to his.

Occasionally it is well for the Hardware dealer to get out among his people in a personal canvass in behalf of some new line he has just taken up, but even then it is only *a* line and not his business. Always he has a weather eye out for his other goods. If he is selling fertilizers he is not an exclusive fertilizer dealer as the agent is, but sizes up the buggy situation, notes that Joe Smith will have to get a new mowing machine or that Deacon Brown's house needs painting. If he is wise he doesn't mention all the things he notices at the time but it attracts more or less of his attention from fertilizers, though it may lead in the future to even more profitable sales.

Buy what you think *you* can sell and not what the agent tells you he can.

COMMERCE AND LABOR AT THE SHOW; OFFICIAL AND UNOFFICIAL ALSO.

The United States Government, through the Department of Commerce and Labor, is to be an exhibitor at the Fifth Annual Business Show to be held at Madison Square Garden, New York City, from October 27 to November 3, according to an announcement just sent out by managers Cochrane and Payne. A statement setting forth in detail the plan and scope of the Government exhibit is now being prepared. The National Association of Manufacturers, which has been called an "unofficial department of Commerce and Labor," is also to have an exhibit, and with it *American Industries*, the official organ of the Association. It is planned to show geographically to the business men something of the wide influence of the Association in the commercial affairs of the world. The list of unofficial exhibitors at this year's show is more brilliant than ever before, including the leading manufacturers in all lines of modern business accessories.

FOREIGN COMMERCE UNDER THE NEW GROUPING, 1896 TO 1906.

This statement is a summarization of the analysis of the exports and imports of manufacturers of the United States under the new grouping recently adopted by the Bureau of Statistics of the Department of Commerce and Labor, and applied to the records of our foreign commerce in each year from 1896 to 1906.

This combination of the groups year by year shows, as above indicated, that articles prepared for use form a steadily increasing share of the total exports, and the articles in a crude state a continually decreasing share, while in imports the share prepared for use shows a decrease and the share imported in the natural state an increase in the period from 1896 to 1906.

The group "Manufactures for further use in manufacturing," composed chiefly of copper in pigs, bars, and ingots, iron and steel in a partly manufactured state, leather, lumber, and naval stores, grew from 75 millions to 223 millions, forming 13 per cent of the total exports in 1906, against 9 per cent in 1896. The group "Manufactures ready for consumption," of which the exports are chiefly iron and steel manufactures in finished form, refined mineral oils, cotton manufactures, agricultural implements, cars and carriages, boots and shoes, and manufactures of wood, grew from 183 millions in 1896 to 463 millions in 1906, forming 27 per cent of the exports in 1906, against 21 per cent in 1896.

The group, "Manufactures for further use in manufacturing," chiefly composed on the import side of tin in bars, copper pigs and bars, diamonds cut but not set, iron bars and billets, tin plates, wire rods and pig iron, grew from 101 millions in 1896 to 221 millions in 1906, forming 18 per cent of the imports in 1906, against 13 per cent in 1896. The group, "Manufactures ready for consumption," which includes on the import side, chiefly manufactures of cotton, wool, silk, fibers, and miscellaneous articles, grew from 227 millions in 1896 to 304 millions in 1906, forming 25 per cent of the imports in 1906, against 29 per cent in 1896.

The following table shows, in millions of dollars, the imports and exports of the United States under the new grouping of the Bureau of Statistics in each year.

IMPORTS

[In millions of dollars.]

Fiscal year.	Foodstuffs, crude, and animals.	Foodstuffs, prepared.	Manufacturers' material.	Manufactures for manufacturing.	Manufactures ready for use.	Miscellaneous	Total
1896	130	119	198	101	227	5	780
1897	128	129	196	88	218	5	765
1898	104	86	189	79	153	4	616
1899	99	123	208	92	169	5	697
1900	98	133	276	134	203	5	850
1901	110	125	248	127	205	6	823
1902	120	95	298	147	234	8	903
1903	119	116	325	192	264	10	1,026
1904	132	118	316	158	257	9	991

ADULTERATION OF TURPENTINE.

The movements for pure foods and pure drugs are evidences of a growing feeling that a buyer has a right to know exactly what he is buying, and a seller must not deceive in what he sells. The same movement has caused laws regarding pure turpentine to be enacted in a number of States. These laws are supposedly to protect the buyer against adulteration. In reality they are often designed by producers of one variety of turpentine to place obstacles in the way of the sale of other turpentines.

But if they tend to give the buyer, even in a small way, a more exact knowledge of what he buys they are of value.

Now pure gum spirits of turpentine in this country is usually obtained by boxing and chipping the long leaf pine and distilling the gum with water. Other varieties, however, like the short leaf pine, the loblolly pine, the Cuban pine, the Norway pine or the Douglas fir, when chipped, yield a spirits of turpentine differing slightly in odor and composition from the long leaf pine product, but having the same general properties. Would it be an adulteration or falsification to sell these other products under the name spirits of turpentine? Certainly not, since there is no reason for restricting the name turpentine to any single member of the conifers. In fact, it was originally applied to the product of a different family altogether. The source is immaterial to the buyer so long as he knows that the products he buys are all terpene products boiling in the neighborhood of 308 to 330 degrees F., and having the characteristics of Pinene.

Again it has been found possible to take waste pine wood itself and extract the turpentine from it by steam. The spirits so obtained, when properly made and rectified, contain the same amount of pinene and the same characteristics as gum spirits, but has a slightly different odor. The sale of this product as turpentine would of course not be falsification. It has the same source and composition as the gum spirits. Only the mode of obtaining it and the odor of some of its less important oils differ from those of gum spirits.

Again it is the custom in some places to make charcoal of the waste pine wood and recover the volatile oil distilled off. This destructively distilled turpentine should not be sold as turpentine without an explanation of its history, because either it will be contaminated with pyroligenous acid, creosote, etc., or else it will have been treated with sulphuric acid or caustic soda or both to remove these products. The presence of the first named impurities renders it unfit for high-grade uses, while the treatment with chemicals to remove them changes the characteristics of the Pinene itself.

Again it is possible to add 5 to 10 per cent. kerosene or benzine or gasoline to turpentine without changing its odor or general characteristics materially. This is plain fraud. It is a sale of a petroleum product at four or five times its real value under the pretense that it is an entirely different substance—turpentine. This is a most common fraud, the amount of petroleum product added often being forty or fifty per cent.

Again it is common to make concoctions of various petroleum

Digitized by Google

distillates, either common petroleum products, or the less familiar ones from California or from Russia or Galicia, either with or without the addition of a little turpentine. These concoctions are sold under a great variety of names, some purporting to be foreign turpentines (Russian, Galician, Grecian, Swedish, etc.) others to be true substitutes for turpentine.

There are such things as Russian and Swedish turpentine, cheaper than pure turpentine because of higher boiling point and antiquated methods of production, but they are not such concoctions as those mentioned above, and the sale of petroleum products under the guise of foreign turpentine is of course a pernicious fraud.

Lastly the turpentine substitute! There may be certain cases where lemon extract has served as a substitute for whiskey. For certain purposes an emetic may be considered a substitute for a sea voyage. For killing mosquitoes petroleum distillates are probably as satisfactory as turpentine. But for making varnishes and thinning paints petroleum products are in no sense satisfactory substitutes for turpentine.

The existence of all these turpentines and so-called turpentines makes it necessary for a dealer to know exactly what he is buying if he wants to deal squarely.

SYSTEM OF A NEW YORK STORE.

By F. F. Purdy.

White, Von Glahn & Co. present, in their Forty-second street store, New York, an exhibition of enterprise and the utilization of every means to attract trade which deserves detailed attention. Their Forty-second Street store has been in operation about seven years. The business of the firm, with headquarters at Chatham Square, was established in 1816. Both establishments are under the direct supervision of E. C. Von Glahn, with headquarters down town, and J. H. Winn is Mr. Von Glahn's representative uptown and has been for over a year past.

The results attained are all the more striking when it is known that the front is little over 20 feet wide, with but one window and the entrance at the side. But that window does a heavy business. Every ounce of popularity and display that can be got out of it is extracted. The writer was attracted to it the other day by an exhibit of mechanics tools, but especially by this sign.

"Think it over. Since 1816 we have been selling mechanics' tools. We warrant our kind." The back and sides of the window were lined with mirrors, and a partition separated the window into two parts, each side of that partition was [illegible]. The other side contained an exhibit of cutlery, with this sign:

"Quality goods. Pocket knives, table cutlery, razors, scissors. Unconditional guarantee." These signs are in red and black and plainly and neatly lettered. They are [illegible] on the premises and done by a letterer in the neighborhood. The windows are changed every two weeks in the Summer and every week as holiday time is discerned in the offing. The division of the windows into two parts renders possible an effective display of two separate lines of stock. We looked into the collection of cards that had been used during the past few months and some of them will convey suggestions regarding display and card lettering to dealers everywhere. Here are a few of them:

"Our prices make it expensive for you to trade elsewhere. Gem food choppers, 85 cents each. Universal bread mixers, $2 each."

"Peck & Snyder and Barney & Berry ice skates, 50 cents to $5 per pair. At manufacturers' prices."

"Holiday suggestions: Carving knives, pocket knives, razor sets, Quality and price."

"Going fishing?"

"A razor for every shaver and one that will make your daily morning scrape a delight. Try our kind. Will not cut friendship."

"Steel snow shovels, 35 and 50 cents each. Steel sidewalk scrapers 50 and 75 cents each."

"The dawn of a new light. The Rath light, $1.50. Increases your light. Decreases your gas bill."

"Have you seen it? Wivanta knife sharpener. The best yet. 25 cents. We have it."

"Money talks to the man who deals with us. Makes every penny count. Wivanta knife sharpener, 25 cents each."

"Keep warm and save coal by buying the Perfection oil heater, $3.50 to $5. Lanterns, electric flashlights."

"That cold room can be made comfortable, by using the Perfection oil heater. $3.50 to $5."

"If you want the correct time get the Seth Thomas watch. $2.50 to $10, the other kind has the worry in it."

"Our motto—Not how cheap, but how good for the price. Wivanta tool cabinets, 10, 15, 20 and 25 dollars."

The method of stock-keeping of White, VonGlahn & Co. is highly to be commended. Round the whole interior there are stock boxes, of two or three sizes, up to within two or three feet of the ceiling. They are uniformly finished in a beautiful golden oak. On the face of each box there is a sample of the article inside instead of the name of the article lettered on it. We are told that many people, who have wants, but who are unlettered, or to whom, anyway, words convey little compared with the sight of the various articles—these people come in, say for a corkscrew, and are attracted by the exhibition of hundreds of different articles on the boxes round the store and often go away with four or five dollars' worth of goods.

In the two or three feet of shelving above the stock boxes there is room for the storing of a convenient amount of surplus stock, the bulk of which of course is carried elsewhere—in the basement. The "forward stock"— in the boxes—is gone over at short stated intervals and replenished from the surplus on the top shelves—conveniently at hand. The "forward surplus" is in its turn replenished at intervals from the big reserve stock in the cellar.

Here are some of the combinations that have been displayed in the twin portions of the window: Bathroom fittings and leather goods; baseball and tennis outfits and fishing tackle, including rods, reels, lines, etc.; electric fans, electric novelties, flashlights, etc., paints and varnishes; one side all thermometers, other side traveling bags, whisk brooms, collapsing cups and general traveling conveniences; builders' Hardware, including sample boards, door knobs, locks, hinges, etc., on one side, other side lawn mowers, horse reels, lawn hose, grass clippers and everything pertaining to the lawn.

The goods are neatly and carefully displayed and attract a deal of attention. The bulk of the trade is transient and suburban. The mirrors are valuable auxiliaries. Aside from the fine effect and duplicating the view of many kinds of goods, any sign that is affixed in decalcomanie or otherwise on the window pane stands out to the beholder from the mirror in the rear.

In the fall and winter, beginning with say, November, the signs spoken of are slid into a neat mahogany frame that hangs out over the sidewalk, and can be read by people approaching from each side. Of course the signs are displayed in the window as well, but the policy of the house in evident—to lose no chance of attracting the attention of the public. Their methods may be studied to advantage by all.

In reply to an inquiry as to why the New York dealers and those in the large cities did not prosecute their business more scientifically it was stated that one cause might be that the dealers became discouraged to a great extent by manufacturers of builders' Hardware, for instance, going after the business direct. But even considering this, it is evident, from the success that White, VonGlahn have made of their up-town branch, that any Hardware dealer having any kind of a location, can increase his business enormously by putting in all the up-to-date auxiliaries of trade and keeping up a system patterned after the one we have described. It can not be alleged that others are situated differently, and that this establishment is a large one. The front is small, although the interior is somewhat larger than one would suppose from the appearance of the front. But this is a plan of campaign adapted to a business of moderate size.

AKRON IN THE LEAD WITH NEW COMPANY WHICH CAN SUPPLY THE WORLD WITH FISHING TACKLE.

What is to be the largest manufacturing company of fishing tackle and general sporting goods in the world was incorporated recently by well known Akron, Ohio, people, and will be known as The E. A. Pflueger Co. The company was incorporated with a capital stock of $100,000 all subscribed. The incorporators are: E. A. Pflueger, C. I. Bruner, Geo. D. Bates, W. E. Slabaugh and Francis Seiberling, all well known in the business world. Operations will proceed as soon as a suitable factory can be obtained and if this cannot be procured a large plant will be erected. The company has a number of plants in view about the city but if none of these are suitable a new plant will be erected and all the latest improved machinery for the manufacturing of fishing tackle will be installed.

E. A. Pflueger, who for years has been associated with the Enterprise Mfg. Co., of Akron, will be president and general manager of the new concern. He has resigned from the above company in order to take charge of his new duties. Mr. Pflueger has devoted his whole life to the manufacturing of fishing tackle, having grown up in the business from the age of fourteen. He is still a young man and the prospects for the new company with such an experienced and energetic man at its head are very bright.

Digitized by Google

He and his associates first started in this business with a small capital and the concern with which he was associated was a very small one. He, however, has built up a business such as few men have been able to accomplish. He knows personally all of its customers and has traveled extensively in order to become acquainted with the people with whom he has dealings.

There is unlimited capital back of the new company and nothing will be lacking to make this the best plant of its kind in the United States. There are few concerns of this kind in the United States and when the new company is ready for business Akron will be known as the center of the fishing tackle industry.

HISTORY OF GENUINE PHILADELPHIA LAWN MOWERS.

As a matter of fact quite a few persons have claimed the first invention of Lawn Mowers in this country. To place this matter in its true form for those interested, Mr. W. K. Hawks, the veteran Lawn Mower Man, being thirty-nine years interested in Lawn Mowers, and when with H. N. Swift of Matteawan, N. Y., was interested in the Lawn Mower business in this country, two years before any patents were issued in the United States, gives us the following statistics:

In 1869 there was four patents issued for Lawn Mowers in America, three of them being full roller mowers, and one The Genuine Philadelphia Lawn Mower. The Philadelphia being constructed with side wheels for driving rollers, the other three with full roller for drivers and for seventeen years all other makers who made side-wheel mowers paid the Philadelphia company a royalty on their patents. At the expiration of this patent many interested themselves in making Lawn Mowers and the price and quality was reduced to that extent, so that to-day many Lawn Mowers are sold on price only; contrary to this policy, The Philadelphia Lawn Mower Co. have always considered quality first and not price, so that to-day they are not only known as the Pioneer Lawn Mower Makers, but their product has become the Standard Mower of the world, and it goes without saying, buy the Genuine Philadelphia and get the best.

Their export business has increased to that extent that the Company deemed it advisable to open a store at 14-16 Scrutton St., Finsbury, London, Eng., not only for their large export trade, but they are making a full line of Genuine Philadelphia Lawn Mowers for the English market. They have also established agents for the sale of their Mowers in Germany through Biernatzki & Co., of Hamburg. For France, Ostheimer Bros., 40 Rue de Exchequier, Paris, and in Belgium, G. Duchamps, Brussels. All of these agents can furnish Mowers at manufacturers' prices of the twenty hand and five horse styles. A most complete line, comprising hand mowers with 6½ inch to 12 inch wheels, and revolving cutters, three to five blades, with five horse mowers, combining all the latest improvements, some of which are adapted to do any kind of work on lawns all over the world.

Jobbers and retailers sell Genuine Philadelphias. If they cannot be purchased of them write to the Philadelphia Lawn Mower Co., 3101 Chestnut St. Philadelphia, Pa., and they will give the name of the nearest dealer. Buyers should also remember they issue a large Annual catalogue, which will be furnished on application so that they may know they are still in business, notwithstanding reports made to the contrary. We are informed that this Company will continue to make nothing but standard high-grade Mowers which will be sold at the lowest manufacturers' prices and warranted to give entire satisfaction.

PROGRAMME OF THE ATLANTIC CITY CONVENTION.

We present herewith the complete programme of the National Hardware Association which will be followed at the Convention at Atlantic City, October 17-19.

PROGRAMME TWELFTH ANNUAL CONVENTION NATIONAL HARDWARE ASSOCIATION OF UNITED STATES.
ATLANTIC CITY, OCTOBER 17TH, 18TH, 19TH, 1906.

WEDNESDAY, OCTOBER 17TH—10 A. M.
OPEN SESSION.

(Manufacturers and all interested including ladies are invited.)
Opening Remarks — W. S. Wright, President.
Chorus—"God Bless our Native Land."
Prayer — Rev. John R. Davies, D. D.
Pastor Bethlehem Presbyterian Church, Philadelphia.
Address of Welcome — Hon. Franklin P. Stoy,
Mayor of Atlantic City.

ROLL CALL.

President's Annual Address — W. S. Wright.
Secretary-Treasurer's Report — T. James Fernley.

INTRODUCTIONS.

F. S. Kretsinger.
President American Hardware Manufacturers Association.

William Vallance
President Canadian Wholesale Hardware Association.
E. M. Bush
President National Retail Association.
J. Hardy
Secretary-Treasurer Canadian Wholesale Hardware Association.
F. D. Mitchell
Secretary-Treasurer American Hardware Manufacturers Assn.
M. L. Corey
Secretary-Treasurer National Retail Hardware Association.

Discussion—What is the best method of introducing new goods to the trade?

2.30 P. M.

Executive Session.
Report of Executive Committee.
Report of Membership Committee.
Report of Grievance Committee.
Report of Entertainment Committee.
Report of Metal Committee.

WEDNESDAY EVENING—8.30 P. M.

Members of the National Hardware Association are invited to attend Reception tendered by the American Hardware Manufacturers Association.

THURSDAY, OCTOBER 18TH—10 A. M.

EXECUTIVE SESSION.

Report of Transportation Committee.
Report of Heavy Hardware Committee.
Report of One Cent Letter Postage Committee.
Report of Fraternal Relations Committee.
Report of Press Committee.
Report of Insurance Committee.
Miscellaneous Business.

2 P. M.

Meeting of Heavy Hardware Jobbers.

4 P. M.

EXECUTIVE SESSION.

Members of Press and American Hardware Manufacturers Association invited.—Discussion.

8.30 P. M.

Card Party—Conducted by Ladies—all invited.

FRIDAY, OCTOBER 19TH—10 A. M.

Report of Catalogue House Committee.
Report of Special Committees.
Miscellaneous Business.

2 P. M.

Executive Session.
Miscellaneous Business.
Discussion on Special Topics.
Installation of Officers.

7 P. M.

Banquet—Subscription price $6.00 per cover.

From all indications there will be an attendance of 70 per cent. of the members of the Association. At the banquet on Friday evening, 19th inst., Hon. John E. Watson, member of Congress from Indiana; F. S. Kretsinger, president of the American Hardware Manufacturers' Association, and Hon. R. O. Moon, member of Congress from Pennsylvania, will be among the speakers.

THE ENTERTAINMENT FEATURES OF THE CONVENTIONS.

The entertainment features connected with the Atlantic City Conventions, October 17-19, are assuming an importance justified by the energetic nature of those under whose charge they are fostered and encouraged. The card party which will occupy the attention of the ladies on Thursday evening will be under the management of a committee headed by Mrs. George W. Trout of Chicago, whose managerial experience in that particular is a sufficient guarantee of a successful issue. There have been a number of prizes donated by the attendant manufacturers, which will be contended for on that occasion, and the affair may be looked forward to with the greatest interest by those intending to participate.

A RECORD WORTH SHOWING.

A rare instance of trade increase, especially of the amount involved, is that of the Norvell-Shapleigh Hardware Co., of St. Louis. A large card announces the fact that on the 19th day of September the increase in sales of goods billed and shipped over that of 1905 reached the million mark thus giving a million dollar increase over last year's business in nine months or three-fourths of a year, leaving three months of this year's industry to be heard from, and one that bespeaks enterprise, push and ability that it would be hard to equal let alone surpass.

LEGAL CORRESPONDENCE

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

CHATTEL MORTGAGE—WHEN VOID AS TO CREDITORS.

Question: A man having a stock of goods wishes to execute a chattel mortgage on the goods to secure a creditor and at the same time to be able to sell the goods for his own account and purchase new stock, which shall also be covered by the mortgage. In other words, while retaining full power to sell his stock, he wants the chattel mortgage to cover all the stock in his possession at any given time. Is this legal?

Reply: According to the law in most States it is not. Although such a mortgage may not be executed with any actual fraudulent intent, its legal effect is to commit a fraud upon the creditors of the mortgagor. Its effect is to leave the mortgagor free to deal with the property as his own and to enable him to buy and sell without regard to the lien of the mortgage. At the same time such a mortgage, if valid, would prevent any other creditor from levying upon or collecting anything from the goods of the mortgagor until the mortgage had been satisfied. Such a form of mortgage is a fruitful source of fraud. Chattel mortgages, however, have been sustained by many decisions where the mortgagor is given a power of sale over the property mortgaged, but agrees that all the proceeds of any sale of the mortgaged property shall be applied on account of the mortgage debt. Such a mortgage cannot impair the rights of other creditors, because even if the mortgagor neglects to apply the proceeds of property sold in satisfaction of the mortgage debt, any amount received by him must nevertheless so far as other creditors are concerned, be applied in reduction of the lein of the mortgage.

LIABILITY FOR LOSS OF FIRE EXTINGUISHERS.

Question: A company leases fire extinguishers to various parties by a written contract, one clause of which provides: "If damage be done to the company's property, the subscriber shall pay to the company the value of the property so damaged or destroyed, or the cost of repairing the same." If the fire extinguishers are destroyed by a fire which happens without any carelessness or neglect on the part of the person leasing them, who must pay for their loss?

Reply: Except for the clause in the written contract the rule would be that the company, in order to recover the value of the property lost or destroyed, must show that the loss or destruction was occasioned by the negligence or carelessness of the person to whom it was loaned. We think the effect of the clause quoted is to make the person leasing the extinguishers liable for their loss, even in cases where no fault can be proved against any one.

LIABILITY OF INDORSERS WITHOUT RECOURSE.

Question: A check came to us in the course of business and we indorsed it "without recourse" and deposited it in the bank. Later payment of the check was refused and it was protested, because one of the prior indorsements was a forgery. Can we be held liable when our indorsement was made "without recourse?"

Reply: A qualified indorsement or an indorsement "without recourse" relieves the indorser, in case the check or draft is dishonored, from the liability to pay it which he would assume by an ordinary indorsement, but even the indorser "without recourse" warrants that the instrument is genuine, that he has a good title to it and that all prior parties have capacity to contract. If one of the prior indorsements on this check was a forgery, and you cannot show title to it, except through such indorsement, it follows that you are liable upon your indorsement, even though it was without recourse.

PARTNERSHIP—HOW NOTICE OF DISSOLUTION GIVEN.

Question: I have been in partnership with a man and the firm has now been dissolved by mutual consent. I am anxious to prevent him running up any more bills or contracting any debts on the credit of the firm. Please advise me the surest way to do this?

Reply: As to all those who have given credit to the firm while you were partners, you must give personal notice. As to such persons it is not enough to publish a notice, or to send letters announcing the dissolution, unless you can show that such notice or letters were actually received by them. The safest course to pursue is to send a notice of dissolution by registered mail addressed to each of the persons who have had dealings with the old firm. As to the general public, in order to relieve yourself from liability, it is sufficient for you to publish for several weeks a notice of dissolution in one or more newspapers printed and circulated in the place or places where you have been doing business. A convenient form of notice of dissolution, where the partnership is dissolved by mutual consent, is as follows: "Notice is hereby given that the partnership lately subsisting between 'A. B.' and 'Y. Z.' of under the firm of 'B & Z.' was dissolved on the day of by mutual consent. 'A. B.' is authorized to settle all debts owing to and by the firm (Signature of partners)."

A WELL-KNOWN TRADEMARK.

"Three in One" Oil is a meritorious article that is warranted as useful in many ways, as the name that blazons it, and is manufactured by the G. W. Cole Company, 141-145 Broadway, New York, and known as such by the Hardware and Bicycle trades, that have long exploited its usefulness. Even the trademark is a unique one to be remembered, for in a large outline ngure 1 a figure 3 is placed, significantly forming the characteristic figure of "3 in 1." The label upon every bottle of the oil has this registered trademark printed in red, which is also to be found on the outside of every package, thus warning the trade against infringements of vested rights.

COMPENDIUM OF COMMERCIAL LAW.

Adolph M. Schwarz, attorney and counsellor at law, Barclay Building, 299 Broadway, New York, has prepared an exceedingly valuable handbook for those interested in credits and collections, in which he has tabulated and condensed many points on commercial law, and in which will be found information on such important subjects as Corporation, Partnership, Law of Sales, Negotiable Instruments and the Bankruptcy Act, with tables giving Rates of Interest, Grace on Notes, Statutes of Limitations and Frauds, Justice's Limited Jurisdiction, Exemptions and Chattel Mortgages, as they prevail all over the United States, as well as other matter of practical utility and permanent value to any business man. Accompanying the booklet is a letter giving in detail information as to Mr. Schwarz' methods of handling delinquent accounts against debtors situated in any part of the United States, Canada and in foreign countries. This booklet will be found helpful to credit men, book-keepers and business men in general, and will be sent on application either to the New York office, as above; to the Philadelphia office at 801 Bailey Building or the office in Chicago at 708-710 Illinois Bank Building.

FIRE EXTINGUISHERS.

OPPORTUNITY OFFERED AMERICAN MANUFACTURERS.

Consul E. L. Harris, of Chemnitz, suggests the possibility of a fairly extensive market for American fire-extinguishing machines and appliances. He suggests the methods by which the markets may or must be secured. He writes:

Fifteen years ago Germany was little advanced in the art of extinguishing great fires in her large cities. To-day, however, practically every city in the Empire has a well-organized fire department, with trained, professional firemen. The whole system is something on the American plan, from which Germany has learned a great deal in improving and working out plans best adapted to meet peculiar and local conditions. Each country village, too, now has a volunteer fire brigade, where formerly nothing of the kind existed.

A fine new fire-department building has just been erected in Chemnitz, and is fitted up with all the latest improvements and appliances. From press reports from other parts of Germany new novelties and experiments are to be continually introduced in order to complete the existing methods of extinguishing fire. I would advise American manufacturers of fire-extinguishing appliances to address illustrated catalogues to the fire departments in the various German cities, as I feel sure the same will receive proper attention at the hands of experts, and it is not impossible that a market for the same may be found, contingent, however, upon the condition that whatever is offered really presents something new along the lines in question. If printed in German, the catalogues would have greater value.

♣

The South has always been noted for the large number of colonels it produces, but Kansas now comes into the field as a competitor, 1176 kernels having recently been counted on one ear of Kansas corn.

THE INTER-MOUNTAIN WEST

BUSINESS GOOD.

The same remarkable business activity that is sweeping over the entire country seems to be making its headquarters here in the Inter-Mountain West. Although the cost of all building materials is high, and labor is commanding greater wages than ever before, still there is more actual building taking place than ever in the history of the West. Much of this building is not of as great direct benefit to the Hardwareman as formerly. In the large modern steel and concrete buildings now being erected in the cities, the retail dealer has little to supply—the manufacturers of Hardware very often bidding direct for the business—but all this building makes and creates a good demand for tools and helps on the general business prosperity. At least this is the way one of Denver's retailers spoke of the conditions as exist to-day in the city "one mile high." Continuing, this dealer said: "Of course there is a better demand all the time for house-furnishing goods, for "pick-up" Hardware, for cutlery, and for sporting goods. This latter line is constantly becoming more and more a factor in our business. It is profitable and responds well to a better effort in advertising. The way to sell sporting goods is not to cut prices, but to advertise and display the goods in the season."

DENVER DEALERS.

Arapahoe Street of Denver, has in reality become the Hardware Row of the West. Here within a few blocks are located five of the finest stores of the State. At 1648 to 1654 is the big wholesale and retail establishment of The George Tritch Hardware Co., doing a jobbing business extending into three States. An exceedingly attractive sporting goods store is conducted here in Denver by the George Tritch Hardware Co. and this branch of the business is growing, as well as the regular Hardware trade.

Frank A. Ellis & Sons' big Hardware store at 1645-51 Arapahoe Street is the scene of much activity. This concern carry on both a retail and jobbing business and by handling a fine line of high-grade goods are each year building up a larger and still more prominent trade. Special attention is given to window displays, which are a feature of this up-to-date store and add much to general appearance of the street. In speaking of trade conditions Mr. Ellis said: "We have not a single thing to complain of and moving up here has helped our retail trade, and we are holding all our jobbing customers.

At 1621 Arapahoe Street is the Denver Hardware Co., of which M. C. White is proprietor and general manager. This store makes a specialty of fine tools and shelf Hardware.

The business that is being done by the George Mayer Hardware Co. at 1516-22 Arapahoe Street is the best evidence of this concern's prosperity. The store is exceedingly attractively arranged, and large windows are used to good advantage in displaying and showing goods. A very good feature of the George Mayer Hardware Co.'s store is its light and bright appearance. Mr. George Mayer is one of Denver's pioneer Hardwaremen and the oldest dealer in Colorado.

Another attractive retail store at 1508 Arapahoe Street is that of Troxel Bros., doing a general Hardware business.

A new concern in the exclusive wholesale trade here is the Kittering-Benway Hardware Co., with warehouse and show rooms located on Fourteenth Street. This concern was formerly in the retail trade, from which they retired entirely and are now devoting their entire energy to the jobbing business. Mr. Kittering said that the business of the firm was largely that of representing manufacturers direct and acting as sales agents. There is a big field here in the Inter-Mountain West for such a business and the success which the Kittering-Benway Co. have met proves that the trade of Colorado welcome such a venture.

Devoting their entire energy to the wholesale heavy Hardware trade the Moore Hardware & Iron Co. at 1529-39 Fifteenth Street are doing an extensive business.

At 1404 Fifteenth Street is the large wholesale house of John C. Mayer Hardware Co. Business was reported as in a very satisfactory condition and the outlook very good by this concern.

The Dillon Hardware Co. are at 1520-26 Fifteenth Street and carry on both a retail and jobbing business.

The Keystone Hardware Co. have a well stocked store at 3006 Gallup Avenue and carry a very attractive line of cutlery and tools.

One of Denver's old well-established houses, The F. W. Morgan Hardware Co., is located at 813 Fifteenth Street. There was an air of activity about the Morgan Hardware Co.'s store which spoke well for the trade this concern is doing.

As a distributing point Denver is gaining prestige every day, and it would seem to be only a question of time, when Denver, the natural gateway of the great Inter-Mountain West, would control the jobbing trade of the State of Colorado.

PUEBLO GROWING.

The big plant of the Colorado Fuel & Iron Co. here at Pueblo is now turning out a large variety of finished steel. The wire and nail mill is being run overtime to supply the ever-increasing demand. Pueblo, Colo., is well termed the "Pittsburgh of the West," and the big steel and smelter niterests here are giving Pueblo a great business boom.

In speaking of the general outlook J. M. Killin, of the J. M. Killin Hardware Co., said: "The only improvement one could ask for, is better prices—competition has forced profits down to a small margin and there are a large number of articles that the Hardware jobber and retailer is obliged to sell without profit sufficient to pay the cost of doing business. The general outlook, however, is good and there is little doubt but that business this Winter will be even greater than a year ago."

The Holmes Hardware Co. carry a large and well assorted stock of general Hardware and carry on both a jobbing and retail trade. Mr. Holmes said that Pueblo was a good jobbing point and that general business never had been better.

Up in Leadville, Colo., there is better business than there has been for many years. The store of the Western Hardware Co. proved this; the general activity here in building is making a good demand for all shelf Hardware, and the new development in mining has made a greater demand for mining supplies.

IRRIGATION BENEFITS THE HARDWAREMAN.

When the Federal Irrigation Bill was passed by Congress three years ago, few people of the East understood or realized what this meant to these Inter-Mountain States. The effects of this measure have been most remarkable. The reclaiming of great tracts of land, which are now profitably producing enormous crops, has had an exceedingly beneficial effect upon the general prosperity of the entire country, and has made itself felt here in the Hardware trade. In Utah and in Idaho and Nevada land that a few years ago was considered worthless, where for miles nothing was seen growing but sage-brush; land upon which, because of the continual dry weather, even cattle or sheep could not graze; is now worth from $50 to $100 an acre because of the value of the crops that are being produced. And all because of irrigation. All this increased value has created and is maintaining a great demand for farm implements and building materials. Closely following the redemption of land by irrigation, has come an influx of people who are each season adding to the general wealth of the country and constantly calling for more and better merchandise of all kinds. So it is that the Hardware manufacturers of New England have felt a direct benefit of the Federal Government's scheme of irrigation here in the West.

BUSINESS BOOMING IN BOISE.

Boise, Idaho, is the center of a splendid fruit country, which has proven well that irrigation pays. In speaking of general conditions Mr. Northrup of the Northrup Hardware Co. said: "Our business which is exclusively wholesale is constantly growing and great development in the State of Idaho is taking place to-day. In fruit raising and farming, in mining and in sheep raising our country is making great advances." From the activity about the big warehouse of the Northrup Hardware Co. it can be easily seen that this progressive house is keeping pace with the growth of the country.

Another energetic, pushing Boise concern is the Eastman-Teller Hardware Co., who have succeeded to the business of the Fletcher, Eastman, Teller Co. During the convention of the National Irrigation Congress held in Boise last month the Eastman-Teller Hardware Co. used one of their large windows to good advantage by making a display showing what irrigation does for the country. Every detail was worked out. One-half the window represented a bit of sage brush desert—nothing but sand, sage brush and jack rabbits. Just next this was a miniature irrigation ditch, the water from which flowed over a beautiful lawn of green sod, with here and there a little plum tree, and a small figure dressed to represent a prosperous ranchman overlooking the entire field. This up-to-date window display of the Eastman-Teller Hardware Co. made a decided hit and attracted much attention to this store. Both members of the concern are rustlers and exceedingly popular.

OGDEN, UTAH.

Closely associated with the Hardware trade is the business of the Proudfit Sporting Goods Co. of Ogden, Utah. This concern do a general sporting goods business, and are the distributing depot for three of the largest manufacturers in these lines. Robert Proudfit is one of the best posted sporting goods men in the Rocky Mountain country and is building up a large jobbing trade.

The Watson-Flygare Hardware Co. have purchased he Hardware store formerly run here by the Z. C. M. I. and are adding some lines to their stock, making their new store the most up-to-date Hardware establishment in Ogden.

A very attractive and fine store in Salt Lake City is that of the King Hardware Co. In referring to local conditions Mr. King said: "We are growing all the time and our trade is constantly enlarging. I find that it pays to push sporting goods, especially fishing tackle and that small pick-up Hardware and house-furnishing goods are the most profitable goods to handle. There is some money in contracts and we are getting our share, especially in the heating line."

Another attractive store is that of the Salt Lake Hardware Co. which concern do both a retail and jobbing trade.

Mr. Patterson of the big wholesale house of Strevell-Patterson Hardware Co. said that their trade was constantly growing. This concern cover three States and have proven that Salt Lake City is a good jobbing point.

All through the Inter-Mountain country business to-day is better than ever in the history of the West, and there is not a cloud in the sky to darken the bright light of prosperity.

HAMMERNAIL.

"THE MAIL ORDER HOUSE BUGABOO."

Among the lively little journals issued in connection with the advertising departments of several manufacturing plants, the Studebaker Bros Mfg. Co., of South Bend, Ind., has recently added *"The Studebaker,"* which is intended, as announced, for the benefit of those who sell the Studebaker products. It is a well edited little paper, as the first number indicates, and deserves a warm welcome from those in the trade to which it is accredited.

The vehicle trade is one in which the catalogue houses have been doing a good business, and in this particular issue this subject is touched upon, and the following article cleverly teaches a lesson and puts the position very plainly in an article headed

"THE MAIL ORDER BUGABOO."

How many Buggies, Carriages, Wagons and Sets of Harness have the catalogue houses sold in your county during the past year? More than you like to think of, perhaps.

How did it happen that they sold so many?

Well, it didn't "just happen."

Not a bit of it.

Every sale made to people who should have been your customers was the result of persistent, consistent and insistent pushing.

Your friends and neighbors don't send their money away to Chicago or Cincinnati or St. Louis because they love the mail order concerns or because they hate you.

They don't go to the trouble of sending for catalogues and sending away their money on uncertainties simply to spite you.

Not at all.

If they buy by mail it is because the mail order man keeps hammering away at them; in every farm paper they pick up they see his announcements of wonderful, stupendous, gigantic, unparalleled and unequaled bargains! Almost every mail brings them a skillfully worded letter that attempts to persuade them that life will not be worth living if they don't take advantage of the last chance to get a $200 Buggy for $34.17! They are constantly told that the catalogue house can save them a whole lot of money—and the result of all this hammering is that they send away from home the money which ought to go to you.

Without criticising the energy or ability of the men who handle the Studebaker line, we must confess that we believe the growth of the mail order business is very largely the fault of the dealer.

The mail order man has built up his trade by being a better salesman, a larger advertiser and a more energetic pusher than the local dealer has been.

That's the plain truth of the case.

Like a more or less famous medicine, he has "worked while you have slept!" His advertisements—which are his only salesman—are on duty twenty-four hours in the day and 365 days in the year.

No wonder he gets the trade!

Now, you know perfectly well that you can take a man into your store to-day, and if your stock is anything at all what it should be, you can give him a better bargain—better value for his money—than any mail order or catalogue house in existence.

You are sure of it.

But what good does it do for you to know that?

You've got to let the other fellows—the customers in your territory—know it, before the fact does you any good.

Nobody else is going to tell them about it.

You've got to do it yourself.

You must take a leaf from the successful man's method, and not only let the people know the fact that you can give them good goods and a genuine bargain, but you have to persuade them of the truth of the facts you give them and keep reminding them of the facts again and again.

The number of jobs the other houses sell in your territory in the next twelve months depends almost entirely upon what you do to push your own goods.

You can't accomplish anything by fighting the mail order idea, but you can accomplish a whole lot by persistently, consistently and insistently keeping your own line before your customers.

It's up to you.

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED SEPT. 17, 1906.

411,054 Padlock. J. E. Opal, Lake Linden, Mich.
411,154. Apparatus for Cleaning Windows. A. Lange, Dresden, Saxony, Germany.
411,190. Combined Wrench and Screw Driver. B. A. Haines, Smithville, N. J.
411,202. Screw. G. P. Rose, Fenton, Mich.
411,209. Lamp Stove. W. H. Wilder, Gardner, Mass.
411,220 Hay Fork. J. S. Gochnauer, East Berlin, Pa.
411,233. Washing Machine. I. B. Warren, Waucoma, Iowa.

PATENTS ISSUED SEPT. 18, 1906.

831,036. Bolt. C. J. Caley, New Britain, Conn.
831,051 Door Check. M. J. Flynn, New York, N. Y.
831,097. Door Stop. H. P. Prium, Chicago, Ill.
831,100. Can Opener. H. L. Sharp, Sandusky, Ohio.
831,135. Clothes Washing or Cleaning Machine. W. C. Barnard, Worcester, Mass.
813,150. Fishing Tackle. L. Fraser, Milwaukee, Wis.
831,153. Plane. J. A. S. Glans, Minneapolis, Minn.

PATENTS EXPIRED SEPTEMBER 24, 1906.

411,429. Fence Making Implement. C. H. Fisher, Waco, Tex.
411,475. Saw. G. F. Sellstrom, Jamestown, N. Y.
411,494. Washing Machine. E. E. Egleston, Albion, N. Y.
411,498. Lawn Mower. A. Graham, Harrisonville, Mo.
411,502. Pipe Wrench. J. D. Hodge, Kearney, N. J.
411,557. Door Check. W. D. Scarborough, Pennington, Texas.
411,658. Washing Machine. F. D. Harding, Baldwin, Me.
411,664. Ratchet Drill. D. Kidney and A. Verboort, Depere, Wis.

PATENTS ISSUED SEPTEMBER 25, 1906.

831,552. Fish Hook. O. Hallstrom, Chicago, Ill.
831,555. Wrench. F. J. Holton and D. Holmgren, Brigham, Utah.
831,583. Combination Tool. I. E. Vanauken, Twin Falls, Ida.
831,662. Bucksaw Frame. J. Gives, Galt, Ontario, Canada.
831,676. Combination Wire Working Tool. A. M. McLeran, Kansas City, Mo.
831,734. Mop Wringer. J. G. McCarthy, Holyoke, Mass.
831,750. Pipe Wrench. J. A. Smith, Chicago, Ill.
831,756. Lifting Jack. N. Weiler, Sioux City, Iowa.

PATENTS EXPIRED OCTOBER 1, 1906.

411,807. Flange Wrench. J. F. Guthrie, Jr., Somerville, Mass.
411,872. Pipe Wrench. G. F. Newell, Newton, Mass.
411,918. Cooking Stove. William A. Greene, Ocean Grove, N. J.
411,927. Wagon Jack. A. P. Millspaugh, Bridgeport, Conn.
411,994. Lock. O. W. Lundholm, Muchachinock, Iowa.
412,024. Device for Inserting Saw Teeth. T. S. Disston, Philadelphia, Pa.
412,096. Pipe Wrench. P. H. Kane, Oil City, Pa.
412,142. Ironing Board. W. Walters, Findlay, Ohio.

PATENTS ISSUED OCTOBER 2, 1906.

832,029. Washing Machine. T. C. Baker, Washington, Kan.
832,087. Vise. J. C. Scoggins, Alva, Okla.
832,098. Wrench. S. E. Thomas, Hagan, Ga.
832,200. Pliers. H. F. Kellemen, A. F. Fasoldt and E. Triebel, Utica, N. Y.
832,367. Wrench. J. F. Dickason, Keystone, Ind.

AGRICULTURE THE TRUE SOURCE OF OUR WEALTH.

It is believed by Mr. James J. Hill, whose life work of developing by the provision of transportation, the unoccupied lands of the United States, has peculiarly fitted him to speak authoritatively on the subject, that the most serious economic question of the future will be to provide the food supply of the 200,000,000 people who will be seeking for homes and work in the United States by the time the present century has run half its course. In the course of an address at the opening of the Annual Agricultural Exposition of the Minnesota State Fair Association, Mr. Hill stated that no nation in history was ever confronted with a more pressing question than that of providing for the 50,000,000 of additional population which, within the next twenty years, must be housed and given employment; furthermore, he believes that the one and only adequate resource before us is the productivity of the soil. In solving the problem, the first fact which must be brought home is that of our dependence upon the cultivation of the soil; for Mr. Hill considers that agriculture, in the most intelligent and comprehensive meaning of the term, is something almost unknown in the United States. The government estimate of the value of all farm products last year was $6,415,000,000, which, after it had been discounted for high prices and current favorable conditions, would be represented by an average total of about $5,000,000,000. Government statistics also state that of the lands taken up in the United States, a little less than one half is under cultivation. Were the other half utilized the output of the soil would be practically doubled, even if no changes were made in the present methods of cultivation. But by direct surplus population, not, as now, so largely into the cities, but to the soil, and by the adoption of the advanced methods of cultivation used elsewhere, the present minimum yield would be so largely increased, that we could add ten billion or even fifteen billion of dollars to the national wealth.

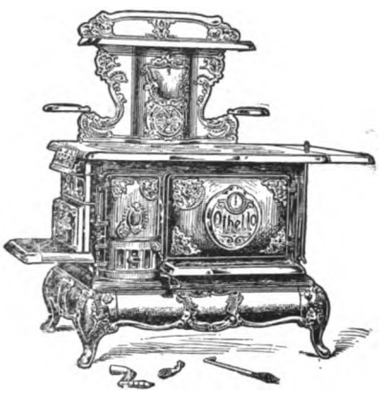
The methods by which the yield of the soil could be increased are three, and they are well known though but little practiced. First is the rotation of crops, which is so little followed that the majority of our farmers have been raising, year after year, the same crops on the same land, until the soil is all but exhausted. The second method of increasing the yield is the liberal use of fertilizing material, and the third and most interesting of all is better tillage.

As showing what intensive cultivation will do, Japan is quoted as supporting 45,000,000 of people on ten thousand cultivated square miles, aided by the food products obtained from the sea; while a market gardener of Paris is quoted as declaring that all food, animal and vegetable, required for 3,500,000 people of two great departments of that city could be grown by methods already in use on the 3,250 square miles of garden surrounding the city.

What is needed is a return to conservative and economic methods, a readjustment of national ideas which will place agriculture in the very forefront. The present tendency to regard manufacture and trade as the only forms of progressive activity, and the false notion that riches can be built upon these at the sacrifice of the fundamental form of wealth production, must give way to a recognition of the fact, once so well understood, that the soil is the foundation of all wealth and prosperity. Acknowledgment of this principle will have the double advantage of vastly increasing the agricultural output of the country, and at the same time of checking that deplorable migration from the country to the city, which has lowered the percentage of agricultural labor to the whole body of persons engaged in gainful occupations in the United States from 44.3 in 1880 to 35.7 in 1900. —*Scientific American.*

A SHORT TALK ON HORSE CLIPPING.

J. L. M'Bfan.



The season is not far distant when horse owners will be found bringing their heavy coated animals to the smith with a clipping machine. An excellent chance for extra profit and every smith with the necessary spare time can well take advantage of it. But for the benefit of his customers, the smith should post himself on the several points necessary to an intelligent use of the clipping machine. In the first place I would caution the smith to secure a good machine. Don't waste money on any kind of cheap tools.

After purchasing a clipping machine, don't think that every horse you see should be clipped. Horses differ and 'tis folly to suppose that every horse that comes into the shop will be benefited by having its hair cut. Should an animal have a very tender and sensitive skin or a skin prone to disease, it were much better that the hair be allowed to grow. On the contrary, however, should the animal be in good health generally, he will be benefited in every way and be more comfortable by an application of the clipper.

From the view point of the owner, the clipped horse is more easily cleaned and kept clean than is his long-haired brother. It is, therefore, economy to use the clipper. The clipped animal will also do more work, more willingly and be in better spirits than if the heavy coat were left uncut. After removing the heavy coat of several horses, the following conditions have been noted: Improved appetite, brightened spirits, more activity shown and the disappearance of the slow and sluggish movements which are the usual accompaniment of a long, heavy coat. In short, the entire constitution of the animal is improved.

THE OTHELLO RANGE.

The Reading Stove Works, Reading, Pa., are presenting the Othello Range in a new model for 1906, denominating it "an old friend in new togs," and well they may, for among the chief features the removable nickel stands first and foremost. Every part can be taken off and put out of the way when blacking the range. The nickeled parts themselves may then be handled freely in the process of brightening, and re-adjusted to the Range without either part of the work interfering with the other. While the parts may be lifted off for convenience sake, they are so adjusted as not to tumble off by accident. The flue system in the Othello is of the sheet-flue type of construction, the draft system being perfectly proportioned to the size of the range. Instead of the pull damper, which sometimes refuses to close fully, thus interfering with the baking process, the new Othello is equipped with an original idea, a slide damper, operated by a knob on top of the range, which directs the passage of as much or as litttle draft around the oven as desired. In the make up of the most important part of any Range, the castings of the fire-box, as becomes a range of the Othello class, are heavy—of a kind indeed which the very careful housewife would not find occasion to replace in many years. They have a patented rib device on long end grate, fire plate and plate back of key brick. In connection with this device, there is a corresponding groove on back of clay-brick, iron linings and water front, constituting the distinctive feature of all Sunshine fire-boxes, viz.: Victor Non-Lifting Brick; Victor Non-disturbing Water Front. The security of the complete fire-box is thus assured, it being impossible to displace any part of the lining, by the action of the grate, or other process of cleaning the fire. The water front is also held firmly in place, preventing any possible interference with free circulation and avoiding mishaps from leakage. A feature of simplicity affecting the repairs to fire box is the ease with which each part may be removed, without disturbing others. By simply releasing the front grate holder the grates themselves may be lifted out without moving any other part.

THE OTHELLO RANGE.

'TWOULD BE AWFUL!

"Mother, if I should die would I go to heaven?"

"Yes, dear, I think so."

"If you should die, would you go to heaven?"

"Why, my dear, I hope so."

"Well, I hope so, too. It would be awful for me up there to be pointed out as the little girl whose mother was in hell."

TWENTIETH CENTURY COOKERY.

Mr. G. Ormandizer (struggling to carve the first turkey his wife ever cooked)—I say, Mary, the bones in this bird are thicker than a whale's—just hear the knife on them.

Mrs. G. Ormandizer (almost crying with anxiety)—you must be against the shells, John.

Mr. G. Ormandizer—Shells?

Mrs. G. Ormandizer—Yes, John, didn't you remember that you asked me to stuff the turkey with oysters?

THE FLEXIBLE FLYER.

The time for winter sports is drawing near and the boys are already talking about their "bobs" and the "dandy" times they are going to have when the coasting season comes around and soon they will be on the lookout for something new in the sled line. To provide for this ensured demand the makers of "coasters" are bestirring themselves in their efforts to get something "swift" and "swell" in the hands of the dealers. In doing this they are paying particular attention to the perfection of steering apparatus. In this respect S. L. Allen & Co., Box 1100-V, Philadelphia, Pa., have achieved a decided success. Their Flexible Flyer is a coasting sled that for speed, beauty and construction is the acme of excellence. It is a sled that will delight the heart of any fun-loving boy or girl and make them long for the snow-covered hills of winter time. It is the Sled That Steers, and the one that is swift and safe. It can be steered with hand or foot and is easily managed in any position, sitting or lying, so that the youngsters can navigate the Flyer in whatever fashion the young idea suggests as the most comfortable and convenient. With their handsome booklet S. L. Allen & Co. are sending out a pretty little paper pattern of the Flexible Flyer, which shows the points of merit in its construction. From this can be seen that it is "the best sled for every boy" and "the only sled for girls." Upon receipt of request the patentees and manufacturers will immediately send booklet and pattern, which request, we trust, will be accompanied by mention of HARDWARE.

THE FLEXIBLE FLYER.

A NEW IDEA IN ADVERTISING.

A novel idea which should prove exceedingly effective is embodied in the manner in which the Taintor Mfg. Co. exhibit in connection with their exploitation of the manifold merits of their popular Taintor Positive Saw Set. They issue an advertising hanger, which is being distrbuted by John H. Graham & Co., 113 Chambers Street, New York, which is made of sheet metal about 5½ x 9½ inches in size, and having a brass chain to hang it by. It is very ornamental in appearance, having a white background, the bordering and lettering being embossed in red with black outline, and the cut of Saw Set also embossed in the natural color of the tool. The lower edge has two chains, one end in a loop and the other in a hook. The original feature to which we desire to call attention is, to the manner in which the dealer is enabled to show the regular Saw Set, which can be suspended from the bottom edge of the hanger, as exhibited in the illustration, thus permitting the handling and examination of its positive merit, so that those desiring a tool can open a discussion that will result in a sale. The catch-line used, "If you like it tell others; if you don't like it tell us," is a good one to inspire confidence while making its appeal to the convinced purchaser.

THE TAINTOR MFG. CO.'S NEW HANGER.

RECENT TRADE PUBLICATIONS.

Gray & Dudley Hardware Co., Nashville, Tenn. Catalogue of Stoves. This publication is very artistic in appearance, with cover in green and red, and coated paper is used throughout. The frontispiece consists of a view of their Foundry and Manufacturing Department, containing over 150,000 feet of floor space under roof. In a prefatory note the company state: "The reputation of our stoves for excellence and superiority is universal. We are producers of the highest quality stoves, superior by every test to other brands. From the raw stock up to the finished stove, ready for use, we are the builders; we know every ounce of material used—that is why we guarantee the absolute superiority of our goods. The best article is the cheapest in the long run; the cheapest thing is not that which is lowest in price but that which gives best satisfaction." Illustrations and descriptive dimensions are given of their Martha Washington, Black Imp and Radium Cook Stoves, for coal; and Reba Washington, Clipper, Sterling and Togo Cook Stoves, for wood. A sectional view of their Wood Stoves is given, with list of parts on the succeeding page. They also manufacture a Franklin Stove, the Hermitage, Ge-De and Bob, all for coal; and the Dudley, for wood only. A line of Coal Heating Stoves is shown, and an assortment of Wood Heating Stoves under the names of Acme, Crown, Rex and Floor Walker, as well as Oil Heating Stoves, Stove Pipe and Elbows, Sugar or Wash Kettles, Dog Irons, Stove Hollow-Ware, Tea Kettles, Waffle and Muffin Irons, Stove Tinware in Sets, Sad Irons, Ventilators, Stove Dampers, Stove Boards, Pipe Caps, Fire Shovels, Flue Thimbles, Fire Pokers and Stove Lid Lifters.

Colebrookdale Iron Co., Pottstown, Pa., with New York office at 155 Chambers Street, manufacturers of Sad Irons and Hardware Specialties, have issued their 1906 catalogue. They are the manufacturers of the celebrated Mrs. Potts' Sad Irons, "Sensible" Sad Irons and Handles for same; Sad Iron Stands, "Sensible" Sleeve Irons, Toilet or Girl's Irons; Toy Irons, Tourist's Irons, Shield "C" Sleeve and Sad Irons, Chinese Laundry Irons, Chinese Common Sad Irons, Troy Polishing Irons, Tailors' Irons, New England Pressing Irons, Keystone Food Choppers, Well or Gin Wheels, Hay Fork Pulleys, Thimble Skeins and Boxes, Wood Screws, Wrenches, etc. Regarding Mrs. Potts' Sad Irons, the company say: "These Irons are so well and favorably known that we will refer briefly to a few main points of superiority. They are cut to shape by special machinery, which makes every Iron true, and the face of these as well as our common Irons is slightly convex, thus making ironing easier than with a flat or straight-faced sad iron. The detachable handles are of wood, excepting the lower part, which is iron, called a stretcher; they do not become hot, need no holder or cloth, and fit naturally to the hand, without straining the arm or wrist. Three Irons, one handle and stand constitute a set. After many years of experience it has been demonstrated that the life of a set of Irons is in the handle. Mrs. Potts' Irons with poor handles are practically worthless. The handle cannot be made too good. We guarantee our Handles not to break. Japanned Stretchers and Caps will be furnished when desired."

McWhinnie Wheelbarrow Works, Poughkeepsie, N. Y. Illustrated catalogue and price list No. 5. Included in the contents will be found Canal, Railroad, Garden, Brick, Coal, Stave, Stone, Steel Tubular, Steel Tray, Steel Wheel and Wood Frame Wheelbarrows for all purposes. They also manufacture Handcarts and Dutchess Bolted Canal, Garden and Metropolitan Garden Wheelbarrows. The factory was founded in 1866, and the present proprietor, Thomas McWhinnie, took charge in 1869. The works are conveniently located for making shipments to all parts of the world, transportation being afforded by both rail and water. The dealer interested in this line of goods should send for a copy.

✤

A Kansas paper again remarks about how handsomely the East came to the assistance of the State back in grssshopper times, and suggests that there is again need of help from the East, to assist in eating the big peach crop.

RECENT TRADE PUBLICATIONS.

Benedict Mfg. Co., East Syracuse, N. Y., with New York office at 409 Broadway, are placing before the trade three large catalogues; one devoted to Hollow-Ware and the other two to Flat-Ware and Novelties. Of their Hollow-Ware catalogue they say: "We take pleasure in presenting to our patrons a line of Silver-Plated Hollow-ware, the patterns illustrated being of the very latest designs, and include Tea Sets, Fruit Dishes, Salad Bowls, Cake Dishes, Bon Bons, Bake Dishes, Candelabra, Trays of all descriptions, Vases, Smoking Sets, Prize Cups, Water Pitchers, Shaving Mugs, Child's Cups, Cracker Jars, and many other desirable articles. Illustrations and prices are given in their Flat-Ware catalogue of their De Witt, La Fayette, Shell, Windsor and Tipped patterns of Spoons, and of their line of Electric Silver and White Metal Ware, Nut Picks and Cracks. Their Novelty catalogue includes new designs of Clocks, Jewel Boxes, Statuettes, Trays, Ink Stands, Paper Weights, in the latest finish, including Ormulu Gold, Verdi Antique, Egyptian Bronze and French Gray; Napkin Rings, Salt and Pepper Shakers, etc., etc.

Goodwin & Kintz Co., Station B., Winsted, Conn. Catalogue No. 28 of Gas and Electric Portables. The company state: "In presenting this catalogue we feel confident that we have succeeded in completing a line of Gas and Electric Portables, Electroliers and Newels that cannot fail to appeal to the trade. The designs run from the cheapest to some of the finest shown to the domestic trade. We have listed the goods complete with fittings and accessories in most instances, as well as for the bare stands. Any portable can be made for either gas or electricity, except where otherwise specified. Any figure can be made as a Newel, but diameter of base should be specified. The finishes on these goods are lasting and attractive. Our Portables are always straight and plumb, and the goods are mechanically constructed." These goods are exquisitely modelled, and are of the most artistic patterns conceivable, being finished in Naxos Green, Applique Black and Brushed Brass, and the catalogue is so extensive and the assortment of goods of such a character as to preclude our doing justice to a description of the beauty and extent of the same. Those interested in these lines will be amply repaid by sending for a copy.

Hunt, Helm, Ferris & Co., Harvard, Ill., have favored us with a copy of their new Steel Sled Catalogue. The company state that "Steel sleds are fast taking the place of wooden sleds for many and sufficient reasons, principally because they are stronger in construction, and therefore more durable; they are more symmetrical in outline and admit of a more lavish decoration, and are therefore more stylish. Added to these features, Star Steel Sleds possess a runner so designed as to make them the speediest sleds ever constructed." The Sleds are illustrated in their actual colors, and in a variety of shapes and styles that are very graceful in design. A line of Steel Coasters is also shown, as well as their "American Boy" Bobs. Sectional views are included in the contents, showing methods of riveting to the knee; also showing how the Coasters and Sleds are braced. A price list accompanies the catalogue. These goods will prove a profitable line for the dealer to carry.

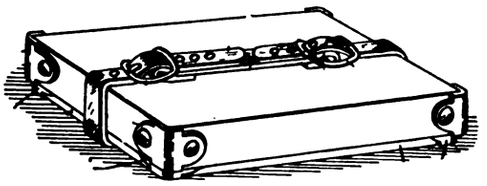
A. Meinecke & Son, Milwaukee, Wis. Catalogue for 1906-1907 of Wooden Toys. Included in the contents will be found a large assortment of Rocking, Swinging and Galloping Horses, Shooflies; Willow, Reed, Wood and Frame Doll Carriages, plain and enameled; English Doll Carriages; Frame, Reed, Willow and Wood Go-Carts, plain and enameled; Reclining and Folding Go-Carts, Children's Chairs and Rockers, Morris Chairs; White Willow and Reed Nursery Chairs, Nursery Yachts, Hardwood and painted Tables, Folding Tables, Blackboard Desks, Hardwood and White Enameled Secretary and Roll Top Desks; Cylinder Desks; Hardwood and White Enameled Bureaus, Dressers, Folding Cradles, Blackboards; Bucks and Saws, Swings, German Spinning Wheels, Wooden Shoes; Willow Display Stands, Office Baskets, Clothes Hampers and Baskets, etc. They also manufacture an extensive line of Furniture Novelties, such as Bamboo Music Shelf Stands, Hardware India Stools, Jardiniere Stands, Bamboo Book Racks, Easels, Centre Tables, Veranda Chairs, Willow Settees, etc.

Blacklock Foundry, South Pittsburg, Tenn., are distributing their illustrated catalogue of Hollow-Ware to the trade. The goods included in the contents are particularly adapted to the Southern Trade, the company devoting their efforts to manufacturing the style of ware that is most in demand in that section, but produce a better finish than is usually given, and their efforts have been appreciated to such an extent as to give them encouragement to increase their facilities for meeting the requirements of their rapidly growing patronage. The company ask the trade to note that they do not attempt to make everything in the Hollow-Ware line, but such goods as are described in the catalogue they make specialties of, such as Sleeve or Flouncing Sad Irons, Tailors' Geese, Shoe Lasts and Stands, Sugar Kettles, English and Southern Pots, Skillets and Lids, Deep Ovens, Stove Kettles and Pots, Griddles, Sad Iron Heaters, Tea Kettles, Waffle and Gridirons, Muffin Bakers, Hitching Weights, Andirons, Dog Irons, Ornamental Square Grates, Sinks, etc. The dealer will find the catalogue a helpful one.

Glens Falls Lantern Co., Glens Falls, N. Y. Catalogue and price list of Safety Lanterns. These Lanterns are made in various styles, including the Hartford Safety Mill Lantern, designed more especially for mill and warehouse use, although it can be readily used for other purposes; Dash Combination Lantern, which is a regular tubular lantern, from which the lens may be easily detached if preferred without; American Safety Lantern, with patent bail-lift for lighting, etc. These Lanterns are provided with the Hermance Safety Fount, the underlying principle of which, the company state, "consists in having a wick and filler tube placed in the oil-fount in such a manner that the oil is trapped when it reaches a certain height in the fount, and the fount is built of such capacity that there is always an air space left in the fount greater than the quantity of oil, and for this reason if the lantern is overturned the oil merely changes its relative position, and cannot overflow or escape from the fount. Inasmuch as nearly every fire is caused by the lantern being overturned, and the oil flowing out, it is self-evident that if the oil cannot escape it is practically impossible to cause a fire in this way. With the Hermance Safety it is impossible to start a fire. Furthermore, it is over three inches in a direct line from the flame to the oil level; hence, the oil never becomes even slightly warm, no matter how many hours the lantern is in use. This means no vapors form which can explode."

National Cutlery Co., Detroit, Mich., Catalogue of "S & S" Cold Chisels and Mechanics' Tools, Cape Chisels, Diamond Points, Carpenters' Nail Chisels, Floor Bars, Crook-Neck Claw Bars, Brick Plugging Chisels, Machine Punches, Backing Out Hand Punches, Steel Drift Pins, Straight and Bent Calking Tools, Boiler Makers' Tools, Wall or Brick Chisels, Drilling and Cape or Key Seating Chisels, Center Punches, etc.

Warwood Tool Co., Wheeling, W. Va., have favored us with their List No. 4 of Tools, including Bars, Froes, Eyes, Hammers, Hoes, Mauls, Mattocks, Picks, Sledges, Track and Coal Miners' Tools, Wedges, etc. The catalogue is well gotten up with half-tone illustrations, and will be found a very helpful one to the dealer. The size of the catalogue conforms to the standard size page adopted for loose-leaf Hardware catalogues. The company have erected a new factory building illustrated in the frontispiece, and with their increased capacity and modern equipment are able to meet promptly all the requirements of the trade.



E. H. H. Smith Silver Co., Bridgeport, Conn. Catalogue of their "Holly" pattern of Silverware, which includes Salad Sets, Knives, Forks, Spoons, Sugar Tongs, Berry Spoons and Forks; Olive and Oyster Forks, Butter Spreaders and Knives; Soup, Coffee and Bouillon Spoons; Salad, Fish or Pastry Forks and Carving Sets. They also illustrate their "Cherry" pattern Berry Spoons, Flemish Knives, Forks and Spoons and Individual Soup Ladles; Marseilles, Rose, Oak, Iris, Verdi and Windsor Tipped patterns of Tableware, and Cupid Berry Spoons. Prices are included. The company call attention to the fact that they have special facilities for making dies for medallions, souvenir spoons, coats of arms, family crests, etc.

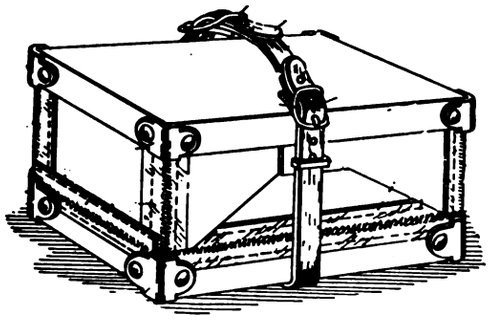
NEW GOODS AND SPECIALTIES



AUTO FOLDING LUNCH BOX.

The Atlas Mfg. Co., Hampton, N. H., are placing upon the market the newly patented Auto Folding Lunch Box, which name they have protected by a trade mark. We present illustrations showing the Lunch Box both folded and when it is full. The box in its folded state is not made to fold perfectly flat, but a

AUTO FOLDING LUNCH BOX—AFTER USE.

space of one and one-half inches is left to accommodate a bottle calculated to hold tea or coffee, a napkin, knife, etc. The side walls are hinged to the bottom of the box, and flaps are hinged to

AUTO FOLDING LUNCH BOX—WHEN IN USE.

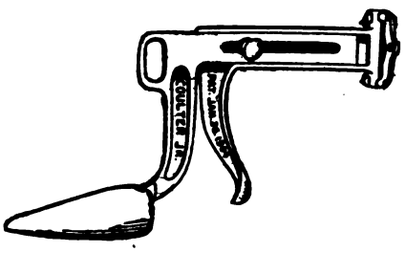
the upright margins of the end walls overlapping the side walls and one another. The side walls carry staples and pass through the overlapped flaps when the box is set up. A retaining strap passes through the staples held by a swivel which permits it to be turned to pass lengthwise of the box when it is folded.

PETTY'S CARRIAGE AND WAGON HEATER.

The Progressive Mfg. Co., Pana, Ill., are the manufacturers of Petty's Carriage and Wagon Heater, of which we give an illustration. The ends are made of strong, light castings, triangular in shape, each face six inches long. Sheet metal covering it is

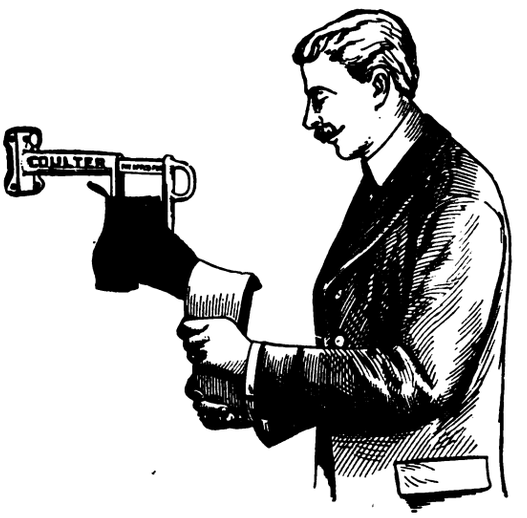
PETTY'S CARRIAGE AND WAGON HEATER.

supported with three steel rods, connecting the ends, which prevent it from bending or breaking. It is fourteen inches long, covered with Brussels carpet, lined with sheet asbestos. It burns equally well in an open carriage, or under a lap-robe, because it has adjustable ventilators. The triangular construction removes all possibility of burning or scorching. It is operated at the small cost of one-fourth cent per hour, and when wishing to quench the fire you have only to close the dampers tightly, which does away with the inconvenience of removing the fire box and pouring on water, which is frequently necessary with other Heaters. The Petty Heater needs but one hand to carry it, and does not spill ashes. The ends and handles are bronzed; making it a



THE PETTY CARBON.

neat, attractive and inexpensive convenience. It burns the Petty Carbon, which is claimed by the manufacturers to be superior to any other in use. Burns without flame, produces neither smoke, soot nor odor. May be extinguished and relighted at will.

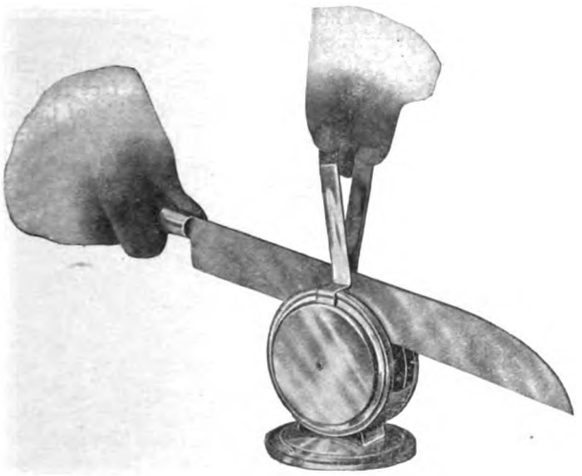


THE COULTER JR. SHOE HOLDER.

Coulter Mfg. Co., 1104 Chestnut Street, Philadelphia, Pa., are the manufacturers of the popular Shoe Holder called the Coulter Jr., of which we present an illustration, showing the article itself, and one showing the method of its use. The Coulter Jr. is used for the purpose of cleaning and dressing a pair of shoes

THE COULTER JUNIOR SHOE HOLDER.

with dressings applied with a cloth and rubbed to a polish by friction, the Coulter Jr. holding the shoe in a firm position while off the foot, and making shoe shining an easy job. It is made with detachable back that will permit its being removed from the



METHOD OF USING THE COULTER JR.

wall when not in use. It is simple in construction, easily adjusted and not likely to get out of order. It is put up in combination style, comprising one back part and two front parts, which will fit any size men's or ladies' shoe. Neatly packed in an attractive carton, including a box of polish and serviceable polishing cloth.

ROSE AUTOMATIC KNIFE AND SCISSORS GRINDER.

The illustration herewith represents Model No. 8 of the Rose Automatic Knife Grinder with grinding wheels incased in handsome nickel-plated frame and stand, manufactured by the Colonial Supply Co., Wellsville, N. Y., which, while involving the same principles as their other models, the construction and outward

AUTOMATIC KNIFE GRINDER.

appearance have been somewhat modified. It is especially adapted for the dining room or buffet, and compares favorably with the finest table furniture. The smaller cut shows the Automatic Scissors Grinder, Model No. 6, with grinding Wheel neatly covered in nickel-plated case, which is a practical, simple and valuable addition to any work basket, giving the correct bevel to the

AUTOMATIC SCISSORS GRINDER.

dullest scissors or shears, and giving the delightful sensation of cutting with clean, sharp scissors. The sharpening wheels are scientifically made by expert workmen, from what is known as Adamite, which will not heat, glaze or draw the temper, being the most lasting and quickest cutting electrical abrasive known.

KINGSTON'S GAUGE HATCHET AND HAMMER.

Kingston-Hall Co., 542-550 Franklin St., Cambridge, Mass., have recently placed on the market patent Gauge Hatchets and Hammers for use in rapid shingling and clapboarding respectively, shown in the accompanying cuts. The gauge on the Hatchet,

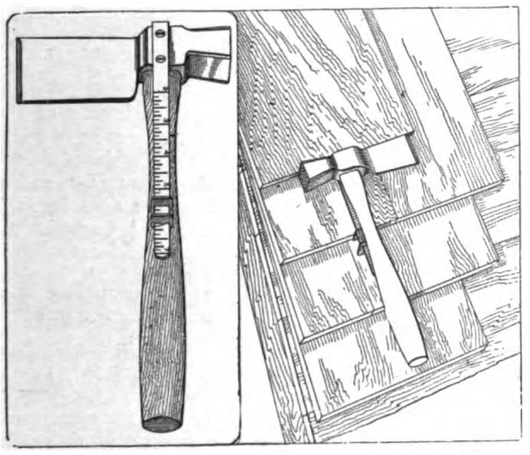

FIG. 1—KINGSTON GAUGE HATCHET.

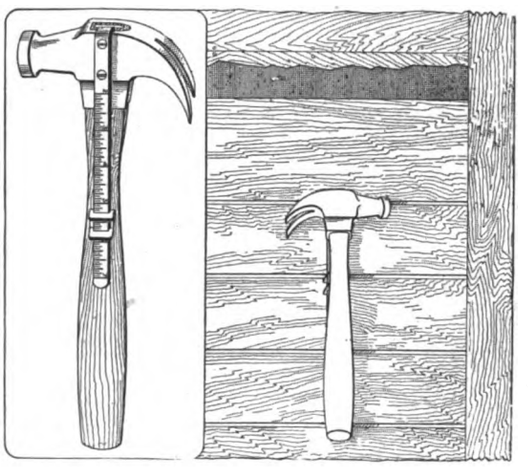
Fig. 1, can be set anywhere from two to seven inches for use in shingling, while the construction is such as to render adjustment easy. The device is alluded to as being simple, inexpensive, most compact and as being used with a minimum motion of the hand and arm. The gauge hammer, Fig. 2, can be used for putting on siding and clapboarding, also roof lath, a 1 x 2 inch



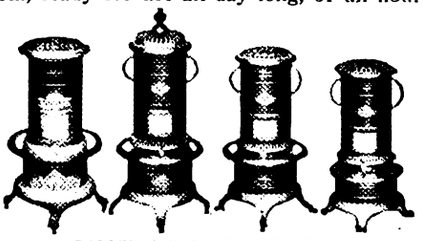


FIG. 2—KINGSTON GAUGE HAMMER.

furring strip being used in some parts of the country as a support for shingles.

BARLER IDEAL OIL HEATERS.

A. C. BARLER MFG. CO., 104-106 Lake Street, Chicago, Ill., are the manufacturers of the Barler Ideal Oil Heaters, which have been before the trade for some time. They represent in their entirety a line of high-grade goods, running at list prices from $3.50 to $11, and seem to suit the requirements of the trade in every respect. Their perfect construction is dwelt upon in a manner which in the description carries conviction, and the ease with which they can be attended to creates no wonder at their popularity. Among the numerous advantages which recommend the heaters are the following: The patented construction of it forces the heat to circulate, and a deflector in the drum increases the radiation, and throws the heat down. The manufacturers claim to be the originators of this device. It is easily moved from room to room, ready for use all day long, or an hour at a time.

BARLER IDEAL OIL HEATERS.

The lighting of a match starts the fire in a Barler Heater, and turning a button brings the temperature to just the right degree. Adjustable wick-stops prevent turning the wicks too high. Accurate dial indicators are attached with screw-threads to make them oil-tight. Flame spreaders with solid tops do not wear out or bend out of shape. Have filler openings, closed by brass caps with coarse threads, easily taken off and replaced. It has the easiest burner to re-wick. New wicks do not have to be split or tied on. Permanent feeder-wicks. In the Ideal the wick devices raise the wicks evenly all around. Positively prevents oil from running down inside of tubes. This is claimed to be an essential Barler feature. No burner can be perfectly odorless without it. Oil that crawls over the tops of tubes, as it is bound to do on any oil burner, is caught in the double top and drawn back into the wick absolutely free from odor. The cold air from the floor passes over the fount, and through the burner in a constant flow. As a consequence, the fount cannot be overheated. Extra feeder-wicks draw oil to the burner when the oil is low or the wicks are short. In the Ideal the wick-stop is easily adjusted without removing fount, and holds the flame at any desired height. The body of the fount is made in one piece, all brass, and every one is tested with air pressure to insure it against leaks. The miniature illustration which we give of these Ideal Heaters shows an assortment of their line, which conveys an idea of their salable character, which they have advertised in the various magazines and trade papers so thoroughly that their name has become "as familiar in their mouths as household words."

SOUTH BEND TOY MFG. CO., South Bend, Ind. 1906 catalogue of Go-Carts and Doll Carriages, including both Stationary and Folding Go-Carts and Doll Carriages in a large variety of patterns.

THE LONG DOUBLE SWIVEL VISE.

After years of experimental and practical tests, the Long Double Swivel Vise, manufactured by the Pittsburgh Automatic Vise & Tool Co., of Pittsburgh, Pa., has been perfected and owing to its unique design this vise is capable of turning in any direction, describing any angle of two complete circles. But it does not stop here, for the simple tightening the jaws upon the piece held, both swivels are automatically locked, not to be moved by any human

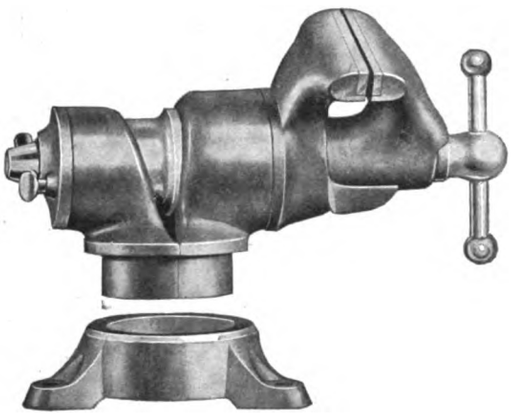

FIG. 1—LONG PATENT DOUBLE SWIVEL FEATURE.

means. Possessing these marked advantages and original characteristics it serves not only as a bench vise, but as a universal gig for drill presses, planers, shapers and other machines where an article is desired to be held firmly at any angle. For this purpose an extra base is provided, the vise being easily lifted from one base to another without undoing any screw or bolt.

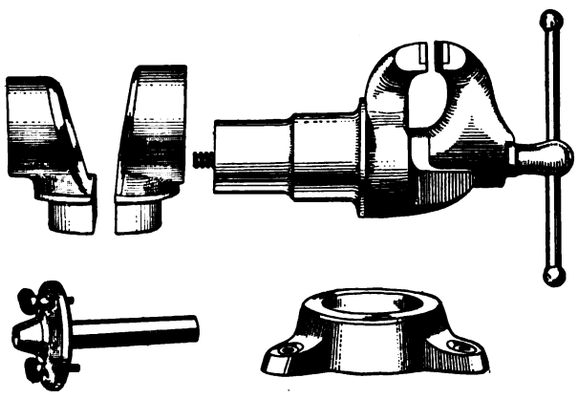

FIG. 2—SHOWING MECHANICAL PARTS OF VISE.

The vise itself is composed of eight sections or parts as illustrated in the accompanying cuts: The screw, front and rear jaws, two yokes, female screw, friction plate and base. This base which is adapted to be secured to any suitable support, is formed with an annular seat for the body of the vise. The body, consisting of two halves or yokes, provided each with a section or half hub seated in the base, are adapted to be slightly tilted in respect to each other and their seat, so that when they are drawn toward each other at their top they will be pressed outward below and thus locked frictionally in the base seat. The rear jaw is adapted to be rotated about its axis within the body of the vise. It has two diameters, the larger one working in the front yoke and the smaller one in the rear. The friction plate is affixed to the outer extremity of the jaw member. This cap bears against the outer edge of the rear yoke and serves as a support and bearing for the sleeve or nut. This possesses a head which bears against the outside of the friction plate or cap and extends thence through same into the internal bore of the front jaw. A special bearing sleeve is placed on the screw between its head and the fixed collar thus affording freedom of turning, but it is designed to be driven or forced tightly upon its seat in the front jaw so as to serve as a reliable backing for the collar when the screw is rotated to open the jaws. This also gives the head of the screw a solid bearing against the full stock of the front jaw, therefore nothing to break or give way or become weakened under severe strains or pressure through the action of the screw.

Thus it will be understood that when the screw is tightened it tilts the body sections towards each other and locks them against rotation in the base. The inner jaw member has a spline connection with the inner jaw, thus preventing its rotation in respect thereto. In accordance with its design the idea of strength is closely adhered to in its construction. The round slide bar, which adds phenomenal strength to the weakest part of all other vises, is made of the finest cast or crucible steel, specially melted and mixed for this purpose. The jaw facings are all of tool steel while the vise itself is composed of a semi-steel. The screw instead of being a common cast iron head cast upon a malleable or steel rod containing the thread, is a hammered steel forging made for this use alone. Thus it possesses the distinction of being absolutely dust proof, non-slipping and non-breakable. Due to its ability of having its jaws revolved in any direction it serves as two vises for if a smaller jaw than its face is desired, the jaws are simply thrown to one side and the side of the same used. If a stationary vise is desired the thumb screws on the rear can be slightly turned and the two swivels tightly locked. By this means any desired friction can be obtained.

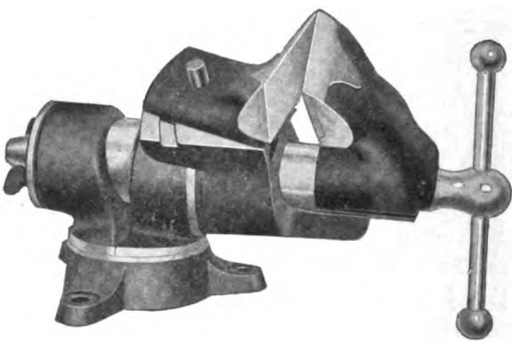

FIG. 3—LONG PATENT WOOD WORKERS' OR COACH MAKERS' VISE.

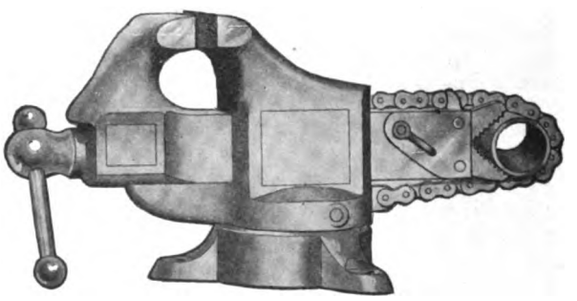
The single swivel vise, although possessing but one movement is also a very marked advancement in vise construction. Unlike any other vise it is automatically locked by tightening on the piece in the jaws. No levers, pins, screws or other "in the way" appliances. By lifting it from the base, the vise can be carried anywhere, as the vise consists of five parts, the rear and front jaws, screws, base and locking dog. The latter is so constructed as to permit the screw to pass through to its upper extremity. It is pivoted near its bottom upon an alloy steel bar supported by the base. Thus when the jaws are tightened upon an object the screw draws the dog towards them, which naturally throws its bottom out against the walls of the base, thus locking it firmly.



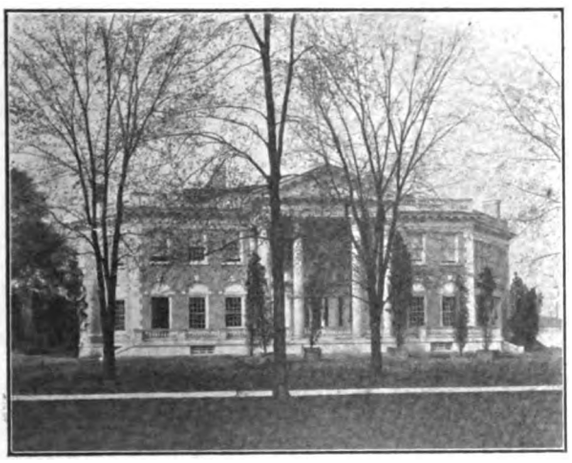


FIG. 4—LONG PATENT SINGLE SWIVEL PIPE VISE.

In conformity with the originality and usefulness of the previously described tools, the pipe attachment for the single swivel vises, deserves mentioning. Unlike any other vise the inventors have placed this important attachment on the rear end of the slide bar, out of the way at all times of the operator, the pipe jaws never interfering with the reception of work in the vise jaws proper. It consists of a tool steel attachment, milled perfectly to size, the two sides straddling the end of the slide bar. These are held in place by a bolt. A double linked chain, the pivot pins of which project beyond the sides of the links at each side is attached at one end by a lug or pin to the body of the vise below the slide bar. By placing the tube or pipe in position, the chain is brought around it, and fastened to the lugs on the upper portion of the attachment. The screw is then given a half turn, which throws the draw bar back, thus tightening the chain upon the pipe and at the same time locking the swivel movement. Its great advantages can readily be understood and appreciated by all mechanics. The necessity of opening the jaws sufficiently wide for the reception of the pipe is done away with, as the length of the chain is sufficient to engage the pipe regardless of the position of the jaws. The range of sizes are also increased 100 per cent. over other combination pipe vises.

THE KELSEY WARM AIR GENERATOR SYSTEM OF HEATING.

In this we show one of the fine residences heated and ventilated by the Kelsey Warm Air Generator System. That this System is giving entire satisfaction and is being placed in many of the finest class of city and country residences, in schools, churches and public buildings, is indicated by looking over the book of "Opinions" showing 250 Kelsey heated houses with hundreds of letters from the Kelsey users.

RESIDENCE HEATEC BY THE KELSEY SYSTEM.

The Kelsey Warm-Air Generator is made by the Kelsey Heating Co., Syracuse, N. Y., with branch offices at 156 Fifth Ave., New York; 38 E. Lake St., Chicago; and with agencies at No. 34 S. Seventh St., Philadelphia; No. 44 Hanover St., Boston, and in nearly eight hundred of the principal cities and towns. In looking over their booklet explaining the construction of the Kelsey Generator, good and sufficient reasons seem to be given for its superiority over other apparatus, or methods of heating. We note that a Kelsey Generator is entirely unlike any furnace in construction and method of warming and distributing air.

THE KELSEY WARM AIR GENERATOR.

By the Kelsey method, great volumes of air are properly warmed by bringing into contact with very extensive and properly heated surfaces. This is accomplished by passing the air in separate currents up through corrugated cast iron flues, or sections, which surround the fire. There are nine to seventeen of these flues in each generator, according to its size. Each flue weighs about seventy pounds and has eight square feet of heating surface, and in a Generator of average size there are 61 square feet of heating surfaces to each square foot of grate surface. It is claimed that these weights and heating surfaces are double that of the ordinary furnace. All the heat is utilized by being brought into contact with these great surfaces on all sides, and there is no loss of heat in the cellar or up the chimney. The Kelsey method of warming air, the great heating surfaces, and the utilization of all the heat, are given as the main reasons for the efficiency, healthfulness and economy of the Kelsey Generator.

Another important and distinctive feature of the Kelsey is its capacity for forcing warm air to distant or exposed rooms. Naturally, the air being warmed in separate currents, is forced out through the nearest heat-conducting pipes, and an even temperature is easily maintained throughout any ordinary house. By use of the Kelsey Patented "Positive Cap Attachment" placed over two or more of the flues, a direct connection is formed between the flues and the heat-conducting pipes, and the warm air is thus forced through long pipes, or against the wind to the room to be heated. This capacity to force warm air in any direction has often resulted in one Kelsey Generator giving entire satisfaction in buildings where two furnaces or a Steam or Hot Water Plant was believed necessary.

Comparisons are made between the Kelsey System and the "Direct" Steam and Hot Water systems, the Kelsey being more healthful because it is a fresh air system and the same air is not warmed over and over. The Kelsey gives results like the Indirect System of hot water heating, but costs less for management, fuel and repairs. Other Kelsey advantages over Steam or Hot Water Systems mentioned, are, that the quantity of heat is easily regulated, the house is warmed quickly in the morning, and there are no unsightly radiators, no valves or pipes to leak, freeze up and burst and cause damage, and there's no danger of accident through mismanagement.

As 28,000 Kelsey Generators have been sold since 1889, and as the makers claim that the sales largely increase every year, it would seem that true merit and the most economical results must have brought these results, because there is no claim made that the Kelsey is a cheap or low priced apparatus. The Kelsey Heating Company invite correspondence from all prospective purchasers, and a careful investigation of the Kelsey Warm Air Generator.

GEM QUALITY OIL HEATER.

Roberts & Mander Stove Co., Philadelphia, Pa., are the manufacturers of the Quality Oil Heaters, a complete line of Heaters equipped with smokeless, odorless and self-extinguishing burners, and which possess the greatest array of practical points indicating quality possible to conceive at this season of the year. One of the most engaging styles is the "Gem," which we illustrate. The Gem Quality Oil Heater with encircling band of highly polished nickeled steel and forty-five sparkling jewels is the most ornamental and distinctive heater made and this is one that the manufacturers make quite a specialty of, and it is readily sold in this market at $5.75 retail, which leaves a good profit for the dealer. The manufacturers claim that there is as much difference and additional value in the Gem Quality over an ordinary heater as in a high-cless, nickel base-burner over the common cannon stove. To those interested the manufacturers will be pleased to forward sample, and make quotations on their entire line, which embraces a good line of nickel and japan finished Heaters.

There's a Screw Loose in the Shear You Are Using

UNLESS You Have the Screwless Spring-set Shear

THAT Is the Shear You Should Buy and the Shear You Should Sell

Which Kind do YOU Handle

The Screw-loose, Screw-set Shear

or The...

Screwless Spring-set Shear

?

Because:

1. It never wears loose at the joint.
2. Blades always held together automatically with just the right spring tension.
3. Pivot free to rotate, forming roller bearing.
4. Largely self-sharpening.
5. Handy to take apart.
6. Tension adjustable.
7. Gives complete satisfaction to your customer

Davies Automatic Shear Co.,

41-43 Maiden Lane, New York City.

WRITE FOR CIRCULAR "A"

Mention "Hardware."

THE NECESSITY FOR A NEW STANDARD SCREW.

The mechanical branch of the Association of Licensed Automobile Manufacturers has recently published a well gotten up and well printed pamphlet of large size, giving the mechanical specifications of a new Standard Screw adopted by the Association of Licensed Automobile Manufacturers, No. 7 East Forty-second Street, New York. In its contents it covers detailed dimensions and specifications of Hexagon Head Screws, Castle and Plain Nuts from ¼ inch to one inch inclusive. The following information will be found of value by those interested, and is quoted from the preface and their circular announcement.

"The present United States standards for Bolts, Nuts and Screw threads were established by the United States Navy Department in May, 1868. These standards remained pre-eminent for many years and have proved of great convenience and value. During recent years, however, manufacturers of fine machinery have found from experience that for a large portion of their work the United States standards for pitch of threads have been too coarse, and the dimensions of heads and nuts too large. In order to secure satisfactory construction special fine pitch screw-threads and smaller nuts have had to be made. The number and variety of these special threads and nuts have finally become such that great confusion, inconvenience and expense have been caused. To overcome this condition the Association of Licensed Automobile Manufacturers has adopted a new Screw Standard which is herewith set forth.

"It is assumed that where screws are to be used in soft material, such as cast-iron, brass, bronze or aluminum, the existing United States standard pitches will be used.

"The A. L. A. M. Standard Screw is a new standard evolved from the old United States standard as a basis. It is nothing revolutionary in any sense of the word, but, on the contrary, it conforms to the general practice of many machine tool and automobile builders.

"A finer thread than that of the United States standard has been found necessary, and this new standard is intended to fill this want.

"Like any new standard, it cannot be hoped that it will be adopted immediately or universally, but it is believed that it will gradually creep into use.

"Considerable study was put on the dimensions of the nuts and heads; careful destructive tests were made before the standard was adopted, to make it absolutely certain that the nuts and heads were large enough and that the threads would not strip.

"Tests were made with ordinary material and with the material it is proposed to use for automobile work. The results were the same in both cases; that is, the screw broke at the base of the thread inside the nut, which was to be expected.

"The material to be used for the screws in automobile work (and which can be easily worked in automatic screw machines) is about twice as strong as ordinary screw stock. Not only is it strong, but very much tougher, being lower in the impurities and showing a very fine fracture, characteristic of a tough steel.

"As time goes on, it is probable that these screws will be found in stock just as the ordinary United States standard is now found. This cannot be done immediately; it must be accomplished by merit; that is, merit in this standard."

THE UNIVERSAL WOOD MFG. CO.

The Universal Wood Mfg. Co., which has recently been incorporated under the laws of Pennsylvania with a capital of $35,000, has taken over the plant of the West End Wheelbarrow Co. of Pittsburgh, Pa., and will greatly extend the business. Besides the manufacture of Wheelbarrows, Lawn and Porch Swings will be manufactured; also other kindred lines. The directors are at present looking for a site; several are under consideration, among them being the present location of the West End Wheelbarrow Co., 60-70 South Main Street, West End, Pittsburgh, Pa., and some out-of-town properties. The manufacture of Wheelbarrows was begun in the Pittsburgh district several years ago, and has increased to such an extent that the present plant is not able to handle the increased business. The officers are: A. W. Pierce, president; F. C. Linn, secretary; W. H. Cochrane, treasurer. W. H. Cochrane has held the position of secretary and treasurer of the Bindley Hardware Co. of Pittsburgh for twenty-seven years, and to his able management is due much of their wonderful success.

OUR CANADIAN LETTER

Toronto, October 5, 1906.

MARKET CONDITIONS.

Trade expansion is the watchword everywhere in all branches of the business and if any section of the trade is not doing a profitable business it is largely their own fault. At present Canada is booming from east to west, immigrants are coming in by the thousands, the farmers crops are good and factories cannot secure sufficient men to increase their outputs and keep pace with orders received. In response to the strength manifested in the United States metal markets, as well as owing to the fact that Canadian mills are booked ahead for months, the prices ruling on iron and steel products are tending upward. During the month advances have been made in Stanley planes and several lines of Builders' Hardware. Lead and copper products have also been moved upward materially. Trade during September was good and the continued warm weather enabled most dealers to clean out summer lines and reduce carry-over stock to a low point. The cool weather now prevailing, however, has given an impetus to trade and from now on till the close of navigation orders will be shipped in large quantities.

There has been a great revival in roller skating in Canada. Toronto has now six rinks, Montreal two, London, Guelph, St. Catharine's and Sault Ste. Marie each one, and others being established at Berlin, Ont., and Winnipeg. As the rink managers buy direct and discourage the personal buying of skates by patrons, the retail trade is not getting much of a look in on the business, however.

CANADIAN MANUFACTURERS MEET.

The annual meeting of the Canadian Manufacturers' Association was held at Winnipeg during the month, the important feature of the convention being the decision to organize two mutual fire insurance companies to enable the manufacturers to escape from the extortions of the fire insurance magnates.

Retiring President C. C. Ballantyne, of the Sherwin-Williams Company, Montreal, in his annual address referred to the large and satisfactory increase in Canada's foreign trade. The total trade was $73,046,000 in excess of 1904-05, the exports increasing $53,270,000, or some $20,000,000 more than the imports. A gratifying feature was that the imports of British goods had increased more proportionately than imports from the United States. The speaker attributed the exodus of young Canadians to the States to the lack of towns and factories, and the inducements and opportunities they afforded.

"To-day the situation is completely changed," he continued. "We have begun to study our own resources. What do we find? Not only that nature has fitted us to be a great agricultural nation, but that our mines, our forests, our streams and our waterfalls destine us to stand in the front rank of the manufacturing countries of the world; that here, within our own borders, we have all the raw materials for the world's great industries, the necessary industrial opportunities for all our sons and daughters, and the greatest and best market for the products of our farms. Our neighbors to the south have recognized this even sooner than we ourselves. To-day they are returning to us our own.

"It is for us to say whether we will continue to purchase our manufactured goods in the United States, or put just a little more tariff on certain lines, and make the factories in the States build plants in Winnipeg, Saskatoon, Moose Jaw, Calgary, Medicine Hat, Regina, Edmonton or any other of the many centres in our great Western prairies which have advantages to offer, and by this means keep the population we are getting. Last year our dutiable imports from the United States amounted to $94,200,167, the large percentage of which was manufactured goods, and might just as well have been made in Canada. As it is, the United States farmers, workmen, manufacturers and other citizens have just that much of our money that should have been kept at home."

HARDWARE WHOLESALERS' CONVENTION.

The eighth annual convention and banquet of the Canadian Wholesale Hardware Association was held at Hamilton on Sept. 27 and routine business was transacted. About 75 guests sat down at a banquet given by Retiring President William Vallance of Wood, Vallance & Co., Hamilton, representatives of the manufacturers and jo bbers being present in number, while the Ontario Retail Hardware Association was represented by Secretary Wrigley, of Toronto, who in speaking for the retailers said the Ontario Retail Hardware Association had been organized at an opportune time, as the present is a critical period in the history of the trade. The wholesale trade is threatened with extinction if present tendencies are not checked. The retailers complain that the jobbers are selling direct to consumers, and this is encouraging many retailers to buy more and more goods direct from the manufacturers. The organization of the retail trade and the harmonious working together of the two interests was absolutely essential to the proper combating of the destructive tendencies now gaining headway. In the United States the jobbing and retail associations worked together harmoniously, and the same condition could exist in Canada if the jobbers, as the older organization, extended the hand of fellowship to their sister organization.

The new officers elected by the wholesale association were: President—T. H. Newman, Caverhill, Learmont & Co., Montreal; vice-president—Thomas Dexter, H. S. Howland & Sons, Toronto; Secretary-Treasurers—Jenkins & Hardy, Toronto.; executive committee—Thomas Birkett, Sr., of Thomas Birkett & Sons Co., Ottawa; J. G. Lewis, of Lewis Bros. & Co., Montreal; D. H. Howden, of D. H. Howden & Co., London, and A. C. Fisher, of Rice, Lewis & Son, Toronto.

RELAIL ASSOCIAT'ONS PROGRESSING.

The Western Canada Retail Hardware Association has been taking a referendum vote on a proposition to curtail the credit system by the members agreeing to close their books to credit business between November 1 and April 15. A large percentage favor the proposal but it is not yet certain whether a large enough majority will agree to stand together on the proposition if the secretary issues notice to the trade to put the rule into force.

The Ontario Retail Hardware Association is also at work, a circular having been sent the members asking for information as to the amount of insurance carried on stock and buildings and asking if the members would place their business with a mutual fire insurance company if one were formed under the auspices of the association. Replies are coming in favorably and definite action will probably be taken during the coming winter.

HARDWARE TRADE HAPPENINGS.

The Dominion Cartridge Company, Montreal, are expanding and have organized an American sales department under the direction of C. Edward Wood, for a number of years with the Simmons Hardware Company. They now have branches at New York, Syracuse and St. Louis.

W. M. Butchart has sold his Hardware business at Content, Alberta, to R. B. Wilkins.

McKay & Shaw have taken over the Hardware business of A. M. McKay & Co., Brussels, Ont.

Jenkins Bros., Bridgeport, Conn., are to establish a manufacturing plant at Montreal to supply the Canadian trade.

The Dowswell Manufacturing Company, Hamilton, makers of washing machines, etc., are to build a large warehouse at Leamington, Ont.

The Amherst Foundry Company, Amherst, N. S., are extending their plant for making enamelware.

Shurly & Dietrich, saw manufacturers, Galt, intend to increase their plant shortly.

McCombs & Somersall have established a Hardware store at Strathcone, Alberta.

John E. Botterell, Vancouver, B. C., representative of Caverhill, Learmont & Co., montreal, is to be manager of the Canadian Fairbanks Company at Winnipeg, vice-president F. R. Newman, now Winnipeg representative of Caverhill, Learmont & Co.

Charles Mulvey has taken over James Sinclair's Hardware business at Winnipeg.

The Vancouver Hardware Company, Vancouver, have sold their business to R. F. Anderson, of Anderson & Lusby, New Westminster, and S. H. Marnock, late with F. W. Lamplough & Co., Montreal.

Benjamin Moore & Co., New York, makers of Muresco Wall Finish, have acquired the Francis Frost paint factory at Toronto and the business will be conducted in future under the name of Benjamin Moore & Co., of New York & Toronto, with

(Continued on page 38.)

REVIEW OF THE MARKETS.

WIRE NAILS: Recent shipments from the mills were exceedingly heavy, but the demand exceeds their ability to supply. The scarcity of steel lessens the output, and prevents a full supply of nails to be made. The recent stiffened quotations are very firmly maintained, and are as follows: f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in ten days:

Carloads to jobbers.....$1.85
Carload lots to retail merchants..... 1.90

New York.—The demands of the local jobbers have been in very fair supply during the last fortnight, and with fewer complaints. The deliveries keep in very good shape. The quotations on small lots from store are on the basis of $2.05 to $2.10 per keg.

CUT NAILS: The shortage in steel affects the Cut Nail as well as the Wire Nail supply, and though there has been a good demand the supply of nails has been difficult to obtain. An advance was made at the recent meeting of the Eastern Cut Nail Association, due to the heavy demand, and the scarcity and high price on steel. Quotations are as follows: f.o.b. Pittsburgh; Carload lots, to jobbers, $1.90; less than carloads, to jobbers, $1.95; less than carloads, to retailers, $2.05. Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 5 and 10 cents advance on Steel Cut Nails.

New York.—The jobbers have failed to get regular shipments from mills, the scarcity of steel interfering with the supply, and the manufacturers being very far behind in shipments. Quotations on small lots from store are on the basis of $2.05 to $2.15 per keg.

BARB WIRE: Specifications on contracts furnish the mills with their principal business, as new business is not very heavy, although the mills are still behind their orders, with no stocks on hand. Quotations remain as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in ten days:

Jobbers, carload lots	$2.00	$2.30
Retailers, carload lots	2.05	2.35
Retailers, less than carload lots	2.15	2.45

SMOOTH FENCE WIRE: The mills are behind their orders, the new business being necessarily light, as most of the orders of any size were placed over a month ago, specifications on contracts alone keeping the mills busy. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in ten days:

Jobbers, carloads $1.70
Retailers, carloads 1.75

The foregoing prices are for base numbers 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

TIN AND GALVANIZED WARE: A further advance in Tinware was announced since our last issue. Quotations of leading manufacturers are about 5 per cent. higher, and certain lines of Galvanized Ware, including Coal Hods as well as the general line of Tinware, are affected by the change.

SOLDERING COPPERS: A further advance of one cent per pound in Soldering Coppers was made recently, bringing the price on 300-lb. lots up to 24 cents per pound. A corresponding change in Copper Wire was also announced.

SLEDGES: Leading manufacturers of Sledges and Cast Steel Wedges have advanced their quotations 7½ per cent. The higher prices are said to be necessitated by the present cost of raw material.

ROPE: The following prices may be said to represent the market:

	Cents Per Pound.
Pure Manila, 7-16 and larger	12¼ to 13
B Quality Manila	11¼ to 11¾
Pure Sisal, 7-16 and larger	9¼
No. 2 Sisal, 7-16 and larger	8 to 8¼
No. 1 Jute, ¼ and larger	8 to 8½
No. 2 Jute, ¼ and larger	7 to 7¼

Less ¼ cent to the large trade.

LINSEED OIL: The following reduced quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....38 cents per gallon.
In lots of 5 barrels or more.....37 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Double Boiled Linseed Oil, 2 cents per gallon higher than raw.
Regular Boiled Linseed Oil, 1 cent per gallon higher than raw.
Calcutta Oil .....68 cents per gallon.

THE PHILADELPHIA TRADE.

The continuation of Summer weather in Philadelphia during the month of September was no doubt felt by the large department stores anxious, of course, at this time of the year, to show Fall goods, but as far as our business is concerned, no falling off has been in evidence—in fact, our sales continue each month to exceed those of last year, and while numerous small advances in price seem to be the order of the day, we do not think there is any speculative buying on the part of the retail dealers as a general thing, although possibly considerable business in manufacturers' hands is of that order. No doubt the majority of advances which have taken place were warranted on account of increased cost of material, higher wages, etc., but we cannot help but think that some are made with the idea of staving off orders from factories and mills already crowded to their limit—then again, other changes have been made on general principles, feeling that the time is ripe to ask more money for their product. However, general business conditions are good. Manufacturers are not furnishing material as promptly as desired, and it is really going to be more of a question of ability to fill orders this Fall rather than at what price, so that merchants throughout the country who have been wise enough to see that their stock is well filled are the ones who will meet the demands and reap the benefit.

Biddle Hardware Co.
D. H. Reddie.

THE PITTSBURGH TRADE.

September sales were quite large, equaling the best September in the history of the Pittsburgh Hardware Trade. Weather conditions were not favorable for early calls for cold weather goods, as the month was quite warm throughout, but sales of tools, builders' Hardware and other staples made up the amount.

The Twelfth Annual Convention of the Ohio Valley Improvement Association is to convene at Portsmouth, Ohio, October 17 and 18. This association has for its object the slackwater improvement of the Ohio River from Pittsburgh to Cairo so as to maintain a depth of nine feet throughout the year. Each year shows progress in this direction as more locks and dams are brought into service, but there is still much to be done. The full value of this improvement is almost inestimable to the whole Mississippi Valley and in fact to the whole country. Of course it means more to Pittsburgh than some other places, but the whole country will have a share in the cheaper transportation of heavy freight, which the improvement will secure. Advances in prices continue in many lines. All goods made in whole or in part of copper, wood and cotton are already advanced, while heavy iron goods such as bolts are beginning to move, and it looks as though January 1st will see a higher range of prices all through the line.

Another strike among the Builders' Trades has been started, and work is at a standstill on large buildings that were being rushed to completion. Employers say they do not know what these strikes will lead to, but one thing seems evident, that it will have a tendency to stop building schemes until more settled times.

Logan-Gregg Hardware Co.

THE ST. PAUL TRADE.

The greatest annoyance we now have is to get goods promptly. Specifications on certain lines made weeks and even months ago are unfilled and when we write or wire we get such cold replies, making no promises which are definite and satisfactory, that we become discouraged and has already had the effect of our placing orders with new houses in hope that new houses will appreciate

our orders more and will be anxious to please us. Surely prosperous times have their drawbacks. Our territory is doing a large business in every line. Business blocks and dwellings are being put up by the hundreds. St. Paul is to-day working to finish up at least two thousand houses of all kinds. The same conditinos exist all through our territory. We expect higher prices on many things about January 1st, when prices are being gone over, and we do not blame any one whose supply is not equal to the demand, when he advances prices. No clouds on the business horizon as yet and we hope will not be for sometime to come.

Hackett, Walther, Gates Hardware Co.
T. G. Walther, Vice-President.

THE MINNEAPOLIS TRADE.

Retail Hardware business in Minneapolis is excellent as to volume. Profits, however, are very unsatisfactory and likely to continue so, all builders' Hardware schedules being figured as a rule at the present factory cost.

Jobbing trade is in excellent condition, all jobbers in the Twin Cities having all they can possibly do, each month probably breaking the record.

Sorry to say that the end of the harvest and during the threshing time there was a great deal of rain and bad weather. Crop reports from one of the largest grain commission houses just issued, state that they believe that there has been a reduction of at least five per cent. from this crop. They state that it is estimated that half of the grain in South Dakota is still in shocks and that this condition is duplicated in the south and central parts of Minnesota, in South Dakota and western Minnesota, where there has been much less rain. It is estimated that 60 per cent. of the wheat has been threshed and that on account of the bad weather during August and September, the movement of crops to market will be somewhat later. They estimate that 200,000,000 bushels of wheat will be the outside figure for the wheat crop of the three States, with prices a little below the average, but with the crop of other grains, flax, dairy products, etc., without doubt the total value of the entire crop will be nearly as great as any crop that has been raised and the country tributary to the Twin Cities is in most prosperous condition.

W. K. Morison & Co.

THE SAN FRANCISCO TRADE.

The numerous new Hardware stores reported in this column two weeks ago have all "caught on," and report business very much in excess of all anticipations. Everybody, including many newcomers, are building houses and business shacks in all sections of San Francisco's hundreds of acres of ruins, and on residential garden plots and vacant lots close roundabout, and all transactions are wholly or mainly on a cash basis. So thoroughly has been the shake up of this community and so greatly scattered have the people been that in evrey center of building activity, most everybody are strangers to most everybody else, and seemingly they don't stop to think who was their Hardware merchant before the earthquake or whether he is again in business, but make a bee line for the first of the many visible Hardware signs they see and do their trading there. And when in our strolling about for trade data, we come upon the re-established old-time Hardware merchant, we see only a store full of customers, and in the pervading business activity no thought of new-comers in the trade, for there is room for all and all are doing all they can attend to. Insofar as the re-established Hardware merchants are concerned, this is what they all say. And there are no drones in the rank and file of San Francisco's present day Hardwaremen, each one being a personal exemplification of perpetual business activity in business hours, and overtime. Some, I think, are working too hard, and ought to slow down, for endurance has its limit. One, I know, of these assiduous devotees of the trade is the head of one of the very busy Hardware stores over the bay in Oakland, and I am glad something has turned up to divert his attention this month from the too much business stress I know he has been standing under since the earthquake fire, for, let it not be forgotten that for several months after the fire the Oakland Hardware stores were the supply sources for both Oakland and San Francisco and San Francisco business continues an important factor in Oakland trade. The Oakland Hardware merchant to whom this notice has reference is Frank Rittigstein, president of the Alameda County Retail Hardware Association, who will, ere the current month expires, become a husband and forthwith start on the recreation trip he so much needs—a honeymoon trip with Miss Sadie D. Lewek of Marysville, Cal., his bride.

Mayor Frank Mott of Oakland, and head of one of the big Hardware stores of his city, returned from the east last week after an absence of two months. He visited St. Louis, Chicago, Nashville, Memphis, Cincinnati, Pittsburg and New York. While the main purpose of his visit was to buy Hardware stock, he took careful notes of the civic utilities in the different cities visited, with a view to their use in his home city, whose affairs he is administering with signal success. He was particularly impressed with the street system of New York. The Mayor brings back many valuable ideas on street matters that he will lay before the Oakland aldermen.

The Montgomery-White Hardware Co. is the name of a newly established store at 375 Twelfth Street, Oakland, Cal. The new store will deal in Hardware, Sporting Goods, Stoves, Household Goods, Paints, etc.

The Palace Hardware Company will next week open a downtown store on Market Street, between Montgomery and Kearny Streets, opposite the Palace Hotel, San Francisco.

The Standard Hardware and Tool Co. has opened a new store at 909 Market Street, San Francisco.

Digitized by Google

W. J. Donnelley has opened a new Hardware store at 11 Stockton Street, San Francisco.

The Union Hardware Company is the name of a new store opened at 736 Polk Street, San Francisco.

W. A. Etling, formerly at 110 Sixth Street, San Francisco, has built a new Hardware store at 2442 Mission Street.

Dunham, Carrigan & Hayden Company has just finished a large warehouse connecting their large store on Kansas Street, and are now about to erect a large Pipe warehouse a few feet south of their quarters. There is some talk of this firm returning to their former location on Beale Street, and putting up a permanent building. The company owns the Beal Street site.

For the benefit of Hardware men everywhere, and others who would be Hardware men, this letter is closed with the information that there is a call in San Francisco for men of a thorough knowledge of the Hardware business and also for young men with but little or no experience but are willing to learn the business.

Industrial Press Association.

THE SAN FRANCISCO TRADE.

(Continued on page 35.)

W. G. Francis as manager of the Toronto factory and business.

A. N. Marshall, of Marshall-Wells & Co., Duluth, has been visiting the Winnipeg branch, where an eight story building is being erected. Mr. Marshall spent a week duck shooting in Manitoba.

The Sayer Electric Company, Montreal, have opened a branch store in that city.

The Warrens Sporting Goods Company, Toronto, have opened a new branch store in Toronto.

Brooks-Sanford Co., Toronto, are to open a branch of their builders supply business at Hamilton.

Hallett & Noden have opened a new Hardware store at Toronto Junction.

Wythe, Orr & Wells have taken over White & Orr's Hardware business at Daysland, Alberta.

E. C. Dent and F. Tucker have opened a Hardware store at Kroneau, Sask.

The J. H. Ashdown Hardware Company, Winnipeg, are making some additions to their warehouses.

The Canadian Oil Co., Toronto, manufacturers of Sterling Paints, had their factory and warehouses burned down last month.

The Manitoba Glass Company have established a glass making plant at Beausejour, Man.

The Philip Carey Manufacturing Company, Lockland, Ohio, is preparing to build an asbestos plant at Montreal. They paid the Dominion government $15,000 in duty in 1905.

The Ontario Steelware, Limited, have taken over the Fairgrieves, Limited, business in tinware specialties. They will also take up the manufacture of high-grade enamel ware. Thos. S. Baker, formerly with B. & S. H. Thompson, New York, is the manager of the new plant.

THERE'LL BE NO PARTING THERE.

First Boy—My papa knows more than your papa does.

Second Boy—I bet he doesn't. Did you ever see my papa? His forehead reaches 'way to the back of his head.

UNREASONABLE.

"Grandma," said little Flossie, "can I have your store teeth to play with?"

"Of course not, dear," replied the old lady. "You must be reasonable in your wants."

"But, grandma," protested Flossie, "it's you that's not reasonable. Every time I want anything you want me to want something else.

❖

Jack—Miss Peachly is a silent belle.

Tom—What's the answer?

"I kissed her the other night and she never tolled."

SOME VIEWS ON FIXED RETAIL PRICES.

It is evident from a study of the situation that the classes of sporting goods upon which the manufacturers have set a fixed retail price are increasing. This is due largely, says the *Sporting Goods Dealer*, to the failure of certain manufacturers to maintain a price on their wares that would insure a reasonable profit. This failure led to a disastrous price-cutting among retailers and injured the business of all concerned. On patented goods and those sold under registered trade-mark the Government protects the manufacturer, allowing him to fix the price of the article and giving him a monopoly on it for a stated period. This at first may seem a hardship for the dealer, but in reality it is not. And if he does not feel like acceding to the conditions of the manufacturer he certainly is at liberty to refuse to handle the goods. He can generally obtain the goods of other makes, which are not sold under fixed prices and therefore do not insure a safe profit. It is no more than simple justice to allow the inventor to reap the benefits of the time, labor and thought devoted to perfecting his invention. Of course, the chief reason why the manufacturer maintains a fixed price on his goods is to make as much out of their production as possible. The same thing may be said of the sale of these goods by the dealer. Both are looking out for themselves. It must not be overlooked, though, that most manufacturers are men of broad business principles and endeavor as far as possible to help and protect the dealer in the sale of the goods. This may be ascribed by some purely to business motives, but it is also a demonstration of that fraternal interest and confidence which one business man should have for another and which is mutually beneficial.

Retail dealers are benefited by fixed prices in a great many ways. One is in regard to unfair competition with a rival dealer. In handling goods of this kind the dealer is always sure that his neighbor is going to undersell him. There is no argument necessary to convince the customer that the price quoted is the best one he can receive. He can't "go next door and get the same thing for less money." Then there is the question of quality. Manufacturers of fixed price goods strive to keep up the quality of their products by putting in them the best material and workmanship. This means satisfied customers and the building up of a good local trade on the foundation of a reputation for reliability and fair dealing. There is also the profit to be considered in connection with goods of fixed prices. These goods that always command the same price generally net a better profit than other goods and it is a consistent profit. In cases where the price is not out of proportion the consumer does not object very strongly against a fixed price. Most people will pay for an article that seems to be worth the money. There is a great deal in possessing the confidence of the buyer. For example, suppose he goes into Smith's store and prices an article of fishing tackle. Perhaps the cost is a little too much for him and he finally leaves, saying he will think it over, or is not quite ready to buy. Later he visits the store of Jones and finds that the same article may be had for fifty cents less than Smith asked. The customer naturally comes to the conclusion that Smith is exorbitant in his prices and is seeking to make an unreasonable profit, not stopping to think that possibly Jones sold the article for little or no profit in order to secure the trade. Then may be Smith gets mad and retaliates in like manner when the opportunity offers. And so ruinous price-cutting starts and both Smith and Jones suffer.

This policy of fixed prices on goods is also a mighty weapon for the dealer to wield against the encroachments of catalogue houses. These goods cannot be sold at cut rates and as they are mostly well known standard goods, a good profitable business is denied these houses. A great many manufacturers are today refusing to sell this class of trade and are doing everything in their power to prevent them from getting their goods. Needless to say the dealers are giving them unqualified support.

Mrs. Stingy—What do you want to leave us for Bridget? I'm sure we have treated you as one of the family.

Bridget—Indade, an' you hov' ma'am, an' Oi've stood it long enough.—*Life*.

THE RAZOR.

STAR
Safety Razor
Price $1.50

THE BLADE.

Three Stars for Shavers

THE CASE.

SOME things, though old, have never been improved upon. Sunlight is still the best light and The Star Safety is still the best razor.

New-fangled fad razors and cheap mitations of the Star have come and gone, but after the 30 years that the Star has been in use, it is still the best shaving instrument man has.

This is because the Star Safety razor is, first, built upon correct principles, and second, made of the very finest materials. The Star blade is hand-forged in the old-fashioned way from the finest razor steel, ground concave and tempered by a process peculiar to Kampfe Brothers. The Star process makes the kind of razors that are handed down from grandfather to father and son.

The Star Blade can be honed and stropped more easily and better than the old-fashioned razor—if our patent Star Stropper is used. A blade that cannot be honed or stropped, cannot give you the velvety shave of a Star. The Strop puts a finer edge on a blade than can be done by any sort of grinding. Naturally this fine edge is dulled by one shaving, so that a razor blade must absolutely be stropped for each shaving if the shaver is going to get the best kind of a shave.

SUN STOVE CO.

Sun Stove Co., Detroit, Mich., manufacturers of Sun Stoves, Gasoline, Oil and Gas Stoves, Air-Tight and Hot-Blast Heaters, etc., have made and are making some extensive improvements in their entire line of goods. They are bringing out this year what they claim to be the quickest baking and best steel range that has been offered to the trade. In addition to this, they are

SUN STOVE CO.'S GAS RANGE.

coming out with a full line of Gas Ranges of the all-steel pattern, and also a full line of Gas Heaters for artificial and natural gas. They have made some noticeable improvements in their Blue-Flame Oil Stoves, and they are now prepared to offer an Oil Heater that has a smokeless device which can be regulated at any time when the heater is in use. This is the only oil heater that has ever been offered to the trade that could be regulated while it is lighted. The company mean by that that the smokeless device can be regulated. On all other oil heaters it is necessary to put out the fire, and let the apparatus cool before the smokeless device can be fixed. In addition to this, they are adding to their line numerous other articles in the way of new Torches, Toasters and Flat-iron Heaters, which they will gladly furnish catalogues of on request.

WASHINGTONIAN PHILOSOPHY.

If you want your clerks to interest themselves in your affairs you must interest yourself in their affairs. Most employers make the mistake of thinking that when they pay a man a fair salary their duty is done, but every man should remember that the human machine is not run the same as the mechanical one. If you put a certain amount of coal and a certain amount of water in an engine you will get out a certain amount of power, and while the salary of a clerk should produce from him the same amount of energy that the coal and water does from the engine, it does not, for there is one factor in the human machine that is not in the iron one and that is the *personal equation*. You start your boy in a big rush to the block above you to borrow a "sphero-cyl," for a job for which the customer is waiting. As he passes along the street he comes to a bulletin telling how the Baltimore lightweight won the championship in Goldfield in the forty-second round the night before. He stops for a glance, gets interested in the details and wastes half an hour. That half hour is the personal equation. That half hour marks th difference between a man and a machine.

Had you known that boy as you should have known him you might have avoided this trouble. Had you known how he loved the sound of the biff, smack, of stuffed gloves on the point of a lanky jaw you might have handed him the morning paper when you came in, with the remark, "Ted, I see your man Nelson got licked last night! Here's the paper; you can read it when you get through cleaning up!" Do you think that boy would waste your time as much if you showed him that sort of consideration when you came in and then later asked him to hurry? I say no! For the man that gets the good will and love of the people who work for him will get twice as much honest, earnest work out of them as the man with the sour apple countenance who pays much larger salaries. You must study the people under you. Study their likes and dislikes and their weak and strong points. There lives no human who cannot be approached from some point. I once lived on a farm, and we had there a mule that was a blooded animal; he was sired by His Satanic Majesty and damned by every man on the farm with one exception. The exception was a trifling negro, who I honestly believe held his job only because he was the only man on the place who could put a bridle on that mule. The negro died, and the mule lived on as mean mules and mean people always do. The other negroes on the place tried time and again to put a bridle on that mule and only had done to them what Maud of Comic Supplement fame does to every man who comes in contact with her. But at last we made a discovery and that was that this mule was blind in one eye, and the secret of the defunct negro's success in putting on the bridle was that he always approached from the blind side. There exists no human without his blind side, and the man who finds the blind side of each man who works for him and always approaches from that side will win in store management as surely as the man who plays poker will win with a marked deck.—*Optical Journal.*

MUST CONTROL HIS TEMPER.

There are a great many things which serve to irritate, provoke and vex the merchant. However, that is true in every walk and calling of life. A man must govern his temper. Temper is a good thing, but it is like all other forces, it must be controlled to be useful. The merchant who flies into a temper weakens himself in the eyes of his clerks, his customers and himself.

Absolute Accuracy

beautiful finish and strength of shooting is shown in the

FAMOUS

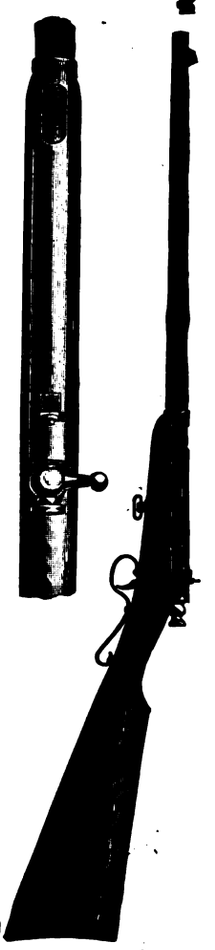
Hamilton Riflos

MODEL No. 23
Retail Price $3.00

Full length 35 in. Barrel and action 21¼ in. long, Take-down, Bolt-action Model. Stock Genuine Walnut. Barrel finely tapered and beautifully finished in blue-black gun finish. Automatic action in loading and ejecting exploded shell.

MODEL No. 19
Retail Price $2.00

Like No. 23, combines simplicity, beauty of finish, strength and shooting power. Simple loading process; improved extractor, rapid and perfect in action, convenient "take-down" features.



MODEL No. 15
Price $1.50

is made like No. 19, except the barrel is 4 in. shorter.

This superb line of 22 calibre Rifles, ideal for target practice or hunting small game, was never offered at the prices we quote.

SOME VETERINARY APPLIANCES IN HARDWARE.

The Tragle Mfg. Co., Reading, Pa., are the manufacturers of the finest and most complete line of Veterinary Files and Floats, a line that might be added specially to a Hardware stock, and attract deserved attention in cities where the absence of these goods would be seriously felt by the class of trade they appeal to. The Tragle Mfg. Co. make the special claim that they are the only exclusive manufacturers of this line of goods in America, and at all times are in a position to fill orders promptly. Realizing as they do there is only a limited sale on these goods, they assure those in the trade desirous of carrying a small assortment

I. X. L. FILE CARD AND BRUSH NO. 44.

they can make it to their interest to handle the line. We give herewith illustrations showing the important items that go to make up a stock. The I. X. L. File Card is made of the very

Tragle Mfg. Co. publish an illustrated catalogue of their complete line, in which will be found a full description of the goods manufactured by them.

AN INSTRUCTIVE EXHIBIT.

There was recently received and placed on exhibition in the National Museum at Washington, D. C., the largest and most complete collection of small arms ever seen in this country. These specimens, of which there are more than 600, are representative of ancient and modern times and plainly illustrate the history of the development of gunmaking from the earliest times to the present. The guns are installed in 38 cases, each arranged in a manner that tells a plain story, intelligible and interesting, not only to those familiar with firearms, but to every visitor. In setting forth the arms of modern times, the best work of such inventors as Colt, Maynard, Burnside, Remington, Spencer, Sharp, Gallagher and others is represented. Following the invention of gunpowder in the year 1300 or thereabouts, the bow of the arbalist was replaced by a metal tube, fitted to the stock and charged with powder and bullets. In the matchlock, as first made, powder was first placed in the flashpan and ignited by a slow match or fuse, held in the hand of the gunner and lighted from burning coals. An improvement on this form was made by placing the fuse in a device corresponding to the hammer of the modern gun, which was operated by a trigger. The matchlocks in the museum's exhibit include many Japanese, Chinese, Persian, African and European arms, some of them decorated in artistic fashion.

Following the matchlock, which had a long period of useful service, the wheellock was invented in Germany. In the lock of this gun the simple mechanism is wound up by means of a removable handle and when the piece is fired a circular steel plate, with a notched edge, revolves rapidly in contact with a piece of iron pyrites, held in the jaws of the hammer, and sparks are thrown into the priming pan. Many interesting specimens of wheellock muskets, pistols and carbines are shown in the exhibit. The display of arms of this type is very extensive and important, embracing specimens of muskets, rifles, carbines and pistols from nearly every country. Persia, India, China, Japan, Turkey, England, France, Germany and the United States are represented. Flintlocks were first introduced by the Spaniards in 1630, and they continued in general use for more than 200 years. In some parts of the world they are still preferred to any other kind of gun. All the guns used by the United States Army up to 1840 were flintlocks, and the adoption of the percussion cap lock was strongly opposed. For a good many years the government had a standing order for the purchase, annually, of 1,000,000 flints, which cost about $3 per 1,000. An unusually fine array of the short, large caliber, bell-muzzle arms which, 200 years ago, were carried in England for the protection of stage coaches, is shown. Within the last few years American manufacturers have been furnishing a "riot gun" embodying some of the features of the old blunderbuss, and they are now used by our express companies. Besides the new specimens mentioned, the collection includes arms of various descriptions used in the United States during the Civil War and other periods. The United States Army magazine rifle, the last page of the story, is also shown and explained.—*Sporting Goods Dealer.*

A TRUTHFUL BOY.

A teacher of a class was disturbed by giggling among certain boys and called upon one of the culprits to tell him the cause.

"Please, sir," responded the lad, "Turner says he knows of a baby who was fed elephant's milk and gained ten pounds a day."

"Turner," said the teacher, sternly, "you should not tell lies."

"But it's true, sir," rejoined the pupil.

"Whose baby was it?"

"The elephant's, sir," replied the lad

ALAS! TOO LATE.

"That rich Mr. Spooner is the most provoking thong! e asked me if I was thirty-three."

"And what did you say?"

"I said, 'Mercy, no!' And he said he didn't think any woman should marry until she was thirty-three."

"Gracious! What did you do then?" "—I called after him that I was thirty-three my next birthday, but he didn't seem to hear me."

POPULAR TALKS ON LAW

Copyrighted 1905, by William C. Sprague, President The Sprague Correspondence School of Law.

CONTRACTS.

No. 7. Offers to the Public. Contracts of Aliens and of Corporations.

As we have learned, in order to constitute a contract there must be an offer and an acceptance. The offer need not be to any particular person, but may be made to the public in general. An instance of this is an advertisement of a reward offered. An acceptance in such a case is necessary in order to make a contract, and the acceptance must be with a knowledge of the offer. In such a case the contract is executed by the act itself. The person accepting need not notify the person making the offer. The offer is accepted by his going ahead and doing the work or performing the act.

An offer made to the public may be withdrawn before it is acted upon, and if the offer was made by advertisement, withdrawal may be so made, and the mere fact that the person performing the act did not see the advertisement withdrawing the offer does not entitle him to the reward. As a rule, an offer does not entitle him to the reward. As a rule, an offer may be withdrawn by the same means used in making it. Of course an offer may be presumed in the law to have been withdrawn by lapse of time. No withdrawal having been actually made, the offer will be presumed to stand for a reasonable time.

We now enter upon the discussion of who are competent to make contracts. Not every one may make a contract. The law books designate six classes of persons who, in general, are incompetent to make binding contracts, either wholly or in part: 1. Aliens. 2. Corporations. 3. Infants. 4. Insane persons. 5. Drunkards. 6. Married women.

In the first place, it may be understood that a man cannot make a contract with himself. In other words, there must be at least two parties to a contract. One attempts to make a contract with himself when as an agent for some one else he attempts to buy the goods of his principal; or when, as executor, he attempts to buy the goods of the testator; or when as auctioneer he tries to buy the goods he is offering for sale. The mere fact that one cannot sue himself would make the rule necessary. The same applies where one attempts to make a contract with himself and another. One cannot sue two persons one of whom is jointly interested with himself as defendant. Neither can one make a contract with a fictitious person; the person must be living.

There is no law preventing the making of contracts between persons of different nationalities, or owing allegiance to different flags. Such contracts, however, made between aliens, that is, citizens of countries at war, are declared in the law to be null and void. In the case of the Spanish-American War a contract entered into between a Spaniard and an American during the existence of the war was a nullity. Even after peace was declared, the contract could be of no effect. As to contracts made before the war, these are merely suspended during the continuance of the war. They revive when peace returns. In the same way a suit on a contract made before the war began cannot be carried on in the courts while the war continues. If brought before the war began, a suit may be brought, or the case may be revived after the war has closed.

* * *

A corporation is a child of the State. It has no inherent right to make contracts above and beyond such as are expressly given to it by the State. Any contract that it attempts to make that is not within its powers as determined by the law under which it was organized, is null and void, or, as the law books say, ultra vires. It cannot be too plainly understood that a corporation has no powers beyond what are given it by its charter, or its incorporating act. In some States the directors are personally liable as partners on contracts made ultra vires. Now, the incorporating act under which the corporation is organized may be general in its terms, specifying only in broad terms the limits of the corporation's powers and rights. It will be understood, as we will see later, that a corporation has the implied power to do any act necessary to the carrying out of the purpose of its organization as provided in its charter. So a corporation has the implied power to hold any property necessary to the carrying on of its business, unless, of course, it is expressly forbidden by law. If the property is to be used for some purpose beyond the scope of its authority, it has no right to acquire and hold it, and a contract looking to that end would be void. A bank, for instance, incorporated to carry on a banking business, loaning money on real estate and taking it on a mortgage, might enter into a valid contract for the purchase of farm implements, these being necessary to the care of the farm until such time as it could be sold and the loan repaid. But a contract by a bank to buy farm implements for the purpose of going into the farming business in general, would be null and void; and so of a bank making a contract to build a railroad; such a contract would be void unless it could be shown that it was necessarily incident to the carrying on of its business as a bank. Corporations may, unless prohibited by the law under which they are organized, make negotiable paper, appoint agents, borrow money, and mortgage their property.

In some cases the charter provides the mode of contracting. In such a case a contract made by the corporation by another mode than that stated is void; for instance, if the charter requires the signature of a particular officer, the contract is invalid without it.

Where a corporation has entered into an ultra vires contract and has had the benefit of the performance of it by the other party, the corporation cannot go into court and claim that the contract was ultra vires and that it is under no obligation to fulfill its part, at the same time retaining the fruits of its unauthorized acts. It would be held by the court liable in eqiuty generally to restore or pay for what it has received.

A single stockholder in the corporation may restrain the board of directors of the corporation from entering into an ultra vires contract, and usually it is true that the board of directors is liable to the shareholders for an ultra vires act. Then, too, the State itself, through its department of justice, may in the courts restrain an ultra vires act, or compel the corporation to forfeit its right to do business.

* * *

Contrary to the popular notion, a corporation organized in one State has no inherent right to do business in another State. The privilege it has so to do is merely by courtesy of that other State. A corporation organized under the laws of the State of New Jersey has no inherent right to do business in the State of Michigan; that it is permitted to do so is by the tacit agreement of the latter State, or by what is known as State comity or courtesy. It follows, therefore, that one State may make reasonable limitations on the right of a foreign corporation to do business within its borders. It follows, of course, that a corporation cannot do in a State other than its home State an act contrary to the law or the policy of that other State, though permitted to do so by the law under which it is organized within the boundaries of its own State.

One State may go so far as to prohibit a foreign corporation from doing business within its borders. A State may discriminate against foreign corporations by imposing taxes on them, or license fees, unless such taxes or license fees be contrary to the interstate commerce act.

Most of the States make provisions requiring foreign corporations to file reports with their secretaries of State at certain intervals. Some require that these corporations shall have offices upon whom within the State service of process may be made. Others require the payment of a certain franchise tax or license fee. Still others provide that unless certain conditions are complied with by the foreign corporation, they shall have no standing in the courts of that State, either to bring suit or defend a suit.

(To be continued.)

HUMOROUS LOGIC.

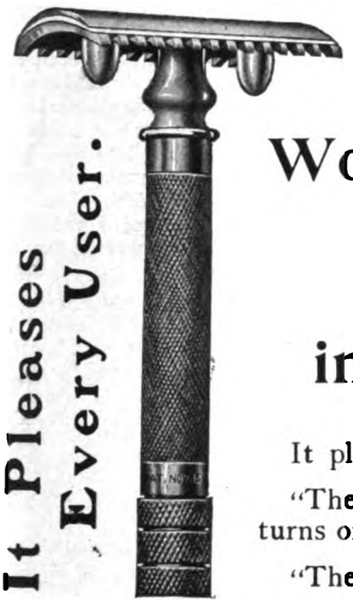
Milwaukee is no longer depending upon beer to make it famous. The fleas are now doing the work.

Great foresight was displayed when Bacon was sent to Cuba with Taft. This prevents all possibility of an embalmed beef scandal.

A Western woman has just discovered the reason for the downfall of man, in early days. Eve had no mother to guide her.

A man named Doolittle was arrested the other day for stealing a watch, and while he probably looked upon the transaction as a Doolittle time taking, it will probably end by shortening up the transaction to "Do-time."

It is unnecessary to remark that the female mosquito is the one which does the biting. What else but a female would annoy a man for half an hour before extracting its little lunch from his anatomy.



Missouri has unquestionably been struck by a moral wave. The city attorney of Kirkwood, Mo., has just introduced an ordinance to make lying a misdemeanor punishable by fine. Is this a move to cleanse the morals of the community or to make millionaires of the attorneys?

The people of Atlanta have been taking a hand in the education of the negro. Their methods show the negro that he is just as likely to be punished for the offense of another as for his own, hence he has little encouragement to keep straight.

HARDWARE DEALERS RECORD

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Abbeville, S. C.—The Abbeville Hardware Co, capitalizad at $11,000, has been chartered.

Augusta, Ga.—A stock company has been formed by E. M. Fuller, Burke Hatcher and James A. Anderson for the purpose of establishing a wholesale and retail Hardware store which will be incorporated under the laws of the State of Georgia and have a capital stock of $75,000. The name of the new company will be the Augusta Hardware Company.

Carney, Kans.—The Todd Hardware & Supply Co. has been incorporated with a capital stock of $25,000.

Cedar Rapids, Ia.—J. B. Jonita has engaged in the Hardware business.

Charlotte, N. C.—A charter has been issued to the Weddington Hardware Company, capital of $50,00 authorized, by J. H. Weddington, Luke Seawell, E. B. Gresham, D. A. Hurley and others.

Collinswood, O.—The Collinswood Hardware Co. has been capatilized at $10,000, by R. G. Wuertz, Gothe Kuebler, B. B. Bernhard, P. B. Sibbing and P. Bernhard.

Colville, Wash.—The Hunt Hardware Co. has been incorporated with a capital stock of $12,000, by Charles A. Hunt and others.

Cortland, N. Y.—Gallop, Sherman & Lovell Hardware Co., has been incorporated to conduct a Hardware and plumbing business, capital, $10,500. Incorporators: Frank L. Gallop, Ray W. Sherman, Donald H. Levell, Cortland, N. Y.

Cottage Grove, Ore.—Miller & Corbett has opened a new Hardware store.

Grenada, Miss.—Doak Hardware Co. has been incorporated with $20,000 capital stock.

Liberty, N. Y.—The Monroe Hardware Co. has been incorporated with a capital stock of $10,000 and the following directors: R. A. Monroe, M. C. Westbrook and J. C. Young, all residents of Liberty.

Logansport, Ind.—Rice Hardware Company has been incorporated, capital stock $19,000.

Memphis, Tenn.—An application for papers of incorporation for a Hardware company capitalized at $175,000, to be known as the Barnes & Miller Hardware Co., has been incorporated. The incorporators were: H. R. Miller, W. E. Barnes, L. L. Crofton, G F. Sproull and T. C. Thompson.

Mohall, N. D.—The Mohall Co-Operative Hardware Co. has been incorporated with a capital of $25,000. Incorporators: Peter L. Satron, J. A. Southam, E. E. Rhode, Mohall.

Nacogdoches, Tex.—Cason, Monk & Co. have been incorporated with a capital of $75,000, to do a Hardware business.

Roseburg, Ore.—F. M. Beard has opened a new Hardware store.

San Antonio, Tex.—The Western Hardware Company has been incorporated to do an exclusive wholesale business.

San Diego, Cal.—John Schonborn of Helena, Mont., and John A. Welcome have opened an uptown Hardware store at 944 Sixth Street. The new firm will carry a complete line of builders' Hardware, mechanics' tools, house furnishings, etc.

Stuart, Va.—T. L. Clark Hardware Company has been incorporated. Incorporators: M. V. Stedman, president; T. L. Clark, vice-president; J. B. Beach, secretary; W. D. Via, treasurer—all of Staurt, Va.

Tacoma, Wash.—Palace Hardware Co. has been incorporated with a capital stock of $15,000. Incorporators, John Holleque, Herman E. Anderson and Alexander O. Brenden.

Quincy, Ill.—Articles of incorporation have been filed of the Gunther Hardware Co. The capital stock of the corporation is placed at $20,000. The company will continue in the general Hardware business at 505 Hampshire street, as heretofore.

Changes and Improvements.

Batavia, Ia.—D. Y. Kennedy has sold his Hardware store to G. O. Davidson.

Burlington, Ia.—The Nichols & Rankin Co. has sold its Hardware business to Mitcheltree Bros.

Canojoharie, N. Y.—The Hardware firm known as the Klinkhart-St. John Company is in the process of dissolution. Inventory is being taken and the stock reduced prior to a change of business. The old stand will be occupied by L. M. St. John and his son, L. S. St. John under the firm name of the St. John Hardware Company.

Carlton, Neb.—F. W. Brown has purchased the Hardware store of H. L. Weimer.

Cawker City, Kans.—Frank Sparks has purchased the Hardware business of Meisenheimer & Dock.

Chariton, Ia.—Basselle & Blanchard have succeeded to the Hardware business of Basselle Bros.

Charlotte, N. C.—The Charlotte Hardware Company has sold its entire stock of goods, charter and name to a new company composed of the following well-known business men of this city: J. C. McNeely, J. H. McAden, H. W. Belk, J. H. Wearn, R. L. Erwin, J. S. Neely and R. C. Glasgow.

Conway, Mo.—Brooks & Johnson have been succeeded in the Hardware business by J. L. Brooks.

Corsicana, Tex.—M. Y. Wilson has just closed a deal with H. L. Strickler & Co., of Calvert, for their stock of Hardware.

Elwood, Ind.—Otis German has purchased the Hiatt Brothers Hardware store on Anderson Street and the invoicing is being completed as rapidly as possible.

Ewing, Neb.—I. D. McClow has sold his Hardware store to A. Dahl.

Franklinville, N. Y.—E. A. Parson has sold out his Hardware business to W. G. Bartlett and Ray Diamond of Buffalo and they will take possession at once.

Frederick, Okla.—Kelly, Harris & Co. have been succeeded in the Hardware business by Hubbard Bros.

Hinton, Ia.—B. F. Bogenriff has purchased the Hardware business of W. G. Pearson.

Kalona, Ia.—Snider & Allen have succeeded to the Hardware business of Snider Bros. & Allen.

Lakota, N. D.—W. H. Pinkerton has disposed of his entire business to Fred Ferris & Son.

Leigh, Neb.—The T. E. Rochford Hardware and furniture stock has been sold to William Wenck of Creston. This is the second time it has changed hands in the past two weeks. The first time Mr. Rochford traded it to Reed Bros. of Madison for a farm in Boone county, and they have now sold it to Mr. Wenk. The present owner is an experienced Hardware and furniture man and will operate the same.

Moline, Ill.—The Hardware firm of Ried & Witter, after twenty years existence as such, is dissolved, Colonel D. O. Ried having bought out the interest of his partner, Robert E. Witter.

Morganfield, Ky.—The Hardware firm of Walker & Scott will be succeeded by Compton & Thomas.

Mt. Auburn, Ia.—W. E. Call has been succeeded in the Hardware business by Call & Farmer.

Newton, Ia.—Early & Marshall have purchased the Hardware store of H. S. Rayburn & Co.

New Vienna, Ia.—Faugman & Wild have been succeeded in the Hardware business by Jos. L. Faugman.

Olathe, Kans.—A. Rothbeg has purchased the Hardware and furniture business of J. A. Elder.

Osceola, Ia.—The firm of Becker Bros., known as the Osceola Hardware Company, has been dissolved.

Phillipsburg, Kan.—N. R. Miller is adding Hardware to his stock of general merchandise.

Rapid City, Man.—Geo. Butchart, of Brandon, has purchased the interest of Mr. Adkin in the Hardware firm of Butchart, Adkin & Haslin. The new firm will be known as Butchart Bros. & Co.

Richmond, Va.—Kennedy Bros. & Killam, Inc., have purchased the Hardware interest of the Sitterding-Garneal-Davis Company. This is an old-established business, having been continuously operated by Carneal & Davis for over eighteen years.

Roswell, N. M.—A contract has been signed by which a $125,000 business deal is soon to be closed. By this contract the stockholders of the Roswell Hardware Co. and a few outside business men will buy the big stores of the Stringfellow-Hume Hardware Co., at Amarillo, Hereford and Canyon City, Texas.

San Antonio, Tex.—The Hardware Co., one of the oldest and largest wholesale and retail Hardware businesses in San Antonio, has completed arrangements to amend its charter and increase its capital from $90,000 to $200,000.

Shelton, Neb.—Bailey & Herring have succeeded to the Hardware and implement business of C. S. Bailey.

Sibley, Ia.—George W. Meader will again enter the Hardware business in Sibley, having purchased the stock formerly owned by Muder & Sows, from C. J. Bovee.

Vancouver, B. C.—J. A. Gray has sold his Hardware store to O. H. Fox.

HARDWARE MANUFACTURERS' RECORD

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, etc.

Atlanta, Ga.—The Atlanta Saw Works has applied for a charter to manufacture all kinds of saws. It is to be capitalized at $15,000, and the incorporators are Jeff D. Smith, J. O. Powell and Ed. T. Williams.

Boston, Mass.—Trussell Hay Harvesting Machinery Company has been incorporated with a capital of $250,000 by Wilbert C. Trussell, Lemuel R. Howe, James A. Rice.

Brooklyn, N. Y.—The Baldinger & Kapperman Manufacturing Co. has been incorporated for the purpose of manufacturing gas and electric lamps, etc.; capital, $50,000. Incorporators: L. Baldinger, O. Kapperman, H. Bonawitz, Brooklyn.

Buffalo, N. Y.—Niagara Wire Cloth Co. has been incorporated to manufacture and sell wire cloth and wire goods; capital, $30,000. Incorporators, W. E. Richmond, J. H. Porter and J. W. Murphy, all of Buffalo.

Dover, Del.—Certificates of incorporation have been issued to the Eck Manufacturing Company, to engage in the manufacture of iron into furnaces, machinery, tools and particularly hand tools. The incorporators are of Philadelphia, and the capital stock is $100,000.

Elkhart, Ind.—An organization has been perfected with a capital of $50,000, known as the Strubler Computing Scale Company. The company will be the manufacturers of a computing scale, the patent rights of which are owned by Charles G. Strubler. Business will be commenced as soon as the organization is completed. The incorporators are Mr. Strubler and Harry Miller and Samuel Winer, both of Elkhart, while the directors are the first two named, C. B. Brodrick, Jr., Jacob Winer and John W. L. Moran. The officers have not been elected.

Gowanda, N. Y.—John Kammerer has incorporated to manufacture Hardware, etc.; capital, $15,000. Incorporators: John Kammerer, Regina Kammerer, Frank W. Kammerer, Jennie W. Kammerer, Gowanda, N. Y.

Kittery, Me.—Alcotite Lamp Co. has been incorporated; capital, $10,000. President, H. P. Knowlton, of Malden, Mass., and treasurer and clerk, J. W. Hawes, of Kittery.

Moline, Ill.—A license has been issued for the incorporation of The Reid Company, for the manufacture of sheet metal and Hardware. Capital stock, $15,000. The incorporators are David O. Reid, Geo. E. Evans and Robert F. Reid.

New York, N. Y.—Perfection Razor Co. has been incorporated for the purpose of manufacturing razors; capital, $10,000. Incorporators: John H. Woods, J. D. Turner, R. W. Cole, F. Winterbottom, Brooklyn; C. T. Roe, New York City.

New York, N. Y.—Reflecting Gas Light Co. has been incorporated for the purpose of manufacturing gas lamps, etc.; capital, $2,000. Incorporators: E. L. Barney, Dr. C. A. Hegeman, E. A. Monfort, Manhattan.

New York, N. Y.—The American Gas Fixture Co. has been incorporated to manufacture gas burners, gas and electric fixtures. The capital is $500,000. The directors are James Bauch, Harry Getsinger and M. H. Gibbons of New York.

New York, N. Y.—The Leffler & Thiele Company has been incorporated for the manufacture of enameled steel ware, with a capital stock of $150,000. The incorporators are Francis Leffler, Albert H. Thiele, Francis H. Ruhe and Walter J. Fenstever.

New York, N. Y.—The Ornamental Bronze and Plate Co. has been incorporated for the purpose of manufacturing bronze lamps, lamp shades, etc.; capital, $50,000. Incorporators: A. H. Stephens, Belleville, N. J.; G. C. Hatch, Kingston; N. B. Hatch, New York City.

Northville, Mich.—The Stimson Scale & Manufacturing Co. recently organized, has just commenced operations in the plant formerly owned by the Hall-Carr Manufacturing Co. The company's capital stock is $110,000 paid in, W. F. Stimpson being manager of the plant.

San Francisco, Cal.—The Pacific Tool & Supply Company have filed articles of incorporation. The capital stock of the company is $500,000. The directors of the company are Charles Stallman, Frank O. Stallman, Norman Reeves, William A. Folger and Royal Charles Miller.

Seymour, Ind.—The Seymour Tool Company, capitalized at $2,500, has been incorporated by Julius C. Birge, Walter W. Birge and Lynn Faulkconer. This new business will be operated in connection with the Seymour Manufacturing Co.

Southington, Conn.—The business of F. L. Ellis & Son, manufacturers of builders' Hardware and sheet metal specialties, has been incorporated in Connecticut as the Ellis Manufacturing Co., with a capital stock of $50,000.

St. Louis, Mo.—St. Louis Hardware Manufacturing Co. has been incorporated; capital stock, $10,000. Incorporators—F. Henry Koch, Edward J. Peterbusch, Emil J. Beimdiek.

St. Louis, Mo.—The Empire Paint & Color Company has incorporated with a capital stock of $10,000.

St. Mary's, W. Va.—The Sparks Hoe Company has been chartered to manufacture all kinds of garden implements. Capital, $10,000, and the incorporators are R. Bolard, Jr., J. R. McMahon, J. R. McCollom and Clyde B. Johnson of St. Mary's and Clark D. Johnson of Letart, Ohio.

Syracuse, N. Y.—Papers of incorporation of the Elbridge Motor & Tool Company have been filed. It is capitalized at $25,000 and will make tools and machinery. The directors are Reuben B. Smith, William L. Robedel and G. Edwin Delong.

Tampa, Fla.—One of the latest additions to the manufacturing concerns of Tampa will be the Yonge-Dekie Manufacturing Co., which is being formed with a capital stock of $50,000. The company will manufacture various tools of the latest pattern, for which they hold the patents.

Watertown, N. Y.—Articles of incorporation have been filed by the Spratt, Corcoran & Foley Company of this city. The company's purpose is to engage in the manufacture and sale of Hardware and its capital stock is to be $7,500. James W. Corcoran, John E. Foley and Charles B. McCormick are named as the directors.

Changes and Improvements.

Brantford, Canada.—The Ham & Nott Co., Limited, manufacturers of refrigerators, screen doors and windows, and woven wire mattresses, in Brantford, Canada, are making additions to and increasing their shop capacity to the extent of about 20 per cent.

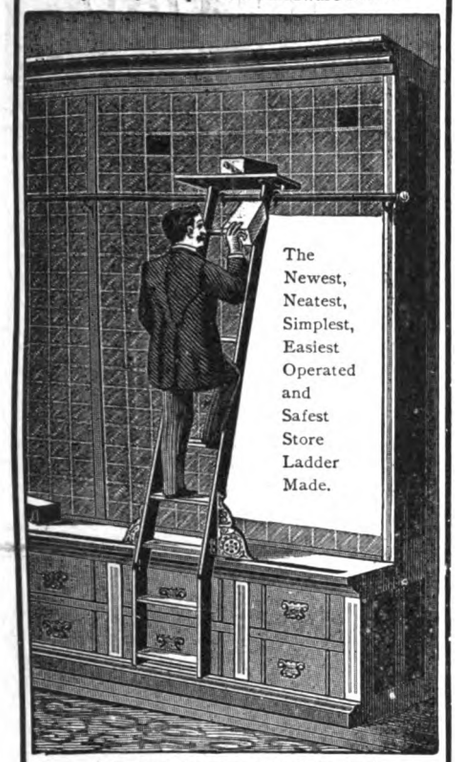
Buffalo, N. Y.—The Buffalo Valve Company, 911 White Building, recently incorporated, has taken up an existing plant in which it will manufacture a special valve to be used in connection with wine and other liquors. The company contemplates the construction of a larger plant this Winter, to include a foundry, and when this plant is completed the company will probably go into general foundry and machine work, making a specialty of castings of aluminum composition. The president and directors are Robert Stock, president; W. W. Smith, vice-president; C. R. Wyckoff, treasurer, and E. S. Newhall, secretary.

Buffalo, N. Y.—The Niagara Cordage Co. is building a new plant in North Tonawanda, N. Y. The main factory building will be 70 by 300 feet, of cement block construction, and will be equipped with the latest type of machinery for the manufacture of rope and twines.

Columbus, Ohio.—The Columbus Bolt Works has contracted for the erection of a warehouse, 60 by 95 feet, four stories and basement. The building will be of reinforced concrete and will be strong enough to carry a load of 1,000 pounds to the square foot on each floor. No wood will be used in the construction except in window frames and sash.

Dallas, Tex.—The Harry Brothers Company, manufacturers of tanks and cisterns, will inaugurate also the manufacture of galvanized iron, eave troughs, conductor pipes, well casing, etc. This will require additional buildings, machinery and working force, all of which they are preparing to put into execution. It will require at least $25,000 additional expenditure.

Elgin, Ill.—Increasing demand for more space has made it necessary for the Elgin Tool Works, formerly located on Harding Street, to move into larger and more convenient quarters. Henceforth the company will occupy the building at 22-24 River Street. The output of the industry will be increased to a great extent. Albert A. Hasselquist is the proprietor and manager of the factory.



Elmira, N. Y.—Within a short time it is expected that the American Radiator plant will be in operation permanently. The plant may be still larger than was first expected, and the force of men larger in number. There is a great demand on the company at the present time, and so the force must be increased to meet the incoming orders. It is expected that the plant will be in full operation before winter.

Frankfort, N. Y.—The Continental Tool Company is enlarging its plant here in a substantial manner, erecting a sawmill and turning factory in order to manufacture its own handles, for the large line of tools it puts out. John R. Lewis of Utica is the present manager of the plant.

BICYCLE AND SPORTING GOODS RECORD

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Alice, Tex.—The Alice Mercantile Co. has been incorporated with a capital stock of $20,000 to handle sporting goods and Hardware.

Andalusia, Ala.—The Benson Hardware Co. has recently opened a wholesale and retail business. Their lines include sporting and athletic goods.

Buffalo, N. Y.—The Buffalo Metal Goods Company, which manufactures the Atherton Coaster brake, has been incorporated with $10,000 capital. F. C. Atherton, S. McDougall and W. F. Emerson are named as the corporators.

Buffalo, N. Y.—The Pierce Cycle Company has been incorporated with G. N. Pierce, P. P. Pierce and C. Clinton as directors.

Detroit, Mich.—The Quadricycle Co. has been incorporated under the laws of that State and purposes manufacturing a four-wheeled motorcycle. The company has an authorized capital stock of $10,000.

Eutaw, Ala.—The Cooke-Rogers Hardware Co. has lately been incorporated with a capital of $25,000. They carry a stock of sporting goods.

Kalamazoo, Mich.—Articles of incorporation have been filed by the Life-Saving Canvas Boat Co. with a capitalization fixed at $20,000. The company has formed for the purpose of manufacturing life-saving boats, fishing boats, launches, yachts, fishing tackle, camping outfits and boating supplies. The filing of articles was delayed for a time because of an infringement suit on the part of the King Folding Canvas Boat Co., which was decided in favor of the former company.

Lawton, Okla.—The Lawton Hardware Co. has been incorporated with a capital of $150,000 by T. S. Bruce, D. Dow and others. They will handle a large stock of sporting goods.

Norfolk, Va.—White Light Bicycle Co. has been incorporated. C. H. White, president; D. S. Alston, treasurer; Edward Reid, vice-president—all of Norfolk, Va. Capital, $25,000.

Ryder, N. D.—The Paterson Machine, Hardware and Sporting Goods Co. has incorporated with a capital of $50,000. T. H. Roney and L. C. Ross are the incorporators.

Springfield, Mo.—C. A. Bogardus Cartridge & Factory Co. has been incorporated with a capital of $50,000. The principal stockholder, whose name forms part of the firm title, is the world-famous rifle and shotgun marksman. It is said that the company's plant will be equipped with machines, each of which will turn out 75,000 cartridges daily.

Syracuse, N. Y.—The Chase Motor Truck Co. has been formed to manufacture commercial automobiles, including trucks, delivery wagons and business runabouts. Aurin M. Chase is the active partner. The company has leased the building at Nos. 230-232 East Water St., and will make its experimental cars there. It is expected that the first one will be running within four months, and that the cars will be on the market for the selling season of 1908.

Syracuse, N. Y.—The Cushion Wheel & Tire Co. has incorporated to manufacture wheels and tires for automobiles, trucks and friction and transmission pulleys of all kinds. Thomas H. Ward, 421 University Block, is president; Edward L. Woods, vice-president and general manager, and Edward Mitchell, secretary and treasurer.

Changes and Improvements.

Afton, Ia.—In January next the firm of Bolinger & Barnum will be succeeded by Bolinger & Nicholson, Mr. Barnum retiring from business at that time. They handle a large line of sporting goods.

Berkeley, Cal.—A. S. Cooley, for fourteen years identified with the Pacific Hardware & Steel Co., is president of the Cooley Hardware Co., 2125 Shattuck Avenue. This firm opened about Sept. 1. Sporting goods will occupy a large department of the store.

Chicago, Ill.—The Van Doren Mfg. Co. manufacturers of the "Champion" telescopic steel rods, patented, have recently reorganized and moved into extensive premises at 56 to 58 West Van Buren Street, under the management of H. B. Wilson.

Clarksburg, W. Va.—The Acme Fishing Tool Company, of Parkersburg, are moving their Salem branch to this city. The local office and warehouse will be in charge of H. E. Sloan who has been with the company for some time past.

Detroit, Mich.—Morgan & Wright are now engaged in removing from Chicago to their new home in this city. The new plant has been built and equipped specially for their needs. It covers an area of seven acres, the main building being four stories, 300x60 feet, and the equipment being in keeping with the splendid structure itself.

Fort Worth, Tex.—A. J. Anderson has now moved into the magnificent new building at Tenth and Houston Streets, and is conducting a sporting goods business upon a large scale. The building is equipped in modern style and the goods are well displayed.

Fort Worth, Tex.—The Gowin Hardware & Sporting Goods Co. have leased quarters in the new building nearing completion at Main Street and Central Avenue.

Gravette, Ark.—The People's Hardware Company have succeeded to the business of J. T. Oswalt. Sporting and athletic goods are included in their stock.

Hayes, Kans.—The business of C. W. Bell, which includes sporting and athletic goods, has been purchased by H. H. Winters.

Mitchell, Neb.—The Mitchell Mercantile Company have purchased the business of C. F. Johnson. Sporting and athletic goods form an important part of their trade.

San Diego, Cal.—Nichols' Gun Store has been moved to 933 Fourth Street, where gun repairing of all sorts is done.

St. Louis, Mo.—Frank P. Ford has been appointed manager of the sporting goods department of the Scruggs, Vandervoort and Barney Co., who have purchased the retail sporting goods department of the Simmons Hardware Co. on Broadway. Mr. Ford became the official head of the department Sept. 17, succeeding George A. Layford, resigned.

Taunton, Mass.—Ernest Mason has recently retired from the Presbrey-Mason Company, but the business continues in the same style, their sporting goods department receiving special attention.

MANUFACTURERS RECORD

(Continued.)

Kankakee, Ill.—The David Bradley Manufacturing Co., manufacturers of farming implements, with factories at Bradley, Ill., has gone into voluntary liquidation. The liabilities of the company are $790,333, with assets of $1,962,883. The management state that the object of the liquidation is to reorganize the business.

Lancaster, N. Y.—The increase of business at the Lancaster Machine & Knife Works necessitates an enlargement to the plant in order that more machinery may be placed. Two additions will be built, one 40 by 75 feet, the other 40 by 90 feet. The works now employ nearly 100 hands, and when the additions are made the number of hands will be nearly doubled.

Leavenworth, Kan.—The Victor Manufacturing Co., hitherto located at Hiawatha, Kan., has moved its plant to Leavenworth, Kan., where it will soon begin operations with an enlarged plant and other increased facilities. It manufacturers the Wonder Washing Machine.

New Haven, Conn.—The William Schollhorn Co., manufacturer of Bernard's patent pliers, cutting nippers, belt and ticket punchers and bolt clippers, is contemplating important additions to its plant and manufacturing facilities. More than 540,000 has been expended in the improvements.

New Martinsville, W. Va.—The board of directors of the Magnolia Window Glass Co., recently authorized an increase of $10,000 in the capital stock of the company. The stock has been taken by local citizens and the cashiers of three New Martinsville banks. This increases the company's capital stock to $60,000.

New York, N. Y.—Charles A. Schieben & Co. are erecting a ten-story factory building of steel construction and concrete fireproofing, adjoining the Schieren Building, covering numbers 61, 63 and 65 Cliff Street. The building will be 68 by 125 feet in size, with light on three sides, and in addition a 25 by 60 foot court on the north side, with floor levels the same as in the Schieren Building. The structure will be equipped with electric elevators, while electric power and light will be supplied tenants from power in the Schieren Building.

Wheeling, W. Va.—The Wheeling Corrugating Company intends to move a portion of its plant at Martin's Ferry, Ohio, where it has more room.

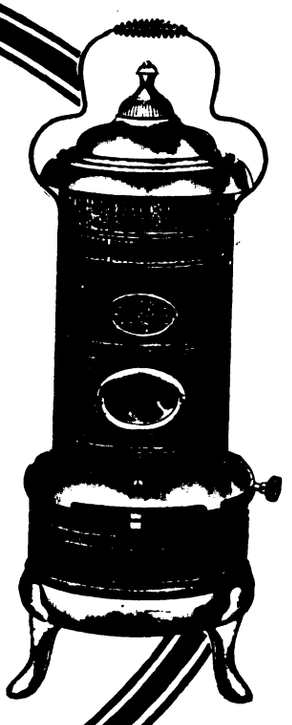
QUALITY COUNTS FIRST

in a Revolver. If you do not wish to sell a customer a second time, then it might pay you to offer him a cheap and worthless weapon on which you make a big profit. If you want his future trade, sell him the famous

H & R REVOLVER

recognized as the greatest revolver value for the money. H & R Revolvers are noted for their accuracy, safety and durability. Made of the best obtainable materials, in a factory fitted with the most improved machinery, operated by highly skilled mechanics; each one is rigidly inspected to insure absolute freedom from flaws of any kind. Every part is accurate to the thousandth of an inch. H & R Revolvers are free from shake or rattle, and if treated with ordinary care will last a lifetime and can always be depended on. When you sell one you make a friend of your customer, and he'll come again to buy cartridges or other goods he may need in your line.



If you have never handled these goods, it is to your interest to put in a stock at once. They are the kind that don't stay on the shelf, and that make satisfied customers. Send for catalogue.

The Chef and The Chief of Roasters

LISK'S SANITARY SELF-BASTING ROASTER

has taken the trade by storm, for on one day, recently, we shipped

Fifteen Carloads of Lisk Roasters

to scores of dealers who had found Lisk Roasters to be a most profitable investment.

No small wonder. The Lisk Roaster is above the ordinary—it is extraordinary. No shrinkage of the roast possible; no basting necessary. Every roast in a Lisk Roaster is "done to a turn" and perfectly roasted.

It's seamless—therefore sanitary. Made of Imperial Gray Enamel used in all Lisk Kitchen Utensils.

Wears like iron—cleans like china—"sells like hotcakes."

Try a sample lot, Mr. Dealer. Our guarantee goes with it.

Lisk Mfg. Co., Ltd., Canandaigua, N. Y.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

Capewell Horse Nails Can Be Used Successfully in Hot and Dry Climates

THE CAPEWELL HORSE NAIL CO., GREAT BEND, N. D.
Harttord, Conn.

Dear Sirs:--

I feel that I owe you a few words of praise for your first-class nails, as I have tried nearly all kinds and find yours the only nail I can drive in **these hard feet of our western horses** without bending the nail, or splitting the hoof, and best of all, every nail clinches without breaking one of them. I consider your nail the best that money can buy. Yours truly,

THE GREAT BEND IRON WORKS,
CHAS. TRITTEN, President

"I consider your nail the best that Money Can Buy."

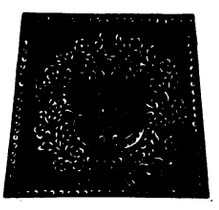
That's IT!

The Universal Chair Seat

It is better and cheaper than cane or leather — more durable than either.



Pretty good proof of their excellence, isn't it, if John Wanamaker and other large Department Stores, as well as the largest chair makers use them?

Try a sample lot. Anybody with a pair of shears can mend any ordinary bottomless chair with **The Universal Chair Seat.** That's why they sell so well. Try and see.

Quality Tells

When Henry Disston was asked the question:
"What do you put in your saws?"
He replied:
"Good steel and honest work."

UPON THIS FOUNDATION IS BUILT
DISSTON QUALITY

"If you want a saw it is best to get one with a name on it that has a reputation. A man who has made a reputation for his goods knows its value as well as its cost and will maintain it."

HENRY DISSTON & SONS., Inc.
Established 1840.

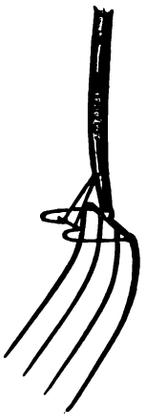
BEST KNOWN, SELL BEST

There is no question about that—it's so with all merchandise.

Take, for instance, the Forks, Hoes, Rakes and other Farm and Garden Hand-Tools we have been making and selling for more than half a century.

The public has learned from *satisfactory experience to depend* upon our brands for all that is desirable in high grade Hand-Tools.

The names of our brands are familiar to tool users everywhere.



And they are *demanded* universally in preference to all others.

They are the best known because they are the best made.
And that is why they sell best.

The standard brands of the world are—

"Ashtabula"	"Ely"	"Harriman"	"Otsego"
"Bolles"	"Ft. Madison"	"Jackson"	"Philadelphia"
"Batcheller"	"Geneva"	"Memphis"	"Utica"

Sold by Leading Hardware Dealers Everywhere

The Shear of The Year

Not How Cheap--But Quality and Durability.

You don't want the Cheapest, but **The Best.** We claim in our **Patent Adjustment Shear** to give you a Shear that has the advantage over other makes of **Quicker Adjustment** and **Longer Service,** combined with **Quality** and **Workmanship.** Requires grinding 1 to 10, that is, other Shears require grinding ten times where ours are ground once. It is not the cutting, but the bearing which dulls the shears.

The **Perfect Feature** of construction of our Shear is the method of drawing the Shear blades together **Without the use of a Screwdriver.** A turn of the milled nut tightens or loosens the blades by forcing the **Forked Head** under the head of the pin which passes through both blades. By a few turns of the milled nut the blades can be taken apart, which eliminates **All Use of the Screwdriver** for taking apart, or taking up lost motion.

Send for Circular and Trade Prices.

GET BUSY

That is the one secret of success in the Hardware trade.
The rapid sales and quick turning over of capital that

A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

The Crystal Coffee Mill

THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

The Jewel Coffee Mill

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

THE FAMOUS GEM is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

The Gem Mop Head.

THE EIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

A Message of Profit to the Dealer

Aluminum Oil Heater

Spells "*Profit*" for you, means quicker sales, more sales, pleased customers, no dead stock on hand.

The "why" of it contained in one comprehensive word—Quality.

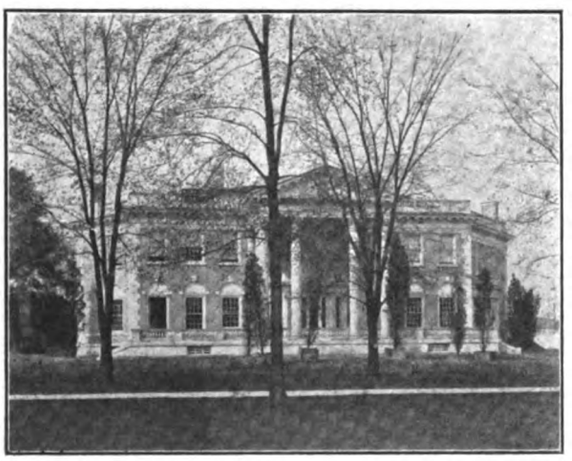
The Aluminum Oil Heater never gets out of order, never gives poor service, is so simple that a child can operate it.

In f ct, a heater that *never* smokes, *never* smells, cannot possibly explode, has perfect combustion, radiates heat from sides and bottom as well as the top, cannot but give *full* measure of satisfaction.

That description fits the Aluminum Heater to a "T."

Our Grand Safety Burner holds the attention and interest of purchasers *at once*. It is so good, so safe, so *practical* that they cannot get away from it.

The exterior is in no way behind the interior. It is handsome and showy.



Try a sample order from your jobber or from us. Let us send you our helpful booklet.

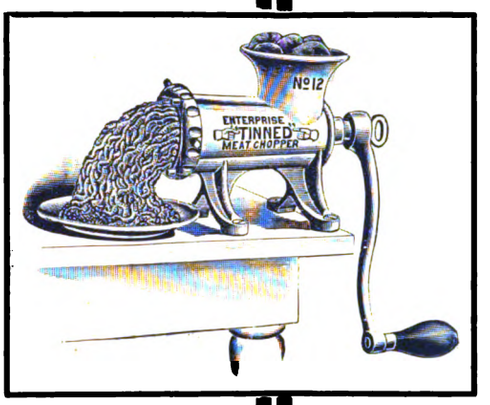
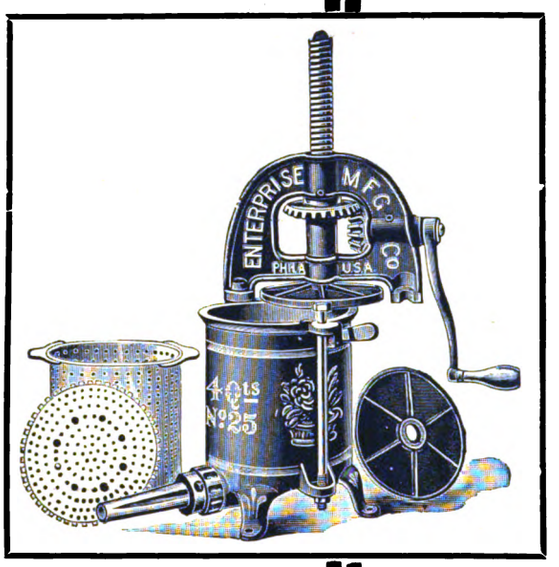
PRISE

Just glance through the 1906 edition of the Enterprise catalogue and see if you are doing all the business you should with **Meat and Food Choppers.**

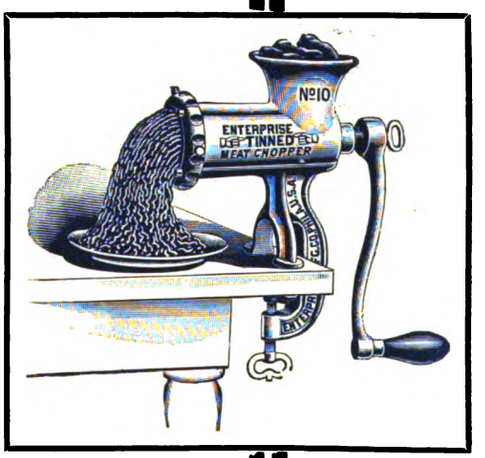
From the small family size, at $2.00, up to a fifteen horse-power electrically-driven Chopper, we can furnish a "knife and plate" Chopper for every possible use.



These are the choppers that first introduced a perfect method of chopping and they have remained for years without serious competition.



They are the only choppers that cut perfectly every tendon and piece of gristle.



The popular sizes, Nos. 5, 10 and 20, have a wonderfully quick sale to families, boarding houses, hotels and institutions.

The Enterprise Sausage Stuffer, Lard and Fruit Press is bristling with good points and patented features that make it the quickest selling and most satisfactory machine on the market. Are you posted on it, stocked, and prepared with advertising matter to push it?

If you haven't the catalogue, write

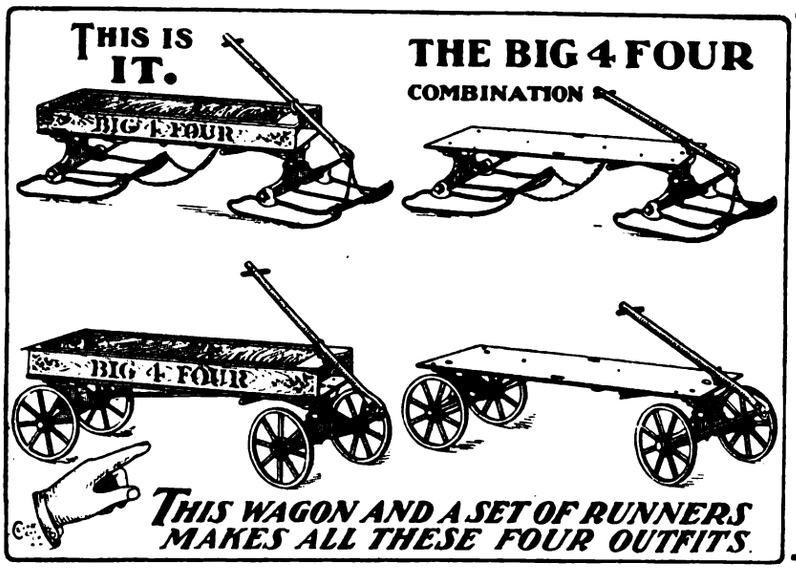
There's Nothing to Fear From the Elements

when your roof is covered with

MF

ROOFING TIN

In case of fire from without it does not ignite; from within, it soon smothers the flames; wind cannot get under; rain cannot beat through; a snow load—the worst of all pressures—creates no damage, while freezing and hail will not crack or destroy this superior commodity.



Think over all other roof coverings and see if such claims can be truthfully made for any of them, then take into consideration the moderate cost and long life of MF Tin, and decide for yourself which is the most practical material for you to use.

Our booklet "From Underfoot to Overhead" tells how "MF" is made. We want you to have a copy and will gladly send it if you will write us.

Big 4

Handier than a wheelbarrow for most purposes round anybody's house, store, farm or factory, besides furnishing great sport for the youngsters. These *best boys' outfits, built in America*, are being sold by over 2,000 dealers in the United States and Canada, and they are the up-to-date progressive sort too. It's a credit to any dealer to handle goods having the character and quality of this line; we make several different styles and sizes; they sell well the whole year through, but are especially great for the holiday season. There is nothing built for money that will give a boy so much real healthy pleasure all the year around. They are unequalled for strength and durability; wagons that we sold over five years ago are still doing good service. Carefully packed for shipment to any part of the world. Catalogues on request.

WHITE WAGON WORKS,

WARNING!

To whom it may concern:-

We have been advised that the Automatic door closi g device made by the American Hardware Mfg. Co., of Ottawa, Ill., and put on the market under the name of the American door catch, is an infringement on our rights under our letters patent, No. 652,828, dated July 3, 19 0. We have accordingly brought suit for infringement against the American Hardware Mfg. Co. in the United States Court. All persons are hereby warned against making, selling or using the device known as the American Door Catch, as we shall vigorously protect our rights.

THE E. L. WATROUS MFG. CO.,
Des Moines, Iowa.

FUN FOR ALL ALL THE YEAR

THE WABASH COASTER WAGON

sells readily at a good margin of profit. Guaranteed to give satisfactory service.

THE WABASH COASTER WAGON is a substantial, general purpose wagon, 34 inches long, 16 inches wide; large, roomy box of hard wood, removable. Well balanced to prevent tipping. Turns easily on narrow walk. All wheels (our exclusive Wabash patent) are 11 inches in diameter—of wide tread, on steel axles, no bumping or pounding. A nobby, solid wagon in which any youngster will have pride and pleasure.

STEEL KEGS
make the best
PAINT POTS

STEEL LEAD KEGS

ARE NON-ABSORBING, AIR-TIGHT AND NON-INFLAMMABLE

Lead Makers & Grinders

increases your margin of profit by decreasing your claims for caked lead and kegs damaged in transit.

The modern method of doing this is to pack all lead in non-absorbing, air-tight, non-collapsible steel kegs.

Lead in steel kegs is always soft when the keg is opened, because there is absolutely no oozing out of oil or penetration of air, to dry the lead.

Steel kegs need no coopering. They are therefore more quickly and economically filled than wooden kegs.

Remember also, that

The Paint Dealer

through whom you market your product prefers to handle lead packed in steel kegs because they are much cleaner, and his fire hazard is greatly reduced.

Steel kegs being non-absorbent, oil-soaked kegs and floors are eliminated, and with them the unclean conditions which are invariably found in the stock room.

Fire insurance should consequently cost less than where oil-soaked, inflammable wooden kegs are a part of the stock.

The Master Painter

prefers steel kegs because they eliminate two channels of loss. Steel kegs being air-tight and non-absorbent every ounce of lead he pays for is soft and usable.

The friction-top cover eliminates the soaking of lead-laden cover splinters in turps in the effort to reclaim several pounds of adhering lead.

Steel kegs make the best paint pots. Old paint is quickly removed with a torch or turpentine. Why let the painter keep paying 25c. each for tin pots, when, through buying your lead in steel kegs he gets a Steel Paint Pot as a bonus.

HARDWARE

Wm. Henry & R. E. Bell Hardware Co., Fort Worth, Texas, have announced that they have disposed of their retail Hardware business to Wm. Henry & Co., and incorporated the company at Fort Worth, who will conduct an exclusively retail Hardware business on Houston Street between Ninth and Tenth Streets. As the Wm. Henry & R. E. Bell Hardware Co. will devote their time in the future strictly to wholesale Hardware, there is no connection between them and the new concern.

MEETING OF TIN PLATE AND METAL DEALERS OF THE UNITED STATES.

According to previous announcement the tin plate and metal dealers of the United States met in executive session at the Marlborough-Blenheim Hotel, Atlantic City, at 10.30 A. M. on Tuesday. P. R. Jennings, of the firm of Bruce & Cook of New York City, called the meeting to order and was unanimously selected to act as chairman. A. J. Cohen, of the Merchant & Evans Company of Philadelphia, acted as secretary.

Mr. Jennings stated that the meeting was called for the purpose of discussing the affairs of the dealers in tin plate and kindred metals and their relations with the manufacturers of these products. The points discussed were enumerated under various heads and considered separately, and resolutions were adopted expressing the combined sentiment of the meeting thereon. These resolutions were referred to a special committee consisting of P. E. Strauss of Boston, Henry Reese of the firm of E. L. Parker & Co., of Baltimore; P. H. Jennings, George T. McIntosh, of Cleveland, and A. J. Cohen of Philadelphia, who were instructed to consider the resolutions as prepared and confer with the manufacturers of tin plate with the object of bringing about the improvements suggested in the resolutions as to the conduct of that business by the manufacturers and jobbers. The meeting reconvened in the afternoon and the subject was further discussed. At a session at 8.30 P. M. Messrs. Theodore A. Gessler of New York, and W. J. Webstein of St. Louis, representatives of the American Sheet & Tin Plate Company, addressed the delegates.

Adjourned to meet at same time of next annual meeting of National Hardware Association.

DEATH OF HENRY C. SQUIRES.

Henry C. Squires, of Henry C. Squires & Son, 44 Cortlandt Street, New York, died suddenly of heart failure on Monday, October 15. Mr. Squires had been apparently in his usual good health, having attended a family reunion but two days before. Mr. Squires was born in Binghamton, N. Y., May 13, 1838, and started in business in New York in 1871 as a partner in the firm of Smith & Squires, in Chatham Street, now Park Row, nearly opposite the entrance to the Brooklyn Bridge. Later he moved to 1 Cortlandt Street, in the Benedict Building, where he remained 12 years as Henry C. Squires, going thence to 178 Broadway, opposite, where he continued for 10 years, when the business was moved to 20 Cortlandt Street, in May, 1892, and from there recently to the present address, where the entire building has been taken. In January, 1892, Mr. Squires took his son, G. Harry Squires, into partnership, who will continue the business. The house always kept a high grade of material, and for over 30 years has represented as exclusive agents in the United States, the well-known house of W. W. Greener, London, England, which manufactures Shotguns, Rifles, Pistols, etc., of the finest quality.

WILLIAM H. COLE.

William H. Cole, who is long known to the Hardware trade through his active connection with the Tower & Lyon Co., of New York, occupying the position of treasurer, has recently established himself with the Oliver Bros.' Purchasing Co. of 127 Duane Street, New York, buyers for jobbers and contractors in Hardware, iron, steel, mill, railway and mining supplies. The arrangement made will include not alone the supervision of office work, but will include a visiting of out-of-town patrons as well, a position which will enable his wide acquaintance with the trade to be made useful, and indicate the popularity which he has always enjoyed in this congenial pursuit.

♣

Mobile, Alabama, seems to be well named. The dictionary says Mobile means "capable of being moved," and the recent big storm not only proved that it was Mobile, but that it automobile a little further inland.

BUILDING SUPPLIES IN DEMAND.

SOUTHERN FRANCE PRESENTS SUPERIOR MARKET FOR GOODS.

According to Vice-Consul A. Piatti, the activity in the building industry, already reported from the Nice consulate, continues unabated. Mr. Piatti writes:

This fact is of special interest to our manufacturers, and especially for the reason that the grade of buildings is continually improving and also that there is a disposition which did not exist before to introduce materials of better quality as well as modern improvements hitherto unknown here. As an illustration I may mention that the use of wood and parquet floors was a few years ago confined to a very few luxurious and expensive buildings, whereas to-day they are used to the extent of not less than 30 per cent. of all the floors built here. One concern alone, having its factory in the neighborhood of Grenoble, informs me that in the past twelve months they have put down at least 400,000 square yards of wood and parquet floors. These cost, laid down, as follows: Floors of ordinary white pine, 90 cents per square yard; of pitch pine, $1.40, or if in pieces 20 by 4 inches by ⅞ inch, and laid in parquet designs, $1.60; of Burgundy oak, 8 by 3¼ inches by ⅞ inch, parquet, $2.20, and of Hungarian oak, 16 by 2½ inches by 1 inch, parquet, $2.60 per square yard. Pitch pine is a very favorite wood here, and the price of boards in the rough has advanced 20 cents per square yard in the past six months.

The item of heating is also receiving attention, for despite the apparent thermometrical mildness of the climate the absence of proper heating has resulted in general complaints on the part of visitors, many of whom have not hesitated to say that they had not known what cold was until they came to Nice. The result has been that many owners are putting in heating plants, and that such are being ordered for the new buildings being constructed or being contracted for. Here again is an industry in which American manufacturers should in all reason have a virtual monopoly of the supply by the force of things, for it must be admitted that no others can compete either in price or excellence. In a previous report this consulate mentioned the case of a heating plant, which had been put in a house here, consisting in a great part of American materials, but which were sent here from Switzerland. It will readily be understood that at this rate heating appliances cannot be expected to become popular, or indeed be within the reach of the average buyer.

A MARKET FOR AMERICAN GOODS.

The same conditions exist with regard to building Hardware. During the past few years a few specialties in the shape of American locks have come into use, but this does not, in my opinion, represent even a fractional percentage of the field open to such and kindred articles. An active representative on the spot with a series of popular samples, and prepared to sell goods delivered at Nice, could in a very short time be in possession of the market here. If there be a department of manufacture in which the prices and features of the American article would appear to leave no loophole for foreign competition, building Hardware is one.

As another instance of this I shall mention the case of an architect who, upon examining with me the catalogue of a firm in America manufacturing doors and windows, said, when we came to the question of prices: "It is not possible. I cannot believe it. There must be a mistake." In this instance I had figured out that hard-wood doors would cost here, laid down, less than the most ordinary thin pine doors sold locally.

In a few words, this market is to-day absolutely at the option of our manufacturers, who by proper and, if necessary, concerted effort might secure openings which would result in a trade bound to increase in the years to come. But the French buyer is not the man to study a catalogue not in his language, ascertain the rate of freight and the duty. He is accustomed to buy his merchandise delivered at the harbor or at the station, and to attempt to work out the items of cost of foreign goods appears to him like taking a leap into the unknown and through which he is bound to be the victim.

♣

The railroads of this country are straining every nerve to comply with the new law—wherever that law gives them the advantage over the shipper.

HARDWARE

DEVOTED TO THE AMERICAN HARDWARE TRADE

PUBLISHED ON THE 10th AND 25th OF EACH MONTH BY
HARDWARE PUBLISHING CO.
309 BROADWAY, NEW YORK

SUBSCRIPTION $1.00 PER YEAR. TO FOREIGN COUNTRIES $2 50

T. A. MACINTYRE, - - - - - - President.
J. H. EDWARDS, - - - - - - Secretary and Treasurer
HENRY HOPKINS, - - - Editor.
J. W. PENTZ, - - - - - General Manager.

OCTOBER 25, 1906

ANNOUNCEMENT.

Owing to the death of Mrs. Thomas A. MacIntyre, the management of Hardware Publishing Company passed to Messrs. Thomas A. MacIntyre, William L. Martin and John H. Edwards, Trustees. Mr. MacIntyre succeeds Mrs. MacIntyre as President, and Mr. J. H. Edwards has been elected Secretary and Treasurer to succeed Mr. A. P. Mitchell, who on this date retires from all connection with HARDWARE.

Mr. Henry Hopkins remains as Editor of HARDWARE and our former Advertising Manager, Mr. J. W. Pentz, assumes the position of General Manager.

It shall be the sincere purpose of the managers of HARDWARE to serve as efficiently as in the past the interest of the American Hardware trade, to which it has been so long devoted, and in every way endeavor to increase the usefulness of the publication to its readers and its advertisers.

NEW YORK, OCTOBER 23, 1906.

Editorial Trade Review

Will this condition of general prosperity last through another year, is the question that is agitating the consciousness of the general buyer. It could not be more promising than it is at the present time, the only fear that seems to possess the trade and distract its equanimity being that the goods they have ordered for their current sales will not come to hand in due season and alleviate a natural distress. It is not prices, although in some goods they have made noted advances. Those in which copper is the principal integral part are the principal ones, but the manufacturers have been so flooded with orders that it is the most natural thing in the world to hear they are months behind their orders, and wonder if yours is among the number.

Effort is being made by the manufacturer to share in the general prosperity by deliveries upon the orders that crowd his facilities with the congestion of activity, but he feels a sense of inadequacy to accomplish more than fairly keeps his customers quiet in the hurly-burly of which they are themselves the creators. Representatives are no longer solicitous of big orders to form bones of contention in the future. The question is frequently asked when a want is sufficiently developed to prepare for: "Have you got them in stock?" If you have, the prevailing price is rarely asked. It is "Let us have the quantity called for, as we want them to fill orders."

Some of the manufacturers of heavy goods have notified the trade that the old-established custom of 60 days or 2 off for cash will have to be abrogated this season, as profits are cut so close and conditions are so opposed to heavier advances that even this state of affairs is improved by the unexpected change. But the jobbers take it rather hard that they have to stand for the change when they themselves cannot do it so readily, and change the terms to retailers who are so largely in the majority.

The condition of the money market in the midst of all this prosperity is by no means easy to comprehend. It has been the prominent worriment of the bankers and brokers for weeks back, whether it is in too little currency to reach all hands in the way of bank accommodations, or what. It is felt severely, and all departments of trade are agitated. And to be called upon to furnish the cash in half the time, if it goes through other branches of the trade besides heavy Hardware, will certainly prove unpopular. The liberal terms which have been so freely given by jobbers and manufacturers have no doubt been abused so often, a change in this respect might bring them nearer the cash.

The trade in the South has been affected very greatly by the rain of several weeks in some sections. The reports during its continuance were feared to have a bad effect upon the growing crops, especially of the great staple, cotton, but they were as usual greatly exaggerated and the damage done not as extravagant as at first supposed. The present price of cotton is looked upon with some complacency, and business has greatly improved as the wet weather has subsided, so that now they may look for a continuance of the prosperous conditions which the merchants of the South have felt was theirs to command.

The exercise of patience is called upon now by all hands, and in every direction and in every description of goods it will be found a commendable virtue. When lines of transportation are overworked in efforts to better delivery; when the elements of car shortage enter into the question of delayed deliveries, the amount of merchandise "on the way" alone may prove considerable and should yield good results.

THE STRANGER WITHIN THY GATES.

Never fail to make some special friendly advances to a stranger purchaser. He may be a new-comer in the neighborhood; if so he wants to get acquainted with the neighboring tradesmen and is looking for his future Hardware home. If not a new-comer he may still be in the course of transition to some new allegiance.

Even if but a transient awaiting a train we should always remember that his impression of the town depends in a great measure upon his treatment by the few with whom he comes in contact and that a good impression, by a stranger, of the town is ever liable to bring harvest in some unexpected form.

The salesman who neglects to get somewhat acquainted with his customer or at least to make a gentlemanly effort in that direction is remiss in one of his most important duties of salesmanship, no matter whether the stranger proves to be a resident of the next block or of another world.

The dealer who neglects to give the stranger whatever personal attention it is possible to give him, if that only be a pleasant word and smile in passing, and who afterwards fails to ask his clerk about the customer, is remiss in his duty and is encouraging inattention in his employees. Such personal attention would of course be an impossibility with the head of a great establishment, but no concern should ever grow beyond the point where it is possible for some one with more authority than the clerk's to take time for being courteous to the stranger who, on his first visit, more than ever again, is susceptible to the treatment he receives.

Digitized by Google

THE PRICE OF GOOD WILL.

We get, in a measure, as we give, although the giving must be in advance. The clerk must earn more than $10 before he can expect to be advanced to $12. So his employer must win the good will of the town by long, hard effort, before it is bestowed, and good will is too valuable an asset to be earned cheaply.

Many a man has felt that his loyalty to his town has hardly been appreciated just because he had to earn appreciation in advance of its being given to him. He has subscribed to the new industry only to see the benefits of its output go to some successful rival. He has made liberal church donations and seen the leaders of the churches trade with his more aristocratic neighbor. He has championed reforms that have been turned against his own interests. Has voted for improvements that were not in his line and only added to his taxes. Has encouraged local industries with his patronage only to be underbid by some out-of-town contractor for the next bit of public work. He has advertised in the struggling local paper just to help it along and hardly gotten a "thank you" for his pains. He has tried to speak with due enthusiasm on the attractions of the place when those that are the freshest in his mind are his receipts for rent and taxes. But some day, when his fire won't burn and the apples are sour, let him think it over carefully; how much, after all, he has received for what he has given.

The new industry has added much to the purchasing power of the town and of his customers. No one can doubt that the church influence has diverted more of the town's wealth into legitimate trade circles, into houses and homes, than would otherwise have gone there. Perhaps the advertising may seem meager in direct results; is it not something to arouse by means of the paper more of a local interest in the place; a local feeling, local ideas, local discussions, local trade announcements for the perusal of the local public? Even the unsuccessful bid may bring his existence to the attention of possible customers of whom he never heard.

A great deal of this good will acquisition must ever be of the vapory, uncertain value that cannot be measured in pounds and ounces or paid for by the yard. Part of its returns consists in the pleasure of the giving; yet withal, it is a good investment from the business standpoint; one that cannot be won by gifts of dollars and cents alone but requires hard, patient effort. A good deal of the gaudy appreciation that seems so glittering in the distance is only a tinsel imitation that is purchasable and is very different from the solid article that only comes through the universal confidence and respect won by honest effort, kindly attention, and unflinching loyalty.

THE QUESTION OF PRICE.

Never ask an intending purchaser to quote a price upon the goods he wishes to examine unless you know him personally and know that he is familiar with both qualities and prices. It is one of the prominent lesser abominations with the average man, though one that to the salesman with his specialist's information seems a perfectly legitimate inquiry. "About what price do you wish to pay?" sounds like a reasonable question, as it may be, if the article inquired for is one that is purchased often enough to render some idea of its price the property of all men; but if only purchased once or twice in a life-time, very few will know much about what they ought to pay and feel at a loss how to answer. They want their money's worth. Probably they want as low a priced article as will give reasonable satisfaction. That may mean $5 or it may mean $10 so far as they know. They have to have the article and are at the mercy of the market. They do not care to say $10 and then find out that a $5 article would have done as well. To let them say $5 and then tell them that there is nothing on the market so cheap as that gives them a cheap position that is humiliating and it is never wise to humiliate a man whom we wish to secure as a customer.

The salesman knows the article inquired for, its variations in price and quality, as nine cases out of ten the inquirer does not; it is his place, a part of his skill, to determine his man without making him feel either foolish or soaked. If the customer is an entire stranger and his circumstances unknown, display an article about as low in price as usually seems advisable to buy for all-around purposes, and one of the next two or three higher grades. State that they may be shown up to so-and-so in price and down as low as something else; that gives him a foundation upon which to build his selection; is one of the ways you can assist him without making him display his ignorance.

There ought to be no fear of losing a little on the extent of the sale by bringing into notice a lower-priced article than might have proven necessary. It is the salesman's place to bring out the superior value in the higher-priced article; if he cannot do that, the needed quality is lacking either in the goods or in the salesman. A little discretion will very readily show about what grade of goods is wanted; then if one or two upward steps from what is under consideration seem advisable, let the superior merit of the higher-priced article for the purpose intended be pointed out. This may be in the quality, the looks, the wear, or it may be in some attachment that extends the uses of the implement enough to more than make the difference in the cost. These are all matters of variable relative importance that can be determined through discrete salesmanship. Certainly it can be done without requiring a man to furnish his own quotations on himself.

LEGAL CORRESPONDENCE

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

STAY OF EXECUTION IN PENNSYLVANIA.

Question: (1) If we sue a party for a bill of goods that has run two (2) months past the terms given him, which were sixty (60) days and we charge him interest at the legal rate for Pa. and he tends us a check with no interest added, after he has been sued, can he take a stay of execution after the time set for the trial, at which he was not present, and what is the limit to a stay of execution; that is, how long a time can he take to pay the amount if he is willing to pay such costs as may be assessed on him.

(2) If the above mentioned party offered to settle with the constable for the amount of the invoice on presenting the summons and the constable not having the amount of the charges promised to telephone the amount and stated they would only be his carfare, but in calling up the Alderman finds there is a charge of three dollars and some odd cents—can an alderman demand such an amount, after our customer promising to pay the account when presented?

(3) Kindly let us know what the charges would be providing the constable had the amount and could have made a settlement when the summons was presented and what they would be for. Y. H. Co.

Reply.—(1) While we do not profess to advise as to local points of practice, and your question does not even state the court in which your action was brought, or the amount for which you sued, yet we judge that your case was brought in a justice's court and therefore comes within the provisions of the following statutes:

"Where defendant does not appear upon summons on the day appointed the justice may, on due proof by oath or affirmation of the service of the summons, give judgment by default against the defendant, allowing 20 days for an appeal if the defendant be a freeholder; if defendant be not a freeholder the justice may issue execution. *If defendant within 20 days after such judgment shall enter bail and pay costs on execution he shall be entitled to an appeal or stay of execution.*" (Brewster's Pr. Vol. 1, p. 582.).

"Where defendant is a freeholder, or enters bail, and the judgment rendered shall be above $5.33 and not exceeding $20 there shall be a stay of execution for three months; and where the judgment shall be above $20 and not exceeding $60, there shall be a stay of execution for six months; and where the judgment shall be above $60 and not exceeding $300, there shall be a stay of execution for nine months." (Brewster's Pr. Vol. 1, p. 602).

(2) We do not understand your second question.

(3) We cannot advise you as to the precise amount of a constable's or justice's fees. These are public officers and presumably they would not charge fees to which they are not entitled by law.

IMPRISONMENT FOR DEBT IN NEW YORK.

Question: Can a man be imprisoned for debt in the State of New York?

Reply.—As a general rule a man cannot be imprisoned in New York for any debt arising out of contract. The principal exception to this rule is in cases where the debtor has been guilty of fraud in contracting or incurring the debt, or has removed or disposed of his property with intent to defraud his creditors. In such cases he is still liable to arrest and imprisonment.

MARRIED WOMAN NOT LIABLE IN NEW JERSEY AS ENDORSER FOR HER HUSBAND.

Question: A married woman in New Jersey indorsed her husband's note to give credit to it and the note is discounted at a bank. The note was made and dated in New Jersey. Can she be held liable on the note?

Reply.—By the Laws of the State of New Jersey, a married woman is not liable as an accommodation indorser, guarantor or surety, unless it appears that she or her separate estate has derived some benefit from the contract. If the note was made and dated in the State of New Jersey, that would be sufficient to indicate that the contract was a New Jersey one and to put the bank discounting the note upon inquiry. We think as a general rule she could not be held liable for such an indorsement. If the note had been made and dated in New York and contained nothing on its face to apprise the bank or person discounting it that it was a New Jersey note, then a different rule would be applicable, and the note might be enforced by a bona fide holder, even in the Courts of New Jersey.

THREATS NOT ENOUGH TO CONSTITUTE DURESS.

Question: A husband threatened his wife that unless she would sign a note with him, she would never live in peace with him again. She signed the note because she was thus coerced into doing so. Can she escape paying it on that account?

Reply.—We think not. A person may avoid a contract into which he or she has entered on the legal ground of "duress". But duress means some improper restraint or coercion effected either by actual confinement or by threats of injury to life or body or threats of unlawful imprisonment. This case does not constitute duress within the meaning of the law, and hence does not present a sufficient reason for avoiding the note.

KRICK'S SAFETY JOCKEY STICK.

Theo. J. Ely Mfg. Co., Girard, Pa., are introducing to the trade Krick's Safety Jockey Stick, of which we give an illustration. The mechanism is all inside of the Stick or handle, and cannot displace the snap by coming in contact with the hands. The rod turns the handle, filling the office of a swivel, thus avoiding the liability of unsnapping. If the Stick should break, it is still strong enough on the rod to insure safety. The Stick has an expansion chain, which is necessary to compensate for the motion of the head, and the chain can be controlled from the rear of the Stick. The device is 4 feet, 9 inches long, including chain, and affords safety in the handling of vicious horses and cattle. It attaches to the ring in the nose; a snap cattle leader, halter, bridle, ring strap, etc. Packed one dozen in a bundle.

TRADE MARKS IN CUBA.

Manufacturers of the United States who have thought of exporting their goods to Cuba should register their trade-marks in that country at once as the only method by which they may protect themselves. If owners do not register their marks others will, and the owners will be compelled to buy out the speculator if they wish to sell their own goods under their proper names. When once registered by speculators, the real owners of trade-marks are at a great disadvantage, and must, either by paying royalties or direct purchase, buy up the speculators.

The Habana Chamber of Commerce, recognizing the great injustice that is being done in this way, is urging foreign manufacturers in their own behalf to register their marks before others do so, and thus practically confiscate their property. The dues charged in Cuba for the registration of a trade-mark are $12.50 United States currency.

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED OCTOBER 8, 1906.

412,275. Mortising Chisel. A. P. Lanterman, Chicago, Ill.
412,318. Mop. I. E. Youngblood, Mitchell, S. Dak.
412,373. Nut Wrench. P. R. Erickson, Ishpeming, Mich.
412,390. Tool Handle. J. S. Jaquith, Sierra City, Cal.
412,479. Handle for Tools or Other Articles. C. A. Davis, Washington, D. C.
412,493. Weather Strip. W. H. Fye, Chicago, Ill.
412,533. Washing Machine. N. D. Oliphant, Meade, Kan.

PATENTS ISSUED OCTOBER 9, 1906.

832,603. Door Holder, Check and Closer. J. C. Fritts, Newark, N. J.
832,604. Combination Padlock. A. B. Gallor, Stamford, Conn.
832,607. Hinge. M. Hauser, Toledo, Ohio.
832,787. Washing Machine. W. C. Foster and L. E. Garrison, Kalamazoo, Mich.
832,788. Attachment for Window and Door Screens. J. A. Gee, Cripple Creek, Colo.
832,789. Dinner Pail. L. C. Harding, Mannington, W. Va.
832,804. Tool. G. W. Oneal and J. B. Pearson, Plumerville, Ark.
832,814. Combination Tool. C. E. Roth, New York, N. Y.
832,941. Saw Set. H. W. West, Victoria, British Columbia, Canada.

PATENTS EXPIRED OCTOBER 15, 1906.

412,719. Washing Machine. G. M. Beck, Lebanon, Ind.
412,786. Nut Lock. F. Post, Baton Rouge, La.
412,831. Spike. L. A. Power, Wilmington, Del.
412,842. Carpet Stretcher. C. F. Cooper, Cedar Rapids, Ia.
412,857. Post Hole Auger. D. B. McCall, Yarrellton, Tex.
412,867. Key Hole Guard. C. D. Williams, Phila. Pa.
412,895. Signal Lantern. A. F. Frahm, Indianapolis, Ind.
412,957. Auger Bit Die. C. H. Irwin, F. L. Hoeffe and J. W. Simmons, Wilmington, Ohio.
412,977. Permutation Lock. W. F. Peters, Cincinnati, Ohio.

PATENTS ISSUED OCTOBER 16, 1906.

833,266. Latch Mechanism. H. G. Voight, New Britain, Conn.
833,267. Latch Mechanism with Automatic Detent. H. G. Voight, New Britain, Conn.
833,302. Lock. A. V. Chisholm, Cambridge, Mass.
833,316. Hinge. G. C. Gardner, Chicago, Ill.
833,331. Window Lift. C. Michaelis, Omaha, Neb.
833,354. Earth Auger. C. L. Tuttle, Rochester, N. Y.
833,422. Food Chopper. J. H. Snow, New Haven, Conn.
833,516. Pipe Wrench. M. G. Ewer, Detroit, Mich.
833,712. Hand Tool. H. Geisenhaner, Schnectady, N. Y.

WHAT HE WOULD DO.

"In this instance," explained the professor of surgery, to the group of medical students, "the left leg of the patient is somewhat shorter than the right limb, thus causing the patient to limp. Now, Mr. Fresh, what would you do in a case like this?"

"Well," responded the alert Mr. Fresh, "I guess I'd limp, too."

SPORTING GOODS IN THE HARDWARE TRADE.

The avidity with which Hardware dealers are branching out by including a traffic in sporting goods as a part of their business is an indication that they appreciate the opportunities that are presented by catering to the lover of outdoor sports. They are beginning to see that there isn't a line more pleasant or more profitable for a wideawake merchant to handle than a carefully selected stock of sporting goods. To begin with, sporting goods are attractive of themselves. When a man goes into an establishment and buys a tool or other article of Hardware he does so because he needs it—there is no special enthusiasm about the matter; the purchase simply represents the acquirement of a necessary item of expense. But there is an entirely different reason that inspires a man to purchase a rod or a gun. These articles appeal to him through his love of recreation and outdoor sport and he is willing to spend just as much as his purse will allow, while in buying Hardware goods he will expend just as little as he possibly can and obtain the desired quality and durability. For proof of the sportsman's regard for the articles that furnish him pleasure, note the man who pays from four to six times as much for a handsomely finished and engraved gun when he knows that a cheaper gun without the trimmings, made by a reputable manufacturer, will give just as good service at trap or in the field, and last just as long. A man who can catch just as many fish with a $3.50 lancewood rod will pay from $10 to $25 for one of split bamboo if he can afford it. It marks the difference between Hardware and sporting goods. One is a necessity, the other a luxury; one is a matter of business, the other a matter of sentiment and pleasure.

To continue this comparison, if a man has a fairly complete kit of tools he is not going to make an addition to it until impelled to by absolute necessity. On the other hand, a man may have a cabinet full of guns or rods, but he will always want just one more, and he usually gets it as soon as a new make strikes his fancy and he can afford the expenditure. A sportsman is a good purchaser because he is continually on the lookout for novelties and will often stint himself in order to add to his outfit some new article that has caught his eye. The field for the exploitation of sporting goods by the dealers is many times larger today than it was a decade ago. Then the sportsmen were just numerous enough not to excite any special comment. Today the man who does not indulge in hunting, fishing, canoeing or some other branch of sport is a rare specimen. The fortnight vacation and the Saturday half holiday during the summer months are now so generally established in the United States and the opportunities they allow for the enjoyment of outdoor sports is so well appreciated and so generally grasped that manufacturers of many lines figure their unit of product in thousands instead of by the hundred. As a consequence of the manufacture of sporting goods in large quantities the cost of production and the retail selling prices have decreased to such an extent that the man of moderate means can equip himself with an outfit which only a few years ago none but the fairly well-to-do could have owned. The deduction from this is, of course, that where the market formerly catered to tens it now appeals to thousands of purchasers. Even if this demand were confined to rods and guns it would mean a brisk business, but the moment a man owns a shot gun or rifle he becomes a prospective purchaser of ammunition, cleansers, reloading tools, decoys and the numerous other articles that go to make up the hunter's equipment. Likewise the owner of a rod and reel must have lines, hooks, floats, minnow buckets and similar kinds of tackle. All things considered, the sportsman is one of the best customers that favor any branch of trade, and the dealer who interests him will find it profitable.

A YEAR'S FIRE LOSSES.

We have in the United States 11,500,000 buildings, valued at $14,500,000,000, or more than all the railroads in the country put together, and of all these just one is absolutely fireproof. That one was built in Chicago by the great insurance companies for a testing laboratory. There are 4,000 nominally fireproof buildings. Yet the one actually fireproof building, according to *Collier's*, cost only 12 per cent. more than a building that would shrivel up at the first breath of an advancing fire. In 1905, which was a normal year, we spent $500,000,000 for new buildings and burned old ones to the value of $200,000,000. We paid $300,000,000 for fighting fire and $196,000,000 in fire insurance premiums, of which we got back $95,000,000 from the companies in payment for losses. Hence it cost us more to burn part of our old buildings and protect the rest from burning than it did to put up all our new ones. And that was a normal year. This year is not normal. This year San Francisco has raised the fire losses of the United States to $500,000,000, even if we do not let another city burn down between now and next January. If we should burn up the whole of our bonanza wheat crop we should think the country had suffered a calamity, yet it is doubtful whether that whole crop would pay for the property we actually have burned and are burning this year. Our entire year's gold supply would not pay for a sixth of it. The entire gold production of the world would not come anywhere near paying for it all. The $500,000,000 worth of buildings which we put up in a year to burn down would cost about $550,000,000 if they were built not to burn down. For the extra $50,000,000 we could save most of the $500,000,000 we pay in normal years for fires and fire protection. In other words, we should have the equivalent of another wheat or cotton crop added every year to the national wealth.

Legal Matters

OF INTEREST TO HARDWAREMEN

INSURANCE—POLICY—ASSIGNMENT—INTEREST.

The Kentucky Court of Appeals held, in the case of Bramblett vs. Hargis, that the assignment of a policy life insurance to a party not having an insurable interest in the life of the insured is against public policy and void as between the parties; that to make the sale or assignment of a policy of life insurance valid as between the parties, the assignee or purchaser must be related to the insured in such a degree as would authorize him to take out insurance on the life of the insured, or he must be a creditor, and if a creditor he can only participate in the proceeds of the policy to the extent of the indebtedness the policy was sold or assigned to secure, and that a policy of life insurance or other property pledged to secure a particular debt cannot be held by the pledgee to cover other debts due him by the pledgor.

CORPORATION—EMPLOYEE—PATENTS.

The United States Circuit Court of Appeals for the Third Circuit held, in the case of The Pressed Steel Car Company vs. Hansen, that the fact that a person engaged at a large salary to take charge of the engineering and manufacturing department of a corporation and assumed the duty of improving its product and devising and designing articles for its benefit did not require him as a matter of law to assign to the corporation patents so designed.

BOTTLING COMPANY'S LIABILITY—INJURY.

The Supreme Court of Georgia held, in the case of Watson vs. Augusta Brewing Company, that a company manufacturing and bottling a beverage was liable to a person injured by swallowing pieces of glass while drinking from a bottle which he had procured from a merchant, who had purchased the same from the manufacturing company.

WIFE—HUSBAND'S DEBTS—CREDITORS.

The Supreme Court of Louisiana held, in the case of Clark vs. Whitaker, that while a wife cannot be held as surety for the payment of her husband's debts, yet if she does not avail herself of the protection afforded and chooses to dispose of her property in his interest, she cannot have the disposition annulled to the prejudice of persons without notice who have dealt with the husband on the faith which recorded deeds give rise to.

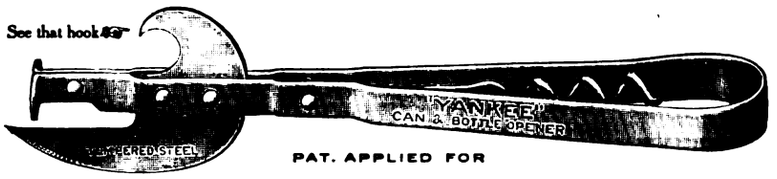
EMPLOYER'S LIABILITY—LADDER—SOUNDNESS.

The Supreme Court of Minnesota held, in the case of Dessecker vs. Phoenix Mill Company, that where an ordinary ladder furnished by an employer to his employee with which to perform his duties was sound and in good condition for use when so furnished, no duty thereafter rested upon the employer to inspect the same from time to time for the purpose of ascertaining whether from its ordinary use it had become out of repair, or at least that no such duty rested upon the employer as to an employee who was thoroughly familiar with the use of such an appliance.

BANK—COLLECTION—UNREASONABLE CUSTOM.

The Supreme Court of Alabama held, in the case of Farley National Bank vs. Pollak et al., that a custom of a bank to send paper received for collection to the bank on which it was drawn was void for unreasonableness.

CHECK—WRONGFUL PROTEST—DAMAGES.



The Supreme Court of Minnesota held, in the case of Peabody vs. Citizens' State Bank of St. Charles et al., that where a bank check is wrongfully protested the drawer may recover temperate compensatory damages without alleging and proving special damages, and that the right to recover such damages is not confined to a trader in the restricted sense in which that word is used in the bankruptcy laws, but extends to any person who is engaged in business and whose credit is thus necessarily injured.

NEW GOODS AND SPECIALTIES

THE "YANKEE" CAN AND BOTTLE OPENER.

Taylor Mfg. Co., Hartford, Conn., are the manufacturers of the "Yankee" Can and Bottle Opener, which we illustrate herewith. It is made of steel, has a tempered steel blade and is made to sell at a popular price. The device removes bottle caps, opens round or square cans and removes the cork from a bottle.

THE "YANKEE" CAN AND BOTTLE OPENER.

In the latter operation the user has a good purchase on the device, as there is the entire length to grip with the hand. The corkscrew is made very strong and tinned to prevent rusting.

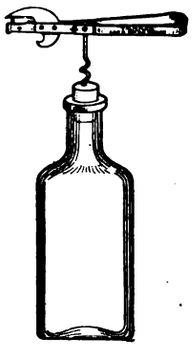

Fig. 1.

Fig. 2.

In Fig. 3 the Combination is shown being used to open a tin can, which can be opened easily, as the blade is made from the best steel and carefully sharpened. It will work either way:

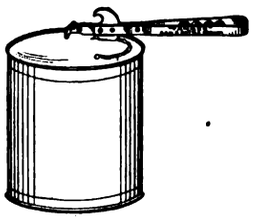

Fig. 3.

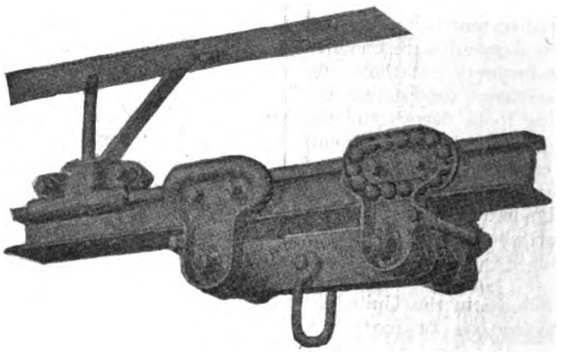
right or left hand. The Openers are packed a dozen in a neat display box, with a standard on the back of the box so it can be placed upright on the counter if desired.

LYMAN COMBINATION REAR SIGHT.

The Lyman Gun Sight Corporation, Middlefield, Conn., among the many specialties they make contributing to the perfect construction of superior firearms, are manufacturing the Lyman Combination Rear Sight, shown in the illustration herewith. This cut shows the No. 1 Rear Sight, and its stem with the small stop-pin at the end. After the sight is attached to the rifle, it should be tested at fifty yards for "point blank" shooting. When the sight is adjusted for this distance, mark the sight stem slightly at the top edge of the sleeve, then remove the stem by turning the knurled sleeve from right to left, and drive the pin into the hole at the end. Screw the sight stem back, and if it is above the mark which was made, remove it again and file the pin shorter until it is correct for shooting fifty yards.

This stop-pin is quite important as it prevents the sight from ever being too low for "point blank" shooting. Secure a No. 2 stem and disc also, to use in your No. 1 sight, and thus be prepared for both hunting and target work. When ordering extra stems, always state make, model and calibre of rifle on which the sight is used. Some of the advantages of this sight over all other sights are given as follows: With this sight almost instantaneous aim can be taken, for the object to be aimed at; while with any other rear sight the chief difficulty in aiming is to bring the sights and objects quickly into line without interfering with the view of the front sight of the object. This

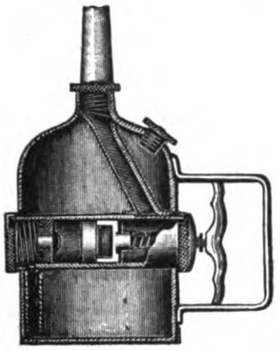


LYMAN COMBINATION REAR SIGHT.

sight can be used when the light becomes too dim to use any other rear sight, and shoot better than you ever could with the common sight. This sight is readily attached to rifle and easily adjusted for shooting at various distances. To obtain satisfactory results with Lyman Sights it is very important that they should be used on the rifle for which they are designed. To avoid the possibility of error in selecting sights, each box of Lyman Rear Sights is labeled, stating the make, model and calibre of rifles for which the sight is suitable.

OVERHEAD TROLLEY TRACK LINE.

The G. & W. Mfg. Company, 26 Cortlandt Street, New York, has just put on the market a new style of overhead trolley track line, patented August 7, 1906, the main portion of which is shown in the accompanying illustration. The feature of this construction is the ease and economy with which this system of



OVERHEAD TROLLEY TRACK LINE.

trolley transmission can be installed for store, warehouse, machine shop, factory and foundry use, and in similar places. Either I-beams or T-rails can be easily bolted or screwed to overhead beams, on which the trolleys of malleable iron having steel balls running in steel ball-races travel back and forth. As the hangers are adjustable, it is possible to easily put up and level the overhead track. There are lag joints between the tracks which prevent tracks spreading or working loose. Other advantages referred to by the Company are safe and solid connection between the track and hangers, adjustable braces that can be put up at any angle, anywhere most convenient, and trolleys rounding curves easily without binding. The company also installs any system of industrial railroad, complete with switches, curves, turntables and cars for transporting all kinds of goods and materials where overhead trolley cannot be used.

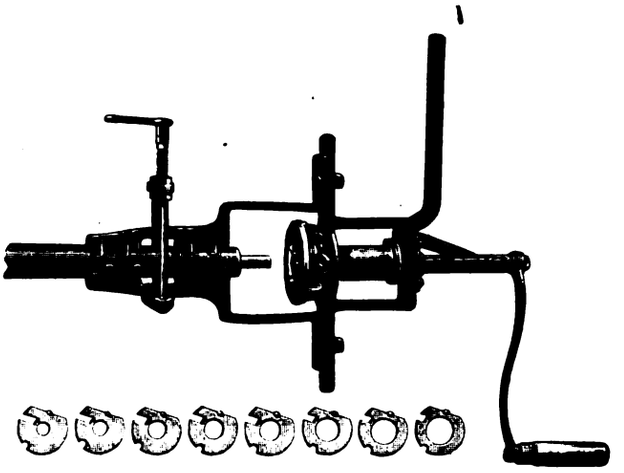
WILKINSON FORCE FEED OILER.

Wilkinson Mfg. Co., 69 Wall Street, New York, are placing upon the market the Wilkinson Force Feed Oiler, of which we give two illustrations. In the manufacture of the steel shell of this high-grade Oiler, the best cold-rolled steel is used—practically indestructible, which is finished in copper, brass or nickel-plated, and the interior mechanism is made of brass, strong in all parts, nothing to wear out except the leather cup

CROSS SECTION SHOWING PUMP.

and valve, which can be replaced in a few minutes. All parts are removable, including the lower valve, which screws into place and is easily removed for repairs should occasion require. The Oiler is made to stand hard wear. All parts are interchangeable, and perfect in workmanship. So sensitive is the mechanism that the movement of one-fourth of an inch will force out the oil, while the spout always remains full to the point ready for oiling, and no oil can escape without working the pull-bar in the handle. There are conditions in nearly all



WILKINSON FORCE FEED OILER.

places where machinery is used where it is difficult as well as dangerous to reach points to be oiled. In such cases the Wilkinson Force Feed Oiler will be found to be just what is wanted, as a slight squeeze of the hand will force the oil to the spot without courting danger. One can stand on the floor and oil shafting overhead or down in pits, thus avoiding climbing into places which endanger life. For this purpose a nozzle is made six feet long. The Oiler is made in four sizes, from a half pint to four pints, and with nozzles from 3 or 5 inches, 5, 9 or 12 inches, 9, 12 or 15 inches and 12, 14 or 18 inches respectively. The article is well made, and the manufacturers claim that every Oiler is guaranteed to work perfectly, and that the spout cannot clog in cold weather or fail in delivering at the precise place it is needed, and as the oil cuts off and stops flowing at once when the pressure is removed from the pull-bar, there is none wasted by dripping over machinery or floors, as is the case with some other Oilers.

BRODHAGE SPOKE TENON MACHINE.

Silver Mfg. Co., Salem, Ohio, are placing on the market the Brodhage Spoke Tenon Machine, of which we give an illustration in this article. The machine is made of malleable iron, and weighs but 11 pounds, which is a great advantage, as it can be carried around and placed on the spoke of a wheel in any part of the shop. While being clamped on the wheel it becomes centered automatically. This insures accurate work. The

BRODHAGE SPOKE TENON MACHINE.

clamping is strong and positive, as there is no danger of slipping once the clamping device is properly set. The force feed is claimed by the manufacturers to be superior to the old screw feed for the reason that the capacity now depends entirely upon the desire of the operator. The length of tenon can be instantly changed or set any length, and will remain positive, insuring the uniformity of cut. The machine will cut up to 2⅝ inch lengths. There are eight different brass gauge plates, as illustrated, which are used in making different diameter cuts. Tenons can be cut every ⅛ inch from ⅜ to 1¼ inch in diameter. This new machine, because of its small size, simplicity and inexpensiveness, will be found invaluable not only in the small carriage shop, but also for repair work or small work in large shops where power is used exclusively.

SELF-REGISTERING SAVINGS BANK.

The Piaget Novelty Co., 265 Broadway, New York, who manufacture a line of Self-Registering Banks of various shapes and styles, have just added to the line one in the form of a Saratoga Trunk, which is destined to become popular and prove a ready seller. This particular Bank possesses the novel feature of having a pivoted door at the bottom, which can only be opened when ten dollars in dimes has been deposited. The 10 cent

SELF-REGISTERING SAVINGS BANK.

coin is pushed through the slot on top, as shown in the engraving, which is registered by pulling out the end thumbpiece, the figures on the front (see cut) indicating always the exact amount the bank holds. When the deposits reach the amount of $10 the opening on the bottom may be removed and the amount secured; or the $10 may be left inside until another 100 dimes have been dropped in. The bank is in the well-known form of a Saratoga Trunk, is made of cast iron and measures 4¾x3½x2⅝ inches. They are distributed in neat cardboard boxes, with the necessary instructions, three dozen being packed in a case, weighing about 110 pounds. The banks are nickel-plated with polished surfaces, and present a very attractive appearance.

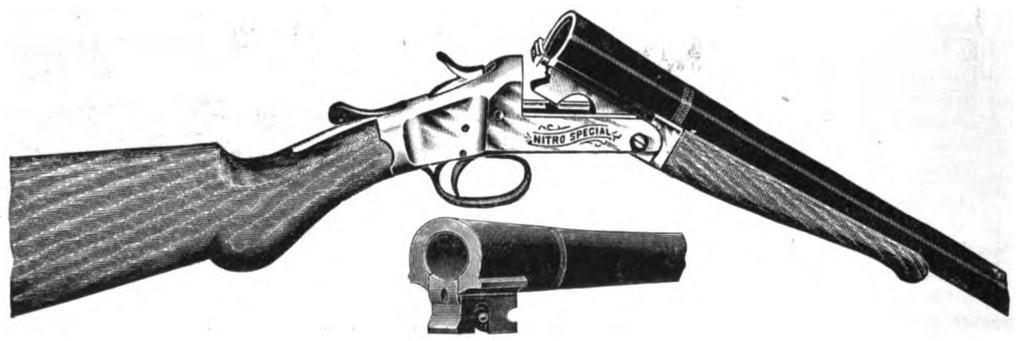
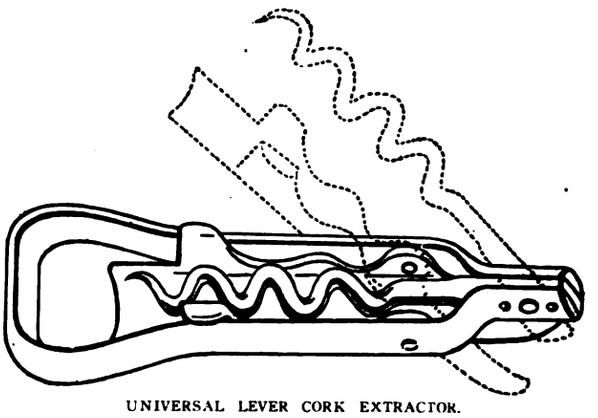
WABASH COASTER WAGON.



Wabash Mfg. Co., Wabash, Ind., are introducing to the trade the Wabash Coaster Wagon No. 37, an illustration of which is given herewith. It is especially adapted for boys and girls between the ages of 6 and 16. It is manufactured in a strong, compact and simple manner. The box measures 16x34 inches and is 5 inches deep. Five hand-wood strips across the bottom give strength. Two strap bolts riveted to the sides pass through the bottom and the middle cross-piece with nuts on the bottom end, forming a truss-frame construction. The corner pins prevent the box shifting on the bottom. The gear is hard-wood, well braced forward and back, and the front wheels turn under to the center, which permits the wagon to turn completely on a narrow walk. The brake controls the speed. The construction of the wheels is referred to as being the best ever used in a toy wagon. They have "T" steel rims of light weight and superior strength, the rim that the manufacturers claim never settles between the spokes. Consequently, there is no bumping or pounding noise. The wheels are 11 inches in diameter; the box is removable. It is well balanced to prevent tipping. The wagon is handsomely ornamented and varnished and trimmed in bright red. It is claimed that errands are turned into pleasure trips with this splendid little vehicle, and any wideawake boy will develop mind as well as body in finding new ways to utilize it in games and sports. The company have nine shipping stations, as follows: Philadelphia, Pittsburgh, Milwaukee, Wis., Louisville, Ky.; Kansas City, Mo.; Seattle, Wash.; Portland, Ore.; Wabash, Ind. They also manufacture geared cars and miniature farm wagons, etc., etc.

WABASH COASTER WAGON.

"NITRO SPECIAL" SINGLE BARREL GUN.



J. Stevens Arms & Tool Co., Chicopee Falls, Mass., are placing before the Hardware and Sporting Goods trade the improved "Nitro Special" Single Barrel Gun. It has an extra heavy cannon breech, and the barrel is made of higs-pressure steel, with lugs swedged on the barrel; that is, a part of the barrel not brazed on. It is of special construc- powder. Has the Stevens check hook to take up all wear, and prevents any strain on the forearm. Has a fancy patent snap forearm, is supplied either nickel-plated or case-hardened, with a walnut stock, rubber butt plate, top snap, coil main spring and made in the usual lengths and gauges, and weighs 7 to 7¼ pounds. The No. 93 is the Extractor Gun, listing at $8, and the No. 97 is the Automatic Ejector, and lists at $9. It is higher in price than other single barrel guns, but the manufacturers claim it is made heavier, stronger and of better material and more symmetrical, and is claimed to be the best gun that has ever been offered in its class, and should certainly interest the trade.

"NITRO SPECIAL" SINGLE BARREL GUN.

UNIVERSAL LEVER CORK EXTRACTOR.

The Snow & Petrelli Mfg. Co., New Haven Conn., for which John H. Graham & Co., 113 Chambers Street, New York, are sole distributers, have put on the market the Universal Lever Cork Extractor as represented in the accompanying illustrations.

UNIVERSAL LEVER CORK EXTRACTOR.

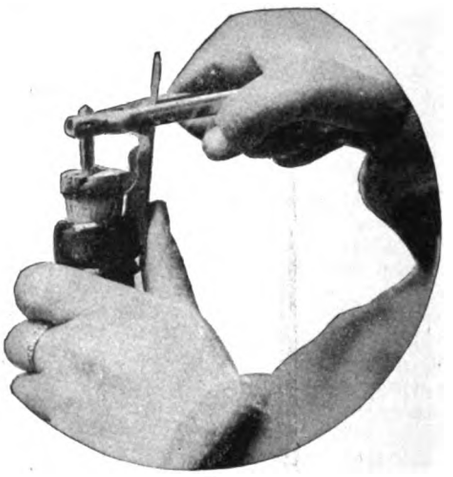


Fig. 2.

The Extractor is suitable for carrying conveniently in the pocket, being but 3½ inches long, folded, and weighing 1¾ ounces. The three parts are formed from wrought steel, and nickeled. See Fig. 1. In use the worm screw is inserted in the cork, and by means of the pivoted lever to be held tight against the neck of bottle for a fulcrum, as seen in Fig. 2, the most stubborn cork can be easily drawn without tugging or straining, by a downward pressure on handle. Tin caps on corks are quickly removed by placing the loop of handle on top of cap and the end of plate under the crimped edge (See Fig. 3) when with

Digitized by Google

an upward lift the cap is thrown off. Where corks are secured by wires the Extractor is held with curved plate underneath, when a slight pressure lowers the hook, which is then inserted

Fig. 3.

under the wire, and with a twist horizontally to the right the wire is cut. Foil caps may also be cut and removed with the hook.

"THE NEW PARTNER."

The J. D. Warren Manufacturing Co., Chicago, Ill., manufacturers of Hardware shelving, have just completed illustrated descriptive matter printed in four colors, of their Hardware shelving shown in combination and separate cabinets and bases, which is known as "The New Partner."

It is the most carefully prepared descriptive matter, both in manuscript and illustrations, in a condensed form, that they have ever compiled. The designs shown were all made to fill actual requirements of diversified stocks, as Mr. Warren saw was necessary in personal visits to stores throughout the country; and his life work for twelve years past is exemplified in this folder and in a few clean cut, clear sentences tells the whole story of what has been accomplished for the convenience and improvement of the Hardware merchant's store.

Instead of being printed in the usual catalogue form it is a folder, so that in opening, store arrangements from the finest to the cheapest are instantly in view for comparison with one another. It illustrates in a most unique and practical way a liberal variety of combinations, that their observation and experience in manufacturing and selling have taught them to be the most practical, costing from $4.50 per lineal foot up; and while the illustrations show lengths of only 25 feet, they are expected to be extended to such length as required by each store, and for this purpose, these combinations show hair lines running between each cabinet and base that separates each unit by itself, so that if a combination is not desired as arranged, or wished in greater length, any part of one combination can be taken and combined with those of others, and the price ascertained at once, as the number and net cost of each cabinet and base is printed separately under each one, thus enabling any one to select an equipment.

The folder certainly displays how a Hardware store may be made as handsome in the way of perfect equipment as any store in the city or town, and there is no stock like a Hardware stock to furnish the interest that compels attention to the goods. Mr. Warren's missionary efforts in this particular deserve the most unbounded success, for his labors in this line produce the most convincing proof of his intelligent persistence, of his genius and inspiration for industrious accomplishment.

NOW SALES MANAGER FOR "3 IN ONE."

Chas. E. Hunt, who for several years has been circulating among the jobbers of the country in the interests of the famous "3 in One" has been appointed sales manager of the G. W. Cole Company, the manufacturers of "3 in One." Mr. Hunt's appointment as sales manager is a deserved recognition of his abilities and energies. Jobbers and dealers from Maine to Mexico know the genial Mr. "Oilright" Hunt. Even Canada has been covered by Mr. Hunt, so in assuming direction of "3 in One" sales all over, the "3 in One" business is marvelous to even those in charge of its development. The demand for and the consumption of this oil spreads so rapidly that the "3 in One" factory is taxed to keep up with the demand and have enough surplus stock on hand to ship without delay. Up to date, however, the factory has been able to ship any reasonable quantities on even telegraphic instructions and with the new additions and improvements now under way expect to keep apace of even Mr. Hunt's most sanguine expectations.

VOORHEES RUBBER MFG. CO.

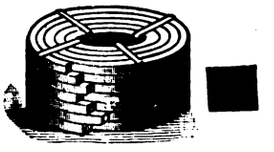
In making its bow to the public some eight years ago, the Voorhees Rubber Mfg. Co., Jersey City, N. J., manufacturers of Mechanical Rubber Goods, through its president, John J. Voorhees, made this announcement: "This company in offering

RUBBER BELTING.

its products to the trade is simply renewing old acquaintances. Its management has had an active experience of over thirty years, and has the ability to make excellent goods, and, what is more to the point, the disposition to do so." No more true

CANVAS WRAPPED HOSE.

or terse expression could have been used to express earnestness and determination to make a mark, and, of course, success has followed. Nothing better for hard service than Belts



COTTON MILL HOSE.

bearing Voorhees name and brands. From Garden Hose to the large and heavy Suction Hose used in government dredging work, the Voorhees factory is equipped for turning it out to

SHEET PACKING.

do the best and most effective service. All guaranteed. There is a lot of special advertising done by some manufacturers. setting forth the virtues of certain Packings, but without a

PISTON PACKING.

parade the Voorhees factory is kept running full time on packings, and they don't have to talk; the packings talk for them.

RECENT TRADE PUBLICATIONS.

Yale & Towne Mfg. Co., No. 9 Murray Street, New York, have distributed to the trade an interesting booklet entitled "Suggestions for Selling Yale Padlocks." Referring to this booklet the company say: "This isn't a Padlock Catalogue, it's a book that suggests *uses* for Padlocks, that may bring to your store people who never before thought of a Padlock as a desirable article for their own use. Most people will say that Padlocks are used on barn doors and couldn't in a half hour tell you of more than one or two other ways to use them. In this book fifty ways are suggested. Our suggestion is that you send these books to desirable customers, who make other purchases in your store—keep them on the counters—mail them to your most important Customers." They are also distributing other taking trade literature under the name of "The Little Black Box" and a Book about Padlocks. They also call attention to the fact that they are manufacturers of the Yale Lock, Builders' Hardware, Ornamental Hardware, Blount Door Checks, Cabinet, Trunk and Prison Locks, and will be pleased to furnish information regarding any of these lines.

Pike Mfg. Co., Pike, N. H., are sending out their new price list on India Oil Stones. Included in this pamphlet is a history of these Oil Stones, with a description of their manifold merits. Instructions are also given for users of India Oil Stones in Machine and Shoe Shops, as well as general directions for their care and use. In this connection they send a letter to the trade, as well as a communication on the subject of German Water Hones.

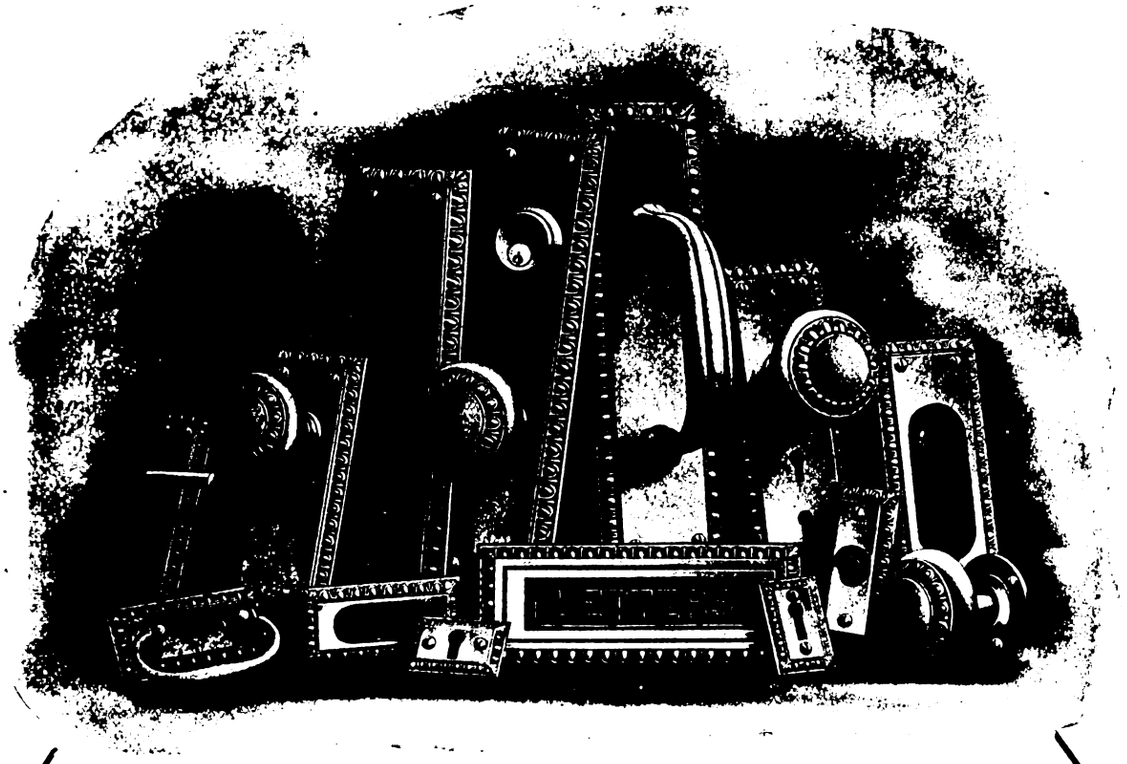
Samuel Harris & Co., manufacturers of and dealers in Tools and Supplies for all kinds of machinists and manufacturers, at Nos. 23-25 South Clinton Street, Chicago, Ill., have favored us with a copy of their new catalogue, in which will be found a large assortment of Taps, Reamers, Wrenches, Screw Plates, Stocks and Dies, Pipe Cutters and Tongs, Drill Sockets, Drills, Countersinks, Mandrels, Hack Saws and Blades, Milling Cutters, Gears, Drill Chucks, Boring Tools, Hand Turning Tools, Lathe Dogs, Box Scrapers, Nail Pullers, Wire Nails, Bit Braces, Auger Bits, Clamps, Hand Screws, Hammers, Steel Shop Pans, Iron Ladles, Dowel Pins, Shovels, Brushes, Wheelbarrows, Pliers, etc., etc. Prices are given throughout the catalogue, and the dealer will find the same a very useful and complete one when ordering machinists' supplies and tools of any kind.

Cyclone Woven Wire Fence Co., with main office at Holly, Mich., and branches at Waukegan, Ill., and Cleveland, Ohio. Lawn Fence Catalogue No. 4 for 1906, devoted exclusively to Ornamental Fence and Gates, and in which the company have added several pages and some new designs. Their Colonial style of single-post fence is particularly worthy of notice, and is claimed to be built heavier and stronger than any other fence of this type previously offered. The feature of showing the fringe of ornamental top above the rail gives a pleasing effect, and the double-cable top in their styles "L"-Extra and "K" fabrics are specially adapted to this construction. The catalogue will be sent upon application, and the company ask the privilege of making an estimate on anything wanted in their line.

Philadelphia Lawn Mower Co., Nos. 3101-3109 Chestnut Street, Philadelphia, Pa. Annual illustrated catalogue and price list for 1906 of their Genuine Philadelphia Lawn Mowers. The line is illustrated in natural colors, showing their various styles and patterns, including High Wheel and Golf Mowers, Roller Bearing Grass Collectors, Drexel, Gold Coin, Dewey and Pony Lawn Mowers, and a line of Horse Mowers under the name of IXL and Eagle. They also manufacture a line of Horse Sweepers, Lawn Sprinklers, Horse Boots and Two-Man Mowers. The frontispiece of the catalogue gives a view of their extensive works, and on the cover will be found, in colors a view of a beautiful lawn on which an Eagle Horse Mower is in operation.

Forsyth Mfg. Co., Buffalo, N. Y. Catalogue of Bath Room Accessories and Moulding Hooks, which includes Stationary and Revolving Toothbrush Holders, Towel Bars, Tumbler Holders, Comb and Brush Shelves, Soap Trays, Brush Broom Holders, Wall Sponge Baskets and Little Giant, Big Giant, "Orient", "Uncle Sam" and "Beauty" Moulding Hooks.

Atlantic Stamping Co., Rochester, N. Y. Catalogue B for 1906 of Atlantic Tin, Copper and Galvanized Ware. Illustrations are given of their line of Galvanized Wash Tubs, Pails, Fire Buckets, Foot Baths, Toilet Ware, Oil Cans, Sprinkling Pots, Oily Waste Cans, Garbage Cans, Cuspidors, Refrigerator Pans, Dry Measures, Cream and Cooler Separators, Strainers and Covers, Wash Boilers, Copper Pails, Strainer Pails, Horse Pails, Cream Pails, Umbrella Holders, Dish Pans, Bread Pans and Raisers, Milk and Pudding Pans, Preserving Kettles, Sauce Pans, Dust Pans, Wash Bowls, Dinner Pails, Packing Cans, Liquid Measures, Pieced Cups, Dippers, Funnels, Coffee Boilers, Plumbers' Torches, etc. The catalogue is printed on an excellent quality of paper with an artistic cover in brown, on which is mounted a photogravure of the warship Atlantic.



Bridgeport Hardware Mfg. Co., Bridgeport, Conn., with New York office in charge of J. C. McCarty & Co., 10 Warren Street, have distributed their new catalogue, No. 15, in which will be found a large number of illustrations of the Hardware specialties of which they are well-known manufacturers, such as the "Suregrip," "New Jumbo" and "Rex" Nail Pullers; "Nox Tox" Crate Opener, "Globe" Box Opener, No. 10 Box Chisel, Screw Drivers, Grant Tack Pullers, Putty Knives, Wall Scrapers, Nippers, Pincers, Call Bells, Nut Cracks, Fence Pliers and Staple Pullers, Ticket Punches, Paper Clips, Paper Files, Toilet Paper Holders, Wire Cutters, Can Openers, Hack Saws and Frames, Keyhole Saws, Fret and Jig Saws, Shears, Cigar Cutters, Ladies' Scissors, Tinners' Snips, etc. This company also manufacture the Hardware for the Perfect Sliding Door, and are sending out a catalogue regarding the same to the trade.

Geo. W. Pitkin Co., Fulton and Carpenter Streets, Chicago, Ill., have issued their Illustrated Price List No. 55 of Paints. In an introductory note the company say: "We have aimed to include in this catalogue all of the products of the Geo. W. Pitkin Company, illustrating the labeled packages in most instances in order to give the trade and their customers generally a correct idea of the manner and style in which our goods are put up. All jobbing goods have been purposely omitted in this catalogue, as we have endeavored to restrict it to a size that will permit the ready finding of any article. We have constantly on hand, and furnish without charge to the trade, appropriate and attractive advertising matter which, when intelligently displayed, cannot fail to materially increase a dealer's sales. Discounts from this list will be quoted upon application. Color cards and samples will be forwarded, and we will furnish information concerning our goods whenever desired. We invite correspondence concerning special paints not mentioned. Our laboratory is well equipped, not only to test all raw materials used, but to analyze, match and prepare samples upon which we will quote prices in competition with all other makers." Their line includes Barn, Floor, Buggy, Vessel, Deck, Screen, Roof and Cornice Paints, Varnish and Shingle Stains; Bath Tub, Bicycle, Stove Pipe and Radiator Enamels; French Ochre, White Lead, Colors in Oil, Zincs, Coach Colors, etc. They will be very glad to send copies of their catalogue to any dealers thinking of handling a complete line of paints.

Oliver Iron & Steel Co., Tenth and Muriel Streets, Pittsburgh, Pa. Standard Price List No. 50 of Bolts, Nuts, Washers, Rivets, Picks, Mattocks, Grub Hoes, Wagon Hardware, Bar Iron and Steel. In a prefatory note the company say: "The steel and iron used throughout our entire works is all of our own manufacture; insuring a uniform quality and enabling us to execute your orders promptly. We solicit your orders and inquiries for all goods named herein, and will be pleased to quote discounts or net prices on application."

New Castle Stamping Co., New Castle, Pa. Catalogue No. 4 of "New Castle" Enameled Ware. Illustrations are given in natural colors of their line of Austrian, Tokio and Special Ware, as well as their Seamless Coffee and Tea Pots, Coffee Boilers, Tea Steepers, Tea and Preserve Kettles, Sauce Pans, Covered Pails, Milk or Rice Boilers, Fry Pans, Pie Plates, Jelly Cake Pans, Bread Pans, Water Pitchers, Bread Raisers, Dish Pans, Wash Bowls, Dippers, Drinking Cups, Dinner Plates, Colanders, Soup Plates, Milk Kettles, Basting Spoons, Pieced Funnels, etc.

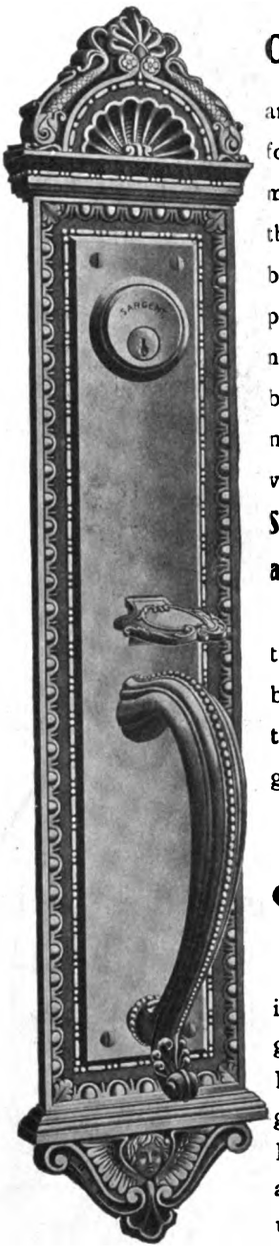
SPARTA DESIGN (GREEK) SARGENT'S ARTISTIC HARDWARE

Educate your customers---those who are erecting homes and other buildings in your neighborhood---to the use of better hardware. A fine house should be fitted with fine hardware; cheap goods are out of place in an elegant dwelling.

It will give you a larger profit and your customers will be better satisfied if they trim their buildings with

Sargent's Artistic Hardware and Easy Spring Locks

than if substitute goods said to be "as good" are used.



We have a complete line of Locks suitable for all classes of work and a variety of Designs to harmonize with all schools of architecture.

SARGENT & COMPANY, Manufacturers

New Haven, Conn. New York Philadelphia Boston Chica

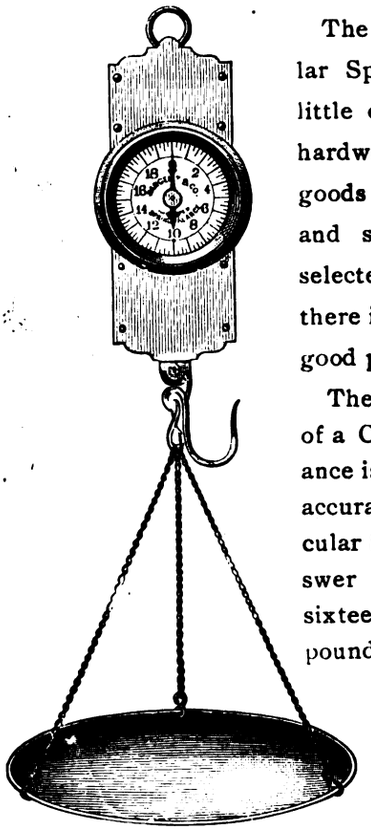
Everybody is now building,

or will be soon,

and there will be much use for builders' hardware. To make sure of your share of the profits sow the seed now by distributing among prospective builders in your neighborhood the attractive, business-bringing printed matter we will furnish to advertise



Sargent's Artistic Hardware and Easy Spring Locks.

Every building fitted with these goods means a satisfied builder—your pleased customer, if you furnish the goods.

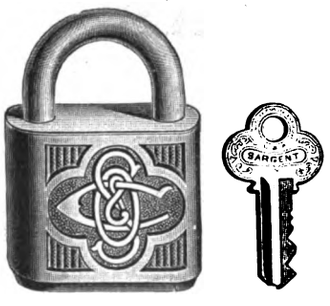
Our Store Door Handle Line

is complete, embracing a great variety of patterns. Both plain and ornamental goods are represented. Bit Key Locks, Flat Key Locks and Cylinder Locks are all used.

Sargent's Spring Balances

White Enameled Front, Round Pan.

The purchase of Circular Spring Balances is a little out of the ordinary hardware line; they are goods with delicate parts and should be carefully selected. In selling them there is a chance to make good profit.



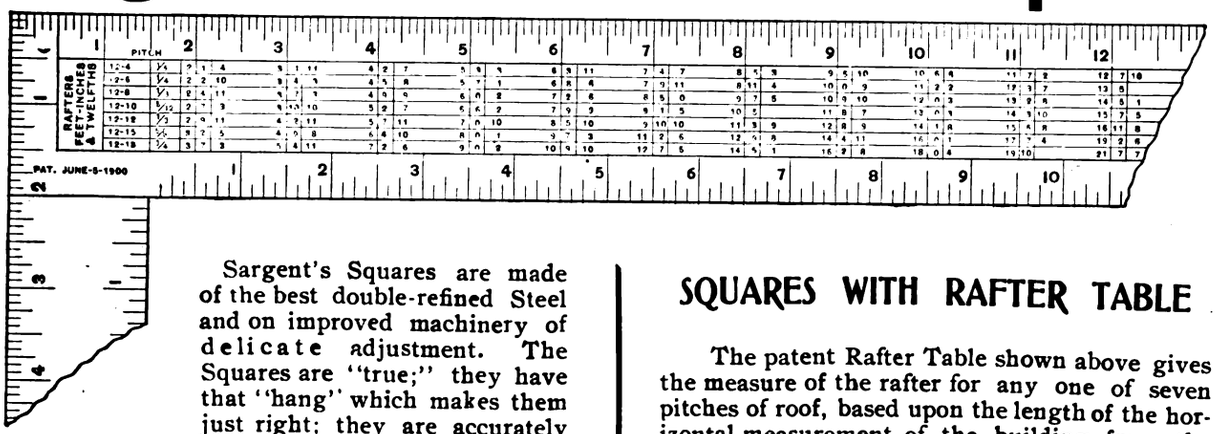
The first requirement of a Circular Spring Balance is that it shall weigh accurately. Sargent's Circular Spring Balances answer this requirement—sixteen ounces to the pound every time.

Again, the balance must be strong in its construction so that it will withstand the wear and tear of almost continuous use. Sargent's Balances fill the bill in this respect—they are strong and durable.

Finish goes a long way in these goods and the finish of our balances is first class; they are made in a variety of styles, with brass front and enameled front, round pan, square pan and scoop. All are warranted.

We make also Pocket, Round and Straight Balances in various styles, also Scale Beams.

Here is a First-class Padlock



well-made, strong and serviceable. It is made of Bronze with Double-locking Spring Shackle and has two keys. Can be master-keyed in sets with our Cylinder Door Locks and with the same Master Key to pass.

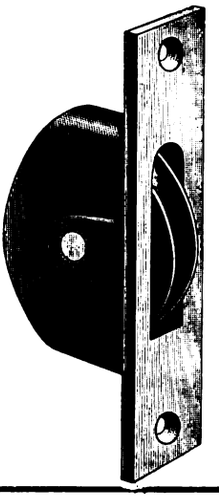
Sargent's Standard Steel Squares

Sargent's Squares are made of the best double-refined Steel and on improved machinery of delicate adjustment. The Squares are "true;" they have that "hang" which makes them just right; they are accurately marked and nicely finished. We make Squares for all purposes and with different markings and labor saving tables and scales, finished in polished steel, nickel plated and royal copper, also blued steel with white and with yellow enameled figures

Our Squares are well known and have a good reputation among practical men. You should sell them.

SQUARES WITH RAFTER TABLE

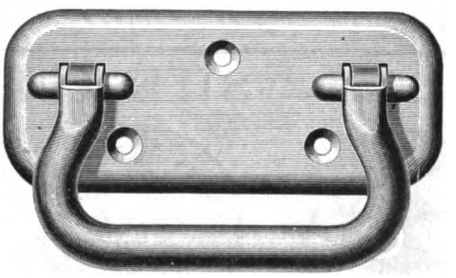
The patent Rafter Table shown above gives the measure of the rafter for any one of seven pitches of roof, based upon the length of the horizontal measurement of the building from the centre to the outside. Full description and directions for using the Rafter Table, as well as the other Tables and Scales with which our Squares are marked, may be found in our Square Booklet, a very useful pamphlet which is packed with each Square and which we also furnish to dealers for distribution to mechanics. Let us send you a copy; it will interest you.



SARGENT'S CYLINDER LOCKS

you can depend upon

They look well, work well and wear well. No better locks are made and you can stand back of every one with the assurance that it will work perfectly and do good service in actual use and give satisfaction to your customer who uses it. Sargent's Easy Spring makes easy-working locks. "Our Little Red Book" tells about it. Send for a copy.



Noiseless Axle Pulleys

should be used for the best work in finishes to match the other hardware.

Our Axle Pulleys (No. 22 series) are made with Iron, Brass and Bronze Face, both Square and Round Corner. They have Iron and Brass Turned Wheels with grooves for Sash Cord, Ribbon and Chain, and are carefully made throughout. We furnish them in plain face and in all the finishes on Iron and Bronze Metal.

These Steel Chest Handles are well liked and the sales are large; they are profitable goods for dealers.

We make three sizes in all the desirable finishes, and also have them ornamented and with different styles of plate. They are very strong. Send for a sample and prices.

THE NATIONAL HARDWARE ASSOCIATION

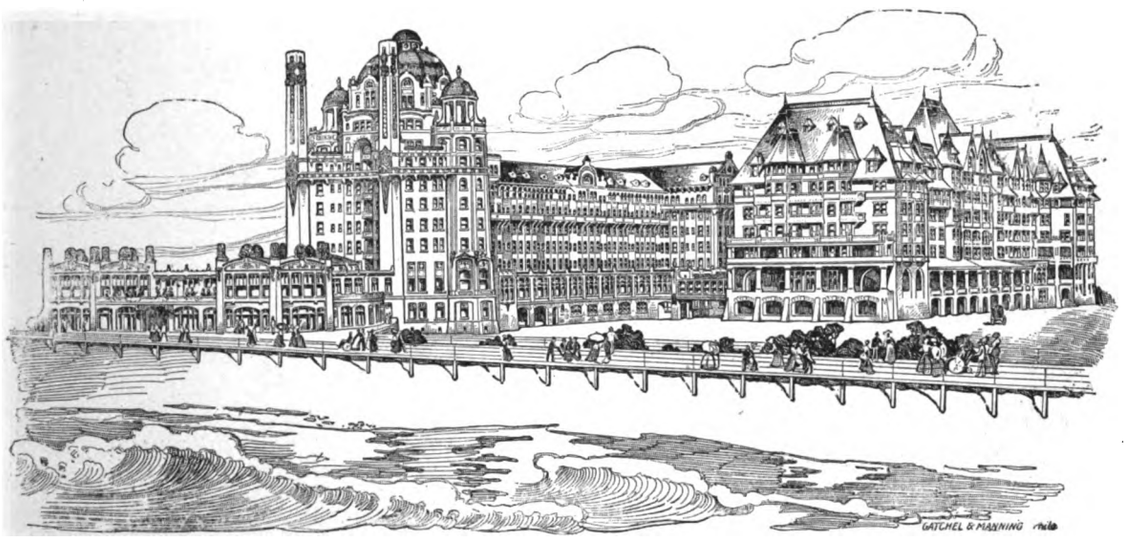
TWELFTH ANNUAL CONVENTION.

Within recent years no Hardware Convention was ever so well attended by so large a number of delegates and visitors as the one just closed.

It seemed as though the effervescent symptoms of traveling had siezed the delegates and their friends earlier than usual, and on Tuesday—the day before the Convention—every train brought its quota of conventioners from the North, the South, the East and the West, so that on the evening of that day every part of the spacious Marlborough-Blenheim, this palatial hostelry by the sea, was literally swarming with the representatives of the two Associations and their friends.

And what better time and place could have been chosen than Atlantic City, the queen of seashore resorts! Perhaps the Executives of the Associations had a premonition of heated discussions to come and so they chose Atlantic City with its cooling sea breezes to temper any possible vehemance of spirit and to affect in salutary fashion sentiments which might have been couched in words of objectionable language.

HON. FRANKLIN P. STOY, THE MAYOR OF ATLANTIC CITY, who welcomed the delegates in the following words:



Mr. President, Ladies and Members of this Association:—Out of the twelve or thirteen years that this Association has been formed, it has been our pleasure in Atlantic City to entertain you at least three of these years. We feel to-day quite proud of our honor of having you with us, and I feel doubly proud of the occasion because I have on each one of those occasions bidden you welcome to Atlantic City. It is hardly necessary for me to go through the formality of telling you what is right and what is wrong for you to do here or to tell you that you are welcome, but it is true and a part of my every-day life and every-day service to the City is to extend the hand of fellowship, and I am here this morning again for the third time to say to you that you are welcome to our City, and in extending that welcome to you I also extend to you the freedom of the city. Each and every one of you know what that means—that while you are in session here, especially at this time of the year, it is fair for me to say to you that it is better for us that we turn over the City to you. We feel that way towards this delegation because it represents the United States, and it represents one of the greatest and noblest works of men, and we always look forward with a great deal of pleasure to seeing your faces here with us and note during the season following your meetings that you come back to Atlantic City and see the place in which you hold your Convention, but this is not one of the most pleasant of those days, I assure you, because old Neptune has charge on the outside of the Boardwalk, but I give to you to-day all of the walk and actually that much of the city into your hands this side of the Boardwalk.

Mr. President, I thank you for the pleasure of being here; for this cordial invitation to be with this delegation. Let me say to you that we hope you will again favor us in selecting this place in the future. We will always extend to you the hand of welcome, and I assure you that we will always find you a place to sleep.

Now, I want to have it understood that those who are here without their lady friends, that protection will be afforded you. If you stray away from the crowd on this long Boardwalk, the Department of Public Safety knows very well of your presence here and they will acknowledge your badge of authority—that you are a member of this institution, and will treat you accordingly—I assure you, kindly. I have made all arrangements for that prior to coming to this meeting, and I am sure, therefore, that I will not be required to be called out of my sleepy couch late at night. I thank you.

President Wright announced that the next thing on the programme was roll call.

On motion the roll call was dispensed with.

THE MARLBOROUGH-BLENHEIM, ATLANTIC CITY. N. J.

WEDNESDAY MORNING SESSION. OCT. 17, 1906.

The opening meeting of the Association was called to order in the corridors of the Marlborough-Blenheim Hotel, at 11 a. m. by President W. S. Wright.

One of the largest gatherings in the history of the Association, including ladies, manufacturers, jobbers and others, assembled at the opening session.

In calling the meeting to order, President Wright said:

Gentlemen of the American Hardware Manufacturers' Association, the National Hardware Association, ladies, gentlemen and friends:

It is, I assure you, a great pleasure to welcome you to a meeting of this kind. The very pleasant experiences of the past, the many pleasant recollections that we entertain of our previous gatherings, the many pleasant friendships and acquaintances that have been formed, are very gratifying and very pleasant to us, and it is, I assure you, a privilege to be able to renew old acquaintances and friendships and form new ones and to greet you under such favorable auspices as exist at the present time. I sincerely hope that we shall all of us feel that we have benefited by our stay; that our deliberations and our work will result to the advantage of all concerned and that we shall go to our homes feeling that we have had a most enjoyable time and anxious for the next meeting of our two Associations.

The programme was opened with the singing of the National Hymn, "God Bless our Native Land," led by Hobart Weed.

Rev. John R. Davies, D. D., Pastor of the Bethlehem Presbyterian Church, Philadelphia, then invoked the Divine blessing.

President Wright introduced

Digitized by Google

Mr. Supplee of Philadelphia at this juncture came forward and presented President Wright with a gavel, which Mr. Supplee stated was a compliment from the friends of Mr. Wright in the National Hardware Association.

President Wright:

Mr. Supplee, ladies and gentlemens I want to assure you that I appreciate this token of your esteem very highly. I shall always treasure it as a recollection of this very pleasant occasion and of the many pleasant friends and acquaintances that have been formed, and I hope it may always be used to the credit of the owner and for the advantage or benefit of the gentlemen who represent these Associations in making the presentation.

The next misfortune, ladies and gentlemen, that you are called upon to endure is the reading of the President's Annual Address.

President Wright then read his Annual Address, which was as follows:

PRESIDENT WRIGHT'S ADDRESS.

The twelfth annual meeting of this Association brings us together under circumstances what should make us grateful to the Giver of all Good and to a capable and wise administration that we live in so favored a land. From the shores of the Atlantic on which we are gathered, to the Pacific, and from the Gulf to

W. S WRIGHT,
President.

the northern boundary of our territory peace and prosperity are well nigh universal. The generous returns from hte soil and the high prices that are secured have given every man who desires to work steady and profitable employment. The distributers have certainly had most favorable opportunities for the employment of their energies and capital, and as for the manufacturers those of you who placed your orders from three to twelve months ago and are still pleading for shipment are as well aware of their trials and sufferings as I am, and perhaps better qualified to make due allowance for their unfortunate condition.

We are glad to have with us as our honored guests and friends the President, Vice-President and Secretary-Treasurer of the Canadian Association, and we wish them the largest measure of success in their Association work.

Since we last met, Congress has at the suggestion of that greatest of all statesmen, Theodore Roosevelt, enacted

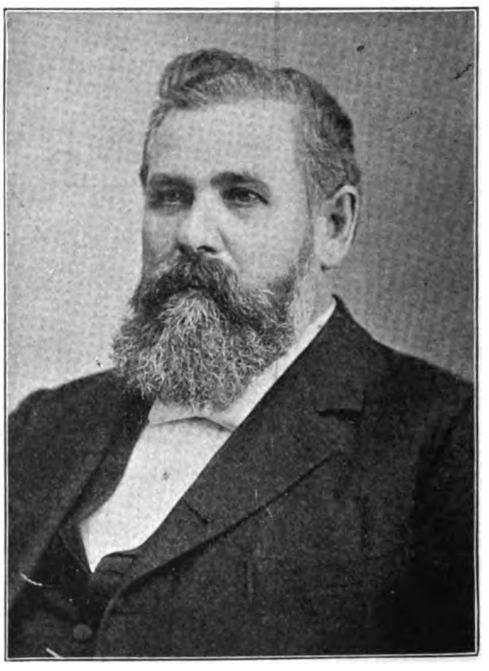
A LAW GOVERNING TRANSPORTATION

to secure equal rights and privileges to all shippers, and our hope is that this law may be so wisely construed and administered as to meet the fullest expectation of its originator. The delays in transportation are a source of serious inconvenience and loss that are as expensive as they are unnecessary and I recommend for your careful consideration the matter of a reciprocal demurrage proposition that will penalize the transportation companies for undue delay in deliveries on the same basis that we are held responsible for delay in releasing their cars.

Our relations with

THE NATIONAL RETAIL HARDWARE ASSOCIATION

have been most cordial, and in the great work they have undertaken, and on which they have made most gratifying progress, we have been of some assistance to them; and they have given us material and valuable assistance in broadening the scope of our work and pushing it forward, for which we are grateful, and hope that the pleasant relations now existing may continue and increase to the advantage of both Associations and their members, as well as the trade at large, and we are pleased to be able to welcome the President and Secretary of the organization whose council and good-will we greatly esteem.



Our relations

WITH THE MANUFACTURERS

have closely followed the constitution of the Association, which says:

"The purpose of this Association shall be the promotion of more cordial and pleasant business relations with each other and with the manufacturers."

And in our dealings with our manufacturing friends we have been met with a broad, generous and fair spirit that has been pleasant and advantageous to both. We must not overlook the fact that these questions have two sides. The manufacturer, like the jobber, has grave and difficult problems to solve, and that many of the questions like legislation must in the very nature of things result in a compromise is self-evident, but if the question at issue is fairly met with a disposition on both sides to be considerate of the other's interest, as well as conservative of his own, the result is a broader view of the situation on both

JOHN C. KOCH,
Vice President.

sides and an appreciation of the difficulties of the other that was not recognized before. But it must not be overlooked that the manufacturer who fails to consider the interest of the distributer and protect it will in time find himself in the position of the man referred to in the Good Book who built his house upon the sand.

Our Committees have during the year most diligently and faithfully supported the officers of the Association, and I want to thank them for their courtesy and consideration. It would undoubtedly be for

THE INTEREST OF THE ASSOCIATION

if more of our work could be done through Committees, but when you consider that the members are busy men and have all more detail work to attend to than their time will permit, it is unfair to make this work a burden.

The Catalogue House question has been most ably handled by the Joint Committee. While I regret to say there has been some criticism and not all outside our membership, this editorial from the *Iron Age* should be echoed by each member of this Association.

"In this connection it is apropos to refer to the latest catalogue of one of the largest mail order houses, which is a fitting tribute to the faithful and untiring efforts of the Joint Catalogue House Committee. The absence of many Hardware manufacturers that appeared in previous issues proclaims the successful effort of this body, which has been pursued in a manner that merits the approbation of all affiliated with the Hardware trade."

I believe this Committee and their work should have more active, earnest, aggressive support from each member of this Association. It is a serious question from

THE BROAD STANDPOINT OF THE MATERIAL WELFARE OF THE NATION.

Its continued growth means the wiping out of rural communities, and not only the retail dealer, but the banker, editor, mechanic and professional man are likewise affected. With these

Digitized by Google

go the churches and schools that are the centres of social life. The best brain power and the staying qualities that are essential to its fullest success come from the rural districts and anything that tends to decrease this supply is a national misfortune. There is also a moral side to the question that is often overlooked. Some of our members took the position twenty years ago that I wish we might all follow: "We cannot furnish goods to Catalogue Houses, for we sell our goods to retail dealers, on whom we depend to distribute them, and this implies on our part an obligation to protect them. To sell the same goods to another party whose object and purpose would be to demoralize and destroy the trade of the other, would in our opinion be as unfair and unjust as to go direct to the dealer's customer, and we will not do either." History repeats itself. Our position in this matter is founded on fairness and justice which in time will prevail. Twenty years ago the jobbers of a certain Western city were the strongest supporters of the Catalogue Houses. To-day they are as actively opposed to the system as your Catalogue House Committee.

The matter of

ONE CENT LETTER POSTAGE AND THE PARCELS POST

are matters of vital interest to us that will come before you in detail, and I hope will have your close attention and earnest support.

Our members and friends in San Francisco have met with disaster greater than we at a distance can realize. To them in

T. JAMES FERNLEY.
Secretary-Treasurer.

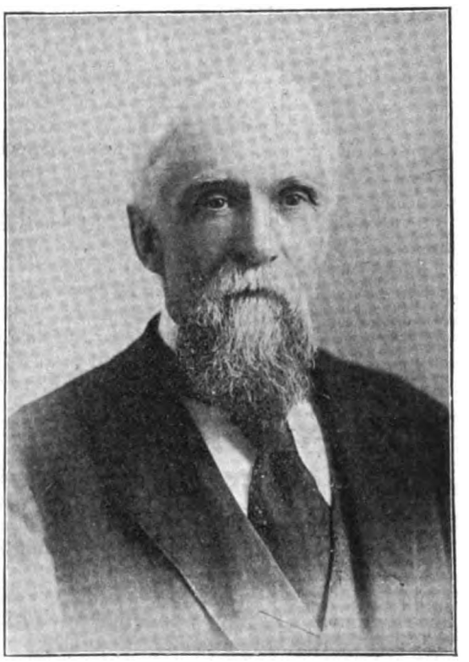
their misfortune our sincere sympathy is extended and we congratulate them on their rapid recovery and hope that like their beautiful city they may rise from the ruins stronger, better equipped and more prosperous than ever.

The Association work is something that I cannot refrain from calling to your attention. Twelve years is a long time in the life of an active business man, and he has forgotten many things that happened during that time that he should have remembered and he possibly has remembered a few things that he would gladly have forgotten. I had forgotten it myself, but in cleaning out my desk a few weeks ago to move to a new office, I dug up a paper I had read fourteen years ago on trade conditions. After reading it I wanted more light, and I dug up some old sales books and records and the balance sheets of '91 and '92. I can't describe this. Words would fail, but I would give a good deal to impress on the mind of each member the mental impression that I received. It would make 200 loyal, active, aggressive members that would

DOUBLE THE POWER AND INFLUENCE OF THE ASSOCIATION,

and improve conditions to an extent that we do not dream is possible. The results that have been secured in the last twelve years can be doubled in the next five if each member will take hold and lift. Many of us do not realize to what an extent conditions have improved, and if we do, we fail to recognize fully the source of this improvement. Do we realize fully the advantage of the National Hardware Association? Realize that in the past some of the brightest minds in the Hardware trade have labored unceasingly and earnestly to secure the benefits that we now enjoy, not with any selfish purpose, but with the object and desire to build up the Association, and to benefit the trade at large. How can we honor them better than to emulate their generous and unselfish spirit and to follow the example they have set?

This Association is operated not for the benefit of any one man or set of men, but for the greatest good to the whole. When any matter is in question involving the interests of the trade, your able Secretary is there to protect your interests, and certainly the experience he has gained in his twelve years of service and his loyalty and devotion to your interest is evidenced



W. W. SUPPLEE.
of Advisory Board.

by the results secured. Some houses feel that they get more in proportion from what they pay the National Hardware Association than from any other one item in their expense account. Can we get more? I think we can. We owe it to ourselves and the Association to

GIVE IT OUR LOYAL AND EARNEST SUPPORT

in thought, word and act. We owe it to our Association, our-

R. A. KIRK.
of Advisory Board.

selves and our associates to place our business with those whose policy in the conduct of their business is fair and considerate of our interests and the interests of those through whom we distribute our goods.

When a manufacturer can sell an interest that is directly op-

Digitized by Google

posed to our own and then come to us and with an extra two or five, take the business from a square honest competitor, who is fairly entitled to it, we hold that an unfair proposition to all these parties in interest, and a jobber or retailer who does this should have no complaint to make if the manufacturer sells the catalogue house, the retailer and the consumer. What we all need to cultivate is more backbone, more square-toed fairness, more disposition to help our competitor which is indirectly a greater help to us than aggressive selfishness. We want less disposition to "trim" and tell what we intend to do with a mental reservation that we will find some way to evade doing it. When we all uphol and practice the Association platform, a high standard of business methods," we shall prosper as an Association and as individuals to a greater extent than we have

S. A. BIGELOW.
Ex-President.

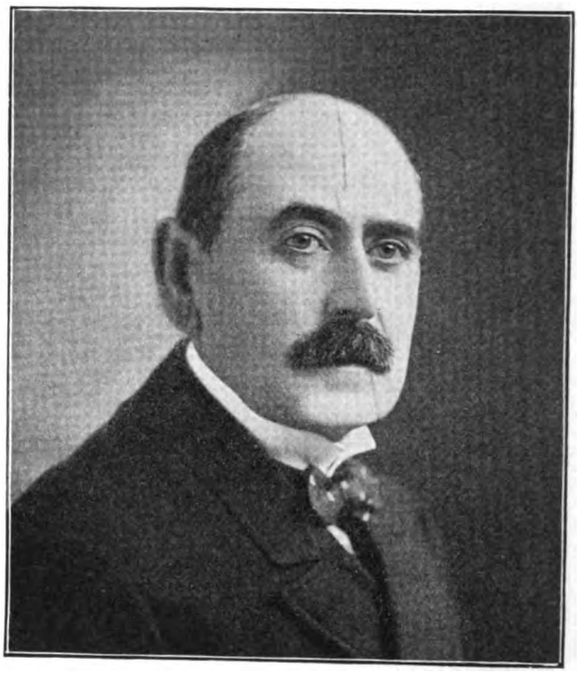
in the past and our influence and usefulness will grow broader and stronger with the passing years.

The hand of Death has lain heavily upon us during the year, and we are called on to mourn the loss of some who have passed from among us, but whose memories we can ever cherish and esteem. I will ask the members to rise while their names are read.

On December 14th, 1905, Mr. George Deming, of the George Worthington Co. of Cleveland, Ohio, was called to his eternal reward, while spending a portion of the Winter on Davies Island in North Carolina. Mr. Deming had been connected with the George Worthington Co. upwards of sixty years. He was known as an honorable, upright merchant, who feared God and dealt justly with his fellow-men. Mr. Deming presided at the meeting which was called by the jobbers of Cleveland, which was really the initial meeting of the National Hardware Association.

On April 11th, 1906, Mr. Robert Sickels, President of the Sickels & Nutting Co., New York City, and of the Sickels, Preston & Nutting Co., of Davenport, Iowa, departed this life after a somewhat lingering illness. Mr. Sickels had been identified with the wholesale Hardware business for forty-three years. He was a courteous merchant, and genial companion. He was always active in organizations connected with his church, as well as with his business.

On September 6th, 1906, Mr. B. Fred Tritch, Secretary of the George Tritch Hardware Co., Denver, Colo., was removed from this scene of usefulness. Mr. Tritch was highly esteemed in the city of Denver, and extremely active in all matters that related to its commercial interests.



It is both a duty and a pleasure to thank the officers, the members of the Executive Committee and the Advisory Board for the careful and considerate attention that has been given to every detail of the Association work during the year, and often to the sacrifice of their own personal interests. Your Secretary-Treasurer has as always been devoted to the interests he has so faithfully and ably represented, and if we can together in the future as in the past work shoulder to shoulder for the best interests of the Association, our own personal gain will repay many times the efforts that we make, and having due regard always in a broad spirit of fairness to the interests of the manufacturers and retailers, whose welfare and prosperity are inseparable from our own.

Mr. Supplee: I desire to nominate Mr. J. H. Van Newkirk as Journal Secretary of this meeting.

The motion was seconded and unanimously carried.

Mr. Balderson: I would like to nominate S. H. Platt as Railroad Secretary of this meeting.

The motion was seconded and carried.

JOHN BINDLEY.
of Advisory Board.

President Wright: The next is the report of the Secretary-Treasurer, Mr. Fernley.

Mr. Fernley made the following report:

SECRETARY FERNLEY'S ANNUAL REPORT.

Once more, and we hope not for the last time, it becomes our duty and pleasure to render an annual report.

H. H. BISHOP.
Ex-President.

You will not expect me at this time to review all the details of the year. This is unnecessary because you have had three letters each week during the year, in which was reported various matters, which were subject to investigation and adjustment in our office.

OUR MEMBERSHIP.

While not seeking members, yet during the year we have had quite a number of voluntary applications, some of which have been passed upon favorably.

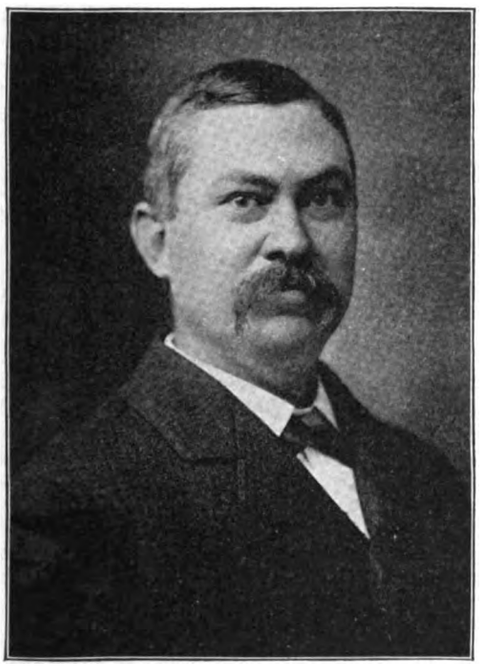
Digitized by Google

PERSONAL VISITS TO MEMBERS.

During the year we have visited about 60 per cent. of the members in the organization and have attended quite a number of Association meetings. On all of these occasions we have been much gratified to learn that the work done by the National Hardware Association was fully appreciated by individual members, and that local and sectional Associations felt that our organization was helpful to them. We also visited several State Retail Hardware Association Conventions and noted with much satisfaction the growth of this movement among our retail friends, almost 10,000 retail merchants being now connected with State Associations and through these with the National Retail Hardware Association.

OUR FINANCIAL CONDITION.

Our report as Treasurer will show that during the year, notwithstanding the fact that we have had some unusual expenses, our income has been equal to the same. So that the very comfortable balance we had on hand at the close of last year is still intact.



OUR POLICY.

Some of the members of our Association have thought that we were not aggressive enough in connection with matters which related to the proper protection of the jobbing trade. The policy pursued by the wholesale and retail Drug Associations has very frequently been alluded to, and the suggestion made that we should follow the lines which they are pursuing.

As you have already been advised, the United States Court has declared that the Drug Association has been too aggressive and that they have violated the Sherman Anti-Trust Law. I have very carefully followed the litigation alluded to, and am quite convinced that the conciliatory policy as outlined by our Executive Committee several years ago is certainly a safer one to pursue than the aggressive one adopted by our friends in the drug business.

We thoroughly believe that if our manufacturing friends will not respect a courteously phrased expression of our preference in connection with the sale of goods to catalogue houses or any other class of trade, they will not respect our demands, and therefore this Association makes no demands. If a manufacturer of any commodity we handle believes that it is just to furnish his goods either direct or indirect to any class of dealers who make a business of trade demoralization, we simply say to that manufacturer, as an Association, that it is our preference that he should change his policy.

Be it said to the credit of the vast majority of manufacturers

COL. R. M. DUDLEY,
of Executive Committee.

of Hardware and kindred lines that they have taken the position that the legitimate retail and jobbing trade of the country are entitled tc at least this degree of consideration and have acted accordingly.

There are a few manufacturers, most of whom do not make a high grade of goods, who are still permitting their prices to be demoralized. We believe that without any effort on the part of this Association or any other organization, these manufacturers will find that their goods will be supplanted by others in the esteem of the trade of the country.

WHOLESALE AND RETAIL JOINT COMMITTEE.

Our labors in connection with this branch of the work have been extremely pleasant and not so arduous as to break down our constitution. This Joint Committee has accomplished results which amply justify its existence.

Your Secretary-Treasurer is also General Secretary of this Committee and unhesitatingly states that a far better condition

J. D. MOORE.
of Executive Committee.

prevails than that which confronted the trade some two or three years ago.

Our Chairman has been active and earnest and has the confidence and esteem of all the members of the Committee.

METAL DEPARTMENT.

This branch of our Association is in a very healthy condition. Yesterday a meeting was held under the auspices of the Metal Branch of the leading jobbers throughout the country of Tin Plate and Metals, the invitation being extended to the members and non-members of this Association. It is a branch of business which requires special technical knowledge, and the employment of a very large amount of capital in proportion to the business transacted. It is a branch of business where the risk of depreciation in price is very large and therefore should pay a fair profit, and yet, unfortunately, conditions are such that the members of our Association who deal in these commodities have indeed just reason to complain.

HARDWARE FOR PREMIUM PURPOSES.

The tendency of some manufacturers to permit their high-grade goods to be purchased by parties who desire to offer them as premiums for the sale of breakfast foods, tobacco, chewing gum, and face powder, is greatly to be deprecated. Our Association at its last Convention passed a resolution in which attention is called to the fact that premium goods practically cost those who receive them nothing, and indeed, they are sold to these parties who give them away at a lower price than the jobber is forced to pay, thus, not only demoralizing trade prices, but if the practice is continued the sale of such for legitimate purposes must necessarily be reduced in the future.

The manufacturers are not alone to blame, as some members of this Association have unfortunately supplied some of these gift houses.

ONE CENT LETTER POSTAGE AND PARCELS POST.

These subjects can be well connected as they both vitally affect the manufacturer, wholesaler and retailer of Hardware.

Every one in the community is more or less of a correspondent and every time a two-cent stamp is placed on a letter, one and one-fourth cent is paid to the government as a profit—inasmuch as it costs but three-fourths of a cent to collect, carry and deliver a letter weighing one-half ounce.

Second-class mail is carried at an enormous loss, and fourth class, which as you know is merchandise, costs about the amount paid; namely, one cent an ounce.

It is proposed by those who advocate Parcels Post to change

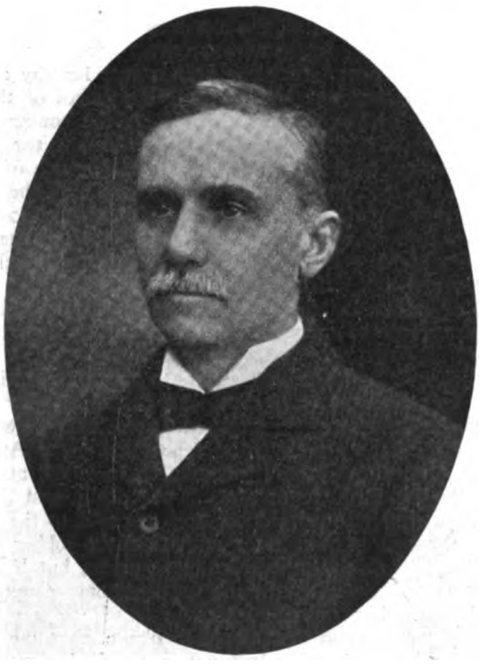
Digitized by Google

the rate to 2¼ cents per pound, or to be exact, 11 pounds for 25 cents.

A Parcels Post in this country can only be conducted at an enormous loss to the government, and would be only of advantage to mail order houses.

Our Association became members of the National Board of Trade early in the year, and it was your Secretary-Treasurer's pleasure to represent you at the annual meeting of that body.

The National Board of Trade had for years gone on record as favoring a Parcels Post. We presented the other side of the question and succeeded in having a clause inserted in their resolution on the question, reading as follows: "We recommend a Parcels Post provided that the same can be conducted without any expense to the government."



During the debate on the subject a delegate asked why the Hardwaremen were the only ones opposing a Parcels Post. Your Secretary-Treasurer replied: "Because they are better organized, have given great consideration to the subject, and are more inteligent than those in other lines of business."

SYNDICATE BUYING.

At the Convention of our Association which was held in the city of New Orleans in 1902 two of the prominent companies engaged in this line of business voluntarily offered to submit their list of clients to the Secretary of this Association, and eliminate the names of such parties as should in the judgment of that official be denied a place on the list of the Syndicate Buyers pretending to represent jobbing interests.

The Secretary-Treasurer was directed to pursue this matter. Two other Syndicate Buyers afterwards consented to do the same, and as a result a large number of parties who were not legitimate retailers or jobbers, but who did conduct business in a way that was demoralizing to the interests of both, were removed from the lists of the Syndicate Buyers alluded to by the respective buyers. Subsequent applications for syndicate buying connections were submitted to the Secretary of the Association, and up to a few months ago the understanding was honestly adhered to.

Two of the four concerns who became parties to this agreement were tempted to evade it. One, however, of the two has made amends, and is now operating in conformity to the New Orleans agreement. We regret to say, however, that one of the four is still pursuing an independent course, and has added names of some who had been dropped by the others; through the in-

GEO. B. LOGAN.

fluence of our members who are clients of the Syndicate Buyer in question, we hope this Syndicate Buyer will also adhere to the agreement.

It has been said by some critics that this Association has recognized Syndicate Buying, and is supporting it; this is a mistake. Our Association has never taken any action which would justify any one in stating that we either support or refuse to support Syndicate Buying.

CASH DISCOUNT.

Recently certain manufacturers have attempted to reduce the profits of both jobber and retailer, by changing their terms, which have been 60 days with a discount of two per cent. off for cash in ten days, to 60 days, and in some cases 30 days, with one per cent. for cash within ten days. This action recalls the position taken by certain very large and influential manufacturers on or about July 1st, 1899, when an announcement of the withdrawal of the cash discount by one of the most prominent combinations of manufacturers, was followed by quite a number of smaller ones, and so numerous were these, that it looked very much as

B. F. ESHLEMAN.
of Membership Committee.

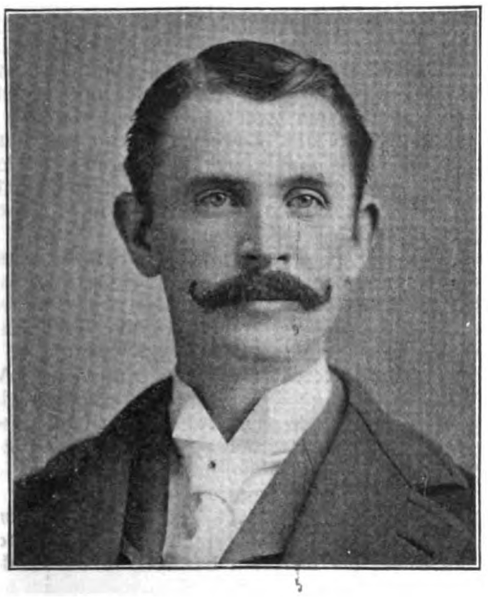
if there would be a complete revolution of the terms of selling Hardware and kindred lines.

This Association through a very strong Committee met the chief officers of the manufacturing corporation alluded to, and used arguments which prevailed, so that in three months a discount of one per cent. was conceded, and in five months the discount of two per cent. for cash in ten days was restored.

At the Convention of this Association, which was held November 15, 16 and 17, 1899, in the city of Pittsburgh, the entire subject was very carefully discussed, and given mature consideration.

Investigations proved that it would be a great hardship to deprive the retail trade of the Cash Discount, as they in turn allowed it to their customers, who paid within a specified time. At the Convention alluded to, the following resolution was unanimously adopted:

"*Resolved*, That it is the sense of the National Hardware Association that the discount two per cent. for cash in ten days formerly given by the manufacturers of steel and iron goods, be not construed as bank interest, but as a premium for prompt payment and as an insurance or protection of credits, and further that such or similar discount be retained where still allowed, and that we urge its restoration where it has been discontinued."



Our Association took the position that the Cash Discount was not really interest on money but that it was a premium for anticipating the due date of a bill. After the Convention alluded to, nearly all the manufacturers conceded the justice of our claim, and it has only been within recent months that our manufacturing friends have agitated any change in the amount of the Cash Discount.

We do not ask those from whom we purchase to reduce their selling price; we simply ask them to figure the Cash Discount in the cost of the goods, just as they do what they expend for raw material, labor, possible losses, freight, administration expenses, good, nice salaries for themselves, and other items too numerous to mention.

We find no fault with our manufacturing friends for pursuing this course; indeed, we rather commend them, but we do hold that it is unjust, unkind and ungenerous to attempt to force the trade of the country to buy goods without a discount or with one per cent. discount for cash in ten days, when both jobbers and retailers are compelled to give the cash discount on their sales of two per cent.

Digitized by Google

Statements have been made by some that the jobbers abuse the privilege; that they take twelve, fifteen and sometimes more days and still deduct the Cash Discount. Such instances are comparatively small in number, and even should a member of this Association ask for a premium when he is not entitled to it by reason of the terms of his contract, it is the privilege, if not the duty of the manufacturer to return the settlement, and insist on the payment of the face of the bill when it matures. This Association asks no consideration for those who violate their contracts. We therefore hope that our manufacturing

CHAS. H. IRELAND.
of Fraternal Relations Committee.

friends without any exception will recognize that the universal terms of selling Hardware and kindred lines should be two per cent. for cash in ten days. Our Executive Committee thinking that this matter was of great importance, on October 8th addressed a letter to over 200 leading manufacturers, 180 or more of whom were members of the American Hardware Manufacturers' Association. Up to date we have heard from 125 of these, and all but 15 are opposed to making any change, so that we can consider that any general movement to change the amount of the Cash Discount will not meet with success.

In conclusion, permit me to thank the individual members for the assistance rendered during the year, particularly for the prompt answers to many communications sent from the Secretary-Treasurer's office; also to thank the Executive Committee and Advisory Board for much valued instruction received from them.

Our President has at all times been earnest, active, cheerful to direct, and has been considerate of our feelings when it was necessary to administer rebuke.

An annual report should close with a few stanzas of poetry, or a statement of purpose to resign. Your Secretary-Treasurer has quoted in previous reports, all the poetry he knows, and he fears to offer his resignation, lest it might be quickly accepted.

Therefore, we simply express a hope that this organization may continue to prosper in the future as it has during the twelve years now closing.

Respectfully submitted,
T. James Fernley,
Secretary-Treasurer.

President Wright: The next order on the programme will be the introduction of several prominent gentlemen whom we always have great pleasure in meeting and whom it is a pleasure to know. The first is our esteemed and honored.

PRESIDENT, F. S. KRETSINGER, OF THE AMERICAN HARDWARE MANUFACTURERS' ASSOCIATION.

to whom we give all credit for everything we get and make no complaint on what we expect to get and fail.

Mr. Kretsinger said:

Mr. President Ladies and Gentlemen:

Until this moment I was not aware that any Joint Session of these organizations was to be held until Thursday. Just now I was informed by your programme of these introductions and I am pleased to express my thanks in a very few words.

Speaking for the American Hardware Manufacturers' Association, I can assure you that we are delighted to again meet with you and particularly greet so many ladies who honor us with their presence—to see so many familiar faces and to extend to you, one and all, a most cordial greeting. We have listened with interest to the addresses of your honorable President and to the report of your Secretary-Treasurer and we note with satisfaction the progress you have made and the good which you have accomplished. They show what concerted action by conservative minds can do. It is fitting that full credit should be paid to the greatest Hardware Association of the world by the greatest Association of Hardware Manufacturers which I have the honor to represent.

President Wright: I will next introduce to you

T. H. NEWMAN, PRESIDENT OF THE CANADIAN WHOLESALE HARDWARE ASSOCIATION.

whom it is always a pleasure to meet, and we would be very glad indeed if we were as close to Canada commercially as we are socially.

Mr. Newman said:

Mr. President and Gentlemen:

On behalf of the Canadian Wholesale Hardware Association, I desire to extend my sincere thanks for your very kind invitation to attend this, your twelfth Annual Convention.

I had the pleasure of addressing a few remarks to you at the last Convention in Washington, and also of an introduction to President Roosevelt, of whom I shall always retain the most pleasant recollections. He impressed me, at the time, as a man of high culture and great ability, well fitted to fill the position to which your great nation has called him.

Our Association, in Canada, has continued its work, during the last year, with considerable success. At the present moment Canada is enjoying a period of prosperity which is likely to continue for some time at least. The rapid settlement of our Great Northwest and the development of our railway systems, are, in a large measure, accountable for our present prosperity.

Might I presume to take up a few moments of your time, giving you some figures which will illustrate the growth of Canada's foreign trade—

Total imports, $294,000,000; total exports, $256,000,000, or a grand total of foreign trade, $550,000,000.

Imports from the United States into Canada, $180,000,000; exports to the United States, $83,000,000.

JAMES S BONBRIGHT.
of Entertainment Committee.

Imports from Great Britain, $70,000,000; exports to Great Britain, $127,000,000.

It is generally believed that Canada is the third largest customer which the United States has. This is very easily accounted for, our close proximity to your great country, is one reason why we purchase so much, and another reason, perhaps a more important one, is that the manufactures of the United States are suited to Canada's requirements.

Digitized by Google

I doubt very much if any nation in this world, possessing a population of six and a half millions shows a larger foreign trade than Canada; our internal trade is growing with leaps and bounds; Canada is becoming rapidly a manufacturing country, and goods formerly imported from other countries are being made at home.

One more illustration of the growth of trade, namely, bank clearings. A few years ago the City of Montreal occupied thirteenth place of all the cities of this continent, to-day she ranks eighth, being exceeded by the following cities: New York,

E. M. BUSH,
President National Retail Hardware Association.

Chicago, Boston, Philadelphia, St. Louis, Pittsburgh, San Francisco, then Montreal.

I cannot close these few scattered remarks without referring to the very cordial relations existing between the United States and Great Britain, the great Anglo-Saxon nations to Christianize by trade and commerce the out-lying portions of the world, insuring the peace of the world, under the protection of the Stars and Stripes and Union Jack, these flags entwined together, the symbol of peace and liberty all over the world.

The Chairman: All of us are compelled to recognize that the interests of the Manufacturer, the Jobber and Retailer are mutual, that the success and upbuilding of one means the prosperity and advantage of the other. Under these circumstances, it gives me great pleasure to introduce to you E. M. Bush, the President of that great organization of the Hardware trade, the National Retail Hardware Association.

Mr. Bush addressed the meeting as follows:

ADDRESS OF E. M. BUSH.

Mr. President and Gentlemen:

I had recently the great pleasure of meeting in Detroit, Mr. Fernley, your Secretary, who had, a short while before this meeting, kindly extended me an invitation to talk to you here to-day. As we hurried to the station to catch our homebound train for which we had given ourselves none too much time, something was said about your program and what time I should take before you. In the midst of this discussion, Fernley, watch in hand, burst forth in a very emphatic manner: "Time's short, time's short, don't spend much time getting there, my friend." Now, Mr. Fernley may have addressed the cab driver, as he insists; but gentlemen, I must always "hae my douts"—and that I may not abuse the courtesy extended me—will remember that "time's short" and spend as little time as possible "getting there."

I appreciate deeply in coming before you to-day, my inability to represent our National Hardware Association so well—so fully—as has always been the happy forte of my honored predecessor, Mr. Bogardus, but that must be the lot of one who follows so worthy a President.

When upon former occasions our National officers have come before you, it has been principally to discuss the Catalogue House question and prospective Parcels Post legislation. I shall touch these subjects but briefly—not that we consider either of them a dead issue—for that the educational influences and agitation of both questions have borne fruitage we are fully convinced by the events of the past year.

Let me rather in a few words try to show you the every day environment of the retailer—contrast his surroundings and opportunities with yours, in your larger sphere of manufacturing and jobbing business life—and endeavor if I may to make two or three suggestions which shall, perhaps, be mutually helpful. I cannot hope to bring anything new to you in these suggestions—this ground has been so thoroughly threshed over that little new is left. But so auspicious an opportunity for a few words on the subject leads me to hope that even a repetition, if *brief*, will bring about some good results.

In the centers of trade, cities of twenty thousand and upwards—often, too, in small places—are retailers doing a business which runs up into six figures annually. But with a vast majority of retailers, whose stock embraces, besides legitimate Hardware, stoves, agricultural implements, vehicles, paints and numerous other lines that in this day fill a general Hardware store, the annual sales run from ten to sixty thousand. It is to retailers of this class who also largely predominate in the State Retail Hardware Associations that I would call your attention. Few of these merchants are brought in direct contact with the heads of jobbing houses, even less rarely do they meet the manufacturers of the goods they sell.

MERCHANTS OF THIS GENERATION GO SELDOM TO MARKET,

for the market comes to them in the traveling salesman of the jobber—in the stove, implement and paint representative of the manufacturer who sells direct to the merchant. Is it strange then that there has existed in the past no greater feeling of community of interest between you and these retailers? And, pardon me, gentlemen, hut have not manufacturers and jobbers been inclined to regard the retailers' interests as of slight consequence? In reality, retailers are the secondary roots of your tree of prosperity, and must be nourished and matured by fair, just and considerate treatment, for this glorious tree will suffer severely, these secondary roots *not* receiving proper consideration.

The lack of this feeling of mutual interest has been accentuated in instances where the merchant has seen in the catalogues of the mail-order houses goods of a manufactuded which he has for years displayed, talked, sworn by and sold, so priced that he has cut out competition. Happily, these times and conditions are passing—largely through the advent of the Retail Hardware Associations—which by this act of association have won recognition of the fact that they are a factor worthy of consideration in to-day's commercialism, and which afford in their convention op-

COL. JAMES R. NUTTING.
Chairman Press Committee.

portunities for the heads of firms to meet the distributers of their goods and products. This acquaintanceship naturally clears the air, matters are better understood, differences are more readily adjusted. While a

FEW YEARS AGO MANUFACTURER AND JOBBER THOUGHT ONLY OF THEIR OWN TROUBLES,

they have learned through Association efforts that the retailer, too, has his troubles, some of them unconsciously or thoughtlessly brought about by the very manufacturer whose goods he is pushing. The retailer rejoices to-day in the knowledge that a great number of manufacturers and nearly all jobbers—all in

Digitized by Google

this Association—are working in unison with him for improved conditions, which we know are coming about. Are we not justified, gentlemen, in a small feeling of pride in the knowledge we have, that the position we have gained has been attained by methods both sane and conservative? For well we know the prejudice, almost distrust, which existed in some minds in the early days of our Association life.

Let me suggest, gentlemen, that whenever possible, you attend with your representative those conventions where displays of your wares are made, that you encourage criticism and suggestions from the retailer, for who knows better than he who comes in direct contact with the consumer, what the public asks in an article and what changes and improvements will meet its demands?

LEARN FROM THE RETAILER WHAT THE PUBLIC WANTS,

for he has his finger on the public pulse.

Next, gentlemen, let me bring to your notice the vast difference in the matter of sales between your business and the retailer's. Few manufacturers can conceive of the many little sales of 10, 15 and 20 cents that go to make up the day's business of a retailer—since the most of your transactions run into hundreds and thousands of dollars and concern ton and carload and trainload in quantity.

The retail merchant must of necessity be accessible to every customer that enters his store, and 'tis an everyday occurrence for customers to come many times to the proprietor himself for

C. B. LOCKWOOD.
of Press Committee.

their little purchases. You say, "Turn such sales over to your clerks;" you can't afford to do what will probably offend your customer and lose to you his trade, which, small to-day, may be large to-morrow. A retailer's trade is limited, he must keep it—it is largely local—while yours is the entire country and perhaps the wide world. I bring this volume of small sales to your attention, and the valuable time often consumed in making them, that you may be more liberal when estimating the profits that are legitimately the retailer's.

A complaint often heard is, that the man behind the counter

DOES NOT EXHIBIT ENTHUSIASM IN TALKING GOODS,

lacks a knowledge of how they are made, of what material, what advantages they have and all the uses to which they can be put, etc., etc. Let me ask you manufacturers what *you* have done to impart this information to us? We receive from you, enclosed—usually—in a neat, tasty box or package, distinctly marked, perhaps, with name, number and size upon it—a chisel, a rifle, a hundred other things. You know its merits, you consider it the best of its kind or you wouldn't send it out—why don't you tell us wherein its especial merit and advantage lie? How, I ask you, gentlemen, is a retailer with hundreds and thousands of other articles upon his shelves—how is he to talk with knowledge, with an air of conviction, with enthusiasm, when his only guide is the name, number and size of that plane, saw or chisel? That is all you have told him of it—and with the myriad of other articles about,

HE HAS LITTLE TIME TO STUDY UP EACH ESPECIAL MERIT.

Why not help us to know more about you and your goods? Tell us for how many years your saw or chisel has been made, of what sort of steel or other material, its improvements, how to use to best advantage, exact dimensions, why you know it to be better than its rival in the trade. The maker of an article should certainly know best the merits of his product. Print this information upon a slip to be enclosed in box or pasted upon the package. This slip will better enable proprietor and clerks to sing your praises and talk the merits of your goods all over this broad land.

One of the strong points of the cataloguer, is the complete description he gives of even the most inferior articles. However

J. J. MENDELBAUM,
of Press Committee.

poor and diminutive the cut may be, these full descriptions in print make an impression that sells an article, which if seen and handled would probably not have been sold; but the minute description does the work.

Many clerks lack the intelligence or inclination or versatility to see and grasp the talking points of an article. These need the information I ask for, in suggesting this descriptive card. Salesmanship in our stores would rank higher did not jobbers and manufacturers as soon as our clerks are developed take them from us by offering higher salaries than we can afford to pay.

Many of you have difficulty in finding salesmen properly to represent you and your wares on the road. Retailers have the same difficulty in securing model clerks properly to represent them and talk their wares behind the counter. We all know how much more readily we buy of

THE MAN WHO UNDERSTANDS AND KNOWS HOW TO TALK HIS WARES.

Every salesman who knows and understands your wares is in a way your salesman, and you reap the benefit of his sales.

I am reminded of the experience of a Western retailer who two or three years ago took the sale of a certain skate (which, by the way, bears a private brand). In each box of skates a neatly printed card with the special features and component parts of the skate subdivided into heads and emphasized by being printed in red ink, reads as follows:

VALUABLE HINTS FOR USE OF RETAIL SALESMEN.

NO NAME SKATES.

Runners—made of carefully selected, toughened Hicarbon Steel, extra broad at base. Hollow ground.

Foot Plates—made from tested homogeneous steel shaped to conform to foot. Owing to its peculiar construction, it is the lightest and at the same time the most rigid in the world.

Clamps—Are made of tested homogeneous steel. The heel clamps are of extra height. No Name skates will "stay on" no matter how badly the heel may be worn. The toe clamps are of the improved, self-adjusting pattern, which places the runner in the centre of the foot. Just the thing for Bull Dog shoes.

Lever—Positive lock. Will not jar loose.

I am told that every salesman in this town when showing these skates, dwelt so upon the phrase "Homogeneous Steel Foot Plate and Clamp," that no small boy of the town felt himself "in it," unless he had a pair of "ingenious steel skates," and the

Digitized by Google

order for these skates placed by this retailer for his Winter's trade was large enough to merit special mention in a general letter to this jobber's salesmen.

I regret to give away this wise jobber's method in so open a manner as before this gathering, but we retailers want you all to "get busy" and give us the concise printed information which will assist in selling your wares.

This is the era of advertising. Retailers too are catching the spirit of the times and many more would advertise than do if they knew better how. Our trade press has done much to stir up and encourage this spirit. A few manufacturers have helped along the movement by preparing advertisements and furnishing cuts of their specialties. Furnish small cuts of your wares for use in newspaper advertising. Recently I asked of a manufacturer the use of a small cut of a lantern which had been bought. The cut sent was fully 4 by 5 inches. Short descriptions and small cuts of your wares we need and ask for, gentlemen. Remember that the retailer as an advertiser is in swaddling clothes. Now can he unassisted produce ads. of your goods that are attractive and bring results? I have seen criticism of the same ad. of a retailer standing for months without change. But, gentlemen, I assure you that it is easier for the proverbial camel to go through the eye of a needle than for many of us to get up unassisted a new ad. for our daily and weekly papers.

Nor do I come to you, gentlemen, with these suggestions as a suppliant for help to the poor retailer. No one knows better than you that our success is yours, and

WHATEVER INCREASES OUR SALES WIDENS YOUR MARKET.

Here indeed lies our community of interest.

While the remembrance of my friend Fernley's remark "Time's short, time's short," prevents my offering many other things under this head for your consideration, I believe he will allow me to speak briefly of our National Retail organization and its prosperous condition.

Retailers issued the first call for an organization of Hardware merchants in 1893 for Chicago during the World's Fair, the object being a national retail organization, but the time was not yet ripe. Just who organized it I do not know, but not a dozen retailers responded to the summons. Among them, however, were Mr. Sibley, of Indiana; Mr. Bryan, of Pennsylvania; Mr. Stebbins of Minnesota. These three gentlemen are to-day ardent workers in their Association ranks.

To Ohio I believe belongs the honor of the first organization in 1894. Close seconds were Michigan in 1895, Minnesota, Iowa, Wisconsin and North Dakota in 1897. Georgia and West Virginia have organized very recently with a larger membership than some of the older and larger States acquired after several years of organization, showing that to-day Association movement is better understood and appreciated. We are hearing the Macedonian call from several other States to come over and help organize us, which will be done in the near future.

Reports received since September 20th from nearly every secretary of the thirty States composing our National organization show perfect harmony, growing interest and increased membership. The growth this year has been greater than any former one. Of the individual States, Illinois leads now by a small margin, with an enrollment of 1044.

An Inter-State Association was organized in Chicago early in 1900, out of which the following year our National Association grew. A good part of its work has been directed with your own against Parcels Post legislation—very effectively too. We were the first business organization to raise a cry against this iniquitous measure. The first appearance before your two organizations of representatives of the National Retail Association was in 1903, when Mr. Bogardus, then our president, addressed you upon the subject. It is with satisfaction we note the growth of opposition to this measure outside our triple organization. The frequent letters in the *Iron Age* of its Washington correspondent have been very valuable to retailers, keeping them informed of the movements of these Parcels Post advocates; and, with the aid rendered in other ways by the rest of the trade press, have had a tremendous influence in awakening widespread opposition to this measure.

I have been amazed at what has seemed to me to be almost criminal shortsightedness, when some of our daily papers appear as advocates of this measure—surely with no consideration of the interests of proprietors and stockholders by their editorial writers—since they advocate a plan, which, a veritable boomerang, would sweep away pages of well-paying advertisements.

Mail order houses, which alone are interested in Parcels Post—once the measure is secured—will quickly abandon the daily papers, for those magazines whose widespread circulation makes them a better advertising medium.

Let me urge that such united action be taken by your two organizations before adjournment of this Convention, as

SHALL BRING THE DIRE EVILS OF A PARCELS POST,

as this business organization sees them, to the attention, the thoughtful consideration and the better understanding of the proprietors and editors of the daily papers of this country. Retailers regard it of paramount importance that this matter be brought by you to the attention of the publishers of these daily papers, who will in the next few months mould public opinion for or against this measure.

The Indiana Federation of Labor, in convention at Indianapolis during the last week in September, went upon record as decidedly opposed to a Parcels Post. A resolution to consolidate third and fourth class mail was defeated upon the ground that the resolution was practically endorsing a Parcels Post, and, the Convention declared, would especially favor mail order houses, which in their opinion were responsible for cheap production.

Also at a recent Convention of fourth-class postmasters held in Chicago, a resolution was passed wherein these gentlemen declared themselves squarely against Parcels Post legislation, for the reason that such legislation would be directly in the interest of mail order houses and against the local merchants, a postmaster stating that "it would drive most of our town merchants out of business."

These incidents, as straws, show the way of the wind.

To learn how we have succeeded with the aid and leadership of the Joint Committee, against standard goods being sold by the Catalogue Houses, it is only necessary to compare these latest catalogues with former ones. And, for the organization which I represent, I desire to express both to manufacturer and jobber, our appreciation and gratitude for aid and assistance rendered, and the compliance of so many of you with our desires and requests in this matter.

A few manufacturers have expressed their purpose to continue their

BUSINESS RELATIONS WITH THESE MAIL ORDER HOUSES,

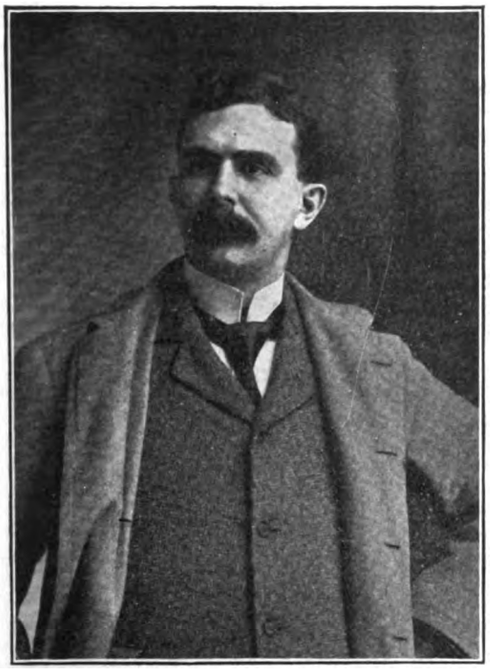
and in some instances, judging from the prices at which their goods are sold, do not care to protect the retailer's interests, even to the extent of regulating the prices at which their goods are catalogued. We, however, continue to hope they will yet view this matter from our point.

Gentlemen, I would not fairly represent our retail organization did I not emphasize the Catalogue House question, though only by brief mention. It is not a theory, but a condition that confronts us in many daily transactions and incidents, nor are words of mine needed for your better understanding of the matter, but herein lies a community of interest that should appeal to us all. We plead for that united and enthusiastic action in this matter, which shall foster and further develop our present system of merchandising, manufacturer to jobber, jobber to retailer, retailer to consumer, rather than the demoralizing methods of mail order houses, which with cut prices, gift-giving schemes, widespread money-borrowing systems, that cannot but work disaster upon present-day business methods, seek for their own aggrandizement, usurpation of manufacturer, elimination of jobber and distrust of local merchant. We surely have the brains and courage, when awake to the situation, to stem this tide of business demoralization.

Rural delivery, trolley lines and telephones are making country and village life more attractive, more desirable every day, a condition most happy for the welfare and prosperity of our beloved country. Will this condition be furthered by any system of business which does away with the retailers of village and town, and puts in their places, mail order houses, hundreds of miles away?

A mail order house that controls forty million dollars capital, will certainly increase the number of its factories as rapidly as the quantity of goods it can market will justify. Some of them are also doing so large a borrowing or banking business with their distant patrons that bankers are becoming alarmed at the flow of money away from the towns and smaller cities into the hands of these firms. Such vast amounts of money must be invested, and does it not seem that a syndicate of mail order houses located in the principal business centers, is much nearer realization to-day than when your attention was called to its possibility on a former occasion?

Several mail order houses of no small magnitude have failed in the last year, and we believe with the improved methods of the retailers in conducting business, with the prevention of Parcels Post legislation, the aid we render one another, the present business method of manufacturer to jobber, jobber to retailer, retailer to customer, will continue to prevail.



The Bulletin, our National organ, has been issued since organization as a quarterly, but became last March a monthly. Its October issue was 12,000 copies and plans are rapidly maturing, whereby we feel confident that by the January issue it will have reached 20,000.

Every Association member eagerly awaits the arrival of his

Digitized by Google

Bulletin, as its pages teem with valuable letters, discussions, information and suggestions as to the conduct of his business. I am requested by the editors of our paper to announce to you that its columns are at your disposal at all times—they heartily invite from you any suggestions, discussions and criticisms that will bring us into closer and better business relations. The *Bulletin* is primarily a retailer's organ, occupying a place distinctively its own.

Retailers would welcome heartily large representations of manufacturers and jobbers at their State and National meetings. Such affiliation could result only in good, for by addresses and discussion, the exchange of ideas and opinions, the friendly relations now existing would be the more closely cemented, enabling us to work more in union, more in defense of our mutual interest and good, as illustrated by what has been accomplished in the prevention of Parcels Post legislation. That what has been accomplished has been of benefit to the individual members

S. NORVELL.
Chairman of Catalogue House Committee.

of our several organizations, no one can deny. Many other questions will doubtless arise in our kaleidoscopic times that may demand quick, united action. The three branches of the Hardware and iron trade represented here to-day, manufacturer, jobber, retailer, representing also the greatest volume of business in any single line of trade in the world, were first to be brought together for consideration and discussion of subjects of mutual interest.

Let us prove to other lines of business by our harmonious action and the good results obtained thereby, that they also will be benefited by following the path where we have blazed the way.

Gentlemen, I thank you.

President Wright next introduced N. A. Gladding, Chairman of the Reception Committee of the American Hardware Manufacturers' Association. Mr. Gladding announced that a reception would be given by the American Hardware Manufacturers' Association in honor of the National Hardware Association in the evening at the hotel.

PRESIDENT WRIGHT: The next, we have with us

JAMES HARDY, SECRETARY-TREASURER OF THE CANADIAN WHOLESALE HARDWARE ASSOCIATION.

Mr. Hardy said:

Mr. President, Ladies and Gentlemen:

It is a pleasure, I am sure, to again attend your Convention and convey as I have to do officially for the Canadian Hardware Association, their thanks for the cordial reception and the kindness the members have always exhibited on every occasion to visitors from our Association.

President Newman has dealt very fully with the figures as to what Canada is doing. I would like to get down just for a moment to what you may consider dollars and cents, and I would like to point out that a great deal has been said about the United States being the natural market for Canadian farm products, yet per head of population, Americans bought only a little over nine cents worth of Canadian farm products during the year 1904, while Canadians per head of population bought from the United States over three dollars and fifteen cents worth of the same kind of farm products. One Canadian consumed more United States farm products than thirty-four Americans did Canadian. Most everyone interested in this matter will admit that the reason for this is that the United States has a high protective tariff, while Canada has a low one. Canadians bought from the United States in the fiscal year 1904 540 times as much bacon, 13 times as much butter, five times as much cheese and over 30 times as many eggs as we sold to them, this, notwithstanding that, they have a consuming market fifteen times as large as ours.

Gentlemen, I think that applies with equal force to Hardware. Whilst we buy 540 times as much bacon, I think the proportion of Hardware would be considerably higher than that. I think if you want to do more business with us you had better come over and put a plant up there and become one of us. There is no doubt you will receive an ample reward. We are progressing, as you are all aware, very fast. We hope to progress a little further and better in the future.

With respect to the future meetings of this Association, we would like to see you come to Canada. We think we can take care of you in Toronto, the finest city in the world. Most of you, a great number at all events, have been there. We have been coming here for a number of years and receiving the greatest hospitality and kindness, and we would like to have a chance to return the favor. Ladies and Gentlemen, we would be glad to see you all in Canada and we know when we get you you will want to stay with us.

PRESIDENT WRIGHT: The next on the programme is

F. D. MITCHELL, SECRETARY-TREASURER OF THE AMERICAN HARDWARE MANUFACTURERS' ASSOCIATION.

who is so well known to you all that I really feel he needs no introduction. We will be glad to hear from him.

Mr. Mitchell:

Mr. President, Ladies and Gentlemen:

When I received an advance copy of the programme for this morning's session I noticed that I was listed for an introduction to those whom I have met on so many occasions for the last dozen years, and I felt somewhat of a sinking feeling, for I was assured it would not be in order for me to prepare an address. I found a note from my friend, Mr. Fernley, which read something like this:

"Dear Mitchell: Do not feel alarmed, you are not expected to say anything," and I have not quite figured out whether that was an invitation or a promise; but in any event I see a great many looking for the dining room and there is quite a long order of business to follow. I am very glad to have the opportunity of meeting and greeting all who are within sight, and I hope that during the rest of the Convention I will have the opportunity to meet each individual in a personal way. I thank you.

PRESIDENT WRIGHT: We have the pleasure of having with us

M. L. COREY, THE SECRETARY-TREASURER OF THE NATIONAL RETAIL HARDWARE DEALERS' ASSOCIATION.

Mr. Corey said:

Ladies and Gentlemen: Mr. Fernley assured me to-day that I would not be expected to say anything. I told him that I would give my time to my President, Mr. Bush.

I assure you that it affords me a great deal of pleasure to be with you to-day. I enjoy these gatherings of Maunfacturers and Jobbers. I believe it is to the advantage of the retailer to get out and see some of the troubles that you are up against, while we thought we had a monopoly of them. I thank you very much for this opportunity and I hope to meet you all personally.

PRESIDENT WRIGHT: It will be a very great pleasure to hear from

W. W. WEBBER, THE SECRETARY-TREASURER OF THE SOUTHERN HARDWARE JOBBERS' ASSOCIATION,

whose well-known reputation for hospitality we have experienced and enjoyed in the past.

Mr. Webber spoke as follows:

Mr. Chairman:

It is with immeasurable pleasure I appear before you on this floor to-day representing the oldest Hardware organization in the United States; the first to appreciate the necessity and benefits of organized effort. The organization of the National Association was a clear endorsement of the usefullness and farsightedness of the Southern and the organization of the American Manufacturers was and is an endorsement of both the Hardware Associations.

I have always taken ground against individual effort to reach universal ends, and have contended that where the benefit was to be divided the work should be, though I regret to say there are those who while appreciating this fact fail to prove their

Digitized by Google

faith by their works. This is essentially an age of co-operation, a time when associated effort is necessary in many lines and I predict long life for every organized body conducted along practical and equitable lines.

The coming together of manufacturers and jobbers assures an acquaintance not to be had otherwise, begets a personal confidence and an intimate knowledge of man that is not possible under old conditions. Experience is the best school and teaches that when we know a man or firm our ability to place an estimate is augmented by our knowledge of surroundings and characteristics of the one with whom we are dealing, thus in many instances rendering transactions easy of accomplishment that otherwise would be difficult if not impossible.

W. W. WEBBER,
Secretary-Treasurer of Southern Hardware Jobbers Association.

There are many who arrogate to ourselves the sum total of all knowledge, who insist that the horizon of every man's vision should come down just where ours does and we have small patience with those who are inclined to think for themselves. Many are heard to insist that their city, county or State is the best known, which reminds me of the speech of the lamented Baker of Benton Co., Ark., who had just listened to a long harangue by some member from one of the river counties in Arkansas, and who extolled the beauties of the broad expanse of acres with the waving fields of corn and then later showing the beautiful snow-white cotton, with the old darkey of ante-bellum history astride his mule as he wended his way homeward, while he sang one of those quaint, touching old songs that only an old darkey knows how to sing:

"Where the tall grasses nod at the close of the day,
And the sycamore's shadow is slanting away,
Where the whippoorwill chants from a far distant limb
Just as if the whole business was all made for him.
Oh! it's now that my thoughts, flying back on the wings
Of the rail and the die-away song that he sings,
Brings the tears to my eyes that drip off into rhyme
And I live once again in the old Summer time."

Then Baker arose and said he desired to say something concerning the beauties of Benton County, Ark., the home of Senator Berry and Representative Peel, the bailiwicks in which the festive negro and the miasmatic mosquito had no abiding place; in fact, a county where the mountains are so high that one can stand on the top of the highest and tickle the bottoms of the feet of the little Democratic angels in heaven and where the gulches were so deep one could stand in the bottom of the deepest and hand a cup of water across to the Republican Imps in hell.

Now, that goes to show that Baker was a man of limited vision and while he lived in a beautiful part of God's vineyard he seemed to forget the beauties and attractions that abound in other places and nowhere more so than here at this resort where each and all of us can for the nonce forget the grind and turmoil of factory and store and mingle together in that spirit that will ultimately bring about "The parliament of man—the federation of the world."

In the long ago it was not the habit of men to thus get together for a season of business, garnished with pleasure and my heart goes out to the man who is so hide-bound and crusty that he can see no good in meetings of this kind. These gatherings are the oases in the Sahara of business life, we leave them broader and better men with a plentiful augmentation of our milk of human kindness and with more sympathy and toleration for those who do not see things as we see them.

Unfortunate is the man who lives for himself and in himself only, who forgets or fails to avail himself of the sunshine that radiates from a million friendships and who gropes his way to the end, "unknelled, uncoffined and unsung." To my mind the most pitiful of all human beings is the man who has devoted all his life and talents to mere money getting, who gathers and hoards the golden eagles only to rejoice in the possession, who lives apart from his fellow man and who refuses to participate in these seasons of fellowship and good feeling. I regard it as a blessed privilege to be here to-day, to mingle for a season with this splendid body of representative men, to look out over this great body of water whose waves lave the rocky shore. of these Eastern States while with her sister on the West the breezes are whispering to the tide as it goes out beneath the setting sun. I predict a glorious future for the three Associations and consequently much good to all the members of each.

Our relations with the Jobbers' Associations are harmonious and cordial, and so they should be, for their members are not only distributers of our product, our good customers, but are in most instances, and particularly where we have had an opportunity of meeting them as we do at these conventions, they are our personal friends, whom it is a pleasure to know and to meet socially, quite as well as to sell them our wares.

The same close relations which have grown up between us and the jobbers can be profitably extended to the retailers of Hardware, for they are now wonderfully well organized in 23 State and Inter-State Associations, and also under a National Association, all of which convene annually and they have frequently extended cordial invitations to manufacturers to be present on these occasions. The membership includes

THE MOST INTELLIGENT, PROGRESSIVE CLASS OF RETAILERS AND BUSINESS MEN

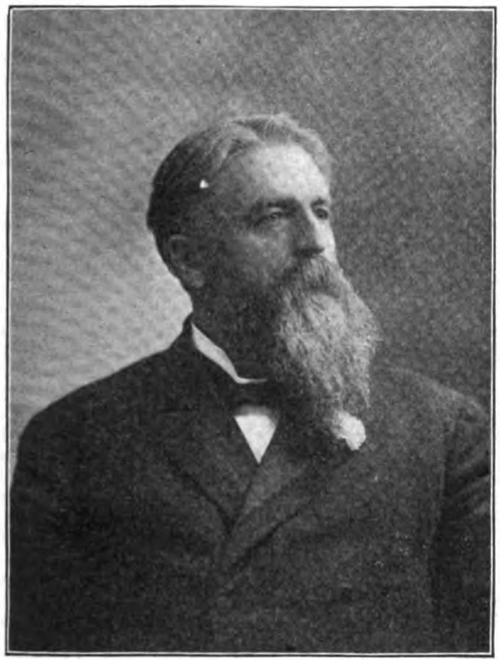
that are found in any occupations and in any communities. These gentlemen are the medium by which our products are finally marketed, for they come in direct contact with the consumers, and we can well afford to avail ourselves of the excellent opportunities freely offered us to meet them.

We have been in the past, and doubtless will be in the future, confronted with questions by our friends, which it will not be possible or wise to legislate upon, for because of the wide range of our industries and the difference in the character of our products, it is not possible to declare our views or our attitude as an Association. Such questions can well be left for the buyers and sellers who are most particularly interested to adjust among themselves. This Association was organized quite as much for social as for business purposes, to foster and encourage cordial relations with the trade, and not only has this been successfully accomplished, but we have profited no little by our acquaintance and contact with each other. Coming together as we do, making an endless variety of Hardware articles, with establishments located in different sections of this great country and working under many and different conditions, we may yet have many interests in common and we can, beyond question, consult together and act to our mutual profit and to the advantage of our friends the distributers.

President Wright: The next subject on the programme is "What is the best method of introducing new goods to the trade?" We will hear from

E. B. PIKE, OF THE PIKE MANUFACTURING CO.

Mr. Pike said: I did not suppose this discussion was to be taken up to-day. Our elegant and handsome Secretary told me that I could only talk five minutes. It made me feel discouraged over the thing to think of attempting to tell all I knew about it in five minutes. In the early hours of this morning I thought I had solved the scheme for the best way for the Manufacturers to introduce their new goods and it occurred to me that I would please them with that idea and get their hearty approval and the everlasting thanks of the Manufacturers if my suggestions were adopted. I don't want to get myself into the sort of a condition that one of our prominent jobbers got into. He said that when he was married he told his wife of the places they were going to on their wedding trip. He told her about the attractions he had seen in his travels. He told her about one hotel, of the good things that they had to eat, and he said when we get there we don't want to forget the good honey they have there. They called at this hotel, but they failed to serve the honey. The gentleman inquired of the waitress "Where is my honey?" The waitress said, "She is



Digitized by Google

not here now." I don't suppose there is any such mix-up here.

Well, I have thought of giving a little of my own personal experience—pardon if I do so, in introducing the best method of introducing new goods. I find to-day that I don't think I know as much about it as I did forty years ago, and I think Mr. Bush in his remarks has given us a good many points that can be used in introducing not only new goods but old goods. I think the idea of having the label on the goods that we manufacture, describing in the first place what the goods are, what they are for and how to use them is a good idea. After many years of labeling goods "The best in the world," and all that sort of thing, it has occurred to us the last two years that we had had very little success in that way of describing goods. We are putting on our goods to-day briefly what the goods are for and how to use them, so they will be plain for the salesman as well as the buyer.

WE HAVE FOUND IT NECESSARY TO ADVERTISE OUR GOODS TO SELL THEM.

We have also found it necessary to sell our goods to advertise them. We understand perfectly, and I think every manufac-

E. B. PIKE.

turer here believes that the wholesaler is the natural distributer of the manufactured goods and we wish that they would distribute our new goods for us, but our experience has been that Mr. Wholesaler will not distribute the goods generally until there is a demand created for them—that he leaves it to the Manufacturer to create the demand, and we have found another suggestion of Brother Bush that men of experience, men from the factory are sent out to the retailer to tell the retailers' clerks and the retailer himself what the goods are and to explain how they are made. We are sending out to-day ourselves, men to the consumer in introducing wheels and oil stones at a cost of three or four times the profit and some times a report of the month's sale is a hundred and forty per cent. for selling the goods—for the salesman going from factory to factory and from user to user and taking the salesman and the retailer with him and educating them about the goods. When I was a boy of sixteen I started with a pair of horses into Northern New Hampshire and Vermont and drove up into Canada, clear up to Montreal, in fact, and sold scythe stones from the old fashioned sleigh to the retail dealer and we got from that retail dealer seventy-five cents to a dollar and a half a dozen for what we sold to the jobber at from three dollars to six dollars a gross, leaving a good handsome margin of profit between our price to retail dealer and the jobber. When I was a salesman for the Enterprise Manufacturing Co., thirty-six years ago, I started out and took the bungs out of molasses barrels to show how well the bungs measured. I took coffee mills and put them into grocery stores; put coffee in them and ground it up and explained to the grocer man what a good thing it would be to grinr the coffee fresh.

Now, gentlemen, the new method I would suggest would be that perhaps the manufacturers would do better to go directly to the wholesaler with his new goods. Every wholesaler—every member of the Hardware Association knows that every member of the American Hardware Manufacturers' Association is absolutely reliable. He knows that the goods he buys from him are all right. Now, if he will only buy from members of the American Hardware Manufacturers' Association, he is all right. In that way he will avoid the manufacturers sending out a representative to this retail trade and to the consuming trade. He will have all the profit and the manufacturer will gladly furnish him small cuts or larger cuts. This is the suggestion that I make, that the new method be that the wholesale dealers introduce the new lines of the manufacturers.

President Wright: The intention was to continue the discussion as to the best method of introducing new goods, but I notice it is after one o'clock.

Mr. Hayden: Suppose we adjourn now and some other time be arranged for further discussion.

President Wright: I think it could be continued Thursday afternoon.

Mr. Hayden: I think it is an important matter and should be discussed. I think it would be wise to continue the discussion on Thursday afternoon. I would make that as a motion, Mr. Chairman, that we continue the discussion at four o'clock on Thursday afternoon.

The motion was seconded and carried.

Thereupon the meeting adjourned to go into executive session at 2.30 P. M.

EXECUTIVE SESSION.

WEDNESDAY AFTERNOON, OCTOBER 17.

The Association was called to order by President Wright at 2.30 P. M.

The first in order was the calling of the roll.

The roll call showed over a hundred and fifty delegates in attendance and Secretary Fernley announced that several delegates were now en route to the Convention. Reports of Committees followed, commencing with the report of the Executive Committee. The discussion of the report of the Executive Committee consumed most of the time of the executive session. Matters of vital interest to the affairs of the Association were discussed at length.

At the close of the discussion on the report of Executive Committee the Metal Committee made its report.

President Wright stated that it was the custom at the first executive session to appoint a Nominations Committee. He appointed the following delegates as a committee on nominations of officers for the ensuing year:

COMMITTEE ON NOMINATIONS.

Brace Hayden, San Francisco; Col. B. F. Eshleman, New Orleans; J. B. Lilliman, Atchison, Kans.; T. G. Walther, St. Paul, Minn.; Irving D. Booth, Elmira, N. Y.; W. Chamberlain, Portland, Me.; John P. Balderson, Philadelphia.

President Wright announced that the Heavy Hardware Committee would meet on Thursday afternoon at two o'clock, and that there would be an open session at four o'clock, which would be addressed by invited guests and others.

The Convention then adjourned until the next morning Thursday, October 18th, at 10 o'clock.

EXECUTIVE SESSION.

THURSDAY MORNING, OCTOBER 18.

The Convention was called to order at 11 a. m. by President Wright.

Secretary Fernley read a telegram from Colonel Woodruff, in answer to one sent by the Association the previous day, in which Mr. Woodruff thanked the Convention for their kind expressions and wishing the Convention a prosperous meeting.

Reports of Committees were called for.

John Donnan, of the Committee to whom was referred the matter of preparing suitable resolutions on the Transportation question, presented the following resolution for adoption by the Association.

RESOLUTION OF THE TRANSPORTATION COMMITTEE.

Whereas, the business interests of this country are suffering severe hardships and delays in the delivery of goods in transit, and

Whereas, we have, after years of patient and persistent effort, failed to secure efficient service at the hands of the railroad companies, and

Whereas, conditions have reached the point which necessitates our taking such vigorous action as will bring permanent relief, therefore, be it

Resolved, that this Association pledge itself to advocate and forward by all lawful means within its power, the enactment by the Congress of the United States, of an act to empower the Interstate Commerce Commission to issue an order to all railroad companies requiring a time limit for delivery of all shipments; such time limit to be decided by the Interstate Commerce Commission on all interstate shipments based on length of haul

Digitized by Google

The railroads to be subject to a penalty to be determined by the Interstate Commerce Commission for each twenty-four hours delayed in delivery beyond the time prescribed by the Interstate Commerce Commission.

John Donnan.
J. G. Bauer
C. H. Marshall.
Alfred D. Clinch.
Committee.

The resolution was unanimously adopted.

The Auditing Committee reported that they found the books of the Secretary-Treasurer in good condition.

The Press Committee made the following report:

REPORT OF THE PRESS COMMITTEE FOR THE YEAR ENDING OCTOBER, 1906.

The duties of the Press Committee have not been particularly arduous during the present fiscal year, at least the Chairman of this Committee has not been compelled to burn much midnight oil to keep up his portion of the work. In fact, he has not had a communication from any member of the Committee, nor from any member of any Committee of the National Hardware Association on any subject, nor from any member of the Advisory Board of the Association, with the exception of two letters from our worthy President who is always right. He has not received a communication of any kind or character save the numerous, voluble and always interesting letters from our handsome and faithful Secretary. The contents of the two letters from our President and the many from the Secretary-Treasurer have not been of a character intended for the public press.

We think the press is a power, sometimes for good. We believe that there is no way that public sentiment can be formed so quickly, thoroughly and effectively as through the daily and weekly newspaper press. Our Association is large and powerful, has a membership of something like two hundred, and we sometimes try to form and influence legislation, both local and national. We believe that forming or attempting to form public sentiment through our Association advisable and that the future Press Committee should be requested to work along this line.

The National Hardware Association should have an opinion on all national legislation of a commercial and economic character and this opinion should be expressed through your Press Committee in the trade magazines and newspapers. Action should have been taken on the pure food bill, railroad rate law, anti-monopoly bill, postal parcel extension and government ownership. There is probably no Association of two hundred members more directly interested than ours in the tariff question, which is being agitated and may soon again be a vital political issue. Yet the Chairman of your Press Committee does not know the views of the Hardware Association on this purely economic question that never should have been a political question at all. The people have a right to know our views on these and other questions that are so important to their interests. These views should be known to the Press Committee and through them made public, and thus—with that influence we possess—used for our own good, which should also and always be for the best welfare of the people of this great and prosperous country.

Yours respectfully,
J. R. Nutting,
Chairman of the Press Committee.

Mr. McIntosh, of the Committee on "One Cent Letter Postage," reported that that Committee was working industriously on the problem and had arranged to have Hon. C. W. Burrows, Vice-President of the National Board of Trade, address the Association at the open session in the afternoon upon the subject of postal matters.

The Transportation Committee made the following report:

REPORT OF TRANSPORTATION COMMITTEE.

To the Officers and Members of the National Hardware Association:

Your Transportation Committee would respectfully report as follows:

Since our last annual convention at Washington, Congress has enacted a rate bill covering freight rates, thereby increasing the power of federal supervision of railroads in the hands of this commission.

It remains to be seen whether or not the present rate bill will give the shippers of this country the desired relief. The chairman of your committee feels that the rate bill recently enacted will avail to the railroads, and instead of giving the shipper relief it will materially increase the revenue of the railroads.

During the past year, a matter of great importance to all shippers in all lines and in all sections has come before your committee—the matter of delayed shipments. You no doubt are all familiar with the resolution passed by the Southern Hardware Jobbers' Association as well as the resolution passed by the American Hardware Manufacturers' Association at their meeting held at Hot Springs, Va., June 12th to 15th of this year. The chairman of your committee had some correspondence with your Secretary-Treasurer as well as Mr. John Donnan of the W. S. Donnan Hardware Co., Richmond, Va., the author of the resolution passed by the Southern Hardware Jobbers' Association in reference to this matter, but no action was taken by your Committee.

Mr. Donnan's resolution calls for the passage of a bill by Congress empowering the Interstate Commerce Commission to issue a rule to all railroads requiring a time limit on all interstate shipments, penalizing the railroads for unreasonable delays in delivery of goods.

While it is well known by the members of our Association that the railroads throughout the country do not give delivery on shipments commensurate in time with the remuneration they collect for handling such shipments, your Committee does not feel that the Interstate Commission should be given any further powers than those already invested in them. We, however, do feel that something can be done in the way of compelling the railroads to give better service, and feel that this is a matter which should be taken up and discussed by the entire membership of our Association.

Your Committee is opposed to the enactment of any law giving the Interstate Commerce Commission further powers than those already invested in them, or empowering them to issue a ruling such as is proposed in Mr. Donnan's resolution. We have no right to place in the hands of any commission or set of men in this country the power suggested. They are the appointees of a political power, and who knows into whose hands this tremendous power may be placed in future years. Under our political system it is not hard to conceive political questions arising under which the Interstate Commerce Commission might become a controlling factor in a political campaign. The efforts of the Interstate Commerce Commission to secure additional authority have been persistent and systematic. There is no doubt that they have had a powerful influence upon public opinion, which would have been impossible, had the official source of the agitation been apparent. No sane man believes that a politically created body will ever be wholly controlled by non-political considerations. There is a vital principle at stake in placing this matter in the hands of the Interstate Commerce Commission, and we would earnestly urge conservative and cautious action in regard to it. We, however, feel that a law should be enacted, penalizing the railroads for delays in delivery of shipments, and in case of delayed shipments, if the railroad refuses to pay the fine as prescribed by law, the complainant to bring suit in the federal court. This court is not interested in the matter, except to hear the case without bias for or against either side, and upon the facts and the law of the case as presented at the hearing renders its decision.

It would seem as though a law could be enacted imposing a fine for delayed shipments along the lines indicated by Mr. Donnan, and in case of delayed shipments, the consignee to make demand upon the railroad for refund, and in case of the railroad's refusal to pay same, the consignee to have the right to carry the matter into the federal courts. There is no question as to the fairness of the proposition, and we feel that it would be much better to give the federal court power to enforce any law that might be enacted than to place the power of enactment in the hands of the Interstate Commerce Commission.

All of our members have no doubt been in receipt of and have read with considerable interest the pamphlet recently issued by T. Payton Giles and John Donnan of Richmond, Va., entitled: "An Injustice, Its Cause and Results, With Some Facts and Figures Bearing Thereon, Also the Only Practical Remedy Therefor." In this pamphlet these gentlemen give facts and figures covering deliveries and delays on interstate shipments which are astounding to us all, also the remedies therefor. If you have not studied this pamphlet carefully, we would advise that you do so.

While your committee is in full accord with Mr. Donnan's views with reference to compelling the railroads to give the shippers of this country better service and in advocating by all lawful means the enactment by the Congress of the United States of an act requiring a time limit on all interstate business, they do not feel that the power of enforcing such an act should be placed in the hands of the Interstate Commerce Commission. By placing this power in the hands of the Interstate Commerce Commission, it would bring to the commission an overwhelming mass of work which that body might attempt to perform but could not accomplish.

We trust this matter of delayed shipments will be taken up and thoroughly discussed by the entire membership of our Association, and would suggest that our entire membership formulate a method of procedure to be worked out by your future committee along the lines indicated in Mr. Donnan's resolution.

Respectfully submitted,
W. M. Glass,
Chairman Transportation Committee.

DELAYED FREIGHTS.

John Donnan of Richmond addressed the Association on the subject. He said:

Mr. President and Gentlemen:

Our Executive Committee in their report have called your attention to the subject of "Delayed Freights," and stated that I would address you relative to same.

This question is one with which our Association should, by this time, be perfectly familiar, having been frequently communicated with by our Secretary. Still, as I think that I can give you some additional information, I will state the facts as briefly as this important question warrants.

Conditions confronting the shippers of this country have become unbearable, and the time has now arrived when this subject should be given the best thought of the merchants and manufacturers towards its solution.

It would seem from letters which I have received that there are a few who are under the impression that our troubles are of a local character. Nothing is more erroneous, as

THIS CONDITION AFFECTS EVERY SECTION OF THIS COUNTRY,

and if our membership could only see the letters which I have in my possession, they would realize that conditions exist of which they have never dreamed.

Digitized by Google

The following are a few extracts from letters which I have received:

Portland, Me., writes: "It gives us pleasure to note that you are moving against the railroads for the delay of goods in transit. The writer has the name of being Chairman of the Kick Committee, against the railroads in this section, so that your article appeals to us with added force. Something should be done, as it takes three weeks for goods to reach us from Connecticut towns, between 200 and 300 miles distant."

Boston stated: "It takes 14 days to bring solid carloads from Pittsburgh to Boston, a distance of 640 miles, and three days from Providence to Boston, a distance of 50 miles."

A leading New York manufacturer writes: "We are shipping goods to every State in the Union, and find, in many cases, goods are from three to five weeks in getting to points, where they should reach destination in three to six days; also in getting supplies, we have had full carloads three to five weeks coming 300 to 400 miles, and this at a season when supplies were very badly needed."

One of the leading firms in Nebraska states: "For the last three or four years, we have been obliged to pay for shipments, in order to obtain two per cent. cash discount, ten to fifteen days before arrival, thus entailing a loss of interest, to say nothing of the worry and inconvenience caused by not having the goods to fill orders."

A large Wisconsin firm writes as follows: "To give you an illustration of how the railroads neglect shipments, some years ago, we opened up trade with a customer half way between Milwaukee and Chicago, about 40 miles from Milwaukee. Soon, our customer complained that it took three days to get his goods, after we had made delivery to the railroad company. We were astonished at such a report, and did not want to believe it; but I went over to the railroad freight office, and inquired about shipment of goods between here and Waukegan, and stated our customer reported it took three days after goods were delivered to the Freight Department in Milwaukee to reach them, 40 miles from Milwaukee. The freight agent laughed good-naturedly, and said, 'This is correct. We load a car every day with goods for Racine, Kenosha and Waukegan, the three most important places between Milwaukee and Chicago. The first day, the car goes to Racine, left there, and goods for Racine unloaded. The next day, the freight train takes the same car to Kenosha, left there, and goods for Kenosha unloaded. The third day the car is taken to Waukegan, and the balance of the goods unloaded there.' I asked him if he thought this was good, prompt service, and he replied, 'No, but it has been the custom of our road to manage the freight business between here and Chicago that way for years, and we have had very little complaint.'"

One Northwestern Association writes: "All that you say is true and more, and the writer believes, that only by severe restriction can railroads be brought to a point where you can get along with them decently."

Other illustrations could be cited, but I will not trespass upon your time in giving them.

You, therefore, see that these are not local conditions, but exist on the Double and Four-Track Systems of the Boston & Maine, Boston & Albany, New York, New Haven & Hartford, Pennsylvania, Erie, Chicago, Milwaukee & St. Paul; and also on every important railroad system in this country. In the South the railroads advertise the following miles per day:

Southern	440.40
Washington and Southern & R., F. & P.	550.08
Seaboard Air Line	356.88
Atlantic Coast Line	479.52
C. & O.	361.20

This is an average of 437.52 miles per day, or 18.23 miles per hour.

These figures, showing the running time of freight trains, are taken verbatim from actual working time tables, as used by train crews of the roads named, and are certainly not faster than the average interstate freight time-tables throughout the country. Thus, the actual running time is shown by the railroads themselves, yet the average movement of freight time is correct, as shown by date of arrival, and not by date of payment in paid freight bills, which can be verified with the railroad B/L, showing date of shipment in each case.

These, gentlemen, are

THE CONDITIONS WHICH EXIST IN OUR COUNTRY TO-DAY,

and that they are actual facts, each one of you knows full well; for the whole commercial class of the United States is suffering uncalled-for losses, on account of lack of reasonably quick movement of freight from point to point throughout the whole of this country.

In justification of this condition, the railroads claim congestion and lack of equipment. But, is it true? The railroads give the same excuses to-day they have done in all these years, and make no improvement whatever; but, to the contrary, a continuous retrograde movement is proven, and unless powerful, thoroughly organized, persistent and continuous pressure of some effectual character is put on the railroads, no man can give a reason for thinking there will be an improvement at a sufficiently early date to be of practical use to the present generation.

If congestion is their excuse, let them explain why it is that they always manage to deliver promptly carloads of fruit from California, peaches from Georgia, watermelons from Florida, or any other class of goods of a perishable nature, for which they have to pay if spoiled; while Hardware, drugs, dry goods, or any other non-perishable freight is subject to such unreasonable delays. So much for congestion.

As another cause of delay, they claim lack of equipment, and state that they have been unable to keep pace with the large increase in tonnage offered; that the tonnage of the country has grown enormously within the past few years, and the

RAILROADS HAVE BEEN UNABLE TO INCREASE THEIR FACILITIES

for handling the tonnage; that every Trunk line in the country is, and has been, increasing its facilities to enable it to handle its large tonnage; and that they have been handicapped on account of their inability to get prompt delivery of rails, locomotives or rolling stock. Such are the paltry excuses which the railroads would offer for the miserable service which they are rendering us. But, are these facts?

Let the railroads give names of manufacturers who hold contracts for equipment or improvements, which are from two to three years, and over, old, and unfilled.

Would any up-to-date merchant think of offering such excuses to his customers for inability to fill orders, or would he not have the goods, even if he had to place his orders two years ahead to get them? If so, then the merchants of this country have not kept pace with its progress. And, will the railroad officials of this country admit that they have less foresight than the mercantile and manufacturing community?

No, gentlemen, the real cause of the delay is not congestion, lack of equipment, or that the freight trains do not make sufficiently fast time with interstate shipments, while *running;* but the

RAILROADS HOLD GOODS AN UNREASONABLE TIME AT INITIAL POINTS,

before starting. At every junction, division, terminal and transfer point of their own roads, shipments are held up. And again, when our goods reach transfer points on other roads, these delays are more aggravated than ever. This last and most serious delay is caused by jealousy of Railroad Systems, one towards the other, and by their attempts to thwart each other's business by each refusing to handle *promptly* shipments which originated on the other system.

These uncalled-for delays, therefore, which could be avoided, by due diligence and business forethought, constitute about seven-eighths of the time consumed between the initial point and point of destination.

In my foregoing remarks, I have stated facts as they exist, and some of the causes therefor. But, the practical question before this body is the remedy.

If the corporation courts held jurisdiction over interstate commerce, there would be no trouble whatever in our receiving relief, but as our corporation courts only hold jurisdiction over intrastate commerce, it is necessary that we look in another direction for the remedy.

In the resolutions which were offered and passed by the Southern Hardware Jobbers' Association, they resolved the following:

"That this Association pledges itself to advocate and forward by all lawful means within its power the enactment by the Congress of the United States of an act to empower the Interstate Commerce Commission to issue a rule to all railroads requiring a time limit on all intrastate shipments conforming to length of haul, and with a percentage of discount on freight bill, payable to consignee, for each twenty-four hours delay beyond the daily movement prescribed by the Commission."

Some have been pleased to term this resolution drastic, but there are certain cases which need heroic treatment, and if ever there was a case needing such treatment, this is the one. However, I will try to anticipate some of the objections which may be offered to my too-drastic resolution.

Why should one think that a resolution suggesting the penalizing of a railroad as too drastic? Surely, it is equity and justice to penalize the offending party in favor of an injured party. This is considered equitable and just by *even* the railroads themselves. *They* think it right to charge demurrage, and also to issue an order that unless goods are removed in forty-eight hours, storage will begin, and yet when they take three to four weeks, and longer, to deliver goods that should have reached consignee in six to eight days, is the consignee to have no redress, even though there are times when seasonable goods have to be carried over for six months, on account of the unreasonable delays? Surely, "It is a poor rule that does not work both ways."

Whenever any new movement is proposed, opposition is always met with, at first, from some one, who is either over-timid, or ultra-conservative, and such a one has made the following objections to my resolution, which I will answer seriatum:

FIRST: "That he was opposed to the enactment of any law, giving the Interstate Commerce Commission further powers than those already invested, or empowering them to issue a ruling, such as is proposed in my resolution."

I should certainly like this party to state upon what ground he bases such an objection. If our Corporation Courts could decide interstate cases, we could then apply to them for relief, but as their jurisdiction is only intrastate, we must, therefore, seek help from a body whose jurisdiction is interstate. Your Intrastate Courts have the power to penalize, then why hesitate for an instant to have Congress delegate to the Interstate Commerce Commission the power to penalize our great Railroad Systems?

SECOND: "That we have no right to place in the hands of any Commission, or set of men, in the country, the power suggested."

This power must certainly be delegated to someone, and that body must be empowered with an authority and jurisdiction, extending over the entire country. The body which governs must have vested within them a power greater than the body which they govern, and must be one whose mandate will be quickly executed, and I have as yet been unable to find a body whose jurisdiction extends over Interstate Commerce, other than the Interstate Commerce Commission.

Suppose the merchants and manufacturers of this country were compelled to take each grievance to court, it would be simply many repetitions of a case of "Jaundice versus Jaundice," but if, on the other hand, the Interstate Commerce Commission were empowered by Congress to require the railroads to carry goods a certain number of

Digitized by Google

miles per day, or to be penalized for their failure to do so, it would be the simplest of matters for the Interstate Commerce Commission to require every railroad to stamp upon the B/L which they issue the number of miles from point of issuance to destination. Then, the per diem haul having been settled by the Interstate Commerce Commission, each party would know positively the time required for delivery, which simplifies matters to a simple business transaction between the railroads and consignee, and the adjustment of claim for slow delivery would then be between these two parties only, without the merchants and manufacturers of this country being compelled to have recourse to legal proceedings.

THIRD: "That in his opinion, it would be as just to ask Congress to enact a law, giving the Commission power to impose a fine on the manufacturer and jobber on account of their not filling an order complete in every detail, and making shipment of same within an hour's time after the order was received, as to ask for an enactment of a law, giving the Commission power to fix a time limit and impose a fine on the railroad company, as suggested in the resolution."

Replying, I would say railroads are given by their charters valuable and far-reaching powers, not enjoyed by the ordinary business firm or corporation. These powers extend even to the extent of condemnation of our property for use in and to facilitate their business.

JOHN DONNAN,
of Fraternal Relations Committee.

With, however, the express stipulation that these unusual rights and privileges are granted in consideration and return for an obligation taken on their part to serve the public in an equitable, reasonable and efficient manner at all times. We are, therefore, entirely within our rights when we demand in the administration and use of the powers we delegate, that the common carriers shall use due business forethought and precaution to provide for proper care of all business that comes to them, as is done by all other business people without compulsion or urging, though the latter class enjoy no special privileges such as the ones above mentioned.

FOURTH: "He says he is no advocate of railroad might, but that there is a vital principle at stake in placing this matter in the hands of the Interstate Commerce Commission, and would earnestly urge conservative and cautious action in regard to it."

In reply, I would say for years we have been ultra-conservative, moderate, deferential and almost abject in our attitude towards the railroads, submitting to delinquencies, breaches of faith, and all rules of equity on their part in their dealings with us, allowing them to take such latitude and such privileges in carrying out their plain business engagements, as we would not endure from, or even think of allowing, to anyone else with whom we had similar business transactions.

For years, we have written letters, and in person, as individuals, have protested, urged, besought and implored of the railroads fair treatment for the enormous sums we pay them in freight charges.

Can any shipper, consignee or business organization anywhere in the United States show any permanent improvement or benefits to himself, his company, or his community as a result of this rare exhibition of conservatism and patience in dealing leniently with the railroads?

Why, then, should *we,* who are beyond question reasoning human beings, who *can* and *do* judge the future by the past, continue indefinitely a course which long years of experience prove conclusively results only in a crop of elusive replies and equally futile and broken promises of relief from an injustice, which we would not endure in business for a day from our best friend, or from any man, or set of men, on earth, except from the railroads of the United States.

FIFTH: "That while every jobber in the country is interested in receiving impartial treatment, and getting his shipments through in the least possible time, yet in endeavoring to secure this impartial treatment, it would be, to his mind, a gross error for us to lend ourselves to such a populistic proposition, as is called for in this resolution."

Is a resolution to be termed populistic when it simply requests its highest tribunal to make a law penalizing the offending, in favor of the injured party, especially when the party whom we wish penalized does not hesitate to penalize *us* in the shape of demurrage whenever they select to do so? Is it populistic for citizens of America to request their representatives in Congress to make a law, which will protect them from the domination of such a power, as the Railroad Corporations of this country? If so, then my resolution may be so termed. But, I hardly think that such a verdict will be rendered by the membership of our Association, especially when such bodies as the following Association, namely, the Southern Hardware Jobbers, American Manufacturers, Michigan Retail Hardware, Soutnern Shoe Dealers, New York Team Owners, and the Chambers of Commerce and Boards of Trade of the cities of Greensboro, N. C.; Tampa, Fla.; Paducah, Ky., and Rome, Ga., have passed resolutions which are equally drastic, if not in the same verbiage.

And, when such Associations as the National Wholesale Dry Goods, National Wholesale Druggists, National Retail Grocers, and others, after reading my so-called drastic resolution have, through their Presidents and Secretaries, in letters to me, stated that they are heartily in accord with my views, I hardly think my resolution can be termed populistic.

SIXTH: In his letter to me, he states, "that he doubts very much whether an act along the lines of my resolution would be constitutional."

I do not think that it comes within our province to discuss this matter. I hardly think that a law could be termed unconstitutional prior to its passage. If, however, such a law is passed, and its constitutionality is questioned, that is a matter to be finally decided by our United States Supreme Court.

Apropos of the above, Mr. Roosevelt, a few days since, at Harrisburg, Pa., made the following remarks:

"The doctrine they preach would make the constitution merely the shield of incompetence, and the excuse for governmental paralysis: they treat it as a justification for refusing to attempt the remedy of evil, instead of as the source of vital power necessary for the existence of a mighty and ever-growing nation."

We thus see that while my resolution is termed drastic, and have heard some of the arguments as to why it should *not* be passed; yet the Chairman of our Transportation Committee says, "We, however, do feel that something can be done in the way of compelling the railroads to give better service and feel that this is a matter which should be taken up and discussed by the entire membership of our Association."

However, notwithstanding the fact that this is a great problem, yet it is not one so large, but that the brains of the jobbing and manufacturing interests of this country can solve, and solve it we *must,* if we ever hope to be emancipated from the domination and tyranny of the Railroad Systems of this country.

One matter I wish to especially emphasize, and it is this:

In passing our resolutions, we are simply going through the early period of lining ourselves up for the coming battle. I have seen a portion of a pamphlet, published by the Washington Railroad Bureau, in which it is shown that while the railroads have not yet become openly antagonistic, yet they are keeping in close touch with everything that we are doing, and that when the various Associations of this country, at the opportune time, write to their Senators and Representatives, with regard to this matter, we will, then, see confronting us the Vanderbilts, Morgan, Gould, Cassatt, Hill, Harriman, and every railroad interest of this country, with their trained legal force.

But, gentlemen, does the mention of the above-named adequately convey to your minds the force which we have arrayed against us, and the titanic struggle in which we are about to engage? Only think for an instant what they are.

The Vanderbilts controlling the New York Central & Hudson River, Lake Shore & Michigan Central, and Big Four, extending from Boston on the East to Chicago on the West, and North through the State of Michigan.

Cassatt, the Pennsylvania, and all of its leased lines, extending through Pennsylvania, Ohio, New Jersey, Maryland and Indiana, and shaping the policy of the C. & O. and N. & W. as well.

Hill, the Great Northern System, taking in Minnesota, Dakota, Montana, Idaho and Washington.

Gould, the Missouri Pacific, and all of its leased lines, covering Missouri, Kansas, Arkansas and the Central West.

Morgan, through Samuel Spencer, representing the Southern Railway System, which takes in the States of Virginia, the Carolinas, Georgia and Alabama to the Mississippi.

Harriman, the Union Pacific, covering Kansas, Nebraska, Colorado, Nevada, Oregon and California. And, with the marvelous genius and foresight, which he possesses, not only controlling the B. & O., which, with the Union Pacific, gives him a through line from ocean to ocean, but is almalgamating certain railroads of the Pacific Slope, which will give him an entire System, running from Portland, Ore., to the City of Mexico.

In the above mentioned roads, I have not spoken of the smaller systems, such as the S. A. L., the A. C. L., the Illinois Central, and many others that could be mentioned; but I have shown you that the great Railroad Systems of this country are dominated by a few imperial intellects.

True, they play the game against each other on the chess-board of this country for advantageous terminal points, and for the advantage of their own systems, but when a paramount question such as this, comes before Congress, do you doubt for one instant but that

Digitized by Google

these giants will stand together as a unit for their mutual protection, and with their trained legal staff will bring to bear every resource of finance, influence, and law to defeat us?

Were they to spend five million dollars to induce Congress not to pass the measure we are now advocating, it would be a mere bagatelle to them, as compared with what they would save annually in not having to pay enforced penalties.

To-day, the railroads are gigantic powers, and we are compelled to admit it. We well know that it is within the power of the above named combination of interest to deal with the shippers of this country as if we were merely pawns upon the chess-board, and one might almost say that they are powerful enough to sweep away any obstacles we might put in their path as chaff before the wind.

But, gentlemen, are *you*—the merchants and manufacturers of this country—to be ruled and dominated by the railroads forever? They are great, but *our* combined mercantile and manufacturing interests are greater.

The time has now arrived for us to rise in our might and I sincerely trust that this body will not hesitate to have its Committee pass a series of the strongest resolutions, for we have now reached the critical period in our history.

Therefore, unless the Interstate Commerce Commission are granted by Congress the power which we desire with regard to this matter, the merchants and manufacturers of this country will continue to be nothing more than puppets in the hands of the railroads, and it would be far better for us to discontinue our business altogether than to continue to suffer the intolerable servitude and slavery which we are now under to these Czars.

It was moved and seconded that the report of the Transportation Committee be received and filed.

The motion was carried with the understanding that the recommendations in the report would be considered by the Committee on Resolutions and presented to the Association for final action. There was considerable difference of opinion among the delegates as to adopting the views regarding the power of the Interstate Commerce Commission, expressed in the report of the Transportation Committee.

Mr. Ireland moved that a Committee of five be appointed to prepare suitable resolutions on the Transportation question to be presented at a later session for action by the Association.

The motion was carried.

President Wright appointed the following Committee to prepare suitable resolutions on the Transportation question: John Donnan, Richmond; A. D. Clinch, New York; H. C. Marshall, Duluth; J. G. Bauer, Topeka, Kans.; Cortland Van Camp, Indianapolis.

Other matters relating to prices and trade relations were discussed.

Mr. Fernley stated that Col. R. S. Woodruff of New Haven was unable to be present owing to a political campaign in his State wherein he was a candidate for Governor. Mr. Turner moved that a telegram be sent to Mr. Woodruff extending the best wishes and hope of the Association that he would become Governor of his State before the next annual meeting.

President Wright appointed the following committee on resolutions: Geo. E. King, Atlanta, Ga.; J. C. Henry, Cleveland; J. W. Wells, Duluth.

REPORT OF THE MEMBERSHIP COMMITTEE.

To the National Hardware Association of the United States. Gentlemen:

The Membership Committee respectfully present to this, the twelfth Annual Convention, its report showing the result of the work it has performed during the past year. The Chairman wishes to express his appreciation of the prompt and efficient service carefully rendered by the Associate Members of the Committee in their decisions relative to the eligibility of applications for membership.

The additions during the past year have been as follows:
Duke, Peterson & Co., Baltimore.
Nebraska Hardware Co., Lincoln, Neb.
Haw & Simmons, Ottumwa, Iowa.
Carter, Donlevy & Co., Philadelphia.
L. D. Berger, Philadelphia.
Calvert & Holloway, Philadelphia.
Roberts, Sanford & Taylor, Sherman, Texas.

There are some applications that have not been decided upon, but are being held for further consideration. The qualification standard for membership is zealously maintained, thus conserving, we believe, the best interests of the houses constituting the membership, and sustaining the strength and standing this associaion have honorably acquired among the mercantile organizations of this character in the United States.

The Committee trust that the work they have performed will meet the approval and endorsement of their fellow members.

Charles H. Turner, *Chairman.*

The Convention then took a recess until 2.15 p. m., at which time the Heavy Hardware Branch of the Association would convene.

It was announced by Mr. Fernley that at 4 p. m. Mr. Burrows, Vice-President of the National Board of Trade, would address the Convention in open session on the subject of One Cent Letter Postage.

EXECUTIVE SESSION

THURSDAY AFTERNOON, OCTOBER 18.

At 3 p. m. the Jobbers interested in heavy Hardware were called to order in special session by the Chairman of that Committee, Mr. Bragg. Two hours were consumed in discussing matters of special interest to dealers in bar iron and horseshoes. Representatives of several manufacturing concerns listened to the suggestions of the heavy Hardware jobbers concerning the customs then prevailing in regard to the discounts and terms on which heavy Hardware was sold. The representatives present expressed themselves as personally in favor of accepting, in a general way the suggestions offered by the jobbers for certain changes in present rules to be made, but recommended that the Committee should secure the approval of other manufacturing concerns so that whatever changes were made would be uniform.

A resolution was offered covering the points which the Committee desired should be corrected by the manufacturers, which were to be properly presented to them.

While this Committee was in session W. C. Burrows, Vice-President of the National Board of Trade, addressed an open meeting of manufacturers and jobbers on the subject of one cent letter postage.

The Association then adjourned to meet the next morning, Friday, October 19th, at 10 o'clock.

The Committee on Resolutions made the following report:

REPORT OF COMMITTEE ON RESOLUTIONS.

Resolved, that the thanks of this Association be and are hereby tendered to those who have in various ways contributed to the pleasure of those who have attended this Convention.

We tender our thanks to Rev. Jno. R. Davies of Philadelphia, who opened our exercises with prayer.

We thank the proprietors of the Marlborough-Blenheim for their splendid and generous efforts to add to the comfort of our members and friends.

We also thank Mr. J. H. Van Newkirk, Journal Secretary, and Mr. F. B. Platt, Railroad Secretary, and Mrs. Geo. Trout, for their faithfulness and courtesy.

We thank the manufacturers for many courtesies which members of this Association have received at their hands.

We also thank the Railroad people for the favors which they have shown us.

We thank the members for their prompt attendance and serious consideration of all matters presented for their consideration.

We also thank the Telegraph Companies for the tender of the free use of their wires to our members.

Geo. E. King.
Geo. W. Wells.
J. C. Henry.

Mr. McIntosh offered the following resolution on the subject of first-class mail matter and on the subject of the Parcels

POSTAGE.

Whereas, the expense of carrying and delivering first-class mail matter is three-quarters of a cent per one-half ounce, and

Whereas, the charge of two cents by the Governm·t is disproportionate to price charged on other classes of mail matter, therefore be it

Resolved, that we protest against this unjust discrimination and respectfully ask our Senators and Representatives to favor a reduction of first-class mail matter to one-cent per half ounce.

PARCELS POST.

Whereas, certain parties are endeavoring to have established a Parcels Post, which will serve their own selfish interests and practically ruin the business interests of hundreds of thousands of retail merchants scattered throughout the country, therefore be it

Resolved, that the National Hardware Association protest against any such measure and urge our Members of Congress to defeat efforts which are being put forth in the interest of mail order houses.

The resolutions were adopted.

The Association consumed the balance of the session in discussing the relation of the salesman to the employer in reference to selling prices.

Mr. Newman of the Canadian Association expressed his views on the subject.

Digitized by Google

Question of the next place of meeting was taken up. Mayor Cutler of Niagara Falls was invited to address the Association and he extended to the Association a most cordial invitation for it to hold the next meeting at Niagara Falls. He spoke at length of the hotel accommodations to be found at Niagara Falls. Mr. Bennett came as secretary of the Committee of Publicity of Niagara Falls, and also joined in an invitation for the Association to come to Niagara Falls.

These gentlemen then retired and the question of the next place of meeting was thoroughly discussed. Many Jobbers gave expression to the great satisfaction they had experienced from the treatment they had received in the matter of hotel service and accommodations at Atlantic City during the present session and after the matter was thoroughly canvassed a vote was taken as between Atlantic City and Niagara Falls, which resulted in the almost unanimous selection of Atlantic City as the next meeting place, the date to be the latter part of October.

ELECTION OF OFFICERS

The Committee on Nominations presented their report and recommended the following members as officers for the ensuing year:

For President, W. S. Wright of Omaha.

For 1st Vice-President, John C. Koch, Milwaukee.

For 2nd Vice-President, Brace Hayden, San Francisco.

Members of the Executive Committee, J. D. Moore, Birmingham, Ala.; Chas H. Turner, Albany, N. Y.

On motion the Secretary cast the vote of the Association for the nominees, and they were declared elected officers for the ensuing year.

The Convention then took a recess until 2 p. m.

CLOSING SESSION.

FRIDAY AFTERNOON, OCTOBER 19, 1906.

The Convention was called to order at 3 p. m.

President Wright announced that the subject to be first taken up would be the report of the catalogue house committee by S. Norvell, the chairman.

While waiting for the delegates to assemble in larger numbers, George W. Korn of Little Valley, N. Y., was invited to speak on the subject. Mr. Korn addressed the meeting and expressed himself as of the opinion that the Hardware dealers in country towns lost a great deal of trade by failing to keep their stores clean and making a proper exhibition of their goods; that in his opinion many people ordered goods from catalogue houses because they saw the articles displayed in attractive advertisements in catalogue house catalogues. He expressed himself as of the opinion that retail buyers as a rule would be willing to pay a larger sum for articles in their home stores than to pay a less price to catalogue houses, and that the main reason for purchasing from catalogue houses was the fact that the goods, especially new goods, were more forcibly brought to their attention by the catalogue houses.

The views of Mr. Korn were vigorously opposed by several of the delegates representing the retail portion of the Catalogue House Committee, especially Mr. Miles of Mason City, Ia., and Secretary Corey of the National Retail Hardware Association. Mr. Miles stated that in his opinion the retail stores of the country in the Hardware line were kept in much better condition than stores in many other lines of goods. He cited his own store and others in his city as examples.

S. Norvell, Chairman of the Catalogue House Committee, then made a statement of the work being done by that Committee. He stated the time was too short for him to make an extended report, but said that substantial results were being secured in support of the legitimate Hardware dealer. He called attention to the difficulties now being experienced by Catalogue Houses in carrying on their business in a satisfactory manner.

The Convention then adjourned.

RECEPTION AND BALL.

The Reception and Ball given by the American Hardware Manufacturers' Association to the National Hardware Association and ladies, held Wednesday evening, October 17th, was a pronounced success. The ball was largely attended and, as the number of ladies was larger than usual, and the music was exceptionally good, the Solarium in which the ball was held was filled with merry dancers. The following programme was carried out:

1. Two-Step—Popularity . . . . . *Cohan*
2. Valse—Danse l'Armes . . . . . *Berger*
3. Two Step—The Tourists . . . . . *Kerker*
4. Valse—In My Merry Oldsmobile . . . *Witmark*
5. Two Step—Seventh Regiment . . . . *Dunn*
6. Valse—O, Dry Those Tears . . . . *Riege*
7. Two Step—Petit Pierrots . . . . *Nichts*
8. Valse—Venetienne . . . . . *Walteufel*
9. Two Step—The Giggler . . . . . *Marx*
10. Bon Soir . . . . . *Massenet*

During the dancing refreshments were served, and it was one o'clock before the dancers could tear themselves away from their pleasant pastime.

CONCERT AND EUCHRE.

On Thursday evening, October 18th, the Concert and Euchre in honor of the ladies of the National Hardware Associations, at the Marlborough-Blenheim, attracted most every one present. The prizes were exhibited in one of the parlors of the Blenheim, and did much to swell the number of players to 400 strong. The names of the donors of prizes and the prizes are here given.

DONORS OF PRIZES FOR CARD PARTY AND PRIZES FURNISHED.

American Sheet & Tin Plate Co., Pittsburgh, Pa., All Playing and Score Cards; Avery Stamping Co., Cleveland, Ohio, Cooking Utensils; American Wringer Co., New York, N. Y., 3 Wringers, 1 Mangle; Atha Tool Co., Newark, N. J. 1 doz. Nail Hammers; American Fork & Hoe Co., Cleveland, Ohio; E. C. Atkins & Co., Indianapolis, Ind., Case Saws; American Axe & Tool Co., Pittsburgh, Pa., 1 Card Case.

Bemis & Call Hardware & Tool Co., Springfield, Mass., Wrench; George H. Bishop & Co., Lawrenceburg, Ind., 2 Family Kitchen Sets; Bronson-Walton Co., Cleveland, Ohio, 1 lot Coffee Mills, etc.; Boss Washing Machine Co., Cincinnati, Ohio, 2 Washing Machines; Bissell Carpet Sweeper Co., Grand Rapids, Mich.; 1 doz. Sweepers; Bullard Automatic Wrench Co., Providence, R. I.; Belding-Hall Manufacturing Co., Chicago, Ill., 1 Card Table.

Chapin-Stephens Co., Pine Meadow, Conn., Combination Rule; John Chatillon & Sons, New York City, Favorite Baby Scale; Corbin Screw Corporation, New Britain, Conn., Coaster Brake; Cleveland Twist Drill Co., Cleveland, Ohio, Set Drills; Corbin Cabinet Lock Co., New Britain, Conn.; Coldwell Lawn Mower Co., Newburgh, N. Y., Lawn Mower; Clyde Cutlery Co., Clyde, Ohio, China Platter; Challenge Cutlery Corporation, Bridgeport, Conn., 2 Cases Razors; Caldwell Manufacturing Co., Rochester, N. Y., 6 Shaving Mirrors; Chantrell Tool Co., Reading, Pa., Hammers.

Diamond Saw & Stamping Works, Buffalo, N. Y., Chafing Dish; Dana Manufacturing Co., Cincinnati, Ohio, Dana Food Chopper; Henry Disston & Sons, Philadelphia, Pa., 2 Hand Saws; Dover Manufacturing Co., Canal Dover, Ohio, 2 Family Cabinets, 2 Laundry Set Cabinets, 12 French Set Cabinets, 100 Tourists Irons.

Enterprise Manufacturing Co., Philadelphia, Pa., 3 Choppers, 1 Mill, 1 Shredder, 1 Tobacco Shaver, 1 Fruit Press, 2 Choppers.

Garland Nut & Rivet Co., Pittsburgh, Pa., 600 Pencils.

Hamilton Rifle Co., Plymouth, Mich., 3 Rifles; Hopkins & Allen Arms Co., Norwich, Conn., Single Barrel Gun; Heller Bros., Newark, N. J., Nail Files and Corn Rasps; Humason & Beckley Manufacturing Co., New Britain, Conn., Fruit Knives.

Irwin Auger Bit Co., Wilmington, Ohio, Set Auger Bits.

Keuffel & Esser Co., New York City, Barometer and Thermometer; George W. Korn Razor Manufacturing Co., Little Valley, N. Y., 2 Double Hollow Razors, 1 Safety Razor; Adolph Kastor & Bros., New York City, Bone Shears.

Lamson & Sessions Co., Cleveland, Ohio, 36 Bicycle Wrenches; Lovell Manufacturing Co., Erie, Pa., 3 Wringers; Lufkin Rule Co., Saginaw, Mich., 1 Solid Silver Case Tape, 2 Reliable Tapes; Lockwood Manufacturing Co., South Norwalk, Conn., Draft Ten Dollars; Landers, Frary & Clark, New Britain, Conn., 3 Coffee Percolators.

McCaffrey File Co., Philadelphia, Pa., Manicure Files for every lady; Mack & Co., Rochester, N. Y., Wood Carvers' Tools; Manning, Bowman & Co., Meriden, Conn., Eclipse Bread Maker, Coffee Percolator; David Maydole Hammer Co., Norwich, N. Y., Hammers; Charles Morrill, New York City, Nail Puller and Hand Punch; Miller Bros. Cutlery Co., Meriden, Conn., Pocket Knives; Meriden Cutlery Co., Meriden, Conn., Oyster Forks.

National Specialty Manufacturing Co., Philadelphia, Pa., 1 No. 2 Coffee Mill; National Enameling & Stamping Co., Baltimore, Md., 1 1800 Oil Heater; North Bros. Manufacturing Co., Philadelphia, Pa., Ice Cream for party, 1 4-quart Freezer and Ice Chipper; National Sweeper Co., Newark, N. J., Carpet Sweeper, 1 100-Tool Set, 1 35 Screw Driver, 1 Holder.

Ohio Tool Co., Columbus, Ohio, Set Auger Bits, Iron Smooth Plane; Oneida Community, Oneida, N. Y., 12 Jars Fruit.

Pittsburgh Steel Co., Pittsburgh, Pa., 1 Clock; Charles Parker Co., Meriden, Conn., Mirror; Pike Manufacturing Co., Pike, N. H., Oil Stone and Clock; Pullman Manufacturing Co., Rochester, N. Y., Assorted Garment Hangers; Fayette R. Plumb, Philadelphia, Pa., Nickel-Plated Tools.

Rochester Stamping Co., Rochester, N. Y., Chafing Dish; Romer Axe Co., Dunkirk, N. Y., Hatchet and Axe; Reading Hardware Co., Reading, Pa., 8 Mowers; S. L. & G. H. Rogers Co., Hartford, Conn., 1 No. 173 Set Silverware.

Savage Arms Co., Utica, N. Y., Target Rifle; O. P. Schriver & Co., Cincinnati, Ohio, Household Truck; William Schollhorn Co., New Haven, Conn., 2 doz. Ticket Punches; H. D. Smith & Co., Plantsville, Conn., Carpenters' Tools; Supplee Hardware Co., Philadelphia, Pa., Lawn Mower; Simonds Manufacturing Co., Fitchburg, Mass., 1 Case Saws.

United States Stamping Co., Moundsville, W. Va., 12 Presses, Enameled Ware.

William Vogel & Bros., Brooklyn, N. Y., 1 pair Auto. Search Lights.

Whitman & Barnes Manufacturing Co., Chicago, Ill., Lawn Mower;

Digitized by Google

Winchester Repeating Arms Co., New Haven, Conn., 1 Rifle; Wood Shovel & Tool Co., Piqua, Ohio, Garden Tools; Samuel Winslow Skate Co., Worcester, Mass., Skates; L. & I. J. White Co., Buffalo, N. Y., 2 Cases Tools; Walden Knife Co., Walden, N. Y., 2 Pocket Knives.

Mr. Charles Graham of the Graham Nut Co., Pittsburgh, Made 83 points and carried off the First Prize, a costly Grandfather's Clock given by the Pittsburgh Steel Co., Pittsburgh, Pa.

The following is a partial list of winners.

SOME OF THE WINNERS.

Mr. N. A. Garland, Pittsburgh, Baby Scale; William Clyde, Pittsburgh, Tool Chest; G. W. Welles, Duluth, Set of Drawing Instruments; E. T. Jackson, Philadelphia, Winchester Rifle; James H. Kennedy, New York, H. & R. Rifle; J. M. Stanley, "Savage" Gun; Miss Elizabeth B. Tranberg, New York, Set of Dover Sad Irons; J. J. McCaffrey, Philadelphia, Caldwell Shaving Mirror; Mr. Bennett, New Haven, Lantern; M. G. Drew, Bullard Wrench; D. A. Merriman, Pittsburgh, Set of Simonds Saws; J. S. Harris, Cleveland, Pike Corundum Wheel Clock; Harry Wise, Chattanooga, Disston Saw; T. M. Steward, Lawn Mower; S. S. Reckafus, Philadelphia, French Coffee Percolator; A. H. Herr, Lancaster, Pa., Oyster Fork; G. W. Korn, Little Valley, N. Y., Pair of Winslow Roller Skates; A. K. Liveright, Philadelphia, Set of Dover Sad Irons; Mr. Purdy, Lawn Mower; F. E. Muzzy, Chicopee Falls, Mass., Auto. Search Lamp; J. McKee, Philadelphia, L. & I. J. White Edge Tool Set; J. H. Droescher, New York, L. & I. J. White Edge Tool Set; L. M. Steward, Cincinnati, Atkins Saws (Chest); W. R. Howell, Carpet Sweeper; J. P. Kelly, Lawn Mower; J. W. Connor, Utica, N. Y., Winslow Ice Skates.

While the lucky winners were called out one by one, the following concert programme was followed out:

PROGRAMME.

Overture—Poet and Peasant	*Suppe*
Valse—Autumn Roses	*Strauss*
Act II from Faust	*Gounod*
a. La Paloma	*Yardier*
b. If I were on the Stage, from Mlle Modiste	*Herbert*
1. Nocturne	*Kroll*
2. Lion du Bal	*Gillet*
Strings	
Fantasie—Lohengrin	*Wagner*

Refreshments were also served, and it was two o'clock a. m. before the last one of this enjoyable party had retired.

ATTENDANCE.

The following is a list of those in attendance:

NATIONAL HARDWARE ASSOCIATION.

Alabama—J. D. Moore, of Moore & Handley Hardware Co., Birmingham.

Arkansas—J. J. Mandlebaum, of Fones Brothers' Hardware Co., Little Rock; W. W. Webber, of Webber-Ayres Hardware Co., Fort Smith.

California—Brace Hayden, of Dunham, Carrigan & Hayden Co., San Francisco.

Connecticut—L. H. Bronson, of Bronson & Townsend Co., New Haven; L. L. Ensworth, of L. L. Ensworth & Son, Hartford.

District of Columbia—F. P. May, of F. P. May & Co., Washington.

Georgia—George E. King, of King Hardware Co., Atlanta; A. B. Palmer, of Palmer Hardware Co., Savannah; W. D. Krenson, of J. D. Weed & Co., Savannah.

Illinois—George W. Trout, of Trout Hardware Co., Chicago; C. D. Clark, of Clark, Quien & Morse, Peoria; Frank H. Jack, of Isaac Walker Hardware Co., Peoria; R. Tenk, of Tenk Hardware Co., Quincy; C. M. Hurst, of Morehouse & Wells Co., Decatur.

Indiana—C. Van Camp, of C. Van Camp Hardware and Iron Co., Indianapolis; G. W. Miller and Jonas Gan, of Pogue, Miller & Co., Richmond.

Iowa—Col. J. R. Nutting, of Sickels, Preston & Nutting, Davenport; F. Luthe, of Luthe Hardware Co., Des Moines; V. E. Hamilton, of Huber & Kalbach Co., Oskaloosa; F. E. Cutler, of Cutler Hardware Co., Waterloo.

Kansas—J. G. Bauer, of W. A. L. Thompson Hardware Co., Topeka; J. B. Silliman, of Bilsh, Mize & Silliman Hardware Co., Atchison; H. D. Lee and Charles L. Schwartz, of The Lee Hardware Co., Salina.

Louisiana—B. F. Eshleman, of Stauffer, Eshleman & Co., New Orleans.

Maine—W. Chamberlain, of The Emery-Waterhouse Co., Portland; Frederick Walker, of Edwards & Walker Co., Portland; C. F. Bragg, of N. H. Bragg & Sons, Bangor.

Maryland—G. L. Irvin, of Carlin & Fulton, Baltimore; Henry O. Reese, of E. L. Parker & Co., Baltimore.

Massachusetts—Samuel A. Bigelow and Charles King, of Bigelow & Dowse Co., Boston; A. H. Decatur and W. A. Hopkins, of Baldwin, Robbins & Co., Boston; F. B. Wilde, of Brown-Wales Co., Boston; J. F. Breck, of Joseph Breck & Sons, Corporation, Boston; L. C. Carter, of Dana Hardware Co., Boston; P. E. Strauss, of Fitz, Dana & Co., Boston; George W. Herrick, of The Herrick Co., Boston; Edwin E. Farnham, of Richards & Co., Boston; Francis B. Austin and Henry L. Doten, of Austin & Doten, Boston; Arthur C. Harvey and W. W. Henderson, Jr., of Arthur C. Harvey Co., Boston; H. W. Waite and A. H. Raniet, of Waite, Raniet & Co., Boston; E. P. Sanderson, of E. P. Sanderson Co., Boston; Charles C. Lewis, of Charles C. Lewis Co., Springfield.

Michigan—George G. Bogue, of Standart Bros., Ltd., Detroit; E. W. Morley and R. C. Morley, of Morley Brothers, Saginaw; C. C. Philbrick, of Foster, Stevens & Co., Grand Rapids; M. J. Clark and J. J. Rutka, of Clark-Rutka-Weaver Co., Grand Rapids.

Mississippi—Lee Richardson, of Lee Richardson Co., Vicksburg.

Minnesota—H. C. Marshall, of Marshall-Wells Hardware Co., Duluth; G. W. Welles, of Kelley-How-Thomson Co., Duluth; T. G. Walther, of Hackett, Walther & Gates Hardware Co., St. Paul; R. A. Kirk, of Farwell, Ozmun, Kirk & Co., St. Paul.

Missouri—J. A. Warner and Huston Wyeth, of Wyeth Hardware & Manufacturing Co., St. Joseph; S. Norvell, of Norvell-Shapleigh Hardware Co., St. Louis; George B. Richards, of Richards & Conover Hardware Co., Kansas City.

Nebraska—W. S. Wright, of Wright & Wilhelmy Co., Omaha.

New Hampshire—George E. McClintock and C. A. Adams, of John B. Varick Co., Manchester.

New York—Charles H. Turner and James K. Dunscomb, of Albany Hardware & Iron Co., Albany; Hobart Weed and L. C. Davenport, of Weed & Co., Buffalo; Pascal P. Beals and Eugene J. McCarthy, of Beals & Co., Buffalo; E. C. Neal, of Buffalo Wholesale Hardware Co., Buffalo; Chester R. Converse and Capt. F. Barker, of Barker, Rose & Clinton Co., Elmira; Irving D. Booth, of Irving D. Booth, Elmira; John L. Clayton, B. A. Hawley, H. S. Hart, J. H. Van Newkirk, T. J. Usher and W. F. Hudson, of Russell & Erwin Manufacturing Co., New York City; Frederick E. Underhill and Alfred D. Clinch, of Underhill, Clinch & Co., New York City; George F. Wiepert, of Sargent & Co., New York City; J. H. Boucher, of Matthews & Boucher, Rochester; Lee Richmond and G. D. Palmer, of Weaver, Palmer & Richmond, Rochester; J. W. Black, of Burhans & Black Co., Syracuse; A. J. Lowery and B. F. Jeffrey, of Wright-Dana Hardware Co., Utica; H. S. Darby, of J. M. Warren & Co., Troy; J. H. Underwood, of Babcock, Hinds & Underwood, Binghamton; R. H. Treman and Fred. L. Hawes, of Treman, King & Co., Ithaca.

North Carolina—J. A. Odell, C. H. Ireland and C. H. Ireland, Jr., of Odell Hardware Co., Greensboro.

Ohio—J. S. Harris, G. T. McIntosh and E. O. Rauh, of McIntosh Hardware Corporation, Cleveland; C. A. Jewett, H. H. Rudd and W. D. Taylor, of Geo. Worthington Co., Cleveland; J. Q. Riddle and J. C. Henry, of The Lockwood-Taylor Hardware Co., Cleveland; E. H. Luetkemeyer, of H. W. Luetkemeyer & Sons, Cleveland; F. Bahlmann, of The Kruse & Bahlmann Hardware Co., Cincinnati; H. L. Thompson, W. W. Knight and F. Lohman, of The Bostwick-Braun Co., Toledo; D. R. McChesney, of the Stollberg Hardware Co., Toledo.

Pennsylvania—W. W. Supplee and J. S. Bonbright, of Supplee Hardware Co., Philadelphia; S. F. Wilson, John R. Griffith, Paul A. Griffith, W. K. Wilson, E. T. Griffith and C. F. Griffith, of Shields & Bro., Philadelphia; Charles M. Biddle, Charles M. Biddle, Jr., Robert Biddle, 2d, Edward Knight, Charles C. Read and D. H. Reddle, of Biddle Hardware Company, Philadelphia; Henry F. Chorley and W. Allen Barr, of W. H. & G. W. Allen, Philadelphia; Wm. E. Dowler, George D. Greenig and W. H. Jones, of Newlin-Knight Hardware Co., Philadelphia; H. Vance Peters, of James M. Vance & Co., Philadelphia; S. Spencer Scott, Thomas Nelson and Walter T. Parsons, of Seltzer-Klahr Hardware Co., Philadelphia; Powell Evans, A. J. Cohen, J. A. McKee and William H. Walton, of Merchant & Evans Co., Philadelphia; John P. Balderston, William K. Singleton and Francis C. Bonner, of W. F. Potts Sons & Co., Inc., Philadelphia; William T. Gummey, James P. McFarland and Frederick A. Fable, of Gummey, McFarland & Co., Philadelphia; Z. T. Hall, of Hall & Carpenter, Philadelphia; C. J. Riter, of Riter Bros. Co., Philadelphia; P. B. Calvert, of Calvert & Holloway, Philadelphia; L. D. Berger, of L. D. Berger, Philadelphia; T. James Fernley and Thomas A. Fernley, of T. James Fernley, Philadelphia; John Bindley and E. J. Lloyd, of Bindley Hardware Co., Pittsburgh; P. Lyon Logan and R. M. Repp, of Logan-Gregg Hardware Co., Pittsburgh; A. J. Bihler, of James C. Lindsay Hardware Co., Pittsburgh; John D. Cherry, of Wolff-Lane Hardware Co., Pittsburgh.

Rhode Island—H. E. Nickerson, of Congdon & Carpenter Co., Providence; Edward A. Loomis and L. H. Coffin, of Belcher & Loomis Hardware Co., Providence; C. S. Angell, of Union Hardware and Electrical Supply Co., Providence.

Tennessee—Bruce Keener, of C. M. McClung & Co., Knoxville; Joseph Orgill, of Orgill Bros. Co., Memphis; R. H. Dudley, of Gray & Dudley Hardware Co., Nashville; W. G. Simmons, of Keith, Simmons & Co., Nashville.

Texas—F. A. Heitmann, of F. W. Heitmann Co., Houston.

Virginia—O. B. Barker, of Barker-Jennings Hardware Co., Lynchburg; John Donnan, of The W. S. Donnan Hardware Co., Richmond.

Washington—A. S. Burwell, of Seattle Hardware Co., Seattle.

West Virginia—W. P. Heiskell, of Ott-Heiskell Hardware Co., Wheeling.

Wisconsin—John C. Koch, of John Pritzlaff Hardware Co., Milwaukee; John C. Kroner, of Frederick Kroner Hardware Co., La Crosse.

AMERICAN HARDWARE MANUFACTURERS ASSOCIATION.

F. N. Tilton and A. W. Bowman, of American Screw Co., Providence, R. I.; Hobart Ames, Charles H. Myers, S. S. Early, C. S. Hubbard, H. M. Myers, H. A. Urban, J. P. Tabb, Lynford Rowland, Jr., C. F. Richner, J. C. Birge, Walter W. Birge and Samuel Burrell, of Ames Shovel and Tool Co., Boston, Mass.; Henry W. Avery, of The Avery Stamping Co., Cleveland, Ohio; Charles A. Brinley, Giles Reynolds, Morris Rudderow, Nicholas Roosevelt, George J. Adam and H. P. Chenoweth, of American Pulley Co., Philadelphia, Pa.; A. G. Beardsley, G. H. Jantz, James Richens and J. D. Williams, New York City; Miss Adelaide Williams, New York City; Mrs. S. E. Winslow, Worcester, Mass.; Mrs. R. D. Wyckoff, New York City; Mrs. E. J. Wylie, Philadelphia, Pa.

Rooms 116 and 117 were occupied by the Pritchard-Strong Co., of Rochester, and they showed some neat samples of their "Prisco" lanterns and bread mixers. An object of interest in their rooms was a life-size figure of Obadiah, a copy of which they are going to furnish their customers and friends throughout the country.

The L. & I. J. White Co., Buffalo, N. Y., showed their beautiful Touring Exhibit of Edge Tools of every description, contained in a handsome case seven feet high. This exhibit will be shown at all Hardware Conventions, and in all the larger cities, this company having been manufacturers of this well-known line of goods for over three-quarters of a century.

Socialists who were recently shocked to find that the editor of the *Appeal to Reason* was the president of a corporation can comfort themselves with the thought that it was possibly nothing more than newspaper enterprise, and he headed the corporation so he afterwards could describe the real feelings of a real corporation president, and thus give his subscribers a thriller.

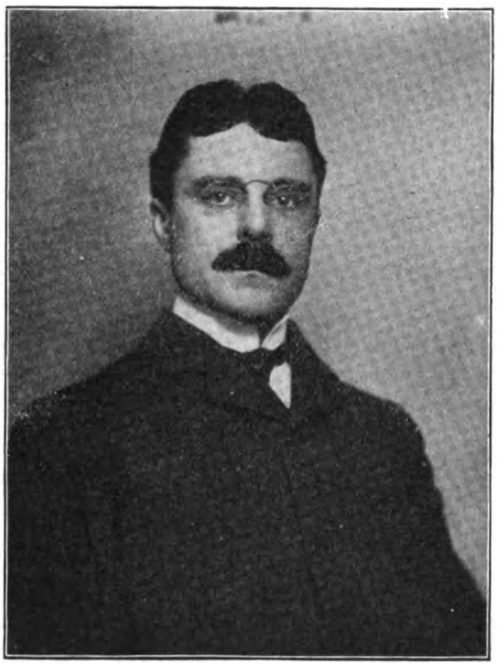
AMERICAN HARDWARE MANUFACTURERS' ASSOCIATION

ELEVENTH CONVENTION

EXECUTIVE SESSION, WEDNESDAY, 2.30 P. M.

The American Hardware Manufacturers' Association went into executive session on Wednesday, October 17, at Atlantic City, N. J. The meeting was called to order by President Kretsinger at 2.30 p. m. The president delivered his annual address.

PRESIDENT'S ANNUAL ADDRESS.



By F. S. Kretsinger.

Members of the American Hardware Manufacturers' Association:

Gentlemen:—It is with delight that I again greet you. I am pleased to be with you again and to see so many present.

First, let me again, and now while face to face with you, express the extreme regret which I felt because of the enforced absence from your June Convention. Had I even contemplated an absence from the country at the time of our meeting last November, nearly a year ago, I certainly would have declined the honor which you kindly paid me, or in any event would have given due notice of my intended journey.

I have read with especial interest the report of the proceedings of the June Convention and have noted with pleasure the acts of the Association in the matter of addresses of our members, which were interesting and instructive; and in the resolutions adopted, which were timely and proper. That the subject of conduct of contracting parties was for the second time (first four years ago) presented to us by a very able and interesting address on "Integrity of Contracts," indicates plainly that it is a subject often brought to the attention of many of our members, and it suggests a thought that possibly others outside of this body, merchants as well as manufacturers, buyers as well as sellers, who are honestly disposed, are equally interested in having clearly defined contracts and agreements conscientiously respected.

C. W. ASBURY.
President.

F. D. MITCHELL.
Secretary Treasurer.

There is another subject that is of more than ordinary interest to the average, and particularly to the long-distance shipper and receiver and that is

THE CLASSIFICATION OF FREIGHT BY TRANSPORTATION COMPANIES.

In no way are we groping in the dark in managing our respective institutions as in the freight department, for, except in very large concerns whose tonnage is so great as to be urgently sought for by even trunk lines, and whose business justifies the maintenance of a freight department with an expert manager, I venture to say that few shippers or receivers have even a faint knowledge of advantageous classification of articles and actual through rates on shipments to distant points. What with the official, Southern, Western and many other established classifications, covering uncertain geographical territory wherein articles are classed under many headings even in each book and often in an obscure way for the use of experts and favored shippers only, it is almost a mental impossibility to determine what are correct and fair through rates on shipments going over several roads. It is only when business is lax and competition keen among carriers (and this is a rare medium) that we come to our rights in the matter of rates through favorable and proper interpretation of classification of our products. No one of us, I venture to assert, begrudges remunerative freight rates nor fairly earned dividends to investors in transportation stocks, but the multiplicity of classification forms, maintained so persistently, is a relic of the past and is apparently for the purpose of blinding the eyes of payers of freight.

We may not be able to agree that it is possible or even desirable for the government to determine all freight rates, for in so doing the shippers' condition might be worse than it now is, besides even railroad owners have some rights, nor may we come to one mind and agree that the government should exact from transportation companies actual delivery dates of all freight accepted by them, irrespective of kind or quantity of articles in each shipment, distance and grades over which they are hauled, and many other conditions, which might be important factors in fixing periods alike just to shipper and carrier, but

IN THE MATTER OF CLASSIFICATION OF ARTICLES OF FREIGHT

I am unable to understand, and no one has ever given me light to see, why iron, leather, lumber, etc., in whatsoever stage of manufacture, are not the same whether carried in cars in Massachusetts or Louisiana, in Minnesota or Georgia or anywhere else, or in any direction.

With one uniform classification of articles in use by all lines over the country, irrespective of freight rates, which must of necessity differ because of length of lines, grades, tonnage and many other reasons affecting each particular railroad company, shippers and receivers could determine with some degree of intelligence and certainty the cost of sales and purchases at destination.

At some time in the near future I hope that this Association will seriously consider and express itself on this subject, and that we can have the earnest support of other similar organizations of manufacturers and jobbers to the end that at no distant day some satisfactory results may come of it.

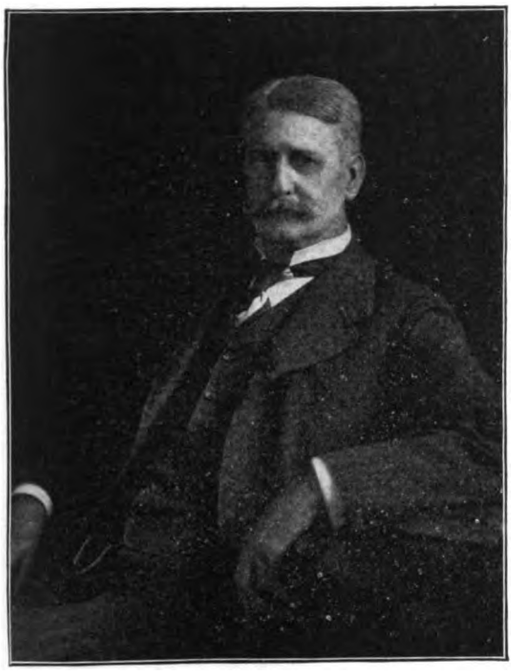
CATALOGUES.

The evil, that of being invited and in many instances very urgently importuned to pay for cost of catalogues issued by job-

Digitized by Google

bers has undoubtedly diminished since we took action by resolution on this subject four years ago, although there may be isolated cases now, where some of you may still be pressed to hand out your substance in fear of losing a customer. This subject has recently been presented to us by one Association in a new form called "Loose Leaf Catalogue," but happily for all concerned it is accomplished with a positive and official declaration that the manufacturers are not to be taxed, are not to be required or even requested to supply gratis either money or catalogue leaves. This independent position taken by our friends is commendable and most gratifying, for both they and we are relieved of much embarrassment, and what at times has even been humiliation. It is earnestly to be hoped that neither demands nor invitations for contributions of this nature will again be received by any of us.

THURSDAY MORNING.



Following the address, F. R. Boocock, secretary of the American Anti-Boycott Association, delivered an address.

A committee on resolutions was then appointed, of which Mr. C. W. Asbury is chairman, consisting of the following: George P. Hart, E. B. Pike, W. H. Hays, W. T. Johnson, D. A. Merriman, C. M. King, H. B. Plumb. L. S. Sherwood and Hobart Ames.

Minor changes were made in the constitution.

The various committee reports were then submitted.

The secretary-treasurer's report showed the Association's finances to be in a highly prosperous condition.

JULIUS C. BIRGE,
of Advisory Board.

The Committee on Grievances reported that no grievances had been brought to its notice.

The report of the Freight Committee was referred to the Committee on Resolutions.

The Membership Committee reported twenty new members.

Marked enthusiasm prevailed throughout the session, and a keen interest was manifested.

Much of the Association's work is accomplished by correspondence among its officials.

The committee work was uniformly confirmed.

An excellent session was had with the exception of the attendance upon the joint session on Thursday afternoon.

FRIDAY MORNING.

The Friday session was devoted to the consideration of reports of committees, the election of officers and the usual routine of miscellaneous business. The following officers were elected:

President, Chas. W. Asbury, Enterprise Mfg. Co., Philadelphia, Pa.

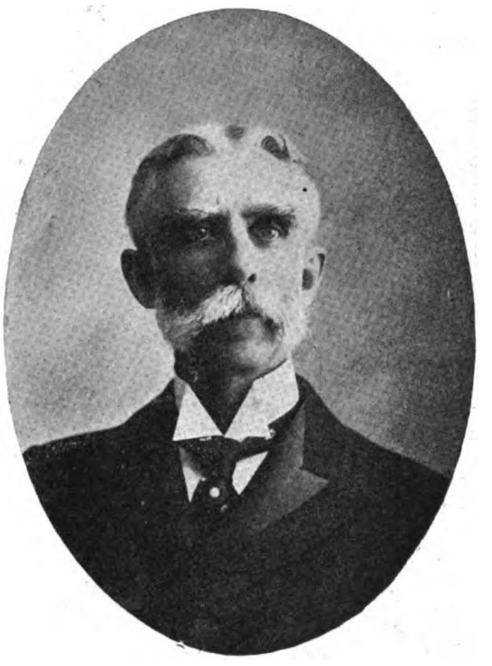
Vice-Presidents: George W. Corbin, Corbin Cabinet Lock Co., New Britain, Conn.; Wm. M. Pratt, The Goodell-Pratt Co., Greenfield, Mass.; Robert Garland, Garland Nut and Rivet Co., Pittsburgh, Pa.

Secretary-Treasurer, F. D. Mitchell, New York City.

Advisory Board: Julius C. Birge, Ames Shovel and Tool Co., St. Louis, Mo.; F. S. Kretsinger, American Fork and Hoe Co., Cleveland, Ohio.

Executive Committee: F. E. Muzzy, J. Stevens Arms and Tool Co., Chicopee Falls, Mass.; C. A. Earl, Corbin Screw Corporation, New Britain, Conn.; W. T. Johnson, American Axe and Tool Co., Glassport, Pa.; Chalmers M. King, McKinney Mfg. Co., Pittsburgh, Pa.; C. F. Carrier, Cronk & Carrier Mfg. Co., Elmira, N. Y.; Edward Ingalls, the Atha Tool Co., Newark, N. J.; Edward M. Kemp, Wabash Screen Door Co., Chicago, Ill.

FRIDAY AFTERNOON.



At the session on Friday afternoon the following resolutions were drawn up, presented and approved.

RESOLUTIONS.

Whereas, The President of the United States has seen fit to rigidly enforce all laws pertaining to the control of combinations of capital into so called trusts; maintaining that such combinations of capital are in restraint of trade, and as such are a menace to the industrial welfare of our country, and

Whereas, Organized labor presents a combination of labor in restraint of trade and as serious a menace to the industrial welfare of our country as any combination of capital could possibly represent. be it

Resolved, By the American Hardware Manufacturers' Association, composed of employers of labor, that the attention of the President of the United States and Congress of the United States, be called to this growing danger to our industrial institutions, and that the President of the United States be requested to urge upon Congress the necessity and justice of enacting legislation which will enable the employer to be free from the boycott, sympathetic strike and from such un-American methods as now obtain in the shape of personal violence and picketing of plants where strikes are in progress. Be it further

F. S. KRETSINGER,
of Advisory Board.

Resolved, That the American Hardware Manufacturers' Association firmly believes in the right of employers and employees to contract with each other without the intervention of the government as to hours of labor; and we denounce all efforts of the labor lobby, now maintained at the seat of this government, to restrict the hours of labor in any industry by law, or to deprive the employer of the only means of protection against unfair interference with his business, viz., the right of injunction.

Whereas, There has been much complaint among our membership relative to the abuse by customers of the usual terms of 20 or 60 days or 2 per cent. for payment within 10 days from the date of each invoice, and numerous requests for deferred date payments, many specific complaints stating that some customers deduct the cash discount of 2 per cent. when emitting in 30 or even 45 days, and

Whereas, Some of our members urge a reduction in the premium for prompt payment.

Resolved, That this Association recommend to its membership the continuance of the present terms of 30 or 60 days or 2 per cent payment within 10 days from the date of each

Digitized by Google

invoice, but that these terms be strictly and literally interpreted.

Resolved, Further, that a copy of these resolutions be forwarded to the National Hardware Association now in session, with the request that official action be taken thereon.

Resolved, That we favor the enactment by Congress of further legislation empowering the Inter-State Commerce Commission to require transportation companies to make reasonable rates for reasonable service and empowering the said Commission to enforce proportionately low rates when the service in transporting merchandise is unreasonably slow.

GEORGE W. CORBIN,
Vice President.

Whereas, This Association has repeatedly approved of the discontinuance of contributions by manufacturers to jobbers toward the expense of publishing jobbers' catalogues and

Whereas, Requests continue to reach manufacturers from some jobbers for contributions directly or indirectly,

ROBERT GARLAND,
Vice President.

Resolved, That we respectfully request the National Hardware Association now in session to adopt a resolution expressing the sentiment of its members upon this most important subject.

Resolved, That the report of the Freight Committee be referred in its entirety to the Executive Committee for consideration and action.

THE ANNUAL BANQUET.

The Annual Banquet was a most enjoyable affair. It was given in the large dining room of the Marlborough Hotel and due credit must be given to the excellent arrangements made by the Banquet Committee for this happy occasion. The committee had prepared the most elaborate and handsome Menu ever presented at an association banquet. Its beautifully embossed leather cover showed in the center a calendar, to the left of which was placed the emblem of the National Hardware Association in the National Colors and gold—a momento which everyone present at the banquet will preserve for its decorative value.

The speakers and the executive officers of the associations were seated at a long table and the rest of the guests were grouped around individual tables thus giving a chance for friends to get together and speak together during the Banquet.

The menu prepared for the delectation of all is therewith given.

MENU.

Canape Lorenzo
Cape May Salts — Cocktail
Strained Chicken Gumbo
Kennebec Salmon — Hollandaise — Sauterne
Cucumbers — Potatoes Natural
Celery — Almonds — Olives
Lobster a la Newburg
Sweet Bread Cutlets — Marechale — Pommard
Mushrooms, en timbale

W. M. PRATT,
Vice President.

Hardware Sorbet
Blue Wing Teal
Hominy — Currant Jelly
Asparagus-Vinaigrette
Roquefort — Neufchatel
Wafers
Ices and Cakes
Coffee
Mints — Cigars

While the courses were being served Mrs. H. H. Rudd of Cleveland rendered Ave Maria from Cavalieria Rustihana and the Misses Reynolds of Dixon, Ill., sang in their usual charming manner to the enjoyment of all.

COMMERCE AND LEGISLATION

Hon. R. O. Moon, Philadelphia, Pa., Member of Congress.

Toastmaster Wright in introducing the first speaker of the evening said:

W. S. WRIGHT.

Ladies, Gentlemen and Friends: I feel a good deal of hesitancy in occupying this position to-night, for I want to assure you that it is the first time I have ever been called on on an occasion of this kind. I have repeated that once or twice before, and I want you to understand that I am going to continue to say it until you clearly understand that I mean it. I want to say that I realize the fact that I was expected to make a speech and had secured at large expense one of the most able and distinguished orators to write a speech for this occasion, but this gentleman, after he had looked over the toasts that he might properly take the matter up said: "There is no use. For me to say anything on an occasion of this kind is a waste of time with the distinguished speakers that you have to follow. I would only ruin my reputation, and the best thing you can do is to keep still."

However, I do want to say that it is a very great pleasure to greet an assemblage of this kind, of manufacturers, jobbers and retailers from the North, South, East and West, gathered together to renew old acquaintances and make new ones, and

SAMUEL DISSTON,
of Executive Committee.

go home feeling that we are broader and better by exchanging opinions and feeling that we have had a most enjoyable time.

We have placed on our toast list the President of the American Hardware Manufacturers' Association, and through some crossing of wires, or possibly appreciating the fact that all the good things that are not born in Ohio come from Philadelphia, the American Hardware Manufacturers' Association have chosen a Philadelphia gentleman to head their Association, and I have great pleasure in introducing to you for a few remarks Mr. C. W. Asbury of Philadelphia, President of the American Hardware Manufacturers' Association.

REMARKS OF C. W. ASBURY.

Mr Wright then introduced Mr. Asbury, who spoke as follows:

Mr. Toastmaster, Ladies and Gentlemen:

I am decidedly lacking in courtesy if I do not take advantage of this opportunity which is the first I have to express the gratitude I feel for the great honor conferred upon me by the members of the American Hardware Manufacturers' Association. I am not insensible to the confidence so expressed. I appreciate it. I will serve you to the best of my ability with the understanding that under no circumstances will I be a candidate for re-election. At the expiration of the ensuing year I shall expect to be retired on full pay.

There are many things I might say to you to-night. There are some things I dare not say for fear of incurring your displeasure on the very threshold of my office. In this connection I am reminded of a man on his wedding journey accompanied by his wife and mother-in-law. A terrific storm overtook the steamer and the man worried the captain beyond endurance with questions as to whether the ship would founder. Finally the captain, exasperated by the man's constant questioning, exclamed: "You coward! Are you afraid to die?" The man thereupon apologized to the captain and said that all he wanted was a few moments notice before the ship foundered as he had something he would like to say to his mother-in-law.

W. H. HAYS,
of Executive Committee.

I feel that I should be charitable, especially to my manufacturing friends, but I cannot refrain from getting even with one of them by telling one of his experiences. He came home from the works one day—it was after a very strenuous day. He was tired. He lay down to take a few moments' rest before dinner. Almost momentarily he was fast asleep and snoring as was his custom. His wife came into the room. Shaking him gently, she said, "Harry, if you close your mouth you will make

C. F. CARRIER,
of Executive Committee.

less noise." He looked up sleepily and said, "So would you." Now, ladies, I have no desire to remind you of your troubles at home, but I feel also that one of my duties in this office will be the cultivation of a spirit of impartiality, and I therefore feel that I should relate the experience of a jobbing friend. This gentleman's wife said to him one day: "My dear, I think you should take some interest in our son's education; I think you should go down to the school and talk to the teacher, look over

Digitized by Google

his lessons, and generally see to it that he is being trained properly." He promised to do so, and did. He went to the school. On his entrance he noticed a general titter in the room. Somewhat mystified, he called one of the boys and asked him to go to the teacher and say to her that Mr. F. would like to see her. The boy returned in a moment with an invitation to come right in. As he walked in, the general laugh continued, and the teacher had great difficulty in maintaining her dignity; so much so that my friend asked her whether any of the boys had pinned anything to his clothing. She said "No," but then explained that she had given to his son a composition. She had asked him to compose a sentence with the word "whole" in it, and the results of his efforts were on the blackboard: "When we have pie at home father eats the whole of it."

E. M. KEMP,
of Executive Committee.

Now, gentlemen, during the coming year it will be my endeavor to bear constantly in mind one thought, and that thought is: "What does the other fellow think?" We admit at the outset that some of the decisions of the Manufacturers' Associations may be reached without due knowledge of the conditions existing in other branches of the trade. We invite hearty

EDWARD INGALLS.
of Executive Committee.

co-operation and conference both with the jobber and with the retailer, and we promise to approach such conferences in a spirit of the utmost friendliness, in the hope that the result of the consideration of those questions which affect all branches of the trade will mean the greatest efficiency in removing such evils as may exist. Such conference in my judgment cannot fail to produce good results, and if the result shall be in any case a difference of opinion, I will assure you that it will be an honest difference of opinion, and it will not be open to a charge of insincerity. (Applause.)

The Toastmaster then introduced Mr. F. S. Kretsinger, who spoke as follows:

ADDRESS OF F. S. KRETSINGER.

Mr. Toastmaster, Ladies and Gentlemen:

The flattering introduction, so generously given, makes my task a difficult one to perform, so let me quiet your fears, if you have any, by assuring you that it is not my intention to mar the pleasures of this occasion by a prolonged talk, nor to delay except for a brief moment the carrying out of the entertaining part of the programme which is to follow. I rise simply to respect the commands of your amiable master of ceremonies, who, as such, is a privileged autocrat, and then in only a few words to acknowledge the compliment, not as intended for me personally, but as especially directed to the American Hardware Manufacturers' Association, which I have the honor to represent.

Organizations in full, active, continuous operation, as are the many Hardware dealers' and manufacturers' associations to-day, are not only of comparatively modern origin, but are essentially American institutions. In their membership is represented greater energy, push and inventive genius, and also a more ready adaptability to new conditions than are found anywhere else in the commercial world; a custom, or a design, or a method of yesterday is a thing of the past, if an improvement is offered

N. A. GLADDING.

to-day. Not the least advantage accruing to membership in such bodies, is the forming of acquaintances, which frequently ripen into friendship and disperse erroneous impressions regarding competitors, and also between contending buyers and sellers.

The associations which are the most successful, whose legislation is most effective, are those which work on broad lines, under influence of the "give and take" rule, and particularly when the questions at issue are vital and concern others as well as their immediate membership. By the candid and temperate interchange of views good is accomplished, whether the questions are between fellow associates or between different organizations. No one thing contributes more to the upbuilding and the successful culmination of our respective associations, than an ever-present spirit of fairness and cheerful willingness to look on all sides of all subjects, which are the subject of discussion. Crooked lines cannot be made straight nor can matters at issue be adjusted by any hasty, maddening methods or by severe criticisms.

Meeting as we do to exchange views on questions which pertain to our respective occupations to adjust differences, to smooth over rough places, or to dispel altogether obstacles which we encounter as buyers and sellers, to adopt new rules of business conduct or to modify old ones, it is of the utmost importance that a dispassionate discussion of the subjects prevail at all times and under all circumstances. That we should differ on both minor and serious questions is to be expected and it is entirely proper that we should strenuously contend in convention and otherwise, each for his own and against his opponent's opin-

Digitized by Google

ion, that if possible the other one may be converted to his views.

You, gentlemen of both Associations, are doing a great work, and yet there is more to be done, conditions change rapidly and new questions appear almost without warning, and it is up to us, as men of business, to act in all fairness, all liberality and with full justice, that our records may be pointed to with pride in future years.

Gentlemen of the National Hardware Association, we greet you to-night, not simply as our customers, nor as mere acquaintances, but as our friends, whose interest and whose success we have at heart. Many of us are close friends of long standing, and it is this acquaintance and friendship which appeals to and influences and guides us in our business relations with one another, and so to-night, dropping all thoughts of buying and selling, of list and discounts, of deliveries or terms of payments, it is a pleasure to sit at your elbow in friendly fellowship and join in pleasant converse. When some time in the future the commercial history of these times and the great Hardware business of this country is written, it will be incomplete without especial reference to and ready recognition of the great work done and the great good accomplished by your organization.

Mr. Brace Hayden was then introduced by Mr. Wright, who gave to his listeners his own personal experience of the San Francisco earthquake and said:

ADDRESS OF BRACE HAYDEN.

Many suppose that an earthquake is preceded by certain premonitory symptoms indicated by a close and muggy atmosphere or some other marked phenomena of atmospheric disturbance, but nothing of the kind foretold the shake of April 18th, for it came upon us altogether unawares. The evening preceding was charming, places of amusement filled with people, the streets crowded, business the day previous was very active; in fact, we were congratulating ourselves on the improved business conditions, the outlook being the brightest for several years past. Shortly after five o'clock of Wednesday morning, the 18th of April, or to speak more accurately, at 5.15, when most good people were in bed the shake commenced. Some say ushered in by an indescribable and terrifying rumbling sound, which I must confess I did not hear, whether because our locality was exempt or my slumber too sound, I can't say, but the first I knew there was a severe trembling of the house that made me sit up in bed and take notice. This was followed by a rotary up and down jerky motion that increased in intensity, accompanied by the swaying of the house, the creaking of the timbers, the cracking of plastering, the falling of chimneys, pictures, bric-a-brac and china, the rocking of the floor, and it was as difficult to stand upright as it would be in a skiff on a short choppy sea. The uppermost thought was will the house fall. There is no time during an earthquake for reflection to think of how much better life you could have led during past years. All this should have been done beforehand, for about the only thing you can do is to hold on to something and wonder when the shake will cease, the bed seemed hardly big enough, it was like a small raft in a stormy sea. I must confess that my heart beats were above the normal, and I had a flitting reminder of the Biblical account of Korah, Daphan and Abiram when the earth opened and swallowed them up together with their families. Two seconds seems a long time when having a tooth pulled, but I can assure you that forty-eight seconds of a quake, when your house is swaying around and up and down and you don't know when it is going to stop or what the result will be, while it may not be quite so painful, seems altogether longer than absolutely necessary for the practical purposes of life; it is not conducive to equanimity of thought. It is unsettling of your ideas of the stability of the earth, and, the phrase, "solid ground on which we rest" is somewhat of a misnomer; but all things have an ending and so it was with this shake. Nature's mutterings were over, her spasm of pain, or of settlement of the earth's crust had ceased; the repair of the geological fault that had been made, and she was at rest; our houses that had not succumbed to the shock settled back into their normal upright position, but minus their chimneys. There is nothing so conducive to steadying your nerves and restoring your equilibrium as to go to work, so in picking and sweeping up the debris of broken china, glass, etc., and in comparing neighborly experiences and losses of which there was a great similarity supplied the needed opportunity; all were not so fortunate as to escape with such trivial losses, for there were some houses that succumbed to the force of the shock, and in whose ruins many a victim was buried. The houses that fell were mainly those which rested upon insecure foundations or whose construction was faulty or materials unsuitable, and where durability and soundness and honest building was sacrificed for appearance sake; the quake revealed such shams and it was generally through such hasty, cheap and meretritious building that lives were sacrificed. In the business and wholesale district, where the structures were of a more durable character, there were very few in which business could not have been continued without any serious interruption. The damage done by the earthquake is variously estimated at from five to twenty millions, but even the maximum sum is trivial in comparison with the subsequent loss. With the subsidence of the trembler our troubles were not over by any means; in fact, they had just commenced, for soon ominous clouds of smoke were seen arising in the lower part of the city, down towards the water front, to be succeeded by the red flames of fire. Promptly the firemen were on hand, hose unreeled and coupled to hydrants, steam up and the fighting force ready for the battle; why the delay, when every moment was precious and the flames gaining headway, they would soon be past control. What's the matter Chief, generally so quick and decisive, why delay the command "turn on the water;" alas, there was none to turn on, the hydrants were opened but the water was not there. Spring Valley mains had been disrupted and the water was sinking into the earth or escaping through the sewers, and as the terrible truth became known the realization that San Francisco was at the mercy of the flames gradually dawned upon the people.

Chief Sullivan who had been at the head of the Fire Department for many years—an efficient and capable man—had been apprehensive of a conflagration, had studied the situation and who had formed his plans to cope with such a disaster, was very early fatally injured, and the force thus left without his guiding judgment; how they worked for three days and nights without rest is a matter of local history, fighting the flames as best they could with inefficient means of drawing water from the bay within very restricted limits, without proper appliances, driven back step by step, their efforts all to no purpose. Dynamite was seemingly the only recourse left and this was used with no unsparing hand; the booming of this giant force sung out the death knell of many a structure, and its thunderous voice, incessant for two days and nights, was heard for miles around, but it did little to stay the onward march of the devouring flames, and it was not till Van Ness Avenue was reached, varying from a mile and a half to two miles from the ferry at the foot of Market Street, that the flames were stayed in that direction, and it proved the value of a wide avenue as a barrier to a conflagration; where that barrier ended the flames continued out Mission Street for another mile and when the fire had spent its force on Friday night, the area of destruction included about 2,500 acres, or a space practically two miles square, once filled with substantial business houses in solid blocks, many supposed to be fireproof, filled with costly merchandise; banks, churches, public buildings, schools, hospitals, costly residences, luxuriously furnished with beautiful paintings, statuary, libraries, and priceless memorials of the past, modest homes and cheaper shelters all swept away in the holocaust of fire; no need to draw upon the imagination to supply the horrors of the destruction of Ancient Rome by fire, or the conflagration that swept Chicago about thirty-five years ago, or the more recent and limited fires that swept over Boston and Baltimore, for experience had now supplanted imagination, and ours was a dreadful one. The calamity was so over-palling that men's senses were blunted and we could see our property swept away, business disrupted, homes destroyed, and even the sacrifice of life without a tremor.

As the fire commenced to spread, and the fact realized that there was no water to stay its progress, the city authorities took prompt measures to stop any panic. Federal and State troops were immediately on duty preventing looting and preserving order. Martial law was proclaimed or rather supposed to be, and which answered the purpose just as well of stopping robberies. People commenced to vacate their homes or were ordered out by the police or military, hastily gathering a few things they could carry or drag along for expressmen or teams were difficult if not impossible to obtain. Where to go was the question; will the fire a mile away reach us, was the anxious inquiry and thought; it cannot be possible that it will climb over these intervening hills and valleys, so the incredulous waited and when it did reach their locality, and it seemed that nothing could stay its onward march, and the whole city was doomed, hundreds of thousands were in the streets with hastily gathered impediments, consisting of such things as they could carry or drag, rich and poor alike, the well-to-do carrying only clothing or protective covering, the poorer dragging and tugging along with their household goods, all precious to them, trying to drag trunks, pushing along sofas and even trying to save pianos, only to leave them to the devouring flames. Canary birds and excited parrots must be saved; little children with their pets, and even strong men with kittens were to be seen; the sights were pathetic and the streets were filled with as motley a crowd as ever gathered in a cosmopolitan city, all nationalities represented, all subdued and uncomplaining by the overwhelming disaster. Where were they going, where find refuge and safety; some to the Golden Gate Park and the surrounding hills, some to the Presidio with their great expanse of open field with nothing for the fire to feed upon, there to camp for many a night and at first with the stars of Heaven for their canopy, others sought the ferries and the cities across the bay, Oakland, Alameda, Berkeley and suburban towns, absorbed, housed and cared for thousands.

Soon hunger commenced its insistent demands, only to be satisfied at first by patience and excitement, altogether too unsubstantial to last long. Those who had provisions shared with those who had none; such supplies as were left in the city were commanded by the authorities. Soon the suburban towns and nearby cities heard the cry of distress and hastened forward supplies. The bread line was formed and rich and poor alike took their places in the ranks and waited patiently their turn for supplies which money could not purchase; tents were found and put up, and the houses that remained—and they covered a large area—did double duty and so shelter was found. The telegraph flashed tidings of disaster far and wide and the East, West, North and South poured out with unstinted hand the ample promptings of their generous souls. San Francisco was suffering, was passing through a terrible ordeal, the response was quick, millions of money was sent, trainload after trainload of provisions, blankets, clothing, tents, etc., were hurried forward, the railroads and express companies giving precedence to her necessities. This awful touch of trouble had made the whole nation one kindred, but the trial was largely robbed of its bitterness by this generous and quick outburst of sympathy and kindness. San Francisco will never forget

Digitized by Google

it. The manufacturers, bankers and merchants of the East have done their full share in encouraging our people, and personally, and as representing a firm that is well-known to many of you, we are under lasting obligations for words of kindness and sympathy, for offers of help and assistance that were showered upon us by hundreds of our friends; their words and deeds are indelibly stamped upon our hearts and in our memories, and in the rehabilitation of business we are taking as active and permanent a way as we know how of proving our sincerity, and I am sure that the experience and thankfulness of our neighbors and fellow sufferers in the Hardware and allied trades was and is the same as our own.

And what of the future? Is San Francisco destined to be buried in oblivion, a memory of the past as has been suggested, either through jealousy or of honest doubts of survival after such a staggering blow? Is its magnificent harbor, the only one of note, and placed by the hand of the Almighty in the economy of Nature's highway, midway of the 1400 miles which stretches between San Diego on the South, and Coloumbia River on the north, nearing upon its broad expanse, shipping from every nation, to be rendered useless, and its bay or succession of bays to become merely a swimming pool for the unwieldy porpoise and a refuge for seagulls? Is the commerce of the Orient, which is being distributed to and from our country over the great systems of railroad which find a terminus at our seaport, to seek some other lines of communication or to be wiped out altogether?

To ask these questions is but to answer them, for San Francisco is great and powerful even in her majestic misfortune. Chicago, Boston, Charleston, Galveston and Baltimore have all suffered from great disasters. Did their men sit down in mournful apathy and whine at their losses; by no means, but with manful enterprise they began the work of reconstruction, and the blood of San Franciscans pulses with the same healthful virility, the same determination to rebuild their city, but on broader lines, on more solid foundations, with better equipment and with safer and more substantial structures, that she may become a pride, not only to herself, but to her sister cities of this great country. The difficulties are great, but so are her opportunities. There has been some criticism as to her slowness of initiation, but this has come mainly from people who do not understand and cannot realize the situation, who do not know the immense difficulties with which she has to grapple; millions of tons of debris cover her roadways, sidewalks, and the ground upon which her buildings once stood; these wrecks must be cleared of their brick, stone and tangled masses of twisted structural beams, shapes, pipe and rods, the debris removed miles away. The streets are already crowded with a close succession of wagons filled with this rubbish; the work is slow, even supplemented as it is by temporary spur railroad tracks laid in many of the streets. Then again delay is necessitated in consequence of the inadequate supply of labor and its extravagant demand in rates of wages; labor strikes have been of common occurrence, some classes of building materials have greatly advanced, and many workmen so indifferent to their obligations of faithful work that taken altogether contractors, builders, architects, engineers and capitalists alike hesitate to commence building operations, when they cannot calculate the cost with any degree of accuracy; but these matters will find a natural settlement before many months have passed. Labor is being and will continue to be so well paid that it will attract an army of workers and skilled mechanics, and in due time the permanent buildings will be reared fast enough to meet all requirements. The earthquake and conflagration have demonstrated that buildings can be put up both quake and fireproof, as many examples are to be seen that substantiated this fact. The weak spots, both of foundation and superstructure, have been revealed, and in avoiding these the new structures of the future will probably cost very little if any more than many of the so-called first-class buildings that were expensive but weak.

Business can be and largely has been housed in temporary structures, without disadvantage to maximum distribution, and we can bide our time awaiting more advantageous conditions for the uprearing of permanent structures. But San Francisco has by no means been idle, business is fast assuming its proportions as of old, even if it has not already exceeded it; transactions in real estate have been very active since the fire and values have not as a general thing declined, but on the contrary there have been many advances. Building contracts have been very numerous and many permanent buildings started, but there is so much to do in every direction that the great amount of work performed seems small in contrast with what remains to be done. The banks, being the media through which business transactions are finally resolved, are in splendid shape, and their clearings are probably as faithful and sound an index of general business conditions as any that can be had, and these show for the months of July, August and September an average of about 13 6-10 per cent. greater than for the similar period of last year; and for the week ending October 6th, 19 8-10 per cent.; and the merchandise stocks that are constantly moving show plainly that their consumption has by no means been curtailed, but on the contrary it is on the increase and will continue to grow, as the State and territory, tributary to San Francisco, is in good and healthy condition, and the millions of property in the city that has been destroyed must be gradually replaced and in better manner than before. The insurance tangle is for the most part solved; it was slow of adjustment at the beginning, and no wonder with the hundreds of millions involved and under conditions new and complex; at first the companies doubtless felt that the earthquake was mainly responsible for the enormous losses and therefore expected that a comparatively large amount of salvage would result; probably we should not criticise their preconceived ideas, as the telegraphic news to the East and to the whole world, magnified the earthquake damage and losses, and it was quite natural that when the army of adjusters arrived it took them some little time to give up their preconceived and form new opinions particularly as the financial interests of their companies lay in clinging to the earthquake claim. Most every company had been very hard hit and a number of them seemingly felt justified in demanding concession, even when they had to admit that the loss was occasioned solely by fire. Most of the best and soundest companies acknowledged their responsibility and met their losses bravely and honorably. A few have shirked when probably there was no absolute necessity for so doing; a few deny any and all liability sheltering themselves behind the more or less pronounced earthquake clause in their policies, and then somewhat strangely offering to compromise at an arbitrary figure set by themselves: a very few say they won't pay, possibly believing that their assets in a foreign country cannot be reached. A resort to litigation in these different classes is the only means of proving who is right or of obtaining settlements.

To such companies who cannot substantiate exemption under any clause in their policies, and who have forced settlements, either through the necessities of the assured or his fear in their implied unsoundness, or such foreign companies who rely for immunity upon the distance of their resources and the difficulty of reaching them, or any other company who has not honorably met its obligations as fully as it was able and legally bounden, there is a day or reckoning coming, for an unreliable insurance company is a very poor one to depend upon whether the risk is in San Francisco or elsewhere, and it is to the interests of business men and all others to watch the settlements of our losses and not the companies who have shirked meeting their contracts.

San Francisco will be rejuvenated, not only by the wealth centered there, but capital from many directions will seek investment, because there is money to be made and the opportunities of certain and satisfactory returns will be greater than ever before.

Mr. John E. Watson, who was next on the list of Toasts, was unable to attend owing to arduous congressional duties and he sent his regrets through the Hon. R. O. Moon, Member of Congress, who then addressed the audience on the subject of Commerce and Legislation.

It was after midnight when the banquet was over and those who attended certainly enjoyed it.

PRESENTATION.

The American Hardware Manufacturers' Association is to be congratulated on its retention of F. D. Mitchell as its Secretary-Treasurer. Mr. Mitchell has proved a singularly efficient officer, and the success of the organization has been materially advanced by his energetic and intelligent efforts. In recognition of his highly valuable services, of the esteem in which he is personally held by the donors, and as a token of good fellowship a splendid case of solid silverware was presented to him in a neat and timely presentation speech on Wednesday. The offering consisted of:

1 doz solid silver Stratford teaspoons.
1 doz. solid silver Stratford forks.
1 doz. solid silver tablespoons.
1 doz. solid silver table knives.

The committee having the testimonial in charge consisted of C. D. Clark, Peoria, Ill., and J. B. Silliman, of Atchison, Kans.

MORE THAN HIS MATCH.

Si Medders—Trolley cars are a great blessin', Josh.

Josh Kronkrib—They be thet. They be th' only thing around here thet an automobile is afraid of.—*Judge.*

A MISTAKEN DIAGNOSIS.

A young woman who recently had taken charge of a kindergarten entered a trolley car and as she took her seat smiled pleasantly at a gentleman sitting opposite. He raised his hat, but it it was evident that he did not know her.

Realizing her error, she said, in tones audible throughout the entire car:

"Oh, please excuse me! I mistook you for the father of two of my children!"

She left the car at the next corner.

OUR BRITISH LETTER.

(Concluded.)

ed the works of F. Braby & Co., Ltd., of London, in order that they might learn something about the making of galvanized goods. Other makers in Sheffield and Birmingham have also thrown open their works in a similar manner. Indeed, this appears to be the age of technical study; the public demand the knowledge from their tradesmen, and traders are responding to the cry, the result being that a greater interest is being taken, not only in the use of modern improved appliances, but also in their sale, as it is apparent that the more there is known about the goods, the greater will be the interest displaying them and bringing them under the notice of buyers.

OUR BRITISH LETTER.

(From our Special Correspondent.)

London, October 13th, 1906.

HARDWARE ENGINEERING.

During the past few weeks an important Engineering and Machinery Exhibition has been held in London, and it has been attended by a large number of visitors, the majority of whom have been engaged in some one or other branches of engineering. A somewhat novel feature was, however, introduced last week, the occasion being Ironmongers' Day at the Exhibition. A large number of ironmongers, associated and non-associated, including Charles Parsons, the President of the Ironmongers' Federated Association, Secretary Smith and several of the leading members of the Central Board, together with Alderman Pond, the President of the London Ironmongers' Association, were present. On that day F. W. Bridges, one of the organizing managers of the Exhibition, invited all the ironmongers in the United Kingdom, entertaining those who availed themselves of the opportunity of inspecting the unique display of engineering and machinery, to high tea. F. W. Bridges, who is also the proprietor of *The Ironmongers' Chronicle*, had prepared a very interesting programme, and conducted those present round the Hall, pointing out to them the leading features of interest from an ironmonger's standpoint. When the Exhibition was carefully scrutinized, and the objects displayed upon the several stands examined, it was really astonishing how many of the exhibits were closely allied with an ironmonger's trade, and especially so when it is remembered that ironmongers are the chief distributers of sundry engineers' tools, and machine tools and accessories. During the last few years a marked advance has been made in ironmongers' workshops, and these establishments, so necessary to the life and progress of the retail ironmongery business, have developed considerably; the introduction of power and the utilization of modern machines, bringing many workshops, formerly modelled on crude lines, up to the standard of engineering requirements; indeed, many ironmongers now possess gas and oil engines, run their own dynamos, light up their premises with electricity, and utilize the power obtained in running their machines, and in working labor-saving appliances. The Exhibition which has just been visited by so many ironmongers contained a marvelous assortment of modern tools, including some beautifully finished goods produced in the United States and handled in this country by well-known tool importers. Some useful drilling machines were especially noticeable, and the pipe-bending machines, which are now becoming very popular, were much appreciated by those ironmongers who practice gas fitting, cycle repairing and other work which requires tube-bending. Such appliances providing for rapid bending cold, save labor, and enable repairs to be affected without the destruction of finish involved when metal has to be heated in a forge. Ironmongers are now taking up electrical work to a greater extent that they have ever done before, and electric wiring and fitting, involving the use of switches and electrical fittings, is now carried on by most ironmongers' workmen. The introduction of incandescent gas lighting has saved the gas-fitting industry from extinction, and the still more modern inverted burners which have been placed on the market within the last two or three seasons, have again brought new work to the ironmonger and enlarged his spher of operations. Many unique machines utilized in all branches of work referred to were shown at the Exhibition. Metal workers, too, and among that number not a few are also ironmongers, found much to interest them. Such machines as cutting-presses, circular shears, double seamers, planing-machines, air drills, pneumatic hammers, and improved lathes being especially admired, and their relative values carefully scrutinized. I think one of the most effective stands at the Exhibition was that made by the L. S. Starrett Co., of Athol, Mass., who are now operating an extensive business in this country. The marvelous variety of calipers and dividers, micrometers and squares and other precision tools used by mechanics embodying the most advanced ideas in practical tool making. I noticed that among the enterprising trade journals who had stands at the Exhibition, the *American Machinist*, the European edition of which well-known journal is consulted as an authority on technical matters connected with engineering.

AUTUMN AND WINTER TRADING.

The remarkably fine and dry weather which has prevailed in this country for some weeks past has somewhat prolonged Summer and early Autumn trading, and retarded what may be termed the cold weather business. A break in the continued dry season, and a snap of cold has, however, brightened up the prospects of Autumn trade, and caused some inquiry for heating appliances, in view of which ironmongers are setting out their shop-windows with stoves and heating accessories, so many of which the manufacturers have provided them with this season. There has been a marked advance in gas and oil radiators, not only in their better construction, greater heating powers and reduced consumption of fuel, but also in their extended use, and ironmongers are finding a demand for this method of heating growing year by year. The American Radiator Co. have some good lines, and the patterns they are offering just now are specially adapted to the requirements of the British market. Their goods are very ornate, and their heating power all that is needed. Indeed, I notice that some of the English makers are adopting radiators more ornamental. Their castings being closely assimulated to the American styles. Every year brings new patterns of register and dog grates, interiors and well stoves; sometimes the improvement lies in the degree of combustion attained, at others in the economic properties and small consuming fire baskets provided; at other times makers seem to vie with one another in using fire-bricks so arranged as to throw out the maximum amount of heat; again air-distributing chambers contrived so that hot air may be utilized, and distributed in every portion of the room, thus effecting economy and preventing draught, are given prominence. Practically all these points appear to have been closely watched by makers this season, and some really good stoves and grates are being handled. Perhaps, however, one of the most noticeable features in present day construction is the tendency to put back the centuries in constructive designs. Some of the quaint old styles now being shown are faithful reproductions of sixteenth and seventeenth century dog-grates, and many of the quaint old cast backs made in Sussex in the early years of the eighteenth century out of the soft iron obtained locally, smelted by wood cut from the forests which have long disappeared are being faithfully copied. The Carron Co., an old-world firm who flourished in the eighteenth century, and yet evergreen in their methods of trading, and in the progressive measures they adopt, have recently placed on the market some beautiful reproductions of late eighteenth century work, some of their register grates, dogs and interiors being modelled of the familiar lines of the Louis period, and Adams, whose names are associated with eighteenth century art, and familiar on both sides of the water. It is pleasing to note that many British ironmongers appreciate the modern art reproductions, and are not slow in introducing them in their stocks.

TECHNICAL EDUCATION NOW REGARDED AS ESSENTIAL.

Technical education is now accepted as essential to good business, and the salesman who does not possess some knowledge of the goods he sells is regarded as behind the times; the man who is ignorant of the constructive processes through which the goods he handles pass before being placed in his showroom, is altogether out of the running, for it is the man who can best explain the qualities of the wares he offers who is most likely to secure the largest sales. These facts are being gradually driven home and accepted by British Hardwaremen, consequently ironmongers are giving their assistants greater scope for acquiring the necessary knowledge, and the ironmongers of the future are being trained in a degree altogether beyond the ideas of ironmongers who donned the black apron a few years ago. The spread of education in Great Britain during the past few years also accelerates the speed with which technical education is gaining ground, for at the present moment there is scarcely a town wherein technical education in some of the higher branches cannot be obtained. The larger schools in the principal manufacturing centres are providing technical slasses for the education of working men, tradesmen's assistants, and others; among the different subjects being dealt with are metal working, gas-fitting, plumbing, copper-smithing, light and heavy ironwork, etc. There are also opportunities being granted by manufacturers to assistants in order that they may learn something of the constructive nature of Hardware goods. Quite recently the Croyden Ironmongers' Assistants' Association visit-

SOME STRANGE USES OF PAPER.

It used to be said that there was no thing but could be made out of leather. The same thing is now said of paper. From water mains, rifle barrels and window panes to clothing, tablecloths and napkins, the range of articles into which paper is squeezed, spun and chemically wrought, is bewildering. Further than that the range of uses to which paper is applied it increasing rapidly. The United States are now the greatest producers of paper in the world, but the smallest exporters. The latter fact is because we use more paper than any other nation and because in some lines of manufacture Germany incontestably leads the world. The adaptation of paper to its present manifold uses is simply a matter of applied chemistry, says a writer in the Cleveland Plain Dealer, and in this science the Germans have long been pre-eminent. But even in Germany and in France, where paper making has reached so high a stage of advancement, it is still Yankee brains that furnish the machinery with which the fabric is produced, and not only are American paper making machines exported to Europe, but American skilled workmen are employed to go with the machines and operate them in the paper mills on the other side of the water. An instance of this has just been afforded in the great copper mining company of Falun, Sweden, which has recently added to its one producing plant, several large paper mills. As part of its equipment, four paper making machines have just been ordered in this country, and a number of expert American paper makers have been engaged to go abroad with them, put them up, and run them when they are in working order. This combination of copper producing and paper making is. as a matter of fact, a very natural result of existing conditions.

The Swedish company, the Stora Kopparbergs Bergslog Aktiebralog, as it is called, and, by the way, it is said to be the oldest corporation in the world, uses for supports in its mines a vast quantity of timber. After all the supports possible are cut out of a tree there still remains a large surplusage of excellent wood, which for a long time went, in a great measure, to waste. Now paper making in Sweden is a great industry, because of the great forests which produce the wood for pulp. So it occurred to the Copper Company that here was a good way to dispose of its waste timber, especially as the heat used for roasting the copper ore could be applied at the same time for the generation of the steam necessary to the drying process in paper making.

It is from Sweden that Great Britain is now getting a large proportion of the paper which she is obliged to import. The average consumption of paper in England is about 5,500 tons a day, and of this she produces only about 3,400 tons, leaving the remaining 2,100 tons to be bought abroad. Sweden, or to speak more accurately the Scandinavian peninsular, furnishes the bulk of this, although our own great paper producing concerns have large establishments in London and are rapidly gaining ground in the English market.

The Swedes as well as the Germans have invented some remarkable appliances for paper, among which is a grease proof paper, which is superior to any other so far produced, but which will soon be matched by an equally good, if not better, article made in this country. One of the uses of this grease proof paper abroad is for the wrapping of butter for shipment. While there is plenty of this grease proof paper now made here, it is used extensively for the wrapping of hams, bacon and similar food products, it has not the merit of being odor proof as well as grease proof, and butter is so sensitive to odors that this paper would not serve in packing it for shipment. The Swedish grease poof paper, on the other hand, is absolutely odor proof as well, and nearly all of the vast quantities of butter shipped from Denmark to England are wrapped in it. The butter reaches Great Britain in pound packages, closely enveloped in the grease and odor proof paper—packages that in a sense are hermetically sealed.

Reverting to the use of American machinery in paper making as exemplified in the case of the Swedish company above mentioned, there is still a more striking instance of it nearer home. For a long time back the machine used in Germany for putting the finish on envelope paper was called the Yankee machine. It was the invention of an American, yet strangely enough there was not a single one of the machines in use in the land where it was invented. And even now the only ones, with a single exception, are in a big paper mill now about completed in Pennsylvania, by German capitalists and under German direction. The other Yankee machines are in the mills of another German in Wisconsin. The peculiarity of paper required for envelopes is that it must be rough on one side, so that the mucilage will stick well, and highly finished on the other in order to give a fine smooth surface for writing.

Probably the very latest commercial fact in the application of paper is in the way of fire proofing. Paper fire proofing, among other advantages, has this one, that the chemicals used penetrate the entire texture of the material and are absorbed by it before it is rolled into any thickness that may be required, thus making them much more effective than when wood itself is treated with them. The paper wood thus produced is as hard as wood itself, is susceptible of brilliant polish, and any variety of decorative treatment, is vastly lighter, perfectly adjustable and absolutely fireproof. The erection of skyscrapers necessitated a very serious study of fireproof materials, and the fire proofing treatment of wood, and the result is that paper is coming very largely into use in all cases where woodwork has to be used. It is particularly adaptable for ceilings and is coming into such popularity for that purpose that the famous papier mache ceiling in the Albany Capitol, which so scandalized the state, is not unlikely in a very short time to be in the height of fashion. In fact, a gentleman who has had a long experience in the paper business said that the day was not far distant when all interiors of fine houses, irrespective skyscrapers, would be very generally provided with fireproof paper woodwork. The material has been adopted for the finishings of the interiors of warships and the Pennsylvania Railroad Company is using it very extensively for the head lining or ceilings of passenger cars. The material commonly used for this purpose, being heavily treated with oils, is highly inflammable, and the adoption of the paper fireproofing material is another precaution for the safety of passengers. In addition to the Pennsylvania road, the New York Central also, it is understood, is considering the adoption of the same material for the interiors of its passenger cars.

As a matter of fact the action of the Navy Department in taking such care to have all necessary woodwork made of material that has been made fireproof by chemical treatment, has turned the attention of people to this subject very seriously. If battleship interiors must be fireproof, it is asked, why should not also the interiors of all passenger cars and public vehicles of all sorts where fire must be counted as among the serious elements of danger?

As for articles of daily use that are now made of paper, their number is surprisingly large. Eliminating such things as car wheels, in which paper long ago demonstrated its superiority over steel; the water buckets, the covering for hay ricks and other similar articles long of familiar use, there are hats and cups and clothing. In Detroit there is a concern which is doing a large and very lucrative business in the manufacture of paper clothing. Paper, of course, as demonstrated in the water buckets, can be made almost as impervious to water as India rubber itself, and combined with layers of thin cloth a material is made which can be and is put into undershirts, waistcoats and jackets, which present a good appearance and are very durable. Without paper cloth it might almost be said that the enormous ballroom sleeves worn by women not long ago would have been next to an impossibility. The strong, stiff but yielding fabric was precisely what was needed to make the sleeves remain in the form that fashion decreed for them.

In dress linings, skirt linings, coat linings and in facings, paper cloth is coming more and more into use, and is giving very good satisfaction. Good looking and very durable hats are made of paper, and paper soles and heels for boots and shoes of the cheaper grades have long been in use. When it was said above that rifle barrels were made of paper, only the literal fact was stated, although the paper rifle is not practical, for various reasons, among others the cost. It was Mr. Whistler, brother of the artist, who had the first paper rifle barrel made in this country, and, although it stood the strain of firing perfectly, it was made and considered only as a curiosity, illustrative of paper possibilities. Water mains made of paper, however, not only are a practical possibility, but are in actual use. Where the conditions are such as to warrant the very considerable extra expense of paper water mains—as, for instance, where, from the nature of the bed in which they must lie, cast iron mains would speedily oxidize—paper water mains, costly as they are, become a matter of economy and are very generally used. Window panes of paper, likewise, are used in cases where there are such constant vibrations or such sudden jars, as would break glass. By a chemical process paper may be made so translucent that a printed page can be read through it with perfect ease. Put in a window frame, it gives a soft light sufficient to illuminate a room for nearly all purposes not requiring a particularly strong, clear light, although objects seen through a paper window pane are seen as through a glass, darkly.

Waterproofs of paper are made in considerable numbers. The material consists of a lining of cloth in the middle with a coating of waterproof paper on both sides and out of it excellent pon-

HAND-POWER ELEVATOR.

The Eaton and Prince hand-power elevator, manufactured by Eaton & Prince Company, 70-76 Michigan Street, Chicago, possesses several distinctive business-bringing features which will

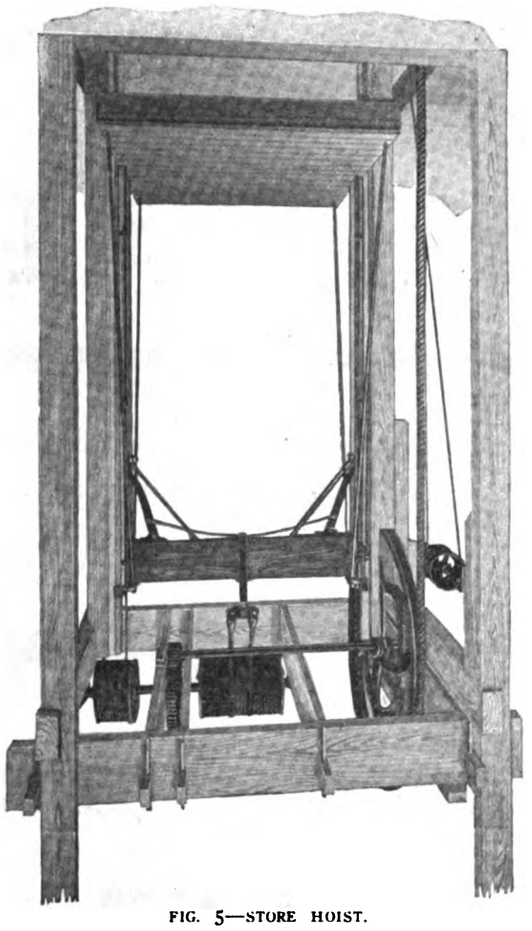

FIG. 5—STORE HOIST.

merit the interest of any customer desiring an elevator of this sort. See Fig. 5.

This company has been building elevators of all descriptions for twenty-five years and has spared neither pains nor expense to perfect their product. One of the most interesting, practical

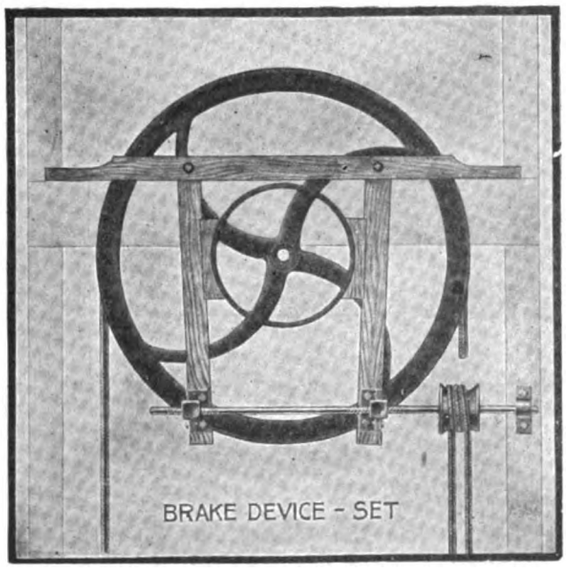

Fig. 6.

and essentially important features of their store hoist is the Brake Device shown in Figs. 6 and 7. It consists of a double shoe working on each side of a band which is cast to the arms of the rope wheel. Each shoe has a bearing on the band; this feature enables the operator of the elevator to lower his car filled to its utmost capacity with the aid of his fore finger and thumb only on the brake line. This brake device is operated by means of an endless cord running around the sheave on the screw shaft of the brake, as shown. A very clever locking device is a feature which absolutely prevents the car from running up into the ceil-

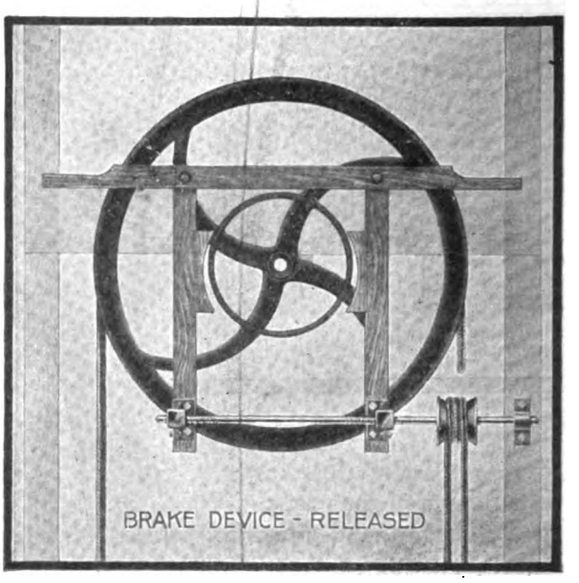

Fig. 7.

ing and smashing things up generally. The car is at all times under perfect control of the operator and cannot possibly move in either direction until brake is released by operator.

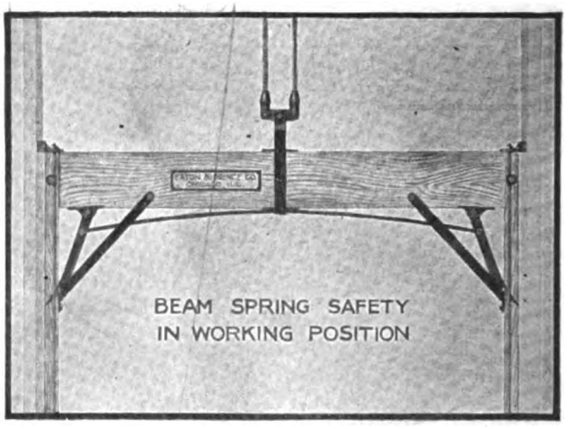

Fig. 8.

Another exclusive feature is a Beam Spring Safety Device and is shown in Figs. 8 and 9. In the event of the cables breaking this locks the car to the guides, thus preventing its dropping.

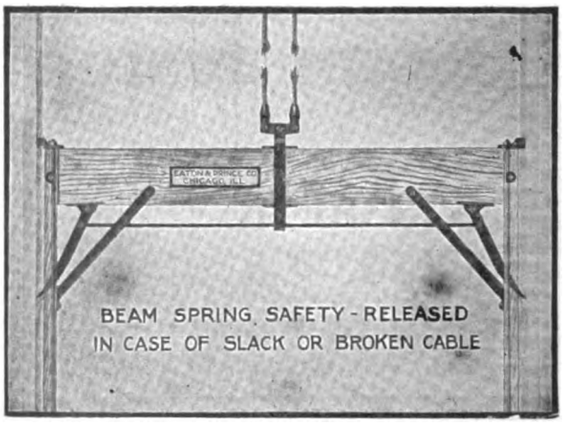

Fig. 9.

This company has issued an interesting booklet fully illustrated, which they are sending out to any one interested and which explains in detail their hand-power elevators.

chos are made, although Uncle Sam still sticks to the good old India rubber for his soldiers. Nearly all articles formerly in leather are now made of paper—such as suit cases, traveling bags, etc., and so successful is the imitation that a man who had himself been in the paper business for nine years bought an article of this kind in London recently under the full conviction that it was leather he was purchasing.

Bamboo fiber makes absolutely the best copying paper there is and the bamboo paper is made almost exclusively in Japan. For that reason—simply because they have the raw material and we have not—we buy a great deal of copying paper in Japan, and the Japanese, on the other hand, buy large quantities of different kinds of paper from us. The Chinese are great consumers of paper in their own country in religious ceremonies, and last year one American paper manufacturing concern alone, which has its central office here in New York, shipped over 100 tons of paper to Canton, China, for use in that way. There is another curious little detail about the Chinese paper trade, and that is in the matter of laundry tickets. The Chinese laundryman, when he gives his laundry ticket, keeps a duplicate of it himself. It is a bright red slip of paper, a little over an inch wide, and he keeps a bunch of these slips hanging on a hook in his laundry. When he issues one of them he writes his Chinese characters in duplicate one above the other on the slip and then tears the paper in two across the middle, giving one end to the customer and keeping the other.

Now, it requires a peculiar kind of paper for this. In the first place, it must be one that will take the brilliant red coloring matter, and then it must have a distinct grain that will tear straight across and not in any direction along the line of least resistance, as in most good paper. Furthermore, in the Chinese laundryman's opinion, it is absolutely necessary that the paper shall come from China. To meet these various demands is a very easy proposition for the paper makers. The paper is produced here in the mills of the East and then shipped to the Chinese Trading Company in San Francisco, which sends it back to the East again, where it is sold to the laundryman as the genuine article, straight from the Flowery Kingdom.

For all purposes of laboratory filtering, paper is superseding every other appliance, and there is in this state a large plant which is doing a very profitable business in manufacturing nothing but filter paper.

Along the line of recent inventions is a process for spinning paper into a fine thread which cannot only be used for sewing, but out of which a very beautiful fabric can be woven. Specimens of table cloths and napkins made by this process were exhibited in this city recently, which compared very well in appearance with fine articles of linen. The process at present developed is pronounced by paper experts to be altogether too expensive for any practical purpose, although it is easily within the possibilities that the day is not so very far distant when we will be using paper table linen. Still, another freak exhibition of what can be done with paper was the production of a paper ax with an edge so hard and fine that it could be used for cutting. One of the recent and very successful applications of paper is in a line which at first thought would seem almost as surprising as the manufacture of axes of paper. This is in its use as an insulating cover for electric wires. Paper is one of the best conductors of electricity there is. Thus boys in a press room often hold one hand on a roll of paper and with the other light a gas jet with the electric spark drawn by touching the end of the finger to a metallic burner. The electricity is first developed in the paper by the friction of going through the calenders in the later milling processes. Electric wires are connected from these calenders to the earth to draw off the fluid, but notwithstanding this the paper reels gather and store charges of electricity that often are not dissipated for months if the reel stands in storage so long.

Yet with all this susceptibility of paper to electric excitement, it has now become one of the substances most used, after going through the necessary process, for insulating electric wire. One single company here in this city disposes of twenty tons a day of paper to be used for this purpose alone.

The proposition that the waste and refuse of to-day is the raw material of to-morrow, in modern industries, is as true in connection with paper manufacture as in everything else. For instance, the pulpy mass called begasse, which is left after the sugar cane has been crushed and squeezed dry of its sacharine matter, and formerly was burned and got rid of as a nuisance, is now used for the manufacture of paper. The Cunningham Bros., the great sugar men of Texas, have two paper mills which make several grades of paper out of begasse, and the business is so profitable that they are about to open new mills.

One of the most profitable side industries growing out of the manufacture of paper came from the discovery of the fact that casein was vastly better than the glue formerly in use for putting the heavy coating on the finer grades of paper. The discovery was not only a bonanza for the man who made it and for those who backed him, but also for the dairies. The skim milk which is left after the cream has been taken off for butter and other purposes and was in the nature of mere refuse for the big dairies, is now turned into a source of profit almost as great as that from butter itself, from its use in the manufacture of casein for paper coating and sizing.

An insurmountable obstacle to the making of old newspapers into a good quality of paper was the fact that the printer's ink with its resin and its heavy linseed oil could not be got rid of by any known process. Paper was made of old newspapers, but it was poor in appearance, poor in quality and always betrayed its origin. So old newspapers became in a certain sense mere waste until about six years ago, when a young man named McEwen from over in New Jersey, ciphered out the fact that the resin and the oil in old newspapers, when the whole mass of ink and paper fiber together was subjected to a very high temperature, would be just the thing for sizing for boxboard paper.

The "Reliance" Way

The Mop Wringer That "Makes Good"

The Reliance

Proves itself the **strongest, simplest** and **most durable** Mop Wringer on the market. A **strong** claim which it would be idle to make if the Reliance didn't **"make good" in actual performance.**

Not only is it the **best** Mop Wringer made, but it **sells** for **25 per cent. less** than the next best; and **sells itself** strictly on its **merits.** It fits onto any pail.

There's no "come back" on the dealer who sells the Reliance. Send for descriptive catalogue and price list.

THE SELECTION OF A VOCATION.

With the completion of preliminary education and with the advent of the trade school season there is naturally a large proportion of the youth of the country that is confronted with the necessity of selecting a line of work which shall be productive of the most satisfactory results financially and otherwise. The gravity of the situation is usually appreciated, if indeed, it is not exaggerated, but there is no question that the tranquility of succeeding years has much to do with engaging in a field that can be mastered and made congenial. It is said that there is no well balanced man who does not have a hobby, and assuredly that man has a bright future whose life's work or that proving his mainstay is also his hobby. The men who have made names for themselves have been favored with a bent that industriously followed has been a leading factor in their achievement of fame. Their liking for their work is so great that they are impatient when not busy at it, and, as anecdote has often told us, had rather do their work than eat or sleep. Those of us who are not so fortunate in that our hobbies are unproductive or are expensive, so far as the supply of bread and butter is concerned, must resign ourselves to our fate and select what we feel can at least be made congenial and gain for us an honest livelihood. Of course in thus disposing of our hobbies we are measuring success from the financial standpoint, because the procuring of the wherewithal is a leading incentive to educating ourselves, though the real measure of success and ultimate happiness must take into account a good number of other considerations than mere income, however important that may be.

If the youth feels confident with respect to his capabilities in a certain direction he needs no assistance in making his selection. If he believes that he has some mechanical genius, but a taste for something for which there is only a restricted market, then unless he has something more than a remote chance of realizing his greatest desire he can, it would seem, safely undertake to learn a trade. The inborn skill with the hands of a man who is mechanically inclined makes it possible for him to acquire a proficiency with more than one trade if needs be, which is saying that the make-up of the mind of the skilled worker would probably admit of his safely selecting any one of a wide number of trades. Such being the case, he can decide on that branch of work which is likely to prove most engaging or the most promising in the way of recompense. Certainly it will be admitted that those who forge to the front and become foremen and responsible, trustworthy workers are those who have proved industrious, persevering craftsmen, who have a fondness for their work and a proper esteem for its honorable position. For the man without a special bent in ability to use his hands there is perhaps some question. With him skill with the hands is apt to be a relatively slow development, though he will doubtless with untiring persistency sooner or later gain proficiency. There are probably many such men who have reached places at the top.

Whether the handcraftsman can also become the master of his trade, in the sense of being an employer making contracts and executing work, depends more than is apparently understood on another feature of the mind. The head that can manage a business in all its branches is not necessarily also the head that can handle all the practical details of actual work.

HUMOROUS LOGIC.

Lucy Triplett recently applied for a divorce in a Western court. It is evident she could no longer stand for the suggestion implied by such a name.

President Eliot, of Harvard, has gone on record as being distinctly opposed to spelling reform. Judging from the way his own name is spelled his ancestors would not agree with him.

The crop reports show the hop crop to be again short. The internal revenue reports show a big increase in the beer production. What do hops have to do with beer, now, anyway?

The modern factory is all right, but it is still far behind nature. Show us a factory, for instance, which can compare with the ostrich, which eats Hardware and produces millinery.

Just because a corporation is said to have no heart is no sign that it does not possess other human attributes. Nerve, for instance; whoever accused a corporation of lack of nerve?

It seems a poor lawyer is often a very valuable attorney. Corporations often look at it that way, if the poor lawyer happens to be a member of the United States Senate.

Chicago fans have all been baseball mad for a week, during the championship games, and it is safe to say those who bet on the wrong team are still in that condition.

REVIEW OF THE MARKETS.

WIRE NAILS: There has been a heavier production during the present month with slight slackening in the demand, making the immediate business rather light by comparison, specification on contracts still keeping the mills busy. They are still considerably behind their orders, with no prospect of catching up immediately, as steel is still scarce, which, if more plentiful, would be quite a help. Quotations are as follows: f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in ten days:

Carloads to jobbers	$1.85
Carload lots to retail merchants	1.90

New York.—The trade of the jobbers has kept up well, and the demand is well sustained, with scarcely any variation. Quotations for small lots from store are on the basis of $2.05 per keg.

CUT NAILS: The mills are reported as being behind orders, but with continued scarcity of steel, which limits the volume of the output. Some mills are quoting prices 5 to 10 cents a keg advance on official quotations. Quotations are as follows: f.o.b. Pittsburgh; Carload lots, to jobbers, $1.90; less than carload lots to jobbers, $1.95; less than carloads, to retailers, $2.05. Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 5 and 10 cents advance on Steel Cut Nails.

New York.—It has been impossible to obtain Cut Nails enough for the demand, orders for nails to supply which have been lessened considerably by the manufacturers. The scarcity of steel bothers the trade to a large extent, although they hope for better service before long. Small lots from store are generally quoted on a basis of $2.05 per keg.

BARB WIRE: Filling specifications on contract orders furnishes the mills with enough to do, as the business is extremely good in trade channels at steady prices. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in ten days:

Jobbers, carload lots	$2.00	$2.30
Retailers, carload lots	2.05	2.35
Retailers, less than carload lots	2.15	2.45

SMOOTH FENCE WIRE: Orders for wire for manufacturing purposes are still in excess of production, and shipments for prompt delivery are quoted by some of the small mills at a premium. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in ten days:

Jobbers, carloads	$1.70
Retailers, carloads	1.75

The foregoing prices are for base numbers 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

INDIA OILSTONES: It is announced by the Pike Mfg. Co., Pike, N. H., that a change has been made in the list prices of its India Oilstones. The list on fine grade stones having been somewhat higher than on coarse and medium, they are now made the same, but with slight advances in a few sizes. The company has also adopted a new price-list on German Water Hones, which necessitates a re-arrangement of discounts which it is believed will prove more convenient to the trade.

COPPER PRODUCTS:—The market for Copper, Brass, Bronze and kindred materials is still an advancing one. Some interests are marketing this class of metals absolutely without guarantees, applying on all business, both where specifications are promptly given and where orders are accepted for future delivery. The following prices reflect the market mainly on shipments from stock in average quantities, with concessions for mill shipments and for large orders: Sheet Brass, 3 per cent. discount from list; Brass Wire, net list; Brass Rods, 10 per cent. discount; Brazed Brass Tubes, 17½ per cent. discount; Brazed Copper Tubes, 12½ per cent. discount; Soft Copper Wire, net list; Sheet Copper, 27 cents per pound, base; Seamless Brass Tubes, 25 cents, base; Seamless Copper Tubes, 29 cents, base, per pound; Tobin Bronze Rods, 23 cents, base, in round lots; Soldering Coppers, 26 cents per pound, 300 lb. and upward; lots of 100 to 300 lb, ½ cent extra, and less than 100 lb., 2 cents per pound extra.

GALVANIZED PAILS AND TUBS: The strength of the sheet metal market has been reflected in several recent advances in some of the lines of Galvanized Ware. A further advance of about 5 per cent. in Galvanized Pails and Tubs has been noted in the quotations of leading manufacturers.

DIVIDERS AND CALIPERS: The advance made some weeks ago by certain manufacturers of Dividers and Calipers has been followed by a further advance of about 10 per cent.

ROPE: The following prices may be said to represent the market:

	Cents per Pound.
Pure Manila, 7-16 and larger	12¼ to 13
B. Quality Manila	11¼ to 11¾
Pure Sisal, 7-16 and larger	9¼ to
No. 2 Sisal, 7-16 and larger	8 to 8¼
No. 1 Jute, ¼ and larger	8 to 8½
No. 2 Jute, ¼ and larger	7 to 7½

Less ¼ cent to the large trade.

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels	39 cents per gallon.
In lots of 5 barrels or more	38 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Double Boiled Linseed Oil, 2 cents per gallon higher than raw.
Regular Boiled Linseed Oil, 1 cent per gallon higher than raw.
Calcutta Oil ..... 68 cents per gallon.

THE PHILADELPHIA TRADE.

The wonderful prosperity which has been enjoyed by our country for the past few years shows no signs of abatement. Business in our own particular branch is exceptionally brisk. Orders are many and of good size. Prices are firm and pretty generally advancing, and manufacturers are holding strictly to advanced costs. The greatest difficulty we have to contend with is the inability of the manufacturers to supply our needs with any degree of promptness. Numberless orders are cancelled simply on this account. The following letter from a manufacturer, whom, we will add, is one of the largest in his line in the United States, exemplifies very clearly the immense volume of business that is being done this year.

"Owing to the enormous increase in our business this year it is simply impossible for us to specify any certain date of shipment for your order dated July 24th, and the only thing we can do will be to try and ship in time for the holiday trade.

The above answer was received by us after numberless inquiries respecting this particular order, and is a fair sample of replies we receive from the factories, if we are fortunate enough to get any. Prices, as we stated before, are firm, although we cannot say that we see any material increase in our profits.

The burning question now, however, does not seem to be so much of price, but—can we get the goods and get them quickly? We are looking forward to a splendid trade in seasonable goods, and trust our hopes will be realized.

Biddle Hardware Co.

THE CLEVELAND TRADE.

After a vacation of sixty days among the bears, porcupines and big fish, I find my predictions published in your September 10th edition verified. There is more danger from a runaway market than is desirable, but the conservative feeling among a majority of manufacturers is strong. The copper magnates seem to have a long lever, and if consumption, the prop upon which it rests, does not tumble, Amalgamated may beat Standard Oil yet. Advances have been extremely conservative by both manufacturers and jobbers. With the increased expense that the rush in business causes, there is danger that ordinary profits may be sacrificed. Among business men radical advances and declines are not wanted. Speculation and business are not good partners. Reasonable regular dividends are preferred, to the king and pauper system. It seems to some people that right

is being sacrificed to reputation in our effort to maintain Cuban independence. The interest of Cuban people demands peace, which every election is likely to disturb. With a settled government their prosperity is assured. Cuba would be the beneficiary in becoming a part of this country. And right commands us to act in her interest. If her sugar threatens our sugar trust, the people can endure less expense for their sweetness.

The Lockwood-Taylor Hardware Co.
C. B. Lockwood, Pres.

THE PITTSBURGH TRADE.

Regarding business in the Hardware jobbing trade of Pittsburgh, we can say that we are crowded to the limit at present. A few days of cool weather started the laggards and orders during the past week have nearly snowed us under. Retailers should make a little allowance for shipments being a day or two slow, as many of them held back until goods were actually called for, and now, of course, want them on an hour's notice. Prices continue to advance in many different lines, and goods are difficult to procure from manufacturers, who all appear to be crowded with orders.

Logan-Gregg Hardware Co.

THE MINNEAPOLIS TRADE.

Business is good in all lines. We think this is particularly true of Hardware, both jobbers and retailers; every indication that these conditions will prevail during the balance of the year. Locally, conditions among the retail trade no better than they have been. Very little prospect of improvement. Seems unfortunate that this is so, when general business conditions are so good and profits ought to be made.

W. K. Morison & Co.

THE SAN FRANCISCO TRADE.

"Will San Francisco ever be rebuilt, is the question asked by people in the East," remarked Ira E. Bennett, editor of the *Washington* (D. C.) *Post*, who is visiting this stricken city. The answer is, he continued, that San Francisco is now being rebuilt. It is not a question of the distant future. The process is visible to the naked eye. Every steel building that was under construction at the time of the disaster is being rushed to completion. Other buildings have been contracted for, and with the removal of debris and the arrival of materials, the work will proceed. Nothing could be more absurd than to doubt the recovery of San Francisco from its great misfortune, in the face of the work that is actually in progress. The contract for the reconstruction of the Palace Hotel on its old site, on a grander scale than ever, has been let. The St. Francis is now completing its great steel annex. Business houses are arranging to build newer and stronger structures than those which succumbed to the earthquake conflagration of April 18-21. The city will not be rebuilt in a day or a year, but it will go up with remarkable quickness.

There is considerable feeling in California at the failure of Congress to pass a bill admitting building material into San Francisco free, and the California delegation, the papers are saying, are held answerable that they made no more vigorous effort in behalf of the measure. The bill was introduced by John Wesley Gaines, of Tennessee, and he says that if any California Representative spoke or worked in favor of his bill, he did not hear of it.

The scale of wages for labor in San Francisco at the present time is as follows: carpenters, $4 to $7 per day; bricklayers, $7; plasterers and cement workers, $5; lathers and plumbers, $6; turners, shinglers, painters, paper-hangers, horseshoers, hod-carriers and signwriters, $4.

The Hardware trade in San Francisco and all over the coast continues exceedingly active and with the Fall business, barring the city's excessive rehabilitation demand, 25 per cent. in excess of that of last year. The local wholesalers are now in first-class shape for filling orders, and they are all well located and conducting business in their usual way before the city's disaster, the continuing difficulty being in obtaining goods enough to promptly fill orders. This is the complaint of every jobber on the Coast, and while their factory orders are much larger than heretofore, the new trade from the retailer is of such volume that the manufacturers are not able to keep up with the rush.

Surveyors are at work subdividing a thirty-acre tract and setting grade stakes preparatory to grading the land for a large tool and implement manufactory which will be established by Baker & Hamilton.

Several Eastern people were here a few days ago looking for a suitable smelter site and after selecting a choice twenty-five acre lot, left for the East to consult with other interested persons. Before leaving they secured an option on the land for sixty days, and it is believed that before the time is out the sale will have been made.

"If you want to know what the United States is doing in our line with our Canadian neighbors," said a prominent jobber, "look at this," and he handed the writer a clipping from a Canadian correspondent's letter in a San Francisco paper of this week. The first figures given are articles from Great Britain to Canada for the fiscal year 1905, and the second figures quoted, notwithstanding the Canadian tariff, gives a preference of 33⅓ per cent to British Products, represents purchases from the United States: pig iron, $247,406—$610,315; bar iron and steel, $289,961—$565,870; bridge and structural iron $2,119—$717,165; rolled edge bridge plates, $4,199—$402,576; plates and sheets, $189,417—$712,448; angles, beams, channels and like material, $240,710—$1,244,245; hoops, bands, scroll and strips, $51,247—$127,240; railway fish and tie plates, $18,604—$151,823; nails,

Digitized by Google

$4,615—$160,708; tubings, $137,879—$978,453; wire, $166,664—$622,634; nuts and bolts, $7,528—$116,084; tools, $47,099—$772,470; machinery $293,384—$4,023,425; gasoline engines, $623—$193,652; pumps, $3,760—$199,877; butts and hinges, $1,341—$59,016; saws, $5,473—$168,783; files and rasps, $8,472—$63,788. The correspondent adds that the tariff preference arrested the decline of British trade with the Dominion, but did not apparently interfere much with the growth of the United States trade. INDUSTRIAL PRESS ASSOCIATION.

EMIGRANTS FOR THE SOUTH.

SECURING NEEDED EUROPEAN LABOR FOR DEVELOPING INDUSTRIES.

A shipload of European emigrants for the Southern States sailed from Bremen on October 18 direct for Charleston, S. C. Concerning this new movement for providing the South with much needed laborers, Consul W. P. Atwell writes from Ghent as follows:

Commissioner E. J. Watson, of South Carolina, who is in Europe endeavoring to turn the tide of emigration to America southward, has been in Ghent at the branch office of his department located here. This branch office has been in operation about one year, and conducted in such a manner as to command the confidence of the Belgian authorities. That Mr. Watson is undertaking work in Europe upon a somewhat broader scale than is usually attempted, and for a purpose that will make the results of his experiments worth studying, may be gathered from the outline given by him to the consulate. Commissioner Watson says:

"I have long been convinced, as has United States Commissioner-General Sargent, that the only practical solution of what is now rapidly becoming the great immigration problem in the United States rests in the selection and direction of emigrants, as far as possible, at their own homes before they are booked and started to America to be dumped into the congested centers of population without the remotest knowledge of country or conditions or where they are to find the kind of work they are fitted for. This has been resulting in the making of paupers and criminals out of good men, who, had they been landed at the door of opportunity and at points from which they could be readily and easily absorbed, would have become quickly useful members of the body politic. The care of the present laws of the United States is simply as to the admission of the immigrant on reaching the great ports. The moment he is admitted he becomes the prey of unprincipled labor sharks.

SELECTING EMIGRANTS FOR THE SOUTH.

"There is a clause in the Federal laws permitting departments of State governments to do the work of selection and distribution at the right place, i. e., before he is booked, and knowing that unless a responsible government undertook this upon practical lines no demonstration as to its value would result, I have undertaken to put our work in Europe upon such a basis that we can send into the South, where thousands can be readily absorbed, carefully selected persons particularly fitted for the work that will be required of them. One of the greatest difficulties has been in the fact that there was no trans-Atlantic steamship line entering a South Atlantic port carrying third-class passengers. During the month that I have been in Europe I have succeeded in having this defect cured, in a measure, by inducing the directorate of the North German Lloyd Steamship Company to make the experiment looking to the establishment of a permanent line between Bremen and the port of Charleston, and the first ship is to sail on October 18. This puts within our grasp the means of carrying the agricultural and laboring emigrant direct to a section in which remunerative work and a good home await him, and where he will be directed by officials instead of labor agencies, and have the fostering care of the State itself thrown around him.

"Our operations are to be confined entirely to Northern Europe, and in every step that is taken we invite the sanction and approval and the aid, as far as possible, of the United States officials and of the authorities of the countries in which we are working. Our delegates, of whose appointments the several governments are notified officially through the State Department at Washington, are peremptorily instructed to regard sacredly all laws and to conceal from no one any of their acts. In this way, with the co-operation resulting, we are looking to selection and distribution at one stroke at the port of departure rather than at the port of entry, where, from the nature of things, proper restrictive and distributive work can never be done."

AN ANXIOUS MOMENT.

A professor of science, well known for his absentmindedness, was engaged in a deep controversy one day with a fellow student when his wife hurriedly entered the room. "Oh, my dear," she cried, "I've swallowed a pin."

The professor smiled. "Don't worry about it, my dear," he said in a soothing tone. "It is of no consequence. Here"—he fumbled at his lapel—"here is another pin."

EXTENDING TRADE.

HOW AN AMERICAN CONSUL DOES PRACTICAL WORK TO THAT END.

A method by which American manufacturers can find a reasonable market in Europe is the subject of a report from a traveling agent of the Commercial Museum in Philadelphia. He speaks of a system which is growing up among American consulates which he describes as "a commercial first aid," and is designed to be a bureau of information about American manufactures that will abolish a great deal of the lengthy correspondence that must take place between manufacturers and foreign consumers before sales are made.

"The real reason," he says, "why American goods do not have a larger sale in Europe is that it takes the purchaser so long to find out about them, since two or three communications must travel thousands of miles. In the smaller European cities, and even in the larger ones, there have been no places where a purchaser desiring American goods could get information about them. He has had to write to America probably several times before finding out what he wanted to know. By that time he has decided that too much trouble was involved, so be bought elsewhere.

PLAN OF CONSUL LEDOUX.

"The honor," he says, "of instituting a system whereby this difficulty may be overcome belongs to Urban P. Ledoux, United States consul at Prague, Bohemia. At present this little out of the way town, unknown to many Americans, contains the most complete directory of American manufactures in Europe. Attracted by Mr. Ledoux's success, many consuls all over Europe are beginning to establish similar directories. American sales in Europe are sure to boom when this system shall become general.

"For a year previous to February, 1905, Mr. Ledoux worked on this plan, indexing, classifying, filing and collecting. On February 15, 1905, he gave a reception to all the other consuls and the officials of the city and formally announced that his American commercial intelligence department was open to the people of Prague. Since then the business men of the town have constantly patronized it, and American trade has tripled.

"Information about every American product that could possibly be needed in Prague is on Mr. Ledoux's files. He has everything properly classified and can give the fullest details at a moment's notice. Under each heading can be found descriptions of the article required, statistics as to its manufacture, names of the various manufacturers in the United States, their prices and their own catalogues.

AMERICAN PAPERS ON FILE.

"Another feature is the commercial reading room at the consulate. In this room 100 of the leading commercial and trade papers of the United States are on file and accessible. This room has become so popular in Prague that it is always crowded. Indeed, the consulate's commercial system has proved so successful that it is one of the best-known places in the city.

"A third feature is the direct assistance given to those interested in connecting with American houses in the way of help and correspondence. The consul has prepared a series of postal cards covering the more frequent forms of request. All that is necessary for the Bohemian business man to do is to sign his name and mail the card.

"This system gives an example of how the best type of American consuls are doing practical, systematic work in furthering trade interests. Prague has the best system; a few other consuls are following Mr. Ledoux's example, and in time it is hoped that the scheme will be in effect in every city that has an American consul."

THEY COULDN'T BEAT THAT.

A minister walking along a road saw a crowd of boys sitting in a ring with a small dog in the center.

"What are you doing with that dog?" he asked.

"Whoever tells the biggest lie, he wins the dog," said one of the boys.

"Oh," said the minister. "I am surprised at you boys, for when I was like you I never told a lie."

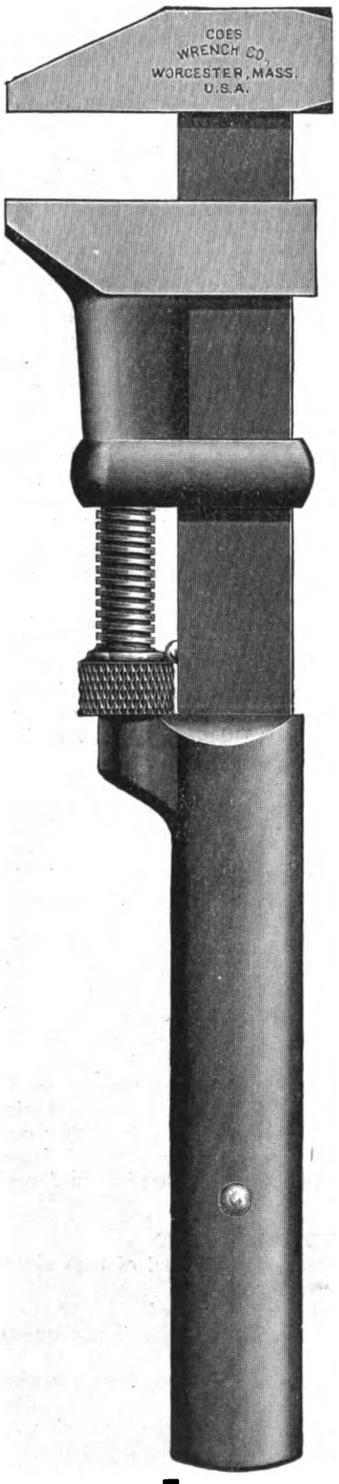
There was a moment's silence. Then one of the boys said:

"Give the gent the dog, Jim."

SURE ENOUGH.

Indignant Agriculturist—Looky here, gol-ram ye! Didn't you tell me this suit o' clothes that bought of ye about two weeks ago would wear like iron?

Swindlebaum—Yase, mein friend, I didt tell you dat; undt aindt it rusty already?—*Puck*.



GIVE HIM A SHOW.

Wife—You were talking in your sleep again last night, dear. Why do you persist in doing it?

Husband—Good Lord, Maria, a man ought to be allowed to talk sometimes, oughtn't he?

Changes and Improvements.

Amarillo, Tex.—The Morrow & Thomas Co. has purchased an interest in the Stringfellow & Hume Hardware Co.

Anita, Iowa.—F. H. Robinson has sold his Hardware and furniture store to H. Bovee.

Atlanta, Ga.—A branch store to cost $17,000 is being erected at 440 Marietta Street by the King Hardware Company. Work on the building will be pushed forward rapidly and it will be ready for occupation in a short while. The store is to be built of brick and will be three stories in height.

Augusta, Ga.—The Augusta Hardware Company, recently organized with a capitalization of $75,000, with the view to opening in this city one of the biggest wholesale Hardware concerns in Georgia, has acquired possession of the bankrupt stock of Deveney, Hood & Co., and the Hardware stock of Day & Tannahill, it being stated, however, that this latter firm will continue its wagon and carriage business. The Hardware Company has also bought the stock of Hatcher Brothers.

Aurelia, Iowa.—W. M. McCall has purchased the Hardware store of Ludwig Pingla.

Belhaven, N. C.—J. K. Voliva Hardware Co. are building a large store to take care of their growing trade. They will carry a complete stock of Hardware, building material, and a large assortment of cook stoves and heaters.

Bennett, Iowa.—The Bennett Hardware Co. has sold its business to Hanson & Henting.

Bentley, Iowa.—Heft & Timberman have been succeeded in the Hardware business by P. M. Heft.

Bismarck, N. D.—Gus Grambs has purchased the Hardware store at Dickinson of Senour & Langley and will take possession January first.

Blair, Neb.—C. O. Krogh has sold his Hardware business to William M. Martin.

Blockton, Iowa.—J. Conner has purchased the Hardware stock of Ed. Nation.

Burlington, Vt.—John A. Manson has left the Hardware firm of John A. Manson & Co., which he established twelve years ago. He will retain an interest in the business here which will be conducted under the same name as heretofore. E. H. Prouty, head clerk for several years, will become manager.

Calumet, Okla.—G. W. Young has sold his Hardware store to Thompson & Johnson.

Carbon, Iowa.—Guernsey & Jaques have succeeded to the Hardware business of Parr & Guernsey.

Center, Mo.—George Foster & Co. have succeeded to the Hardware business of Young, Foster & Co.

Central City, Neb.—W. T. Morris has purchased the Hardware store of Stephen & Meyer.

Charlotte, N. C.—The Charlotte Hardware Company, recently organized, has increased its capital stock from $30,000 to $125,000. This company recently bought out the old Charlotte Hardware Company on East Trade Street and opened business at No. 20 East Trade Street. John C. McNeely is president and the company has started into business under most favorable auspices.

Fairlie, Tex.—J. E. Roderick has sold his Hardware store to R. A. Rountree.

Forest Grove, Ore.—M. Peterson has been succeeded in the Hardware business by M. Peterson & Son.

Gouverneur, N .Y.—Charles H. Bowen & Co. have sold their Hardware business to W. R. Perrin & Co.

Gouverneur, N. Y.—M. E. Loveland has purchased the Hardware, mill and mine supply store of Cutting & Perrin.

Greentop, Mo.—Z. C. Miller has sold his Hardware business to P. H. Johnson.

Greenville, S. C.—The Markley Hardware Company has let the contract for a $7,000 warehouse, which will span Reedy River near the foot of Main Street, where the extensive plant of the company is located. Work on the new building will begin at once. The warehouse is to be 200 feet in length by 60 feet in width. It will extend up and down the river and cover almost the entire bed of the stream. The building is to be made of galvanized sheet iron, made in the form of imitation pressed brick. It will be two stories high.

Imperial, Neb.—Hicks & Bullock have succeeded to the Hardware and harness business of Hicks & Hays.

Jansen, Neb.—Thiessen & Co. have sold their Hardware business to A. M. Friesen.

Joplin, Tex.—J. H. Frank has succeeded to the Hardware store of J. W. & J. B. Frank.

HARDWARE MANUFACTURERS' RECORD

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, etc.

Boston, Mass.—Boston Tool Co. has been incorporated to manufacture tools, machinery, etc.; capital, $10,000. President, Charles C. Camber, Boston, Mass.; treasurer, Frank E. Ross, Lynn, Mass.; clerk, Louis F. Carlow, Cambridge, Mass.

Boston, Mass.—The American Parafelt Company has been incorporated to manufacture jar rings, etc.; capital, $100,000. President, A. J. Detwiler, Williamsburg, Pa.; treasurer, C. A. Patterson, Martinsburg, Pa.

Buffalo, N. Y.—The Susquehanna Hardware Mfg. Co., recently organized for the manufacture of light and medium lines of Hardware, has contracted for the erection of its factory at Susquehanna, Pa.

Lansing, Mich.—Announcement has been made of the organization of the Michigan Screw Co., which promises to become an important establishment for Lansing. The company has a capital of $100,000. Both Lansing and outside persons are the incorporators of the new concern. R. E. Olds will be president and M. Ray Potter secretary-treasurer. Hugo Lumberg of Detroit will be manager and shop superintendent, and W. M. Roberts, also of Detroit, will be sales manager.

Melrose, Mass.—The Hathaway Recording Scale Co. has been incorporated for the purpose of manufacturing machines for weighing, recording, etc.; capital, $75,000. President, H. Hathaway, Melrose Highlands; treasurer, J. S. Hathaway, Boston.

Menasha, Wis.—The Paul-Luttman Company has filed articles of incorporation. The capital stock of the company is $15,000, and the incorporators are Arthur D. Paul, John W. Luttman and W. L. Wheeler. The business and purposes of the corporations are "to conduct, pursue and carry on the work of a foundry and machine shop; to carry on the manufacture of all kinds of castings of iron, steel or other metal; to carry on the manufacture of all kinds of machinery, tools and other articles, either of iron, steel or other metal, or of wood or of both metal and wood, and generally to do all kinds of repairing and machine work," etc.

New York, N. Y.—The New York Safety Chest Co. has been incorporated to manufacture safty chests, safety locks, etc.: capital, $6,000. Incorporators: G. A. Dewey, H. C. Miller, F. C. Robertson, New York City.

Changes and Improvements.

Athol, Mass.—The building being constructed for the L. S. Starrett Company will be completed December 15. It is to be four stories high, 282 feet long and have an average width of forty-five feet. The hack-saw blade department will be moved into the new building, and part of the grinding department will be there. In one end of the building will be a storehouse.

Benton, Ark.—The Owosso Manufactur- have enlarged it in every department, which Malvern, have begun the operation of their plant. In rebuilding the plant the company has enlarged it in every department, which will enable them to double their former capacity. In addition to manufacturing screen doors and window frames it is the intention of the company to install an up-to-date handle factory. This new concern alone will give employment to 150 men.

Chattanooga, Tenn.—The Volunteer Disc Plow Company have applied for an amendment to their charter increasing the capital stock from $50,000 to $100,000. The names appearing as incorporators are F. Llewellyn, M. Llewellyn, S. V. Weeks and others. The plows of the concern are at present made at the plant of the Chattanooga Implement and Manufacturing Co., but it is understood that steps will soon be taken for the company to erect a plant of its own.

Columbus, Ohio.—The Columbus Bolt Works is working on what will be one of the strongest built and most conveniently arranged warehouses in this section of the country. The building is to be five stories high, of reinforced construction, and each floor calculatedt o carry a load of 2,000 pounds to the square foot.

Elmira, N. Y.—The Eclipse Machine Co. is making extensive alterations to its plant at Elmira Heights to accommodate the changes that have been made in the class of work done at the factory. Heretofore the company has confined itself to the manufacture of bicycles and bicycle brakes exclusively, the Morrow brake having been the sole product since 1899. The company is now engaging in a general machine business, the equipment of the plant being such as to permit of a high class of work being done. With the grinding, polishing, plating and buffing departments, the blacksmith shop and case hardening ovens, there is no class of machine work which cannot be done at the plant.

Kenton, Ohio.—The Kenton Hardware Manufacturing Co. are contemplating making improvements in the very near future which will include the erection of a one-story brick foundry building. The company will require a 66-inch cupola and a belt or rope driven elevator in addition to the transmission system.

Lawrence, Mass.—F. V. McLenathan, manufacturer of leather belting, is to erect a new factory in that city, 35 by 100 feet, one story and basement.

Little Valley, N. Y.—Case Bros. have decided to move their cutlery factory to Kane, Pa.

Little Falls, N. Y.—The business with the Henry Cheney Hammer Co. has so far outgrown the accommodations of the present plant that the erection of an addition has been decided upon. The new building will be about 32 by 60 feet, three stories high, and will be of brick, with first floor of stone and steel.

Newark, N. J.—The Oscar Barnett Foundry Co. is to erect a new plant consisting of a machine shop 40 by 135 feet, shipping room 50 by 150 feet, light foundry 100 by 150 feet, heavy foundry 100 by 150 feet, carpenter and pattern shop, buffing and sorting room, japanning room and storage room. All the buildings will be of brick and steel construction.

New York, N. Y.—New York Belting Co., 51 Beekman Street, are increasing their capacity for the manufacture of leather belting by the addition of a large new plant where hydraulic power presses are being installed.

New York, N. Y.—The Duplex Metals Company, 208 Fifth Avenue, which some months ago purchased the plant of the Combination Steel Company at Chester, Pa., fitting it up for the manufacture of Monnot metals in plates, sheets and wire of copper-steel, announces that the wire department is now in operation and it is ready to fill orders for this product. J. F. Monnot is president and Byron E. Eldred secretary and treasurer.

Northampton, Mass.—William A. Rogers, Limited, of Niagara Falls, N. Y., and Northampton, Mass., manufacturer of silverware and cutlery, has moved the plating plant of the Northampton works to Niagara Falls, merging it with the company's plating plant in that place. Several years ago the company purchased the cutlery plant of the E. Wood Cutlery Co., and the cutlery and plating plant of the Rogers & Wood Co., both of Northampton, and has since largely increased the capacity and output of both. The blanks for plating will continue to be manufactured at Northampton as well as all other lines of cutlery which have hitherto been made there, and facilities for the manufacture of blanks and general table cutlery are being increased at the present time, so that there will be no decrease in the number of people employed at Northampton.

Oklahoma City, Okla.—The Wire Goods Manufacturing Co., manufacturers of farm and ornamental fencing, lawn gates, railing, window guards, etc., is contemplating the erection of a large factory.

Omaha, Neb.—The John Deere Plow Co. has purchased an entire block of property lying just south of its present building, with the ultimate intention of erecting one of the largest warehouses in the west.

Piqua, Ohio.—The Favorite Stove and Range Company, in order to take care of its increased business, has increased the capital stock from $300,000 to $1,500,000. This increase, only a part of which will be used at the present time, will be used in securing additional ground, putting up new buildings and purchasing additional equipment.

Port Arthur, Man.—The Meisel Manufacturing Co., a branch of the Port Arthur Harvesting Machine Co., has entered into a contract with the town to establish a manufactory here, to employ at least 150 men and have the same in operation by May 1, next year. Mill machinery and heavy harvesting machinery will comprise the output.

St. Paul, Minn.—The Northern Malleable Iron Company have purchased a tract of between seven and eight acres of the property formerly occupied by the Bohn Manufacturing Co., and will build a large malleable iron plant. The buildings will be of steel and concrete construction, the main structure having dimensions 110 by 900 feet. Their equipment will consist of three melting furnaces and the proper proportion of annealing ovens.

HARDWARE DEALERS' AND MANUFACTURERS' RECORDS

(Concluded).

HARDWARE DEALERS RECORD

Changes and Improvements.

Oxford, Neb.—Howell Bros. have been succeeded in the Hardware business by Howell & Schepker.

Pendleton, Ore.—A. Kunkel is moving his Hardware store to Spokane, Wash.

Peoria, Ohio.—John Daum, a well-known resident of Marysville, has purchased a half interest in the Hardware firm of Thompson & Thomas of Peoria. The firm will be known as Daum & Thompson, Mr. Daum having purchased the interest of Mr. Thomas.

Port Angeles, Wash.—R. Gutenberg & Co. have succeeded to the Hardware business of Gutenberg Bros.

Pueblo, Colo.—R. W. Cline has purchased the business of the Ashton-Hanger Hardware Co.

Pontiac, Mich.—Beattie & MacCallum is the name of a new firm which succeeds William W. Beattie, Hardware dealer. Mr. Beattie recently purchased the interest of his partner, Ralph D. Tobin, the firm formerly being Beattie & Tobin.

Portsmouth, Iowa.—C. C. Cooper has purchased the Hardware business of M. J. Shafer.

Rockford, Ill.—A. Nelson, who has been conducting a Hardware business at 623 Seventh Street, has decided to close his store and will go to Iowa where he has other interests.

Savannah, Ga.—The Hardware business of William & H. H. Lattimore, at No. 19 Broughton Street, west, has been transferred to C. X. Balfour of Thomasville and W. P. Calvitt of Savannah.

St. Joseph, Mo.—A statement filed shows that the capital stock of the Parrish-Erickson Hardware Company was at a meeting of the stockholders, increased from $10,000 to $20,000.

Stockbridge, Mich.—Mann & Stephens have sold their Hardware store to Harry Singleton, Adelbert Brearly and Chris. Taylor.

Strawn, Kan.—Charles Thrall has purchased an interest in the Hardware store of A. J. Baxter.

Vancouver, B. C.—J. A. Gray has sold his Hardware business to O. H. Fox.

Waco, Texas.—J. R. Railey & Son have succeeded to the business of the Railey Hardware Co.

Wilbur, Wash.—The Plough Hardware Co. has purchased the Hardware department of M. E. & E. T. Hay.

York, Neb.—J. V. Hyder has sold his stock of Hardware to A. E. Grant of Albany, N. Y.

Roseburg, Ore.—A. J. Bellows has purchased the Hardware store of Beard & Oliver.

Rose Hill, Iowa.—Brown Bros. have succeeded to the Hardware business of Brown & Hensil.

Rosendale, Mo.—Bales & Wright have been succeeded in the Hardware business by Bales & Beecher.

Roswell, N. M.—H. J. Shaver has sold his Hardware store to J. D. Rollins.

Seymour, Mo.—J. F. Norman has been succeeded in the Hardware business by the Good-Norman Hardware Co.

Shelby, Iowa.—Antes & Miller have sold out their Hardware business.

Silver City, Iowa.—Little & Landon have purchased the Hardware business of A. P. Reeve.

Sugar City, Colo.—Jacob Chisdes has purchased the Hardware business of J. F. Laubham.

Weeping Water, Neb.—Mason Bros. have sold their Hardware business to M. J. Wickersham.

West Washington, Pa.—Collins Rush has sold his entire stock of Hardware in the Griffith building on Fayette Street, to C. T. Irwin.

Wilsonville, Neb.—McCue Bros. have sold their Hardware business to G. H. Travis.

Youngstown, Ohio.—On account of the continued ill health of C. O. Mayberry, the C. O. Mayberry Hardware dealers are forced to go out of business.

Zearing, Iowa.—Edward Woehler has succeeded to the Hardware business to Woehler Bros.

Van Buren, O.—Eugene Giesey, who recently disposed of his Hardware stock by auction, has reopened his store and will conduct it the same as before.

Wilsonville, Neb.—G. H. Travis has purchased the Hardware store of McCue Bros.

Fires.

Abbott, Tex.—The warehouse of Dawson Bros., Hardware dealers, has been destroyed by fire.

Havelock, Iowa.—The Hardware store of H. P. Armitage has been destroyed by fire.

Jordan, Minn.—Fire started in the Hardware store of C. H. Casey recently. Mr. Casey's loss is $25,000 to $30,000. Insurance will nearly cover entire loss. Fire started from explosion in basement, caused by some one dropping match on combustibles.

Pine Beach, Va.—Meert Hardwart Co.'s store has been totally destroyed by fire. Fully insured.

Sarcoxie, Mo.—The Hardware store of Carmack & Wood has been damaged by fire.

Warren, Pa.—Fire broke out recently in the large four-story warehouse of the Pickett Hardware Company, Limited, and for a time threatened the business section of the city. The firemen worked under difficulties on account of frequent explosions of oils, powder and fulminating caps stored in the building, but the flames were finally controlled with a property loss of $100,000.

Willard, Kan.—In a recent fire the Hardware and implement stock of Winters, Rogers & Co., was destroyed.

MANUFACTURERS RECORD

New Incorporations, etc.

Providence, R. I.—The Art Die Sinking Co. has been incorporated. Herman G. Possner, Albert W. Possner of Cranston and Clinton W. Brown of Providence are named as the incorporators. The company will be located in Providence. It is authorized to make and sell all kinds of die making machinery, hub-cutting tools, designs and patterns, and building and selling machinery. The capital stock is placed at $50,000.

Rochelle, Ill.—The Eureka Metal Box Strap & Mfg. Co., recently incorporated, is now located in its new factory. The building is 100x100 feet, with boiler and engine room adjoining. The line of manufacture will include metal shingle bands, flexible clasps, box strapping, twisted bars and clutch nails.

San Francisco, Cal.—San Francisco Saw and Tool Works have been incorporated by Isaac Fried, R. N. Colby, William Mitchell, Louis Lauten and E. K. Mains, The capital stock is $25,000.

Sodus, N. Y.—Parsons-Lane Co. has been incorporated to manufacture tools, metal castings, etc.; capital, $5,000. Incorporators: William N. Parsons, Augustus H. Lane, William T. Gaylord, Sodus, N. Y., and others.

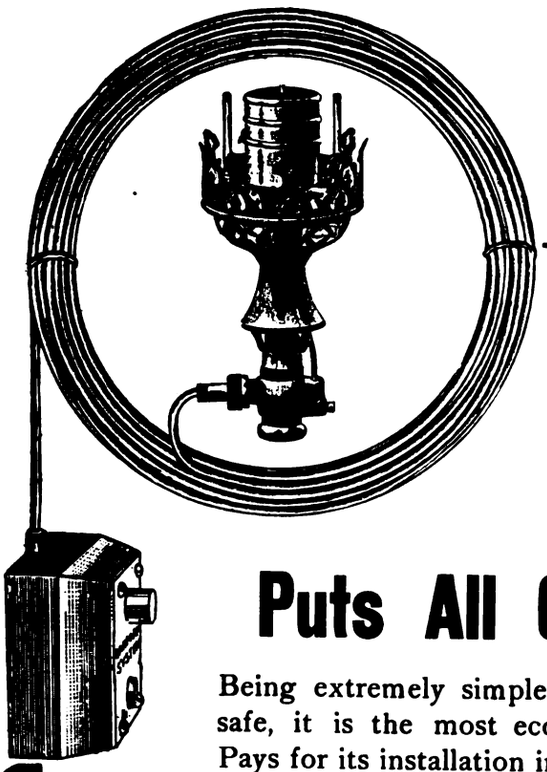
Stamford, Conn.—The Stamford Gas Stove Co. has filed a certificate of organization in which the amount of capital stock subscribed for is given as $75.000. The president of the company is Henry J. Warren of Stamford. H. P. Goff of Pittsburgh, Pa., is vice-president and John J. Garrison of Detroit, Mich., is treasurer. The other officers are: Assistant treasurer, E. B. Mooney of Brockton, Mass.; secretary, Harry L. Starrett, of New Haven; assistant secretary, F. T. Lockwood, of Stamford.

Syracuse, N. Y.—The Globe Melleable Iron Co., which proposes to take over the plant of the Hyde Steel Tool Co. and manufacture melleable iron castings, has filed papers of incorporation. The capitalization is $50,000.

Topeka, Kans.—A new company is being organized for the purpose of manufacturing a number of farm and garden implements recently invented by B. H. Pugh, who lives near Oakland. The new company will be chartered for about $50,000 and will commence the erection of the factory building some time this fall.

Utica, N. Y.—Spitzli Mfg. Co. has been incorporated to manufacture Hardware, novelties, etc.; capital, $20,000. Incorporators, Adolphus F. Spitzli, L. E. Spitzli, George H. Spitzli, M. A. Spitzli, Utica, N. Y.

Changes and Improvements.



Piqua, Ohio.—The Wood Shovel & Tool Co. have been doing business only for about two years, but they have already found it necessary to enlarge their facilities and will begin work on additions to their factory that will increase their output about 50 per cent.

Worcester, Mass.—The Graton & Knight Manufacturing Co., manufacturers of leather belting, are to erect a new building, to be five stories and basement, and 80 by 140 feet.

South Marion, Ind.—The new Hoosier stove factory is nearing completion very rapidly, and will be under roof before many weeks. The walls have been completed, and the place is beginning to take on a finished appearance. The factory will have a special track of its own to connect with the Clover Leaf, and shipping facilities will be very convenient.

San Francisco, Cal.—The Pacific Hardware & Steel Company, Henry T. Scott and others, have under consideration the erection of a rolling mill in South San Francisco, where it is understood a site has been selected.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

Capewell Horse Nails Can Be Used Successfully in Hot and Dry Climates

THE CAPEWELL HORSE NAIL CO., GREAT BEND, N. D.
Hartford, Conn.

Dear Sirs:--

I feel that I owe you a few words of praise for your first-class nails, as I have tried nearly all kinds and find yours the only nail I can drive in **these hard feet of our western horses** without bending the nail, or splitting the hoof, and best of all, every nail clinches without breaking one of them. I consider your nail the best that money can buy. Yours truly,

DOLLARS AND SENSE

IT'S Common Sense that "a Poor Article is dear **at any price**"—**"Sterling"** Power Hack Saw Blades and **"Sterling"** Power Hack Saws, though not lowest in price, are the **cheapest**—because—most economical and serviceable. **They cut quick, saving time—they cut true and straight,** saving labor and material—they break very few blades, **saving money.**

"Sterling" Hack Saw Blades in a **"Sterling"** Power Hack Saw Machine make a combination which **saves money** in any machine shop. If interested, it will pay you to look into this question.

THE
Imperial Rotary Washer

THE record it has made for itself by its noiselessness—its easy operation (has all steel roller bearings)—its handsome finish—its gold and aluminum bronze castings—has caused people to expect more of Washers than they used to.

This is unfortunate for other washers; the IMPERIAL ROTARY still gives more satisfaction than is expected.

You ought to have our catalogue! It shows the most complete line of washers on the market.

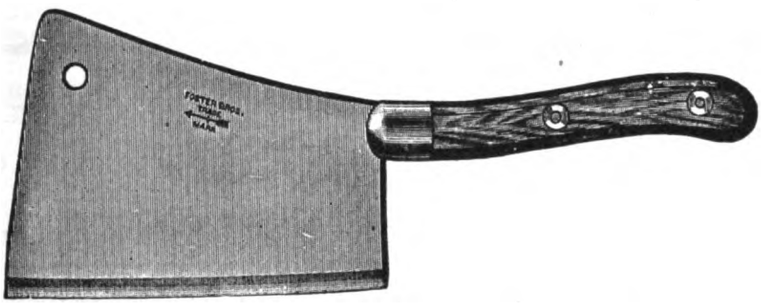
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chattillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

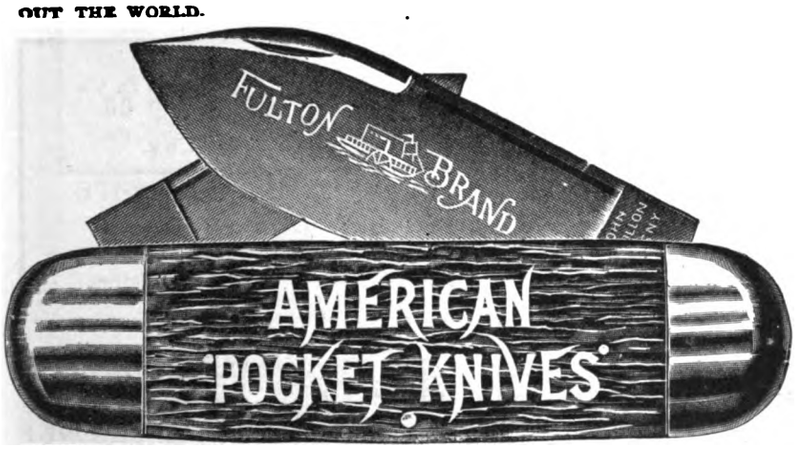


has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York.

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.



These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.

Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

FUN FOR ALL

ALL THE YEAR

THE WABASH COASTER WAGON

sells readily at a good margin of profit. Guaranteed to give satisfactory service.

THE WABASH COASTER WAGON is a substantial, general purpose wagon, 34 inches long, 16 inches wide; large, roomy box of hard wood, removable. Well balanced to prevent tipping. Turns easily on narrow walk. All wheels (our exclusive Wabash patent) are 11 inches in diameter—of wide tread, on steel axles, no bumping or pounding. A nobby, solid wagon in which any youngster will have pride and pleasure.

Aluminum Oil Heater

The Heater that Stands for More Sales, for Pleased Customers, for Sure Profits

The real fundamental, rock-bottom reason for it all is our

Grand Safety Burner

the unexcelled, the unrivalled, the *only* safety burner in the world

Note Its Construction

A—Flame Spreader. **B**—Air Space outside of Wick Tube. **C**—Air Space inside of Wick Tube. **D**—Wick. **E**—Outside Casing to Burner. **F**—Air Space between Fount and Outer Casing. **G**—Fount for Oil. **H**—Feed pipe conducting oil from Fount to Burner. **I**—Shield resting on top of Fount with Air Space underneath.

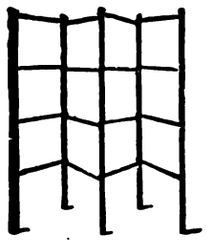
It eliminates:

1st. That unwholesome odor, because its flame spreader is solid, no perforations to clog up.

2nd. That disagreeable smoking, because of i s perfect smokeless device.

3rd. The danger of explosion, because the wick does not enter the oil fount at all. Oil is fed to it through feed pipe (H).

Any prejudice people may have against oil stoves is at once dispelled when you *show them* that you have a heater that eliminates all these troubles. Their decision is made immediately—"I'll take it." You have made a good sale, a satisfied customer, a sure profit.



Send your order to us today—or to your jobber.

We have an interesting booklet for you. It's yours for a request.

A NEW MONEY MAKING LINE FOR HARDWARE DEALERS

Mr. Hardware Dealer:—We have a proposition to offer you on which you can build up an excellent trade—one there's good money in.

It isn't one of the worn-out, thread-bare kind, but a new, live, line that will fit in with your regular business just fine.

It's one that pertains to the poultry industry and if you have given any attention to this field you will realize something of its great money making possibilities. Over $1,000,000 is spent every year for incubators, brooders, supplies, etc.

Why not get your share?

Never thought of it, have you? Well, the wide-awake hardware men are going to put in this line of goods and those who "get busy" first will get the best cinch on the trade.

When we say to you there's money in our proposition—that it's no trouble to interest buyers we know it to be a fact.

Over eighteen thousand people interested in them last year alone.

Just drop us a line saying you want full information and we'll tell you how to start a profitable side line there's money in.

Don't pass this by—it's worth hundreds of dollars to you and only costs a 2c stamp to get in touch with this new branch of trade.

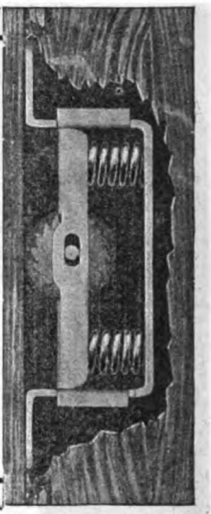
Don't Put Sash Weights in Your Windows!

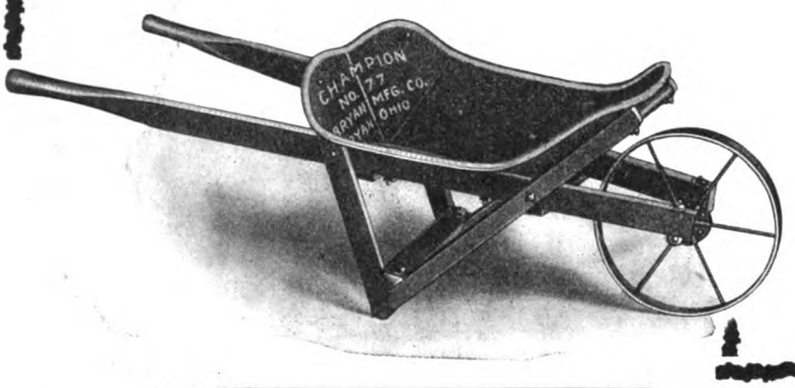
They are Out of Date.

The "AUTOMATIC" SASH HOLDER



is Better and Cheaper, More Convenient, Less Perplexing, Easier to put in, More Reliable, More Durable, More Satisfactory.

The "Automatic" Sash Holder is the new, modern, up-to-date device that dispenses with cumbrous sash weights, kinking cords or ribbons, useless weight pockets, misfit pulleys and reluctant balances, and saves all the time, labor and expense of fitting them in place.



Architects are specifying them, Contractors and Builders are buying them, Sash and Planing Mills are providing for them, Carpenters are putting them into buildings old and buildings new.

Prevent rattling and permit the window to be moved up and down with ease. Hold it safely at any point desired. *A sample set of four sent post paid for $1.20. Ask your dealer or write us direct.*

AUTOMATIC SASH HOLDER CO., 277 Broadway, New York City.

GET BUSY

That is the one secret of success in the Hardware trade. The rapid sales and quick turning over of capital that

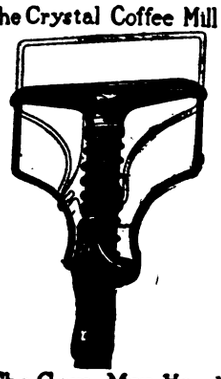
A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

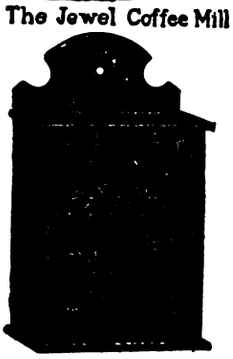
The Crystal Coffee Mill



THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

The Jewel Coffee Mill



You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

The Gem Mop Head.

THE FAMOUS GEM is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE EIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

HARDWARE

The Eagle Cooperage Works, Circleville, Ohio, manufacturer of Eagle Mop Wringers, Detachable Mops and Rex Dish Mops, has remembered its friends in the trade by forwarding them a souvenir in the form of a complete little leather card case, bill and memorandum book combined, with the recipient's name stamped on the inside cover in gold. In distributing this useful souvenir the company takes occasion to express their thanks for past favors and solicits a continuance of same.

Surpless, Dunn & Co., manufacturers' agents, 74-76 Murray Street, New York, have been appointed sales representatives of Vaughan & Bushnell Mfg. Company, Chicago, whose large and varied line of Hand, Adze, Eye Nail and Machinists' Hammers and other tools is widely and favorably known in the trade.

TRADE PRESS ASSOCIATION ELECTION.

The American Trade Press Association held its seventeenth annual meeting and dinner at the Hardware Club. The following officers and directors were elected: President, F. E. Seward; first vice-president, E. C. Brown; second vice-president, Franklin Webster; third vice-president, W. H. Boardman; secretary and treasurer, L. J. Montgomery; directors—John A. Hill, James H. McGraw, J. D. Crary, James M. Wakeman.

ELECTRIC MEAT CHOPPERS.

The good housewife accustomed all her life to using a chopping knife and bowl must have been surprised when she saw for the first time a modern chopping machine operated by a crank, and doubtless she would be still more surprised if she could see a present day electric meat chopper in which hand labor, so far as to chopping goes, is entirely eliminated. In this machine you just feed the meat into a hopper and turn a switch and the motor does the rest.

AMERICA'S INCREASING FOREIGN TRADE.

American domestic exports for September amounted to $137,039,696, an increase over the same month in 1905 of $4,733,642. The country's domestic exports for the nine months ending with September aggregated $1,218,977,784, an increase of $137,385,218 over the same period of 1905. The imports for the first nine months of this year totaled $947,935,187, an increase of $74,662,659 over the same period of 1905. This shows a much more rapid increase of exports than imports.

THE RED JACKET MANUFACTURING CO.

A contract that was let recently by the Red Jacket Manufacturing Company for the doubling of the size and capacity of its big foundry in West Davenport, means a lot not only to that growing manufacturing plant but to the city in general. The company let the contract for its new foundry to the Tri-City Construction Company, and will expend from $10,000 to $25,000 in the construction and equipment of the building. The Tri-City Construction Company gets the contract, which was let in the office of Temple, Burrows & McLane, designers of the building. It will be 80 x 200 feet, the same construction as the present foundry, which it continues toward Rockingham road for 200 feet, doubling its size and capacity. The addition means a daily melting capacity for the foundry of twenty-five to thirty tons of iron, and the employment of seventy-five more men, many of whom will be skilled molders necessarily brought here from elsewhere. Quite a number of families will thus be added to the city, and the enlarged plant will be a fine help toward the upbuilding of West Davenport. The company will also install a brass foundry, to make its own brass castings and outside work. One end of the present factory was built for this purpose, but was never equipped owing to lack of room.

FLOOR SCRUBBING MADE EASY.

If Elias B. Dunn has his way the day of the scrubwoman is over. So is the day of shaking out carpets and laborious washing of floors for the housewife. Mr. Dunn gave a demonstration of the inventions which have brought this about in the offices of the Dunn-Locke Vacuum Cleaning Co., in the Knickerbocker Building, No. 116 West Thirty-ninth Street, New York, recently. The device is like the ordinary vacuum cleaning apparatus, except that it scrubs the floor, sucks up the soap and water and carries all the refuse back through a rubber tube and thence to the cellar with a pump which discharges the stuff. Mr. Dunn threw flour and other things over the upholstery of his office furniture, and showed how the apparatus cleaned it all off in a few seconds and left not a stain behind.

OLD AGE DEFIED.

The Hungarian chemist Brunn, claims to have discovered a liquid chemical compound which renders certain kinds of matter proof against the effects of time. He asserts that it doubles the density of nearly every kind of stone and renders it water proof. It imparts to all metals qualities which defy oxygen and rust. The professor says that while traveling in Greece some twenty-five years ago, he noticed that the mortar in stones of ruins which were known to be over 2,000 years old was as hard, fresh, and tenacious as if it has been made only a year. He secured a piece of mortar and has been working on it ever since until now, when, he says, he has discovered the secret. His discovery, he claims, will, at the least double the life of metal exposed to the air, such as bridges, railroads, vessels, and tanks.

A SAW TO SAW STEEL.

A circular metal saw with inserted teeth, that, during a test, made a record of one inch a minute working its way through a 14-inch steel billet, is one of the latest achievements of the saw manufacturers, says the *Engineering News*. This machine is intended to cut 13-inch billets into convenient lengths for forging into locomotive driving axles; heavy forgings and castings can likewise be handled by the temporary removal of the special appliances fitted to the machine, the weight of which is about 10 tons.

EMIGRATE TO CANADA.

The number of immigrants entering Canada during the fiscal year 1906 was 189,064, an increase of 42,798 over 1905. The immigrants from the United States numbered 57,919, or 14,267 more than in 1905. Canada has for years pursued a policy of inducing imigration by extensive advertising and paying bonuses to immigration companies. It is said that each British immigrant costs Canada $13, and agriculturists and servants from the continent of Europe cost the government $5 each.

The homestead entries for 1905 amounted to 34,645 in Manitoba and the Northwest. The so-called fertile belt in this section of the Dominion contains 90,000,000 acres suitable for settlement, of which 67,250,000 acres have been granted to railroads, homesteaders, etc., leaving 22,750,000 acres for new homesteads.

ENAMELED STEEL USED FOR SIGNS OF ALL KINDS.

It has never been an easy thing to manufacture street signs which are at the same time practical and durable. After many years experience with tin and scores of other materials, enameled steel seems to have come into favor for signs of all kinds including street guides and advertisements. Enameled steel sheds water readily; remains eligible much longer than signs of nearly any other material. There has, however, been some need for improvement in the mounting of the enameled signs, and a distinctive advance in this line is seen in a new article which has appeared on the market.

The base of the sign is a wooden back about 7/8-inch thick and 3 3/8 inches wide, and beveled at the ends, the outer or longer face being the length of the sign as determined by the length of the street. This wooden back can be nailed or otherwise fastened to the house, tree or post to support the sign. The sign itself is a steel plate enameled in blue with white letters. The side edges are turned to slip over the wooden back and have four large screw-holes near the ends. The ends of the turned over sides are beveled at the same angle as the back of the board.

When slipped over the wooden back the enameled sign is held in place with four round-headed brass screws. Leather washers are put between the enamel and the brass heads and they are not screwed up too tight, because the steel plate will expand and sufficient play must be left so that it will not buckle.

Signs are made in all styles to suit special requirements. For example, one city sets four signs or iron brackets on a trolley pole at each corner, thus showing the street names from every direction. Another puts the signs along the supporting post instead of horizontally across it, and puts one on each of its four sides.

Ornamental corner pillars are furnished for holding signs, made of hollow metal with a solid bed plate in the ground and double brackets for holding two or more signs 10 feet above the ground. Lamps of any kind can be put on top of these pillars. Signs for telegraph, telephone, railroad, street car, newspaper, contractor, wagon, express, real estate purposes, public notices, advertising, etc., are also supplied for window and other signs, house numbers and all kinds of door plates.

NOVEMBER 25, 1906

Editorial Trade Review

The month of October undoubtedly held up to the record for a fullness of sales which tasked the efforts of the distributing powers to the utmost to do justice to. The manufacturers have still to contend with the shortage of cars, which has delayed the trade for months, and the delays on account of non-delivery of raw material form one of the aggravating features that gives the producer of goods a prolific cause for worriment. The trade is already busying itself with the selection of holiday requirements, which will form a good portion of their sales during December at a fair margin of profit, and consequently these goods will form a field of special activity on which prompt deliveries will be urged with a persistence worthy of the most satisfactory results.

The changes in prices that seem to be of almost daily occurrence unsettle quotations for buying and selling with alarming frequency; frequently orders on special lines of goods are taken from the jobber with the assurance of an advance in prices at an early date to assist in making the orders sufficiently full and complete, and the advance resulting causes the re-adjustment of the jobber's quotations, which, although in a manner apparently conservative and moderate, when comparison is made with the prices formerly prevailing, the trend being ever upward, one is surprised by the range of goods which are made subject to change, and on which the dealer will found the prosperity which will be indicated by the next inventory.

In almost every line of staples that is carried largely in stock by the trade, the plentiful supply is retarded by these unavoidable delays that are inseparable from prompt deliveries at this time of the year especially, let alone the causes otherwise affecting it. In Builders' Hardware it is more noticeable because now is the time when pressure is brought upon the dealer for the supplies of such material as will bring to a completion the structures of all kinds, from edifices and warehouses to dwellings and churches, which have been the production of keen enterprise during the preceding months. The labors of hordes of skilled workmen need these supplies, and the manufacturer is at his wit's end to supply the jobber and enable him to fill the dealer's orders. In this branch of the business, Builders' Hardware, the trade has rarely known so prosperous a season. The demand on every hand for better goods being in harmony with the prosperous conditions surrounding the industry, has made it more difficult than usual to anticipate wants that in ordinary seasons would be supplied with Hardware more plentiful because less expensive.

The magnificent weather which has been the characteristic of the past two weeks, has made the dealer's wants for winter more manifest than ever, and the early movement which in former seasons was noted as prevalent in November has been fostered and encouraged at an earlier date, and created the activity which is now so noticeable. It certainly looks as though the great crops upon which we safely ground our present prosperity would warrant the expectation of a safe trade in 1907 for the first six months, and for which the dealer can shape his stock and carry it in full supply. The conservatism of the United States Steel Corporation has been commendable, and that the market hasn't lost its bearings and taken advantage of the present state of affairs may be attributed largely to the conservatism of this large manufacturer holding it in check.

THE COMMANDING OUTLOOK.

The country for several years has enjoyed, and yet enjoys, a prosperity for which its good crops are the explanation. Good as were the crops in 1905, the production of 1906 will generously exceed them. In contemplating the past it is noted the turn for the better, in its beginning, was more of a debt-paying than expansive character. With debts cleared came the progressive period; the period when the people at large, and the agricultural class in particular, had money to spend. In no more general way has this money been invested than in improvements. A better house, a better barn, better machinery, tools, harness, etc., claimed consideration. Evidence of the decision is to be seen in all parts of the land. A continuance of prosperity is suggested by the large crops of the year with a demand indicative of good prices. It is more than suggested there will be a continued expenditure in improvements. In every way, in the household, in the barn, in the field, in implements tools, nails, etc., there will be a call for Hardware. In the cities the progress will be no less. House-building was never more engaged in. The sound of the hammer and the saw evidence the prosperity bringing them into activity. The outlook is certainly an excellent one when regarding the people collectively as free from debt and making money which is finding investment in buildings that must favorably affect the Hardware business. Dealers are confronting even a better situation than the favorable one of the past year. An excellent demand for goods in the Hardware line is well indicated.

THE COMMERCIAL VALUE OF PERSONAL HABITS.

Guard your own private habits, if for no higher than a commercial reason. Your mode of life is watched, not by your own employees alone, but by the visiting salesmen, each of whom represents a separate business institution with which you are doing business or may wish to in the future. Commercial ratings are not everything and the modern jobber knows it. The personality of the man behind the gun counts much in the efficiency of its aim. More than one retailer has been surprised by a sudden tightening of his credit, a closer looking into accounts, a less elastic treatment and has wondered why. His rating may have remained the same, his bills been settled just as promptly, his treatment of the house as fair. Perhaps he did not even realize that there was any change in his reliability in

Digitized by Google

any way. The tip went out through some of his salesmen visitors. "H—— will bear watching; he drinks more than he used to; he has taken to playing poker; he is dabbling in stocks." It does not matter that the retailer's habits had been learned through a good social time with the salesman himself. The latter is not on trial and the former is; hence his credit is curtailed as a matter of precaution rather than because his business gave signs of wabbling.

A Hardware dealer recently advertised for a partner with money to extend a special line of trade. The man was found and the situation presented to him so attractively that he was about to invest. Two unexpected visits found the Hardwareman absent from his office and a little inquiry located him at a neighboring pool room. That settled it. The business was all right but the man behind it was open to the possibility of question and the partnership was spoiled.

PLEASE THE WOMEN.

Please a woman with a household novelty and ten to one she will succeed in using it for a variety of things the manufacturer never dreamed of, excepting when he had the nightmare. Disappoint her and the chances are she never afterwards can find a hammer in the whole concern good enough to drive a carpet tack. That isn't the worst of it. She will tell her family so convincingly how she has been swindled that not a member of it will ever trade at such a place again: they would not dare to, lest she find it out.

A man will get outrageously cheated and then will say nothing, but grin sardonically while all of his fellows go in and do likewise. A woman will drag them back by force and call the police if they insist on entering. Perhaps the man may even be cajoled and made to believe that he was not hurt very much; at least that he has been a victim of circumstance rather than of fraud: anyway he wants to go back just to see if it can be done to him again. Swindle a woman and all the apologies in the world won't quiet her. She is after the goods and not excuses. Either she is suited, and all sweet words, or else she isn't and is all words that are not so sweet; and there it ends—only, something else begins.

Certainly it pays to please the women. No other class of customers are more liberal or more loyal; none others half so influential as they in favor of their commercial friends. But an offended woman will get even seven times over if she has to wait ten years to do it and in the meantime is compelled to organize a special social club or sewing society to accomplish her revenge

THE MISTAKES OF OTHERS.

If a customer should chance to overpay for a purchase, no honest dealer would neglect to rectify the error. Should he forget a portion of the goods that he has paid for, they should be held for his return or sent to his address. But how about the man who thinks he knows just what will answer for a certain purpose but overlooks some point that is sure to bring him disappointment; is he always warned of his mistake? If he gets it into his head that cheap High-fly razors in the show-case are the standard High-crack goods that require no other guarantee than their own name, is he carefully set right in his belief before he purchases?

Perhaps there is no more certain index to the business man's real character than the extent to which his conscience lets him profit by the mistakes of others. It may not be to the extent of keeping money wrongly paid or of failing to deliver goods the purchaser has forgotten. There is a passive as well as an active co-operation with that commercial bug-a-boo, mistake, by means of which a good many men ease their conscience when it pinches them in a sore spot for putting into their pockets a profit that is not legitimate.

It really matters very little whether a man deliberately fools a customer or whether he lets the customer fool himself or connives with the clerks or with circumstances to do the fooling. If he takes advantage of the misbelief to profit at the other man's expense he has tested the elasticity of his conscience to an extent that will weaken it a little in the future. The customer may never find out the deception from his purchase. He will certainly discover its effect upon his deceiver in the course of time, if he remains a customer until the stretching is repeated often enough. Presently he will be heard remarking to some friend:

"I used to think H——— strictly honest, but of late he seems to be getting tricky. I wonder what has happened to him that has changed him so."

Nothing has happened to him. Nothing has changed him radically. Instead of growing, he has stretched until he is weakened; that is all. Its a big step from a strictly honest men to a moral wreck, but not a very big journey if we stretch ourselves across the short-cut. Any of us could do it if we wanted to; indeed it is one of the surprising phases of human nature, the readiness with which conscience, stretched a few times to the straining point, adapts itself to the new demands and becomes less and less resistant to them until it finally becomes so pliant that it hardly restrains from anything at all that promises a little profit or satisfaction.

THE OVER-DONE FOLLOW UP.

It is always possible to overdo a good thing and the energy with which some firms follow up their inquiries supplies a vigorous example. Not every applicant for a catalogue or information is an intending purchaser. Some one may want a little general information on the present development of machinery along certain lines, or the very attractiveness of the firm's magazine advertising may have so interested him in the subject that he seeks further information in the catalogue so freely offered, much as he would seek a magazine article on the same subject, and still not be at all interested in it professionally. Of course there are various other reasons. We will say that he asks for a hand-book of information about gasoline engines. The book arrives and with it a letter stating that the district manager will call upon him in a day or two; perhaps the manager brings the book in person. A few days later the general agent for that territory runs in to have a talk with him; the local dealer has in the meantime been notified and several rival agents more than likely have got wise.

If all this has happened in a country district the entire neighborhood is ere this remarking that "Mr. H—— is going to buy an engine; now what in Texas does he want of one, do you suppose?" That may be a little difficult and embarrassing for Mr. H—— to explain if he happens to be a minister or a teacher. As a result he is assailed with criticisms, agents and suspicions for the rest of the season; and on the manufacturer's part, there has been a lot of expense worse than wasted.

The wisdom of a personal visit from some distant agent, to put it very mildly, is questionable until some other point is gained than the mere inquiry for a catalogue. Such visits cost money, take the agent's time from more profitable fields and in a great many cases cause considerable chagrin to the unfortunate minister or lawyer who has to move about the country with a lot of threshing machine agents at his heels and the rest of the community laughing at him and all his followers together. A personal letter with the catalogue with a request for an interview will in many cases bring out some evidence as to whether or no an interview would be of any use. In other instances the local dealer can supply sufficient information to determine the best method of follow-up to be employed. Certainly his advice should be obtained before the men of the road are sent. Occasionally a sale may be lost by this more dilatory method, but it will be found far less offensive and in the end, expense considered, more fruitful of results.

THAT CHRISTMAS PRINTING.

By and by the holiday season will be back upon us and a good many idea barrels will be tapped for instant use. Some of these pet business schemes will require special printing, an up-to-date announcement, a circular, pamphlet, souvenir card or other form of the art preservative. Even the regular business correspondence will be rendered more attractive by freshening up the stationery supply. Somehow, when everything else is bright and fresh, a dingy letter-head looks as much out of place as a garbage receptacle in a city park.

Probably the great majority of business men who are at all progressive will have some form of business at the print shop within the next two months. The question is, how many will place their orders far enough head to get their work done when they want it?

There are a great many enterprising business men in the world. The supply of printers is supposed to be restricted to about the number that can make a living the year around. There is sure to be a rush of orders a little later and that means delay, disappointment, perhaps slighted work.

What is the matter with your holiday plans now? Can't you mature them and put your copy in the printer's hands while he has time to give it due consideration? Then later on get everything arranged for that can possibly be arranged ahead, envelopes addressed, circulars folded, etc., so as to put as little extra work of this sort as possible upon your own working force during the holiday rush. At the psychological moment you can quietly launch your plans while your less foresighted neighbors are frantically falling over each other in a mad rush to get the printer's attention or his scalp.

IRON AND STEEL IMPORTS AND EXPORTS.

Exports of iron and steel manufactures show an increase of about 25 per cent in the nine months ending with September, and imports or iron and steel manufactures show also an increase of practically 25 per cent. in the same period, when compared with the corresponding months of the preceding year. Exports of all domestic products increased meantime but about 13 per cent. and the total imports but about 9 per cent.

A remarkable feature of the import movements in this class is that of pig iron and iron ore. Importations of pig iron in the nine months ending with September, 1906, are practically twice as great as in the corresponding months of 1905 and six times as great as in the same months of 1904. Iron ore also shows a large increase, the imports of that commodity in the nine months ending with September, 1906, being 818,030 tons, against 650,286 tons in the corresponding months of 1905 and 297,212 in the same months of 1904. Pig iron and iron ore imports aggregated over 10 million dollars value in the nine months ending with September, 1906, against about 5 millions in the corresponding months of 1905 and about 2 millions in the same months of 1904.

Nearly all forms of iron and steel show an increase in importations, the principal exception to this being tin plate, which shows a fall from $3,381,150 in the nine months ending with September, 1905, to $2,526,632 in the corresponding months of 1906.

Another article of importation which may be considered as a measure of activity in certain lines of iron and steel manufacturing is pig tin, used chiefly in manufacturing tin plate, of which the importations in 1906 amount to over $27,331,500, against $20,700,371 in the corresponding months of 1905 and $17,348,294 in the same months of 1904. Exportations of tin plate also show a marked increase, the total number of pounds exported in the nine months ending with September, 1906, being 23,794,151, against 14,562,152 in the corresponding months of 1905 and 12,056,069 in the same months of 1904.

The growth in exportations of iron and steel, a growth which has been one of the most marked characteristics of the export trade during the last decade, is larger in the nine months ending with September, 1906, than in any corresponding period in the history of our export trade. The gain in the nine months ending with September, 1906, over the corresponding period of the preceding year is over 24 million dollars, while the largest gain in any like period in earlier years is that of 1900, which showed an increase of about 21 millions.

Comparing the figures of 1906 with those of a decade earlier, the exports of iron and steel show a gain of over 270 per cent., having been $34,549,290 in the nine months ending with September, 1896, and $127,189,673 in the corresponding months of 1906, while the imports of iron and steel show meantime an increase of 50 per cent., having been $16,361,429 in the nine months ending with September, 1896, and $24,376,887 in the corresponding months of 1906. Comparing 1906 with even two years earlier, a marked increase is shown in both exports and imports. The exports of iron and steel manufactures in the nine months ending with September, 1904, were but $82,551,937 against $127,189, 763 in the same months of 1906, showing a gain of 37 per cent. in two years' time; and the imports of iron and steel manufactures in the nine months ending with September, 1904, were but $16,598,505 against $24,376,887 in the same months of 1906, showing an increase of nearly 50 per cent. in two years' time.

Pig iron is, at the present time, the most striking feature of the iron and steel imports, having been $7,801,664 in the nine months ending with September, 1906, against $3,788,376 in the corresponding months of 1905 and $1,337,548 in the same months of 1904. This pig iron comes chiefly from the United Kingdom. The total value of pig iron imported in the fiscal year 1906 was $7,788,884 of which $5,376,983 was from the United Kingdom, $903,908 from Germany, and most of the remainder from Austria-Hungary, Belgium, France, Sweden and Switzerland.

Iron ore is also an import of considerable importance, though the figures are not included in those above quoted of the value of iron and steel importations. The value of iron ore imported in the nine months ending with September, 1906, is $2,295,506, against $1,514,291 in the corresponding months of 1905, and $685,123 in the same months of 1904. The bulk of this iron ore comes from Cuba.

Nearly all of the great articles or groups of articles share in the increase in exports of iron and steel manufactures. Steel rails increased from 5⅓ million dollars in the nine months ending with September, 1905, to over 6½ millions in the same months of 1906; structural iron and steel, from 2¾ millions to 4½ millions; wire, from less than 5 millions to 6⅓ millions; builders' Hardware, from a little over 9 millions to more than 10 millions; electrical machinery, from 5½ millions to 6¼ millions; metal-working machines, from 4 millions to practically 5½ millions; sewing machines from 4½ millions to 5¾ millions; while printing presses, pumps and pumping machinery, and cash registers show in each case an increase, making the total exports of machinery of iron and steel practically 60 million dollars in value in the nine months ending with September, 1906, against a trade over 50 millions in the corresponding months of 1905.

The following table shows the value of iron and steel imports and exports in the nine months ending with September, from 1896 to 1906:

Nine months ending September—	Imports of iron and steel.	Exports of iron and steel.
	Dollars.	*Dollars.*
1896	16,361,429	34,549,290
1897	10,829,797	45,693,384
1898	9,639,658	59,990,665
1899	10,768,407	76,569,205
1900	16,398,349	97,311,140
1901	14,057,766	76,846,899
1902	27,838,237	73,352,016
1903	34,652,234	72,714,360
1904	16,598,505	92,551,937
1905	19,565,755	102,922,277
1906	24,376,887	127,189,673

DEATH OF A. J. CORDIER.

Auguste J. Cordier, one of the foremost men in the enameled ironware business in this country, died at his home at Woodhaven, L. I., October 22, from the effects of a stroke of apoplexy. He was in his fifty-third year and had been in ill health for a year as a result of overwork.

Mr. Cordier was born in the old city of New York, February 27, 1854, but early came to Brooklyn to take up his life work in the business of which he was the head when he died. When but twelve years old he engaged in the humble capacity of office boy with the Lalance & Grosjean copartnership, then a comparatively small house but a few years old. Industry and careful habits won recognition at the hands of his employers, and he was successively promoted to the positions of entry clerk, city salesman and traveling salesman.

The second vice-presidency of the company was his next step, which he took in 1889, rising to first vice-presidency in 1892. Florian Grosjean, his father-in-law, and senior member of the concern, died in 1903, and Mr. Cordier took the presidency, the highest post of trust and honor the company had to offer him.

Not until a year ago did he relinquish his active labors in the business, and then only at the command of his physician. The ample and magnificent villa that he had erected four years previously, at Woodhaven, became his headquarters, and as his health continued to fail he conducted his affairs from his study. His ill health also compelled him to give up his attention to the clubs and bodies of which he was a member, although he retained his membership in all of them until he died. When he passed away he was a director in the Woodhaven Water Company, president and director of the Lalance & Grosjean Company, a member of the Union League and Fulton Clubs, of the Chamber of Commerce of Manhattan, of the Montauk Riding and Driving Clubs, the New England Society of Brooklyn and the Church Club of Jamaica. He was formerly a director in the Phoenix and Hanover Banks, of Manhattan. Although he took no active part in politics, his inclinations were Republican.

Mr. Cordier is survived by a widow, daughter of Florian Grosjean; a son, Auguste J., Jr., and a daughter, Alice Marie.

THE AMERICAN HARDWARE CORPORATION.

In a recent issue of the New Britain *Daily Herald* it publishes an article which seems to substantiate the claim of that city to have within its limits a corporation with more employees than any other in the State of Connecticut. The concern in question is the American Hardware Corporation, whose constituent companies and the number of persons employed are as follows: P. & F. Corbin, 2,000; Corbin Screw Corporation, 1,500; Corbin Cabinet Lock Company, 900; Russell & Erwin Mfg. Company, 1,700, and Corbin Motor Vehicle Corporation, 250. This makes an imposing total of 6,350 persons employed by the American Hardware Corporation, which number will be materially increased when the large addition to the plant of the Corbin Screw Corporation now under way is completed.

THE EDUCATED MERCHANT.

There is a popular notion, which has gained wide support, that for the young man who intends to enter a business career the years at college are wasted. This is not confined to the laity, for many well-known merchants have argued along the same lines, declaring that colleges and college courses were too apt to deprive the youth of some of the qualities necessary for a success in the world of trade.

As we have stated before, says the *Oregon Tradesman*, education cannot, unaided, make a merchant out of anybody. The trading instinct is born, not made. The ability to make money is a natural one; the bump of acquisitiveness cannot be produced by culture or training. Some shrewd traders there have been who could scarcely read or write. Many of them have amassed considerable fortunes. However, they have been at such a manifest disadvantage, so open on many sides to attack, that almost without exception a common school education is regarded as a necessity for the future business man.

The principal mistake in the popular idea that higher education is hurtful is in the belief that the chief aim and end of the merchant is to gather in money. The first principle of the merchant, and, for that matter, for the lawyer, the physician and everyone else, is to make a comfortable living. Self preservation, all the necessities, some of the luxuries—in short, the benefits of wealth—are legitimately sought for by all men.

But when the chief aim, the only dominating principle in a man's life, is to hoard gold, the instinct is distorted and the true reason for living is gone.

The merchant of today looks on the definition, "one who buys and sells," as too narrow. The merchant of today is not a merchant to the exclusion of everything else. It lies within him to become a success as a man and a merchant as well. He may be an honored and respected citizen, and he frequently is. The man who thinks only of dollars may get them, but that is all he gets. Most of our great merchants have become great men at the same time. Their opinions on other subjects are sought and found sound and good; some of them become statesmen, full of common sense and keen ability; others are able and willing to work for the good of their community, producing wonderfully satisfactory and lasting monuments to themselves. Success, true success, is not confined to the getting of dollars.

We believe we are stating a fact when we say that every really successful merchant is educated. We mean the success that includes the making of money and the using of it wisely, and we refer to the education which broadens the mind and enlarges the heart—frequently self-acquired. The ambition of the young man is usually higher than the mere collection of a great bank account. The bank account is very necessary and a good thing to have, but the use of it is still more important.

Probably not more than twenty-five per cent of our merchants have received more than a high school education, but for all that, most of the successful ones are educated men; through their own efforts, through their own desires, they have mastered knowledge which enables them to direct their means wisely, to enjoy the fruits of their labors and to assist materially in the advancement of the world.

There was a time when the typical grocer, conceived in popular fancy, was a fat but obsequious man, aproned and perspiring, seeking to drive a shrewd bargain and ready to take advantage of those who dealt with him. This has changed until today the grocer or other merchant has no particular type, for it is changing continually. Many grocers are thin, and many of them wear no aprons. Most of them are able to hold their own on political, educational and religious subjects. All of them hold a higher and more recognized position than ever before. Without losing their ability in buying and selling goods, they have added to their knowledge as they have added to their means.

And it is worthy of note that this change has not been accomplished by any loss of natural aptitude for business. We believe that it has served to make them more efficient; it has given them a wider knowledge of conditions, of human nature, and has enabled them to take opportunities which would have been obscured without their education, whether it was secured through the medium of a college or by personal effort and a real love for the wisdom they sought.

As years go by, failures appear to grow less in proportion to the number of people engaged in business. There are years when disasters come and many go under; there are others when few fail to gain profits in keeping with their efforts; but the general trend is for less failure in trade. This is not due to a smattering of Greek verb roots, nor to the ability to master the problems of differential calculus, but to the cultivation of the mind, whether it be due by delving into the learning of the ancients or by the profound study of men and things which every truly successful merchant steadily seeks.

The college education is all right for the embryo business man, but it is not absolutely essential to real success; but education of some kind is essential for the highest success in any career, whether it be that of the merchant, the doctor, the attorney, the preacher or the day laborer. Education means training, development, cultivation, bringing out. The uncultivated field may be rich in natural nourishment for plant life; it may produce considerable crops without care or attention. But its natural fertility will be doubly effective when cared for by a scientific and thorough farmer. So the business man may do a good deal with nothing but his natural instincts, his native shrewdness; but with education of some sort, his real worth is increased many fold, and his true value to himself and to the world about him made more effective.

FRANK H. TAYLOR.

At a meeting of the stockholders of The Yale & Towne Mfg. Co., held at its offices in Stamford October 30, 1906, Mr. Frank H. Taylor was unanimously elected a director of the company and at a subsequent meeting of the Board of Directors, held on the same day, was elected a vice-president of the company.

Mr. Taylor was born in Cincinnati, Ohio, and after leaving school entered Haverford College (near Philadelphia) where he graduated after a four years' course; immediately after which he entered Harvard University, from which he also graduated, in class of 1877, receiving the degree of A. B.

After leaving college Mr. Taylor entered the employ of the George Fox Starch Co., of Cincinnati, Ohio, as an apprentice, advancing through various stages to the position of superintendent. In 1882 he removed to Philadelphia, where he became one of the organizers, and then treasurer of the Belmont Iron Co., of which ultimately he became the president. The plant of this company having been destroyed by fire Mr. Taylor in 1890 accepted the position of manager of the Philadelphia branch house of the Yale & Towne Mfg. Co., which he retained for the following seven years.

In 1897 he transferred his residence to Pittsburgh, Pa., to accept an appointment as sales manager of the Westinghouse Electric & Mfg. Co. He served three years in this position and was then promoted to the position of fourth vice-president, in which he served for about three years, and finally was elected to position of second vice-president, which he filled for the following three years and until he resigned in April, 1906. He is a director of the Westinghouse Electric & Mfg. Co., and of the Provident Life & Trust Co., of Philadelphia, and one of the trustees of the Engineer's Club of New York.

Mr. Taylor's wife was a Miss Nicholson, a grand-daughter of John L. Whitall, of the old house of Whitall, Tatum & Co., of Philadelphia. They have four sons.

As a vice-president of the Yale & Towne Mfg. Co., Mr. Taylor's duties will relate equally to the manufacturing and commercial sides of the business and ultimately will include many of the matters which heretofore have been attended to by the president.

The present official organization of the Yale & Towne Mfg. Co., is as follows, viz.: President, Henry R. Towne; Vice-Presidents, Schuyler Merritt, Frank H. Taylor; Secretary, J. H. Towne; Treasurer, A. R. Erskine; General Manager, Kirk Brown; General Superintendent, Walter C. Allen.

ONE USE OF ADVERTISEMENTS.

How many season sales are lost each year because the dealer overlooked the probable want until he got the inquiry? That is where the advertising pages of the Hardware journals would do much to set him right if they were perused with proper attention. It isn't so much what a man knows as what he calls to mind at the proper time which determine his qualities as a buyer. A great deal of the value of what is read comes in the form of a reminder rather than of actual information, and this may best be gotten from the advertising columns. The editor of a trade paper hardly feels justified in calling attention over and over to some seasonable point but the advertiser keeps slugging away on his own specialty; then he is sure to hit the retailer at the proper season if the retailer only hits him.

No matter how familiar one may be with all the regular advertisements running in his favorite journal, it pays to form the habit of hastily running them all over with each issue, not only for the new advertisements, but to recall to mind each of the various lines that have not yet been ordered and ask as each is reached: "Is it time for me to order that to-day?" Such a habit will save many an overlooked order, disappointed customer and lost sale.

Almost numberless are the frantic hurry orders that are sent in after the inquiry has come, which are finally filled by the jobber too late for the use of that particular customer and, more than likely, too late to hunt up a new one. The belated retailer then has his choice between a row with his jobber or a little addition to his already over-abundant stock of goods that must be carried over to another season with its possible change in market demands.

LEGAL CORRESPONDENCE

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

RAILROAD COMPANY LIABLE FOR LOSS OF SAMPLE TRUNK.

QUESTION: A traveling salesman in our employ took with him a sample trunk filled with samples, which was considerably larger than the ordinary trunk. He bought a ticket and checked the trunk paying $0.85 for excess baggage and told the baggage man that it was a sample trunk. An accident happened and when he called for the trunk he found it water soaked and the contents ruined. It is a common practice to transport sample trunks on this railroad and our salesman had traveled over that same road with his sample trunk many times before. Can we recover from the railroad company the value of the samples contained in the trunk, which is about $300?

REPLY: We think that you can do so. The baggage master had notice that the trunk contained samples, rather than the ordinary clothing and personal effects carried by travelers, and accepted the trunk with notice of this fact, and in accordance with the common practice of the railroad to carry the sample trunks of commercial travelers. The value of the contents of the trunk was not disproportionate to what it might have been presumed to contain. The case, therefore, differs from those in which a recovery has been sought against railroad companies for the value of trunks containing, for example, jewelry worth many thousands of dollars, where the actual value of the contents is far disproportionate to the apparent or indicated value. We think under the circumstances the burden would be upon the railroad company to show that it exercised due care in the transmission of the goods and upon its failure to do so, it would be liable for whatever damages resulted to the contents of the trunk by reason of its negligence.

LIVERY STABLE KEEPER'S LIEN.

QUESTION: Can a livery stable keeper who has boarded a horse, and whose bill is not paid, keep the horse till the owner pays the bill?

REPLY: Ordinarily it is held in the absence of statutes that he cannot. The reason is that the owner usually has the right to take and use the horse at any time, and that right is deemed to be inconsistent with any right on the part of the livery stable keeper to keep the animal, in case the bill is not paid. This rule is changed in New York and many of the States by statute and under these statutes the livery stable keeper has a right to keep the animal till his bill is paid. Of course he waives his lien by voluntarily relinquishing possession of the horse.

NOTE—WHEN ILLEGAL AND VOID.

QUESTION: We discovered an employee had collected money and had not turned it in to the firm. We looked up the amount of his embezzlements and got him to give us a note, indorsed by his wife, to make them good. Is the note collectible?

REPLY: So far as the note was given to secure the payment of the amount embezzled by your employee, it is of course perfectly valid. But if it was given upon any understanding or agreement that you should not institute criminal proceedings against him on account of the embezzlement discovered, then the note was founded upon an illegal consideration and cannot be enforced. The law regards the compounding of a felony as against public policy, and as itself criminal; and no agreement or security given upon the understanding, express or implied, that it was to purchase immunity from criminal prosecution can be legally enforced.

UNITED STATES BANKRUPTCY LAW-PRINTING COMPANY MAY BE AN INVOLUNTARY BANKRUPT.

QUESTION.—Can an incorporated company engaged in the business of printing and selling newspapers and in job printing, go through bankruptcy?

REPLY: The present Bankruptcy Act of the United States provides that, "Any person who owes debts, except a corporation, shall be entitled to the benefits of this Act as a voluntary bankrupt;" and also that, "Any natural person" (except wage earners and farmers), "any incorporated company and any corporation engaged principally in manufacturing, trading, *printing, publishing*, mining or mercantile pursuits owing debts to the amount of $1.000 or over, may be adjudged an involuntary bankrupt."

RIGHT OF FINDER OF LOST PROPERTY BURIED IN ANOTHER'S LAND.

QUESTION.—Some workmen employed to dig a ditch on A's premises, found some valuable coins in the soil about six feet below the surface of the ground. Who is the owner of the coins, A, the owner of the land, or the workmen who found them?

REPLY: The general rule seems to be that the finder of lost property obtains title to it as against all persons, except the original owner who lost it. This rule has generally been applied, even though the property has been found upon the land or in the soil of another person. The workmen would, therefore, usually be held to have title to the coins as against the owner of the soil and as against all persons, except the person who buried them.

A NEW MONEY-MAKER FOR DEALERS.

It is not very often that a real, brand-new proposition comes along and for this reason we believe the readers of this paper will be unusually interested in the advertisement of the H. M. Sheer Co., of Quincy, Ill., found in our advertising columns. When this company applied to us for space in our paper, their proposition was so different from our regular line of advertisers that we were more than ordinarily interested to learn how they had built up such a remarkable business. So we investigated and the more we looked into the matter the more we were surprised that their idea had not been put before the Hardware dealers before.

A NEW AND IMPROVED INCUBATOR.

But, as is so often the case with good opportunities, it has been overlooked until the Sheer Co., in looking for new worlds to conquer, hit upon the idea that their proposition was specially suitable to the Hardware trade in many respects. For eighteen years this company have been manufacturing incubator and brooder fixtures, and have, through judicious advertising and high-class goods, built up a very successful business. Last year they interested over eighteen thousand people in their line of goods and they see no reason why a great deal of this business could not go through the local Hardware trade. Any one familiar with the magnitude of the poultry industry, which by the way exceeds in volume more than any single industry of the day, not excepting iron, steel, wheat, or manufactures, will readily realize here is a field that has no limit of possibilities in way of trade.

There is no question but what it will pay every Hardware dealer, who reads this, to send to the H. M. Sheer Co. for their Hardware dealers' proposition. Just a mere request on your business stationery will bring full information, and the first in the field of course will get the most benefit. We might have gone into detail and given you a greater explanation of their plan for Hardwaremen, but we do not feel that we can present the proposition as well as the originators. For that reason we urge you to write direct to this company. We assure you at the start you will find them dependable in everything they say and offer. They have a good thing and the wide-awake dealer will "make hay while the sun shines," by getting in touch with them at once. The season for their goods is just coming on, and there is no time to be lost if you wish to get the benefit of it this season.

CONFIDENCE AND COURTESY.

There are two important building stones of business. One of the most successful merchants of our time put it none too strong when he said: "Confidence is the keystone of the arch through which the path must be taken leading to success." Every Hardwareman realizes keenly from his own experience that this is an absolute necessity to business success. In placing his first order for goods, or when he first embarked in business the stimulant which enabled him to put his whole heart and mind into his work was confidence. Without this no business can permanently prosper.

And just in the same way the customer must have confidence in the store and its methods, in the merchant and his goods, and in the degree in which this confidence is generated and maintained, will the business be a success. This being the case it is of the utmost importance for the Hardwareman to do everything in his power to cultivate and to strengthen confidence on the part of his customers and the public generally.

HOW TO CULTIVATE CONFIDENCE.

Now and then a merchant will be found who believes that selling goods at low prices, or cut prices, is the only way to build business. This is a mistake. Without a living profit no business can thrive—without a fair margin, no dealer will succeed. And it often happens that by cutting prices a merchant will make his customers feel that on some goods he is obliged to charge a larger profit—thus destroying confidence. "Honest Goods at Honest Prices"—such a motto put into practice will be one of the best builders of business confidence. Never misrepresent any merchandise, either by a misleading advertisement or by any words of over-praise in the store. In selling an ice-cream freezer a certain Hardwareman established his store in this way. A new family had come to his town. The woman of the house was looking for an ice-cream freezer. The merchant in showing the Rapid Freezer said: "This six-quart freezer will do the work in about fourteen minutes and do it well." "But," said the lady, "I've heard of freezers that will freeze cream in ten minutes or less; haven't you that kind?" The merchant showed the good qualities of the make he carried in stock—easy to clean, and not hard to turn, but did not say that it would freeze in less than fourteen minutes. The lady bought it. A few days later again she was in the store, buying some housefurnishing goods. "I just want you to know how pleased we are with our new freezer. It works splendidly and took only nine minutes to freeze five quarts of cream." Being better than represented is one way of breeding confidence. That woman became a permanent customer of that store.

ADVERTISING.

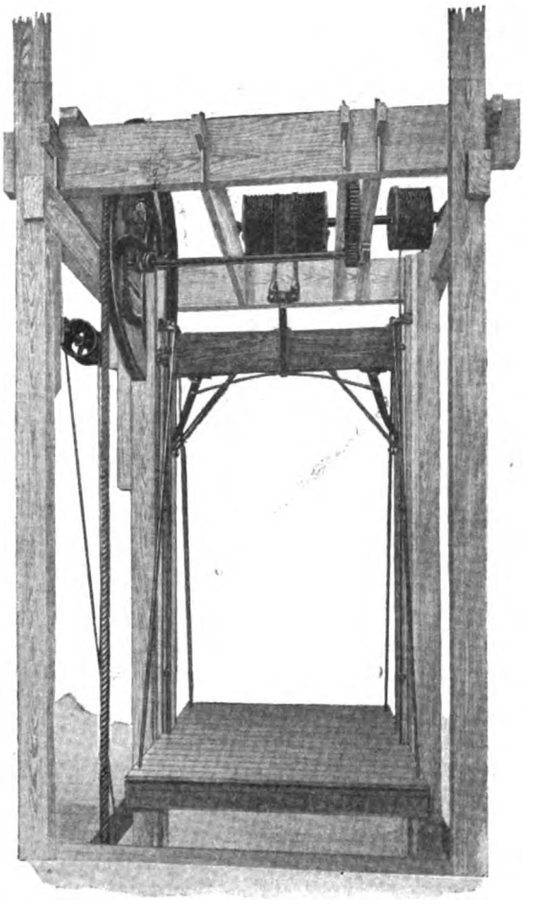
With honest values, and a well-sorted stock, judicious advertising is one of the most effective ways of stimulating and encouraging confidence. In the newspaper the Hardwareman should make his advertisements plain and to the point. If he is able to get an exceptionally good value in any household article or in tools it is well to give his customer the benefit of his purchase, and by advertising let them know about it.

The dealer himself must have confidence in his own store, in his goods and in his methods. He must believe that the price charged is right, and that the goods are as he represents them. And the greater the degree of confidence the easier it is to win success.

COURTESY IN THE STORE.

Just as the keystone of trade is confidence, so the corner stone is courtesy. Let the Hardwareman have honest goods not misrepresented and even though his advertising be most effective, still his business will fall far short of the greatest possibilities, if this other great factor of genuine success is not in constant evidence in the store—confidence of good values through a well-worded advertisement may first make a customer of the store—but it is polite, courteous treatment that will bring this customer back and make him a permanent customer of the store. And the best business of the Hardwareman is not transient trade, but the continual, constant trade of the permanent residents of his town or city.

What salesman does the merchant like to save his orders for? What house with all things equal does he prefer to mail his orders to? Who are the people he prefers to treat and do business with? It is that salesman, it is that house, it is those people, where courteous treatment will be always shown him. And his feelings are not different from those of his customers.



HOW TO PROMOTE COURTESY IN THE STORE.

Certainly no argument is needed to enforce the truth of the fact that business courtesy and politeness are essential to business to-day. With daily increasing competition, with department stores and mail order houses bidding for a part at least of the Hardware trade, the merchant must bend every nerve to hold and to enlarge his trade. And nothing that he can do will be of a greater aid than this little thing, courtesy. It should go all the way through the employees of the store. The proprietor and the manager must be polite to their employees, if they expect courtesy to be shown by them to the customer of the house.

A Hardware store was opened by two brothers, young fellows, a few years ago in the suburb of one of the Central New York cities. They had a good knowledge of the business, but lacked capital. Their stock was small, but by close attention to each customer's wants by their polite, courteous consideration these brothers have built up a successful, well-paying business, and are daily selling goods to people of the city who come blocks out of their way to trade at this store. A true saying it is: "Nothing succeeds like success"—but a true, and underlying saying is "Nothing succeeds like courtesy." HAMMERNAIL.

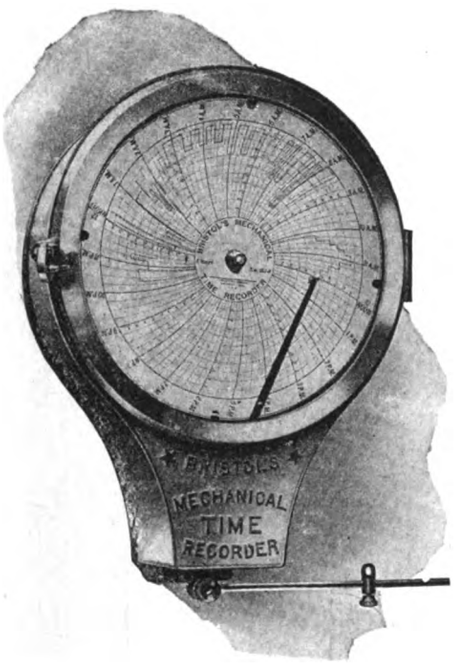
HAND POWER ELEVATOR.

The electrotype of the Store Hoist which accompanied the article in our issue of October 25th, referring to the Eaton & Prince Hand Elevator, by a strange perversity of intention was exhibited in a way that was puzzling to comprehend. We give

HAND POWER ELEVATOR.

it here properly, and apologize for the lack of care shown by our mechanical forces, whereby it made the cut stand on its head, when it would be more appropriate to make it stand at the head.

CONFUSION IN MANY LINES.



There are many objections to a Hardware store handling too many brands of goods, but one is frequently overlooked. A Hardware store is, more than most lines of business, made up of many distinct trades, with each of which the retailer must be personally familiar. The human mind is limited and cannot grasp the details of too much at once, but the faculty is happily given most of us to lay aside one set of specifications and take up a new one at will. The good salesman who is suddenly called out of the buggy department to show up a gasoline engine forgets buggies on the instant to become an engine specialist, providing he only has the qualities which characterize one line of engines to untangle. If he had to pick up the details of the entire engine business, to contend with the contentions of competitive lines the chances are that he would become more of a blundering idiot than anything else.

It is not an impossible strain on the mind to pass from the buggy to the engine business, but to as readily master all the details of the business as one must do in showing up the advantages of one engine over another is too much of a specialist's knowledge to augur well for the management of the building trade department, the stove room, lock counter and the many other lines that make up the store life of the salesman for a day.

MECHANICAL TIME RECORDERS.

To fill the continued and increasing demand for an instrument which makes a graphic record of variations and the time of such variations, of mechanical movements. The Bristol Company, Waterbury, Conn., have placed on the market the instrument illustrated in Fig. 171, to which they have given the name Mechanical Time Recorder. A circular chart revolves by clockwork at uniform speed, while the pen moves over the chart an amount proportional to the motion to be recorded.

MECHANICAL TIME RECORDER FIG. 171.

The chart is 8 inches in diameter, being the same size as on the well known Standard Bristol Gauges. Clock movements can be supplied for complete revolution of chart once in 15 minutes, 1 hour, 2 hours, 3 hours, 4 hours, 6 hours, 8 hours, 10 hours, 12 hours, 24 hours or 7 days. Thus it will be seen that the speed may be selected to give best results under all commercial requirements. The pen arm is rigidly attached at its lower end to a shaft which is turned by a short arm projecting through a slot in bottom of the case. The lever shown in the cut projecting to the right is clamped to the short arm by a thumb nut. Special attention is called to the fact that this lever is adjustable and can be clamped to the arm at any convenient angle.

The motion to be recorded after being properly reduced, if necessary, is imparted to the lever which in turn transmits to the pen. The total scale on the chart is usually taken proportional to the total motion to be recorded. Reduced motion, if necessary can easily be arranged by the aid of pulleys, levers or other reducing devices. Fine adjustments can readily be made by applying the motion at the proper point along the lever, and to facilitate this, a metal attaching piece is provided, which is adjustable on the lever arm and secured in any position by thumb nut. It will readily be seen that by the aid of the adjustable lever arm and the adjustable slide on the arm, the instrument is most conveniently adapted to record motions of all amounts and directions. Total deflection of the pen is obtained by turning the lever through an angle of about 21 degrees or five inch motion at its outer end.

This instrument can readily be used to record the rate of motion and position of sluice gates, turbine or engine governors, gate valves, etc. It is also adapted for recording the rise and fall of liquids in tanks, rivers, reservoirs and fore bay. In the gas industry it can be used to check up the operators and thus prevent the "blowing" of the holders either day or night. Its applications are, however, so many and varied that it is difficult to mention them, even for a single industry. Any further information desired will be furnished by the manufacturers on application.

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED OCTOBER 22, 1906.

413,159. AUGER. J. Bailey, Wilmington, Ohio.
413,178. COMBINED SCRATCH AND BIT GAUGE. E. E. Doe, Mount Tom, Mass.
413,180. COMBINATION TOOL. E. D. Ely, Canton, Ohio.
413,209. MOP WRINGER. S. H. Schmuck, Cleveland, Ohio.
413,298. LATCH HINGE. E. E. DeKalb, Syracuse, N. Y.
413,316. ATTACHMENT FOR AUGERS. W. J. M. Dobson, Brooklyn, N. Y.

PATENTS ISSUED OCTOBER 23, 1906.

833,734. SCREEN DOOR HINGE. J. Diehl, Sheboygan, Wis.
833,767. SAFETY RAZOR. F. H. Arnold, Reading, Pa.
833,865. WRENCH. W. A. Beason, Ashville, Ala.
833,949. WAGON JACK. J. F. White, Bloomington, Ill.
833,980. WAGON JACK. C. P. Sester, Peoria, Ill.
833,996. LAWN MOWER. G. H. Bryan, Plankinton, S. D.
834,022. RAZOR BLADE HOLDER. H. S. Phillips, Meadville, Pa.

PATENTS EXPIRED OCTOBER 29, 1906.

413,653. HEATING STOVE. G. F. Filley, St. Louis, Mo.
413,659. SASH FASTENER. F. Graburn, Winnipeg, Man., Can.
413,663. LIFTING JACK. J. W. Kawkins, Kent, Ohio.
413,677. WHEELBARROW. J. W. Maloy, Marietta, Ga.
413,725. LEMON SQUEEZER. N. Levy, Auburn, N. Y.
413,794. LOCK. C. M. Stiner, New York, N. Y.
413,799. PADLOCK. J. B. Amwake, Lancaster, Pa.
413,817. WASHING MACHINE. D. B. Wagner, Carey, Ohio.
413,821. WASHING MACHINE. E. Churchill, Tulare, Cal.

PATENTS ISSUED OCTOBER 30, 1906.

834,242. WRENCH. J. Anderson, Portland, Conn.
834,295. WIRE STRETCHER. T. A. Haldeman, Concordia, Kans.
834,312. WRENCH. J. McLean, Boston, Mass.
834,313. SELF HEATING SOLDERING IRON. R. W. Marvell, Baltimore, Md.
834,338. NIGHT LATCH MECHANISM. H. P. Townsend, New Britain, Conn.
834,347. TUBULAR LANTERN. A. W. Walter, Canton, Ohio.
834,353. SAFETY RAZOR. F. H. Arnold, Reading, Pa.
834,370. WASHING MACHINE. C. A. Dodge, Syracuse, N. Y.

PATENTS EXPIRED NOVEMBER 5, 1906.

414,189. MOP WRINGER. A. M. Burnham, Gardiner, Me.
414,261. PERMUTATION LOCK. E. C. Smith, New York, N. Y.
414,262. WASHING MACHINE. E. P. Snyder, Stroudsburg, Pa.
414,357. SCREW CUTTING TOOL. J. E. Woodbridge, Hartford, Conn.
414,363. DINNER PAIL. C. H. Bailey, Rock Island, Quebec, Can.
414,367. DOOR SPRING. E. F. Baude, Cincinnati, Ohio.
414,381. PERMUTATION LOCK. G. M. Douglass, Benedict, Neb.

PATENTS ISSUED NOVEMBER 6, 1906.

834,886. SASH LIFT AND LOCK. W. J. Byrnes, Sacramento, Cal.
834,917. KEYLESS PADLOCK. C. Liaci, New Haven, Conn.
834,920. PIPE WRENCH. C. L. Mahnicke, Columbus, Ohio.
834,941. BENDING TOOL. J. A. Staples, Newburgh, N. Y.
834,967. ATTACHMENT FOR SCREEN DOORS. A. J. Carlson and H. S. Juve, Baltic, S. D.
835,036. LAMP AND LANTERN HOLDER. W. N. Roberts and H. B. Matthews, Ansonia, Ohio.
835,060. DISH WASHING MACHINE. C. W. Donnell, Grand, Okla.
835,071. WRENCH. H. C. Land, Altman, Texas
835,125. AUGER BIT. A. N. Webb, Youngsville, Pa.

♣

"Once," said Senator Pettus, of Alabama, "when I was spending an evening at the home of a friend in Selma, as we sat in the dining room we heard such a dreadful scratching sound from the direction of the kitchen.

"'Martha!' called my host to the cook, 'what is that scratching noise? Is it the dog trying to get in?'

"'Huh!' said Martha, 'no indeedy! Dat's no dawg a-scratchin' de do.' Dat's de cook a-writin a love lettah to her honeysuckle!'"

Trade Meetings

NEW YORK STATE RETAIL HARDWARE ASSOCIATION.

At a meeting of the New York State Association of Retail Hardware Dealers held recently in Syracuse, it was decided to hold the next annual convention in that city, the sessions to continue over four days, from February 19 to February 22. They have engaged the Alhambra Music Hall for their headquarters, and propose to hold in connection with the meeting an exhibition, renting space to all manufacturers and jobbers who desire to make exhibits at that time. The committee who have the exhibition in hand will be announced later. The officers are now arranging the programme. Mr. John B. Foley of Syracuse is secretary. The hall provided is 75x123 feet in dimensions, so there will be accommodation for many exhibits.

WISCONSIN RETAIL HARDWARE ASSOCIATION.

The secretary writes: Our Eleventh Convention will meet February 6, 7 and 8, 1907, at the Public Service Building in Milwaukee, and hold sessions in the forenoon only of each day, and in this way members will have a part of each day to visit their jobbers, see the sights, etc., and we think it will result in an almost total attendance of all members in the city. The exhibit feature in charge of the local Association will be held under the same roof, on the floor below, right in the heart of the city. Everything points to a very large attendance. The insurance feature is growing nicely, having written $1,000,000 so far in 1906, or $220,000 more than all we wrote in 1905, with an expense account of less than 13 per cent. Losses paid this year number only 11, and total less than $10,000."

C. A. Peck, *Secy.-Tres.*
Berlin, Wis.

ILLINOIS RETAIL HARDWARE ASSOCIATION.

The secretary writes: "Our next convention will be held in Chicago, February 13, 14 and 15, 1907, in the Coliseum on Wabash Avenue. In connection therewith will be an exhibition of Hardware, for which the space is nearly all taken. G. R. Lott, 1002 West Lake Street, Chicago, is manager of the Hardware Exhibit for the Association, and he states that manufacturers and jobbers are preparing one of the best Hardware exhibits ever shown anywhere. The Illinois Retail Hardware Association was never in a more prosperous condition, with its nearly 1,000 members, and an enthusiastic harmony."

L. D. Nish, *Secretary.*
Elgin, Ill.

THE RETAIL HARDWARE ASSOCIATION OF THE CAROLINAS.

On the recent canvass of the secretary through North and South Carolina the movement to combine the two States into one strong organization was met with enthusiastic support, and the Retail Hardware Association of the Carolinas is now an accomplished fact. At the last meeting of the South Carolina dealers at Columbia, S. C., last June, a resolution was adopted authorizing the secretary to make this canvass in North Carolina to effect this combination of the two States, and the necessary membership was soon secured in a visit to only a few of the towns in North Carolina. A general canvass of the entire State is now being made at this time, as the next meeting of the Association will probably be held in some town in North Carolina, and a strong effort will be made to have all the North Carolina dealers attend this meeting at which time we expect large accessions to our membership from that State. The membership in South Carolina now embraces 75 per cent. of all the dealers in that State. As yet we have no State Mutual Fire Insurance Company, but an institution of this kind is in the course of formation among our members at the present time, and we hope to have it in operation inside of a year. In the meantime some of the already established mutuals are writing fire insurance for the members in North and South Carolina, and mutual insurance is growing in popularity, the saving therefrom enabling the dealers to carry their stocks more fully protected against fire. The most complaints that we hear of are: The small jobber selling to the consuming trade, and the large jobber selling to every cross-roads store; which trade ought to let alone to supply itself from the larger retailers. These conditions can almost always be corrected amicably, when brought up in the proper light before the jobber. All are alive to the menace offered to the retail interests in the postal measures for the government to transport merchandise at a loss, and we shall continue to exercise our influence against it. Better harmony exists between competitors, in the same towns, than for many years. Our industries are in a very prosperous condition, money is plentiful, and our dealers are exerting themselves to gain business by giving better service rather than by cutting prices. All the available water power, in which this section abounds, is being developed, and the electric current therefrom is being transmitted to the towns for running the factories and lighting the streets and houses.

Paul W. McLure, Secretary.
Greenwood, S. C.

NORTH DAKOTA RETAIL HARDWARE ASSOCIATION.

The secretary writes in regard to the next Convention: "The dates decided upon are February 5, 6 and 7. The city of Minot has been selected for the meeting, and the Hotel Leeland as headquarters for dealers. As this State is strictly an agricultural State, the Implement Dealers organization is a very strong one, and as many of our members are also implement dealers, it has been thought that it would be quite an advantage to have both the Conventions meet in the same town. Their meeting follows ours, so that members in attendance can have an opportunity of attending both. This organization in the past has never held its meeting in any other town than Grand Forks or Fargo, but we believe this next meeting is going to be one of the best we have ever held, and particularly one of the largest attended, as the city of Minot is in the center of one of the thickest populated portions of the State, the country having a population between 35,000 and 40,000, and as there have been so many new stocks of Hardware put in the western part of the State during the last few years, it naturally would have a tendency to make the attendance of the meeting larger."

C. N. Barnes, *Secretary,*
Grand Forks, N. D.

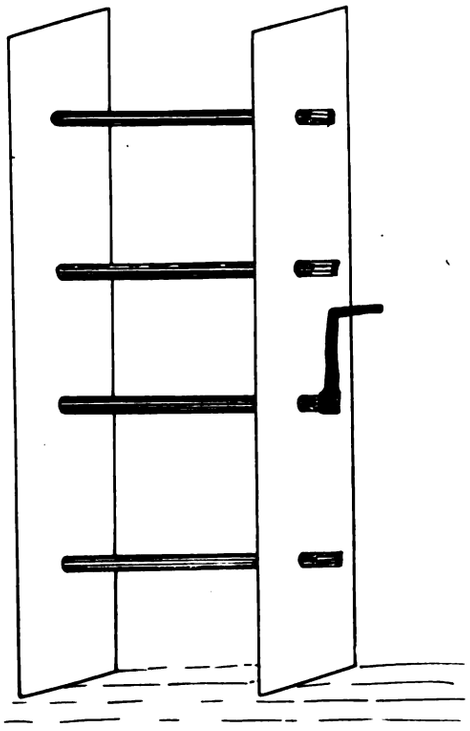
IOWA RETAIL HARDWARE ASSOCIATION.

The Ninth Annual Convention of the Iowa Retail Hardware Association will be held at Des Moines, Iowa, February 19, 20, 21 and 22. The sessions of the Association will be held in an auditorium of the Christian Church, and the Hardware Exposition, to be held in connection with the convention, will be held in the same locality in the Shrine Temple. The morning and evening of each day will be devoted to the exhibit features of the convention, and the afternoon of each day will be devoted to sessions of the Association proper. This division of time is made in order to prevent any conflict between the two features of the Association. During the sessions of the convention, the exhibits will be entirely closed, and during the open sessions of the exhibit the convention proper will not be in session. By extending the time of the convention one day, ample time will be given for all features of the Association. The Shrine Temple, in which the exhibit feature will be displayed, is a building perfectly adapted to the purposes of a Hardware Exposition, and it is expected that this part of the convention will attract a very large number of people who have never yet attended the Association meetings. The committee in charge of the details of the convention have decided to cut out the souvenir programme, but will issue an Official Gazette, at the close of the convention. This publication will contain the complete proceedings of the Ninth Annual Convention, from the official stenographer's notes, with reproductions of all papers, addresses and resolutions presented at the meetings. An elaborate programme of the convention will be mailed as usual, but without any of the advertising features that usually accompany these publications. The board of directors and executive committee of the Association have spent much time and labor in planning the details of the Ninth Annual Convention, to the end that every live Hardwareman in the State may feel an interest in being present, or being represented at the 1907 meeting of the Association.

A. R. Sale, Secy.-Treas.,
Mason City, Iowa.

ONLY MISPLACED ENERGY.

A father, fearing an earthquake in the region of his home, sent his two boys to a distant friend until the peril should be over. A few weeks after, the father received this letter from his friend:



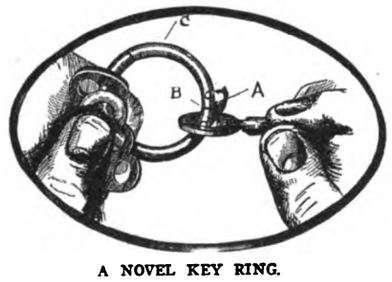
"Please take your boys home, and send down the earthquake."

Digitized by Google

A HANDY ROPE REEL.

By B. A. Chambeau.

The sketch accompanying is of a rope reel made and used by Alex. Feragen, the Hardwareman at Ogdensburg, Wis. The reel is made by boring holes in two upright boards fastened



A HANDY ROPE REEL.

against the wall, and running through them round wooden rods. The latter are squared at one end to fit an iron handle which Mr. Feragen had made at a cost of a few cents at the blacksmith shop. Mr. Feragen told the writer that he found the reel a very convenient article. It keeps the rope up out of the way, and keeps it from tangling when measuring off.

A NOVEL KEY RING.

The trade will soon be shown a most interesting and practical Key Ring. This subject is one of interest to all Hardwaremen, and of course it is desirable to keep pace with the newest devices in this line. The key ring we refer to is the "Morden." It enables one to lock keys on securely and quickly, has no projecting corners or springs to catch in the pocket, and is made on good mechanical lines. A Practical Locking Key Ring is a subject which has engaged the thought of many inventors, and many thousands of dollars have been expended in experimental work,

A NOVEL KEY RING.

but it has remained for the Morden Mfg. Corporation, of Waterbury, Conn., to produce a Key Ring which well merits careful examination. The Morden Mfg. Corporation, Waterbury, Conn., claims that the majority of Key Rings marketed heretofore have been either too bulky, too expensive, or too poorly made, and that the combined qualities of secure fastening and instant adjustment shown in the "Morden" Key Ring are almost unknown. To open the ring the inner projecting edge of the flat latch A is pushed outward, as represented in the illustration. This will expose a little point, under which the finger nail can be slipped and the latch lifted until it clears the joint B, when the gate part of swivel C should be swung to one side. Keys may then be put on or removed instantly, saving time, fingers and annoyance.

"AUTOBRAKE" STEEL RANGES.

Cook & Van Evera Co., 38-40 E. Lake Street, Chicago, Ill., are the manufacturers of the popular "trade mark" line of ranges sold under this name.

Bodies are heavy Wellsville polished blue steel and lined with asbestos. Oven plates are very heavy, bottom oven plate has cross strips riveted on under side to prevent buckling. There is no part of the steel exposed to the fire. Duplex grate for coal, and when reversed is adapted for wood; grate can be removed through the front without disturbing any part of fire box. Air space in fire box admits proper amount of hot air to the flame at the point of combustion, therefore burns the coal gas, which gives best and economical results for both cooking and baking.

"AUTOBRAKE" STEEL RANGE.

Lining is cast in sections, corrugated and curved and surrounded by air space, therefore very durable. Grate rest and lining rest are portable, cast separate, and durable. Extended fire box for wood, makes fire box 25 inches long. Rear flue or soot pocket is all cast. Ash pan is large, and funnel ash chutes above same force ashes to drop into ash pan. Main top has three interchangeable anchor plates, each containing two griddle covers. Direct damper is easily operated, and can be replaced without dismounting any parts of range. All joints are closely mounted; dampers, flues and fire box properly proportioned and constructed to insure combustion and distribute heat evenly, where same will do most good.

Reservoir is cast enameled and encased in all cast iron frame. Bottom of reservoir casing frame is depressed and much lower in the center than on the edges, therefore will hold and evaporate any water that may form from condensation, or sweat from the reservoir. This is a most desirable feature ever made, as it prevents moisture from coming in contact with joints, where steel and reservoir frame bolt together. Autobrake Steel Ranges are sheet flue construction. Design, mounting and nickeling of this range is first-class in every respect.

RECENT TRADE PUBLICATIONS.

American Tap and Die Co., Greenfield, Mass. 1906 catalogue of Factory No. 1, succeeding Nichols Bros., cutlers. The catalogue is devoted to a line of Edge Tools, including Butcher Knives, Cleavers, Ham Stringers and Tryers, Kitchen Saws, Fish and Miscellaneous Knives, Pot Forks, Roast Beef Tyers, Ship Scrapers, Steels, etc. While Nichols Bros. have sold their business to the American Tap and Die Co., there will be no change in the management of the Butcher Tool Department, as a separate new factory was built last season by the latter company, adjoining Nichols Bros.' old works, where fine threading tools are made. The catalogue is a very complete one of everything pertaining to Edge Tools, and should be sent for by the dealer.

H. H. Mayhew Co., Shelburne Falls, Mass. Catalogue No. 12 of High Grade Tools, in which will be found descriptions and illustrations of Screw Drivers, Plain, Ball-Bearing and Combination; Machinists', Pocket and Brace Screw Drivers; Plain and Ratchet Braces; Glass Cutters, Gauges and Squares, Tack Claws, Bits, Brace Drills, Gimlets, Countersinks, Punches, Nail Sets, Reamers, Ice Picks, Scratch and Ice Awls, Rifflers, etc. Prices accompany the same. This catalogue may be had upon application.

RECENT TRADE PUBLICATIONS.

McKinney Mfg. Co., Pittsburg, Pa. Price list and Catalogue No. 34, including Butts of every description, Strap and T Hinges, Hinge Hasps and Staples, Swivel Padlock Staples, Grate Hinges and Hasps, Screw Hook and Eye Hinges, End Gate, Washing Machine, Dress Suit Case, Trunk, Folding Bed and Link Hinges; Sash Lifts, Drawer Pulls, Door Hangers, Stay Rollers, Shelf Brackets, Steel Washers, Trucks, etc. The company call special attention to their new system of Class Numbers by means of which the number applied to each line in bright steel is also used as the base for numbers of same line in other finishes. This has made the re-numbering of a few of the lines unavoidable, but wherever a change has been made the old number has not been given to any other line.

Reading Hardware Co., Reading, Pa., with New York office at 96-98 Reade Street, have favored us with their catalogue and price list of Reading Lawn Mowers. In a prefatory note the company say: "'Since issuing our pamphlet of Mowers in 1905, showing the Reading Ball-Bearing, Peerless and Century Machines, we have added the National, Monarch, Quality, Sterling, Keystone and Junior. Our line is complete as to patterns, styles and sizes. The success of the Reading Ball-Bearing and Peerless has been most satisfactory, and owing to the largely increased demand for our Mowers and the additions to same, we were compelled to take this department from our Builders' Hardware plant and provide separate factories, fully equipped for the manufacture of Lawn Mowers on a large scale."

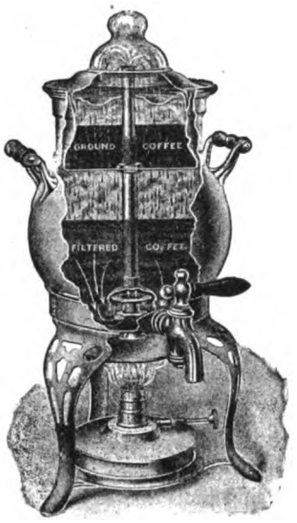
Norvell-Shapleigh Hardware Co., St. Louis, Mo., are sending out their Christmas Catalogue, containing 160 pages of goods that are especially adapted to the holiday season. The company say of this catalogue: "We have gotten out this catalogue for the purpose of interesting the Hardware dealer in the sale of Christmas goods. Usually from the 15th of December to the 15th of January, the Hardware dealer is sitting around in his store with nothing to do while the drug store, stationer, notion shop, etc., are worked to death. This is a condition which we do not think should exist. We believe that the Hardware merchant should be extremely busy during the holiday season, and that he should make a desperate effort to secure some of the holiday trade. People who buy Christmas presents usually have the money to pay for them. This gives the dealer, who sells Christmas goods ready cash to settle all his obligations at the end of the year. Furthermore, this line is very profitable. We believe if the Hardware merchant will devote a little more energy to the sale of Christmas goods, he will be surprised at the sales and profit he can make. This catalogue has been sent to the trade: If we have overlooked any Hardware dealer, will be very glad to forward one upon receipt of his request."

Harrington & Richardson Arms Co., Worcester, Mass. Catalogue No. 9 of Revolvers and Shot Guns. The frontispiece contains a view of their factory and office on Park avenue, Chandler and Abbott streets, and fine half-tone engravings of a large line of Double-action and Hammerless Revolvers is shown; also Vest Pocket Safety Hammer and Young America Safety Hammer Revolvers. Included in the illustrations will be found their Non-Ejecting Single Guns and Automatic Ejecting. A price list of parts is also given. Of their firearms the company say: "Firearms made by the Harrington & Richardson Arms Co. are stamped with their name in full or 'H. & R. Arms Co.,' which is a guarantee of superiority in every detail; a guarantee that the greatest care and watchfulness are exercised in the various processes of manufacture; a guarantee that the best materials the market affords are employed as well as the highest skilled labor; a guarantee that under the perfect system of inspection and expert criticism, defect in the finished product is impossible. Simplicity of construction, perfect safety, absolute reliability in action and superior accuracy are the qualities which characterize the Harrington & Richardson Arms Company firearms. With the proper care they will last a lifetime, and will always be in working order. Firearms should be kept clean and well oiled in order to give the best and longest service. We repair, and furnish parts for, firearms of our manufacture only. When sending same to us for repair or when ordering parts, give explicit instructions by letter as to what you desire, and mark the package plainly with the sender's name and address in full. Harrington & Richardson Arms Company guns and revolvers are sold by all high-class dealers. Should your dealer not carry them write us and your inquiries will have prompt and careful attention."

Jos. Dixon Crucible Co., Jersey City, N. J., have published the tenth edition of "Graphite as a Lubricant" and it is now being distributed to the trade. The subject of lubrication in general, and graphite lubrication in particular, is exhaustively treated. All the good features of the previous edition are retained, but the very latest information—both scientific and practical—that has to do with the subject is added, making it valuable to the student of theory and the man of practice. The publication is arranged and indexed so as to readily enable the reader to find the information he is most interested in. Those who desire to post themselves on better lubrication should secure a copy of "Graphite as a Lubricant" by writing the company at the above address.

O. Lindemann & Co., Nos. 35-37 Wooster St., New York. Catalogue of Japanned, Brass and Tinned Wire Cages for Canaries, Finches, Red Birds, Robins, Mocking Birds, Parrots, Monkeys, Squirrels, Mice, etc. The catalogue contains forty-eight pages and is replete with illustrations of their complete line. The company say: "In issuing this catalogue we would call the attention of our customers to the many new styles of cages we have added to our previous assortment and beg them to order by this latest edition. Using nothing thinner than No. 17 wire for both Brass and Japanned Canary Cages, while the bottoms are also made of heavy material, our customers will receive full value for their money. All Feed Cups for our Canary Cages are provided with an undercut lug, blown or pressed on them. They are placed near the bottom, so that the shells of cracked seeds are not so liable to be scattered beyond the bottom as if the bird was sitting higher up when eating. Cups and perches are furnished with all cages. Our Japanned Cages are painted with Zinc White, trimmed with bright Red, Green or Blue, and are thoroughly baked in a drying room, making the enamel as hard as china. None but the finest colors are used in decorating them. Being the original inventors and patentees of Brass Cages, made without solder, we would state that they are constructed of solid wire rails with holes drilled in them for the upright wires, making them very strong and preventing vermin from breeding in them. They are lacquered with an article of superior quality, to avoid tarnishing in any climate, and may be cleaned with cold water, in the same manner as Japanned Cages. At the same time we would state that these Cages are furnished with Tin Gravel Pans, Brass Tipped Perches and Spring Doors, without extra charge."

Corbin Cabinet Lock Co., New Britain, Conn. Illustrated Catalogue and price list for 1906 of Corbin Padlocks. The frontispiece consists of a view of their immense factories, and included in the contents will be found a large line of Wrought Padlocks, Baggage Fasteners, Pew Locks, Cast Padlocks and Wrought and Cast Padlocks with Corbin Ball-Bearing, Pin-Tumbler Cylinders. Assorted Dog Collar Locks are also shown, as well as Assorted High-Grade Padlocks, Chains, etc. The catalogue is very carefully compiled, printed on an excellent quality of paper, fine half-tones being used, and bound in dark red linen. This company have warehouses at 21 Warren street, New York; 52 North Sixth street, Philadelphia and 107-109 Lake street, Chicago, and the catalogue may be had upon request.



Patterson, Gottfried & Hunter, Ltd., 146-150 Center St., New York, have distributed to the trade a booklet descriptive of their line of Emery Wheels and Grinding and Polishing Machinery. A price list is included in the contents. This company can also supply it short notice Emery Cylinders and Wheels. In a prefatory note the company say: "We are exclusive agents in this territory for the Emery Wheels of the Abrasive Material Company. We have a large stock of Emery Wheels on hand and plan to keep this stock well filled up so we can fill your order from our storehouse. We are also going more extensively into Grinding and Polishing Machinery. We would gladly send you our catalogue on Abrasive Material and Grinding and Polishing Machinery on request." This company are also well-known dealers in Machinery, Metals, Hardware, Tools and Supplies.

NEW GOODS AND SPECIALTIES

"UNIVERSAL" PERCOLATING COFFEE MACHINE.

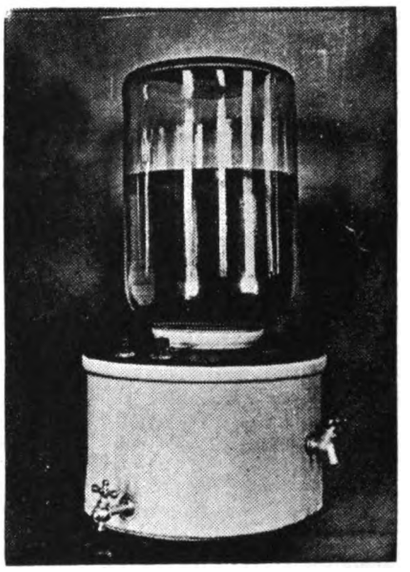
Landers, Frary & Clark, New Britain, Conn., are placing upon the market the "Universal" Percolating Coffee Machine, of which we give an illustration herewith. The body is made of one piece of copper, without any seams or joints, so that there is no possibility of leaking, which is frequently the case with pots that have seams. The whole machine is heavily nickel-plated, and the inside is carefully coated with pure tin. Special attention is called to the new pattern of cup for holding the ground coffee, perforated on the bottom and on the sides, as well as to the spreader plate, by the construction of which the water falls through the little holes uniformly upon the ground coffee. It is so constructed that if there is more water than can be taken care of in this way, the overflow runs over the edge of the spreader plate and out of the holes around the top of the cup

"UNIVERSAL" PERCOLATING COFFEE MACHINE.

back into the Percolator. This percolating apparatus clarifies the coffee perfectly without the use of eggs, and the coffee is claimed to be as clear as wine. The cup and spreader plate, the tube and valve, are all alike made of pure aluminum, which is one of the most sanitary of metals. In all other percolators the water must be boiling before it begins to come through the tube. In the "Universal" the action of the automatic pump forces the water through the tube while it is only luke-warm. As the water is gradually heated, the percolating process goes on all the time, the wholesome qualities of the coffee are extracted, and by the time the water has reached the boiling point, which seems necessary to bring out the flavor and aroma, the coffe is ready to serve. It is claimed that coffee made with the "Universal" is a healthful, aromatic and invigorating beverage, and the manufacturers refer to a very important point in connection with the machine, that of making coffee on the table. As a general rule people associate table machines with after-dinner coffee, because they operate so slowly. Pure, wholesome, nutritious coffee can be made with the "Universal" for any occasion, because it operates quickly.

DANA MOP WRINGER.

Dana Mfg. Co., Cincinnati, Ohio, are the manufacturers of the Dana Mop Wringer, which has been brought to the notice of the public through advertisements in all the leading periodicals of accredited circulation, and which is illustrated herewith. Among the numerous advantages which is claimed for it over other mop wringers is the fact that it will wring the mop without wetting the hands and without requiring any stooping over. It wrings the mop so easily that any one can operate. It operates by spring pressure, not with foot pressure. It allows the operator to stand in a natural position, with feet resting firmly on the floor. It always wrings. It has also an extra strong bucket. It will not leak. It has no platform to add weight, and make it clumsy to work with. It is compact and convenient. It is claimed that the Dana Mop Wringer is the wringer that is more widely known



DANA MOP WRINGER.

than any other for the reasons set forth in the early part of this article, and that the dealer can sell it more readily on that account than any other mop wringer made. It has only to be known to become popular.

SANITARY SPRING WATER COOLER.

Fulper Pottery Co., Flemington, N. J., are the manufacturers of the improved Sanitary Spring Water Cooler, of which we give an illustration herewith. Among the advantages claimed for this cooler over other water coolers are the following: It is made all in one piece, overcoming the necessity of complicated

SANITARY SPRING WATER COOLER.

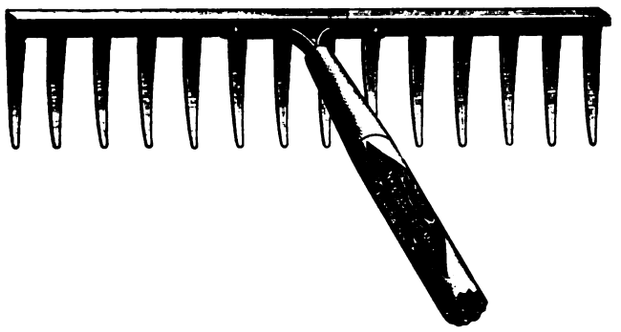
faucet, coil of pipes, etc. It has large space for chilled water, so that several glasses can be drawn off without materially affecting the temperature. All the material of which it is composed is lasting and sanitary, not affected by age, dampness nor handling. These jars are made in three sizes to accommodate 1, 2 and 5 gallon bottles.

NO. 1489 KEYHOLE SAW.

Bridgeport Hardware Mfg. Co., Bridgeport, Conn., are the manufacturers of the No. 1489 Keyhole Saw, which we illustrate. It has a handle stamped from cold-rolled steel and said to be unbreakable. The ball-shaped end of the handle is a novel feature which will be appreciated by any mechanic, as it fits into the palm of the hand and doesn't chafe it. In fact, it gives an individuality to the tool, and makes it a very attractive one in

Digitized by Google

consequence. The Handle is constructed of steel, gun-metal finish, and combines a wrench for ¼ and ⅜ nuts. The blade is 7 inches long, made of cast steel carefully tempered and

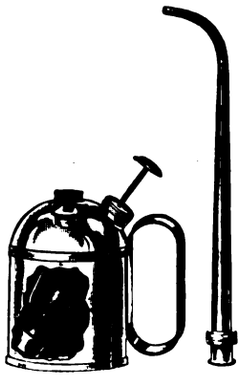


NO. 1489 KEYHOLE SAW.

polished, and is claimed to be first class in every resp ct. The special clamp attachment for holding the blade in the handle is a distinctive feature of this tool, furnishing the means of locking the blade securely, or of releasing and removing it instantly, if desired. The Saws are packed one dozen in a box, and three gross in a case.

"IDEAL" GARDEN RAKE.

Cronk & Carrier Mfg. Co., Elmira, N. Y., are placing upon the market a new Garden Rake, which they call the "Ideal." The head is made from high-carbon channel steel, the flange reinforcing the head, making it very rigid. The teeth are slight-

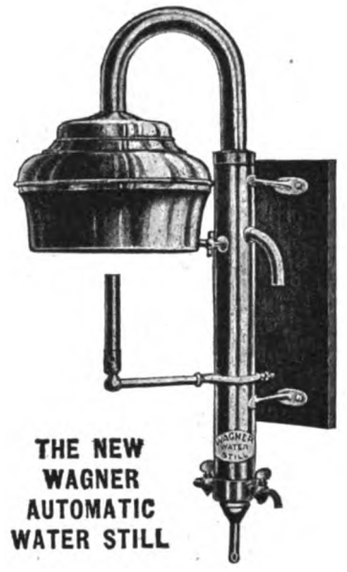


"IDEAL" GARDEN RAKE.

ly curved and the back of the rake is straight and smooth, making it very handy for use as a stable rake or for smoothing off gardens, etc. The rake is made in 12, 14 and 16 teeth, which weigh from 30 to 32 pounds to the dozen.

HOWLAND PUMP OILER.

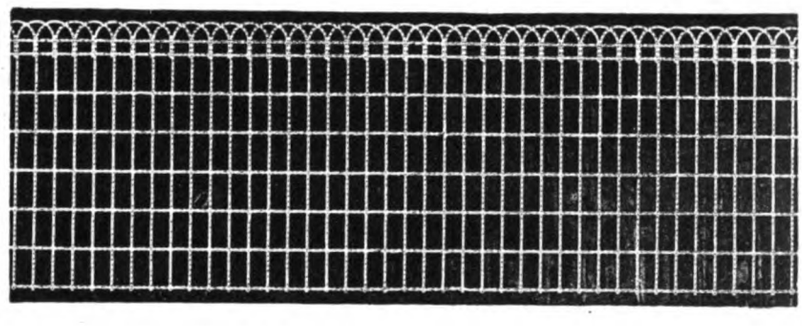
Maple City Mfg. Co., Monmouth, Ill., are the manufacturers of the Howland Pump Oiler, which is designed especially for oiling machinery with overhead bearings and all places not easily accessible with a common oiler. It will deliver oil when held in any position by applying a slight pressure to the plunger. It is made with solid or detachable spout, the latter connection be-



HOWLAND PUMP OILER.

ing made by means of a union, as illustrated in the cut herewith. The cut shows the construction of the detachable spout oiler. These oilers are made in tin, copper-plated tin and in solid brass, the manufacturers making each of them in four sizes. These oilers are made of the very best material, and the manufacturers also make a full line of oilers, including a valve can, pour cans, spring bottom and mowing machine cans.

THE WAGNER WATER STILL.



The Wagner Water Still Co., 87-89 Washington Street, Chicago, Ill., are the manufacturers of the Wagner Water Still, which we illustrate herewith, being the most recently patented Still on the market, having been patented April 24, 1906. This Still is entirely automatic, and operates continuously by simply

turning on the water and gas supply. It is claimed to supersede all other Stills in its construction, ease of taking apart and adaptability to the wants of particular people. Distilled water is delivered by this Still, cold, aerated and absolutely pure, direct from the apparatus; and the Still is claimed to be the only automatic Still ever offered where the boiling chamber can be instantly detached for cleaning purposes. It is made of copper, nickel-plated, and has a capacity according to size of ½, 1, 1½ and 2 gallons per hour. The company also manufacture Steam Stills of 100 to 1,000 gallons daily capacity.

CYCLONE ORNAMENTAL FENCE.

The Cyclone Woven Wire Fence Co., Waukegan, Ill., are manufacturing a style of fencing by which the ornamental fabric is made by cabling the wires together, and at intervals inserting crimped wire pickets, reversing the twist of each cable on each picket. It is claimed that this form of construction makes an immovable joint at each intersection, and takes care of the question of expansion and contraction. At the same time this combination of pickets with twisted strands makes an ornamental fence that is unique and original. Their Style "L," extra fabric, which we illustrate, has the two top cables close together. These hold

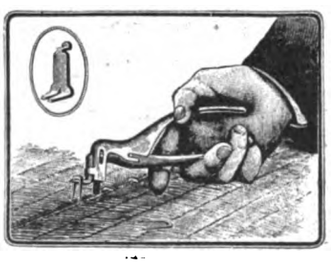
CYCLONE ORNAMENTAL FENCE.

the ornament in shape by engaging the double stay with two cables, add to the beauty of the design and double the strength of the top. It is constructed of No. 12½ wire, 6 inches apart, crimped pickets No. 9, 3 inches apart, and all heights, from 24 to 70 inches, are carried in stock in 15 and 20 rod rolls. They make a number of styles and of different widths represented in catalogue, which may be had for the asking.

Digitized by Google

GENERAL SPECIALTY CO.'S NOVELTIES.

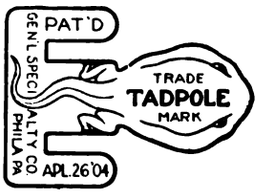
The General Specialty Company, Philadelphia, Pa., have a line of profitable selling specialties, among which are several novelties worth considering by the Hardware trade, the latest of which is the Tipso Mirror, a combination shaving and toilet mirror, which strikes the average person as being by far the handiest ever devised. It is an oval mirror of French plate, bevelled and handsomely mounted in metal. It can be adjusted,



TIPSO MIRROR.

by a touch, in any direction, at any angle, so as always to get the best light on the fact. Each mirror has a heavy ball fixture for screwing into the window frame or wood-work near any convenient light, day or night. For household use or traveling the Tipso Mirror will be found a very convenient accessory to toilet facilities. The company also manufacture a durable advertising novelty with which to attract trade and "hammer home" a firm name and trademark. This requirement is being met ex-

KANGAROO TRICK LOCK.



actly by the Kangaroo Trick Lock. This trick lock is a catchy, amusing puzzle; it can be bought in quantity at a very low price, and it gives a good and lasting display to the advertising, stamped by means of a steel die upon the face of the padlock. From its nature the Kangaroo Lock is particularly adapted for Hardware advertising.

BI-PED TACK PULLER.

The Bi-Ped Tack Puller, an original novelty success of theirs, has become a staple in the trade, being called for in preference to the old-style tack claw wherever it has been introduced. Its separate foot for pulling matting tacks alone would make it a valuable article, as it is claimed by the makers, there is nothing else on the market which will take its place for this work.

An improvement is announced in the Tadpole Paper Fastener, made by the same concern, this fastener being now made of steel instead of brass, making a stiffer, firmer fastener, and at the same time permitting a reduction in the price to a popular figure which will undoubtedly widely extend the use of this popular

TADPOLE PAPER FASTENER.

fastener. The Tadpole occupies a field that is all its own, not in competition with any of the numerous paper fasteners on the market. It holds two sheets of paper as securely as twenty.

Lively advertising matter is supplied to the trade with all of the General Specialty Co.'s specialties and enterprising dealers who want a look ahead can learn of more new things ready for the market by getting in touch with this progressive company. Their office has recently moved to their new factory building, Tenth Street and Susquehanna Avenue, Philadelphia.

O. K. ICE CREEPER.

Norlund & Co., Williamsport, Pa., are the patentees and manufacturers of the O. K. Ice Creeper, which we illustrate herewith. It is an adjustable, detachable creeper, which can be used in the streets, on the roads and in the woods. It possesses many advantages over similar articles on the market, and should not be compared with them. It can be adjusted to fit several size heels,

O. K. ICE CREEPER.

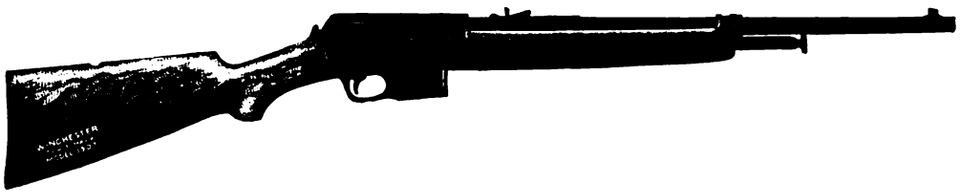
is easily applied and as easily removed as a pair of skates. Is neat in appearance, light and strong, made of good quality steel and properly tempered. It is made in three sizes: No. 0 large, No. 1 medium and No. 2 small. Packed one dozen pairs of a size in a box. The manufacturers furnish a neat, strong pasteboard box for the reception of one pair of O. K. Creepers, for the convenience of the purchaser, and pack one dozen pairs with boxes, assorted sizes, 3 large, 6 medium and 3 small in a box.

NORLUND'S SAFETY HEEL AND BALL PLATE.

Norlund & Co., Williamsport, Pa., are placing upon the market a Lumberman's Safety Heel and Ball Plate, of which we give illustrations herewith. The Heel Plate will not ball up, and is just the plate for lumbermen, as they can be screwed or nailed on the heel quickly; also on lumbermen's rubbers, rubber boots, etc., for which the manufacturers furnish a special wrought iron nail suitable for the purpose, as screws will not hold so well in

HEEL PLATE.

BALL PLATE.



rubbers. This Heel Plate is made of a solid plate of the best quality steel, having calks formed while hot, and warranted not to break or bend. They are made in two sizes and styles, three

Digitized by Google

point and four point, which are Nos. 1 and 2. No. 2 is a trifle smaller than No. 1, and has shorter calks more suitable for lumber yards, etc. The plates are packed in neat and strong pasteboard boxes, one dozen pairs in a box. The Ball Plate also illustrated is made in the same manner as the Safety Heel Plate, but having six turned up calks properly arranged so as to engage any surface upon which one may step and thereby prevent slipping under all circumstances. They have a great advantage in many ways over the common calks in use by lumbermen, because they can be quickly applied to a shoe whether the sole is light or heavy, and easily removed if desired. Like the Heel Plates they can be used on rubber boots and shoes. They do not ball up, a feature well worthy of appreciation, as sticks and chips will not cling to its calks, as is the case with the common calks. The manufacturers claim this feature is worth considering.

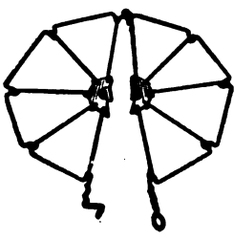
THE NEW WINCHESTER HIGH-POWER MODEL 1907 SELF-LOADING RIFLE.

The great success achieved by the Winchester Model 1905 Self-Loading Rifle, made in .32 and .35 calibers, resulted in many requests for a gun of the same type adapted to a high-power cartridge suitable for big-game hunting. This has led them to offer the New Winchester High-Power Model 1907. This gun shoots a cartridge of .351 caliber, with 180-grain bullet, having a muzzle velocity of 1861 feet per second and a penetration of 26 7/8-inch pine boards when used with metal patched bullets, and 13 7/8-inch pine boards when used with soft-point bullets. Although this cartridge is quite small in size, it is very powerful in execution and can be highly recommended for use in hunting the largest game. It has the Model 1905 self-loading principle, which is very simple and strong, and has demonstrated its absolute positiveness and durability by about two years service in the hands of users. The new rifle is very neat and attractive in appearance, no other on the market having such symmetry, compactness and beauty of outline. It holds six shots, five of which are loaded into the magazine, which is detachable and can be inserted in the gun when the bolt is closed, making it much quicker, safer and handier than those that must be loaded with the bolt down. Extra magazines can be carried, by means of which very rapid and continuous firing can be done. This style of loading won all the competitive prizes at the recent National Matches at Sea Girt. The shell is ejected from the side. There are no moving projections on the outside of the gun to cause trouble and no screws to shake loose. The barrel is stationary like that of any ordinary gun and the sights are attached directly to the barrel. It has a simple take-down device, which allows the gun to separate into two portions, the stock and action being in one part and the barrel and receiver in the other, making it very easy to clean. The rifle has a 20-inch nickel steel barrel and a handsome pistol grip stock, and weighs about 7¾ pounds. It will be ready for the market in the early part of December.

THE NEW WINCHESTER HIGH-POWER MODEL 1907 SELF-LOADING RIFLE.

"QUICK AND EASY" ORANGE KNIFE AND PEELER.

Erie Specialty Co., Erie, Pa., are placing upon the market a new Orange Knife and Peeler with genuine stag handle and nickel-plated blade, which we illustrate herewith. They are made of drop-forged steel, finely nickeled, securely fastened in handle. The orange peel is slitted from point to stem in six or eight sections. Then with back of blade the peel is easily removed. With the point of blade the core or navel can be easily cut out, when orange can be slit open by inserting blade at either end without any waste of juice. They are furnished mounted a half dozen on card or separately. White bone handles come a half dozen in case in two styles. All orders will be filled on card with stag handles unless otherwise ordered.



"QUICK AND EASY" ORANGE KNIFE AND PEELER.

"SOLID COMFORT" HEATING AND COOKING DISC.

The Seed Filter and Mfg. Co., 158½ Chambers Street, New York, are offering the trade the "Solid Comfort" Heating and Cooking Disc, illustrated herewith. This Disc is put on an ordinary gas bracket in place of a gas jet, and in appearance is somewhat like an inverted saucer. This peculiar construction enables the device to radiate the heat downward. It is of steel and substantially constructed. It burns a blue flame with a minimum amount of gas. There is no soot nor smoke. It is furnished in either nickel-plate or open hearth steel finish. It can also be utilized for heating water, for shaving, cooking, making tea, coffee, etc. It also finds use for warming bed and bathrooms. The company are placing on the market a Toasting Attachment, shown herewith, which can be readily put on the Heating Disc. In the center of the attachment is a shoulder, and when the handles of the attachment are closed these shoulders rest on the burner-tube shoulders. The handles of the attachment then spring together, keeping it in place on the burner. The heat of the Disc radiates downward, toasting the bread. From two to four slices of bread can be toasted simultaneously.

WRITE FOR CIRCULAR "A"

Mention "Hardware."

SOME USEFUL RECIPES FOR WINDOW ORNAMENTATION.

By B. A. Chambeau.

The following recipes will come in handy for the man who is looking for some new advertising material. Writing on the show windows is oftentimes more fetching than using the ordinary show cards, and it is a good deal cheaper, when you know how. Pencils for this purpose, with which you may write on the glass as easily as with an ordinary lead pencil on paper, are very easily made. Here are the recipes for several colors:

BLACK.

Lampblack	10 parts
Wax	40 "
Tallow	10 "

Melt the wax and tallow together, and add the lampblack.

WHITE.

Krems white	40 parts
Wax	20 "
Tallow	10 "

Mix as above directed.

LIGHT BLUE.

Light prussian blue	15 parts
Wax	20 "
Tallow	10 "

Mix as above directed.

DARK BLUE.

Prussian blue	15 parts
Wax	15 "
Tallow	10 "

Mix as above directed.

RED.

Zinnabar	20 parts
Wax	20 "
Tallow	20 "

Mix as above directed.

YELLOW.

Chrome yellow	10 parts
Wax	20 "
Tallow	20 "

Mix as above directed.

After preparing the above mixtures, allow them to dry and cool until they are of a consistence that may be pressed, by use of moulds, or even a bread pin and board, into convenient-sized strips or pencils.

LIQUID SLATING FOR BLACKBOARDS.

You can make your own blackboard, as follows:

Into a suitable vessel pour 150 parts of rain water. When it boils add 10 parts of borax, and as soon as this has dissolved, add 40 parts of orange shellac. When this dissolves, pour in, while stirring, 25 parts of finely pulverized pumice stone. Let all boil together a few minutes, and then add 10 parts of lampblack, previously stirred up with enough of the boiling liquid to moisten it thoroughly but not wet it. Stir this long enough to insure its even distribution. Strain the liquid off through a fine sieve, and it is ready to use. It attaches itself to almost any surface, wood, metal, pasteboard, or even an ordinary wall. Apply with a soft, flat brush. Two coats will answer, but three are better. This is a splendid substitute for slate, and, indeed, is superior to all but the very best slates. Use an ordinary crayon or slate pencil for writing on it.

COLORING ELECTRIC LIGHT BULBS.

First mix the white of one egg, previously beaten to a frosting, and one pint of soft water. Strain through a very fine sieve, and make sure that no bubbles remain on the surface of the liquid. The globe should be carefully cleaned and polished, and then dipped into the mixture and hung up on a string to dry. After about half an hour they should be dipped the second time, to insure a perfect coating. When perfectly dry they are ready to be colored. For this, dissolve ten to thirty grains, according to the density of color desired, of any powdered dye in four ounces of collodion. Dip the globes in this and hang up to dry. If not dark enough, after about six hours, when they are dry, dip again. This coating will never crack or peel off. The best container for mixing the fluid is a baking powder or similar can, just a little larger around than the globe. This requires less of the mixture to make enough to cover the globe.

OUR CANADIAN LETTER.

(*Concluded.*)

McLean & Sterling have purchased the Hardware business of the Souris Hardware Company, Souris, Man.

The Canadian Rubber Company, Montreal, have purchased the plant of the Maple Leaf Rubber Company, Port Dalhousie, Ont.

The Dowswell Manufacturing Company, Hamilton, manufacturers of churns, washing machines, etc., are enlarging their plant.

McGlashan, Clarke & Co.'s new silver-plated cutlery factory at Niagara Falls, Ont., is now in operation.

The Stephens Paint Company, Winnipeg, are erecting a $30,000 warehouse at Calgary, Alberta.

HARD LUCK.

Ella—My face is my fortune.

Stella—It's too bad you can't get your money changed.

OUR CANADIAN LETTER

TORONTO, November 5, 1906.

TO ABOLISH TRAVELERS TAX.

It is understood that legislation will be enacted during the coming winter abolishing the laws imposing taxes on travelers doing business in Quebec, British Columbia and Prince Edward Island. A conference of the heads of the Dominion and all the Provincial governments was held last month and the proposed action arranged, although British Columbia may yet refuse to do as agreed. The repealing of the laws will once again open the doors to all comers and stamp out a petty piece of provincialism out of keeping with the spirit of the age. Quebec's law imposed taxes ranging from $100 to $300 per year, British Columbia, $100 each six months, and Prince Edward Island, $20 per year.

HIGHER TARIFF EXPECTED.

The Dominion government is to meet November 22, two or three months earlier than usual, in order to enact new tariff legislation. It is expected that United States exporters will be further discriminated against to the extent of at least another 5 per cent. added to the tariff wall all round. The obnoxious "dumping clause" is not likely to be interfered with.

LARGE VOLUME OF BUSINESS.

Jobbers report the season's business to date to be by far the greatest in history. Hardly a town in Canada has stood still, building being active everywhere, Toronto and Winnipeg each being millions of dollars ahead of last year's record. Not only builders' Hardware, tools, etc., but every branch of the business has felt a tremendous demand. Higher prices are the rule all along the line, Canadian and American manufacturers being forced to lower their discounts because of the big advances made in the metal markets. Hardly any line of goods has been exempt from the changes in quotations, and the trade has been kept busy following the market reports.

OUTLOOK FOR HOLIDAY TRADE.

As all sections of the community are extremely busy at fair wages the trade is looking forward to one of the most satisfactory holiday seasons for some years. The farmers' crops in Western Canada, as well as in the east, have been eminently satisfactory and collections have been good. An effort was made in Western Canada to adopt a four or six months "close season" during which the Hardware dealers would refuse to grant credit. The attempt was not successful, however, although many individual dealers are working on a strictly cash basis from November to April.

HARDWARE TRADE HAPPENINGS.

President Newman (Caverhill, Learmont & Co.) Montreal, of the Canadian Wholesale Hardware Association; Vice-President Dexter (H. S. Howland & Sons), Toronto; Ex-President Wm. Starke (Starke Hardware Company), Montreal, and Secretary Joseph Hardy, Toronto, represented Canadian jobbers at the recent National Convention at Atlantic City.

Brandram-Henderson, Limited, have been incorporated with a capital stock of $1,750,000 to manufacture white lead, mixed paints, etc., as successors to Henderson & Potts, of Montreal and Halifax.

The Montreal Rolling Mills are to erect a large nut and bolt mill and other additions to their plant. The Peck Rolling Mills, also of Montreal, are also enlarging by putting up a nail and steel goods factory.

The Kendall Bell Co., of St. Louis, are to establish a branch factory at Toronto.

F. C. Graham, of the sporting goods department of Lewis Bros., Montreal, has accepted a position in a retail Hardware store in New York.

Charlton & Wilson are erecting a Hardware store at Haileybury, Ont.

F. W. Gerber has opened a Hardware store at Birch Hill, Sask.

The Blanchite Process Paint Company, composed of Canadians who have secured the Canadian rights to this paint, have secured a large factory in Toronto and will be manufacturing about December 1.

The Sutherland Rifle Sight Company will erect a $20,000 factory at Westville, N. S.

The Sherwin-Williams Paint Co., Montreal, are erecting a linseed oil mill at Montreal and will build another factory at Winnipeg.

Cameron & Campbell, manufacturers of Hardware shelf boxes, Toronto, are to erect an $8,000 factory.

Boulter & Gilmour, Hamilton, have sold their Hardware business to Stanley Mills & Co.

The Fox Saw Tooth Company has been organized at Welsfort, N. S., with a capitalization of $25,000.

L. N. Vanstone, for twelve years on the road for H. S. Howland & Sons, Toronto, is now Ontario sales manager for the Canada Steel Goods Company, Hamilton.

W. J. Monaghan, Weyburn, Sask., G. B. Jamieson, Melfort, Sask., and the Moose Jaw Hardware Company, Moose Jaw, Sask., have been enlarging their store premises.

William Stair's Son & Monow, Halifax, have moved into more commodious quarters for their jobbing and retail Hardware business.

Walter B. Reynolds, formerly a prominent Hardware dealer at Halifax, N. S., died early in October.

Skelling & Jackson, Neepawa, Man., have erected large additions to their Hardware store.

The Mechanics' Supply Company, Quebec, have let contracts for large extensions to their present buildings.

Bernhardt & Gies have purchased the Hardware business of McMurty & Bernhardt, Preston.

The Canada Steel Goods Co., Hamilton, have built a large plating addition to their mill, and will manufacture fancy butt hinges in high-grade finishes, such as old copper, bronze brass, antique brass, dull brass, bower-brass, etc., a class of goods formerly imported for the Canadian trade.

Agar Bros., Edmonton, are erecting a $5,000 Hardware store.

L. Kribs is establishing a Hardware store at Pincher Station, Alberta, J. G. Hooper, one at Arcola, Sask., and John Engelland another at Aberdeen, Sask.

Cluff Bros., Toronto, have purchased a site for a large radiator factory at Toronto.

Work has been commenced on a 120x80 foot extension to the Hardware foundry of the Taylor Forbes Company, Guelph, Ont., already the largest Hardware manufacturers in Canada.

The Canadian Drawn Steel Company, Hamilton, and the Brantford Screw Co., Brantford, are erecting bolt and nut factories.

Toronto has secured its eighth roller skating rink and contracts have been let for one to be erected at Hamilton.

Thos. Dunn, the pioneer Hardware merchant of Vancouver, B. C., is establishing the first Hardware store at Port Rupert, the Pacific terminal of the Grand Trunk Pacific Railway.

James Ashdown, the millionaire Hardware dealer, of Winnipeg, has been asked by the Board of Trade, the Manufacturers' Association, the Trades and Labor Council, and other important organizations of that city, to run for mayor.

Ham & Nott, refrigerator manufacturers, Brantford, are enlarging their plant at a cost of $6,000.

Work has been commenced on the new lead corroding works to be established at Montreal by the Brandram-Henderson Company.

The Dominion Wire Manufacturing Company, Montreal, are putting a novel kitchen hook on the market.

Wilcox Manufacturing Company, London, manufacturers of builders' Hardware, are to enlarge their plant.

The Belleville Rolling Mill has commenced operations after being closed down a year.

Stephen Drew, of the Hobbs Hardware Company, London, has accepted a position in the retail store of Cowan & Co. London.

Arch. McFarlane, Montreal, one of the most successful manufacturers' agents in Canada, was married on October 25th.

The Gillette Safety Razor Company now have their Canadian factory at Montreal in full operation. A. A. Bittners is the Canadian manager.

The Ontario Lead and Wire Company, Toronto, are advertising their wire nail and white lead plants for sale, intending to devote all their attention to plumbing supplies.

Oscar S. Hunter is to establish a Hardware store at Durham, Ont.

The Berlin Electrical Novelties Manufacturing Company have removed from Berlin, Ont., to Toronto.

REVIEW OF THE MARKETS.

WIRE NAILS: Jobbers' stocks on Wire Nails have been kept quite low during the month so far, on account of the customary reasons: shortage of cars and conditions of freight transportation. The slow market for steel causes mills to be in bad shape to deliver promptly, having felt their inability to catch up on orders. The new contracts taken in October gave a bulk of business which makes the month compare with September sales very favorably. The market is exceedingly firm. Quotations are as follows: f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in ten days:

Carloads to jobbers	$1.85
Carload lots to retail merchants	1.90

New York.—An excellent demand characterizes the local market, and the jobbers have been able to get a fair supply of Nails with some degree of promptness. Quotations on small lots from store are on the basis of $2.05 per keg.

CUT NAILS: At the recent meeting of the Cut Nail Association no change was made in the price of Cut Nails. Prompt deliveries by the mills are prevented by transportation delays that have now got to be an old story. A number of sizes are reported as being scarce in the market, and premiums over regular quotations have been paid occasionally to secure prompt deliveries in urgent cases. Quotations are as follows: f.o.b. Pittsburgh; Carload lots, to jobbers, $1.90; less than carload lots to jobbers, $1.95; less than carloads, to retailers, $2.05. Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 5 and 10 cents advance on Steel Cut Nails.

New York.—The scarcity in the local market has not abated, and the scarcity of some sizes has been severely felt. The non-delivery of steel and the slowness with which deliveries are made from mill cause the delay. There is a good demand, and the quotations for small lots from store are made on the basis of $2.05 to $2.10 per keg.

BARB WIRE: The new business is reported as being light, as the season is now growing late. Contract orders supply most of the business that is being done. The market is well maintained with quotations as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in ten days:

Jobbers, carload lots	$2.00	$2.30
Retailers, carload lots	2.05	2.35
Retailers, less than carload lots	2.15	2.45

SMOOTH FENCE WIRE: The mills are still very much behind on orders, the demand for manufacturing purposes being so great. Shortage of steel in many cases, and of cars as well, has made more or less delay in shipments. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in ten days:

Jobbers, carloads	$1.70
Retailers, carloads	1.75

The foregoing prices are for base numbers 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

BRASS BUTTS: A change took place recently in the market for Brass Butts, changing both list and discount, and resulting in an advance of over 15 per cent., attributed to the heavy advances in raw material. A change in list was decided upon largely to meet the views of the jobbing trade. The old list was doubled and a base discount of 50 per cent. was established.

SHEET ZINC: Under date of October 24, Matthiessen & Hegeler Zinc Co., La Salle, Ill., announce the price of Sheet Zinc as $7.90 per 100 lbs. in 600-lb. casks of the thicknesses from Nos. 9 to 22 inclusive, and of the widths from 32 to 58 inches inclusive, and of the lengths from 72 to 96 inches inclusive, delivered f.o.b. cars, La Salle. This price is subject to the usual discounts.

STOVE HOLLOW WARE: An advance of about 5 per cent. on all grades of Stove Hollow Ware has been announced by the principal manufacturers of this line.

SASH WEIGHTS: In consequence of the increased cost of the raw material, the manufacturers' prices on Sash Weights in the Eastern district are represented by the quotation of $28 to $29, with a probability that $30 will be reached in the near future. In the Southern district prices also are higher by the quotation of $22.50 to $25.

COPPER PRODUCTS: The present situation in Copper, the price of Ingot Copper ranging between 22 and 23 cents per pound, cause the present market conditions, which are reflected by the following prices: Soldering Coppers, 27 cents per pound, base, 300 pounds and over; Sheet Copper, 27 cents, base; Brass Seamless Tubes, 25 cents, base; Copper Seamless Tubes, 29 cents, base; Brazed Brass Tubes, 17½ per cent. discount, and Copper Wire, net list. Brass Jack Chain has been advanced to 60 and 5 per cent. discount, Brass Safety Chain 70 per cent. discount.

PROOF COIL CHAIN: Owing to the continued scarcity and higher prices of raw materials the manufacturers of Chain, at a conference held in Pittsburgh recently, decided upon an advance of $3 a ton in prices of Proof Coil Chain. The new prices are as follows for cask lots, f.o.b. Pittsburgh:

	Cents.
3-16 in.	8.10
¼ in.	5.55
5-16 in.	4.65
⅜ in.	4.00
7-16 in.	3.85
½ in.	3.75
9-16 in.	3.70
⅝ and 11-16 in.	3.65
¾ and 13-16 in.	3.55
⅞ and 15-16 and 1 and 1 1-16 in.	3.50
1⅛ and 1¼ in.	3.60

There are the usual extras on Crane Chain, which are 1¼ cents for BB Crane and 1¾ cents for BBB Crane.

ROPE: The following prices may be said to represent the market:

	Cents per Pound.
Pure Manila, 7-16 and larger	12¾ to 13½
B Quality Manila	11¼ to 11¾
Pure Sisal, 7-16 and larger	9¼
No. 2 Sisal, 7-16 and larger	8 to 8¼
No. 1 Jute, ¼ and larger	8 to 8½
No. 2 Jute, ¼ and larger	7½ to 8

Less ¼ cent to the large trade.

LINSEED OIL: The following advanced quotations are announced October 30 on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....41 cents per gallon.
In lots of 5 barrels or more.....40 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Double Boiled Linseed Oil, 2 cents per gallon higher than raw.
Regular Boiled Linseed Oil, 1 cent per gallon higher than raw.
Calcutta Oil .....68 cents per gallon.

THE CLEVELAND TRADE.

We regret that we must anticipate some time in the future a season of decline. It is pleasant to mark up prices when they seem legitimate, beyond that the expected reactions threaten. Manufacturers and jobbers both have attempted to stem the flood but demand for goods have over-weighed their efforts. The poor common people oppressed as the politicians tell us by combinates, rebate and tariff, want the goods for their comfort, and having paid off the mortgages they made under low tariff, when competition was the life of trade—they have the money and insist on having the things they want. The people who think they should be suppressed are about to say so by their ballots, and we shall see what public opinion is. If they succeed in relegating a lot of those fellows to tramps again, the rest will have a chance. If they fail the common herd may control the country. In the meantime everybody is busy, and most of them seem contented.

THE PHILADELPHIA TRADE.

Trade during the month just past has been extremely active; in fact, our volume of business for October having exceeded the best records of any of the Spring months, all of which showed large increases over corresponding periods in previous years, and this, with prices advancing daily, goes to show the enormous demand for merchandise of all kinds for immediate use, as we believe there is practically no speculative buying of any account on the part of the retail dealers throughout our section.

Almost every mail brings notice of some advanced price or a stiffening up of some kind, which means that the jobber is compelled to ask more money for his wares, or else show an actual loss, as in many cases it is impossible to replenish stock at prices ruling a few months ago. This is especially noticeable in the brass or copper line on which the increases have been greater than on any other. Then again a serious difficulty is the inability of manufacturers to supply sufficient quantities to meet the demand as well as delays in transit owing to shortage of cars, so that according to all rules of supply and demand set down by political economists we see no reason why there should be any change for some time to come—and it will be the wise merchant who is not only well covered with contracts, but has sufficient quantity of stock to meet the wants of his trade.

BIDDLE HARDWARE CO.
D. H. Reddie.

THE PITTSBURGH TRADE.

Trade conditions in Pittsburgh continue quite favorable. It was a record month in amount of sales for October, and November starts off at about the same gait.

Old business men wonder at the long continuance of the good times, beginning with 1898, which have now lasted for eight years. Have we discovered how to do business without the disastrous panics of old time, is the question often asked and answered variously. Our impression is that human nature is the same as ever and that the sanguine temperament will grow bolder as the years of prosperity pass. Overtrading will surely bring the usual backset, but when it will come is the question. Meanwhile we are all doing a good business and making hay while the sun shines. LOGAN-GREGG HARDWARE CO.

THE CHICAGO TRADE.

Our business for October shows an increase of twenty per cent. over the trade of September with no signs of an abatement in the demand for seasonable goods. Frosty weather the past week has started a lot of new business in Sheet Iron, Planished Iron Stove Boards, Lanterns, Skates, Elbows, Coal Hods, Axes, Scoops and other Fall and Winter merchandise.

Several of our road salesmen have made record-breaking sales the past thirty days, and they state prospects are first-class for a continuance of good business from now until Christmas.

The advance in Wire Nails, Cut Nails, Sheet Steel, Tin Plate, Wagon Wood Ware, Anvils, Builders' Hardware, Padlocks and similar goods have stimulated trade rather than checked it.

In comparison with one year ago many items in shelf goods have advanced from 15 to 30 cents and yet the trade seem anxious as ever for the goods and require prompt delivery. We have a good stock so that we have been able to ship promptly and anticipate little trouble from shortages of goods, though in some lines manufacturers are several months behind in the better classes of Mechanics' Tools and Builders' Hardware.

WELLS & NELLEGAR CO.
J. B. Nellegar.

THE SAN FRANCISCO TRADE.

Business was never so active as now. The demand for all kinds of Hardware and kindred lines is in excess of the supply. The refugees are gradually getting into homes of their own and the demand for household goods is fully in keeping with that of building Hardware, and I detect, especially among the many newcomers in the retail trade, considerable speculation as to whether the present activity will not soon subside with a portentous death-like thud. A further bearing in this connection is the fact, hoped for by tens of thousands to be only a temporary fact, that but few permanent buildings of Great San Francisco are further advanced than the blue prints. The delay in clearing away the debris has a great deal to do with the slow progress of permanent building. There are some very handsome buildings in course of construction, but only where owners were able to have their grounds cleared, by placing early contracts. There is another serious cause for delay in permanent building, and that is the outlandish wages asked for labor. It is not a matter of right, but nothing more or less than a holdup. Unskilled labor demands more than skilled, and for the latter the union rates are completely ignored. Many of the property owners are refusing to be held up in this manner and are postponing building until such time as the laborer is willing to moderate his demands. Thus it is, and the better sentiment of the community, while it it anxious for a restored San Francisco, is not finding fault with property owners for postponing indefinitely the rebuilding of the city.

The feature of trade organization work during the month just past occurred south of the Tehachapi range of mountains, the dividing line as mapped out several years ago by Southern Californians as the natural boundary line between North and South California, a State division wanted then, I think, more than now. The new organization is named the Southern California Hardware & Implement Association, of which Mr. Humphrey, of the Humphrey-Daggett Hardware Company of Whittier, has been elected president. The association starts off with thirty-three members, and it is the intention to employ a permanent secre-

Digitized by Google

tary and endeavor to secure as members every retail dealer in Southern California. The success in getting these dealers together in organization form is credited largely to the active personal work of the State Association president, C. M. Brown, of Hollister; Mr. Humphrey, Henry Guyot of Los Angeles, F. P. McKay of Santa Ana, J. F. Dostal of Redlands, Mr. Devore of Ocean Park and Mr. George of Santa Barbara. The election of Mr. Humphrey as president is universally thought to be a wise move, as he has a thorough knowledge of association work, having been one of the founders of the Minnesota State Hardware Association, an enthusiastic worker and one who is believed by all eminently qualified to guide the organization to success. The members are: Ott Hardware Co., Santa Barbara; Henry Guyot, Los Angeles; J. F. Dostal, Redlands; F. P. Nickey Hardware Co., Santa Monica; Pasadena Hardware Co., Pasadena; Munroe Hardware Co., Pasadena; Boutelle-McAdams Co., Pasadena; Humphrey-Daggett Hardware Co., Whittier; John McFadden, Santa Ana; Franzen Hardware Co., Riverside; J. G. Hausler, Riverside; George F. Mott, Riverside; McCormick-Ormand Co., Riverside; Sering Hardware Co., Redlands; Redlands Hardware & Stove Co., Redlands; San Bernardino Hardware Co., San Bernardino; American Hardware Co., San Bernardino; A. L. Euny, Colton; Corona Hardware & Implement Co., Corona; Bradley & Russell, Pomona; A. Nagle, Anaheim; L. E. Miller, Anaheim; H. A. Dickel, Anaheim; Bird V. Beebe, Anaheim; Dean Hardware Co., Fullerton; Jewett Blair, Fullerton; F. C. Schilling, 2128 West Pico Street, Los Angeles; H. E. Cockley & Son, 612 West Pico Street, Los Angeles; E. L. Brown, 709 Central Avenue, Los Angeles, and Long Beach Hardware Co., Long Beach.

A representative of the California Promotion Committee, an association that is doing wonders for the State and is materially supported by the Hardware trade, approached the writer this week with the following newspaper clipping, being of the belief that the editor of HARDWARE would give it space in his journal:

"From a telegram just received by the California Promotion Committee it is learned that Harlow N. Higinbotham, president of the Columbian Exposition of Chicago, is heartily in sympathy with the movement to hold a Pacific Ocean Exposition in San Francisco in 1913. Rufus P. Jennings, chairman of the committee, had an hour's conference with Higinbotham, and the latter said that now was the proper time to launch the proposition, to hold the exposition. He thinks there will be a world-wide attendance, and that exhibitors will be greatly interested. By the time the exposition is held San Francisco will have fully recovered from the effects of the recent fire and will in itself be an object lesson to the world of the way things are done in this part of the country." INDUSTRIAL PRESS ASSOCIATION.

HIGH DUTY METAL.

The Western Tube Company, Kewanee Ill., write as follows regarding a new discovery in bronze mixture, known as High Duty Metal:

It is a well-known fact that the copper alloys known as brass and bronze generally suffer a marked reduction in strength with increase of temperature. This loss of strength is not generally taken into account because the deterioration is slow up to a certain point, and this point is above the temperature of steam of air at the usual pressures. At about the temperature of 150 to 175 pounds steam loss begins to be very rapid, and at about 400 deg. F., there is a sudden marked drop in tenacity. From that point to 500 deg. F., the loss is very rapid and the strength of the material is seriously affected.

In designing our new line of Extra Heavy and Medium Pressure Brass Valves, this Company determined to use the metal which would show the smallest percentage of loss in this respect that it was possible to obtain, the same metal to have other qualities which are essential to a valve for use under high pressure.

In endeavoring to secure this metal, an effort was made through the Secretary of the American Society of Mechanical Engineers to collect all of the existing literature upon the subject, and it was discovered that practically all that has been determined on this question is the result of the experiments of the British Admiralty in 1877, as described on page 309 of Kent's Manual. Having found that no further light was to be obtained from past researches, this company inaugurated an exhaustive series of tests with a large number of mixtures of copper, tin, zinc and other metals, with the purpose of determining for itself absolutely the best metal for its purpose.

These experiments have extended through a period of eight months, and the statements made above have been fully corroborated and emphasized. For instance, it was found that an alloy that is commonly in use as steam metal and would be called a fairly good metal for this purpose, showed a drop in tensile strength of as much as 28 per cent. when raised to the temperature of 407 deg. F., which is about the temperature of steam under 250 pounds pressure without superheating. It was assumed that this temperature would be a fair one at which to make tests, inasmuch as engineering practice is tending strongly in these days to the use of steam at about this pressure, or superheated from a lower pressure to this temperature.

Another metal which has been considered an excellent mixture and is frequently used by valve makers for valves of higher grade and designed for higher pressure, showed 22 per cent. loss under the same conditions.

The well-known "government" mixture, as it has been called, consisting of 88 parts of copper, 10 of tin and 2 of zinc, was found to be as little affected by this extraordinary increase of temperature as any alloy which has ever been used, as far as known, in the manufacture of valves. The "government" mixture was found to have an average of a large number of bars tested, a cold tensile strength of 33,633 pounds per square inch. When raised to 40 deg. F. and again tested, the temperature being maintained constant during the test, the tensile strength dropped to 30,675 pounds per square inch, showing a loss of nearly 9 per cent.

We are glad to say that after making all of our experiments, we have arrived at an alloy which is practically of the same tensile strength as the above mixture when cold, as it shows an ultimate strength of 33,520 pounds per square inch at 70 deg. F., and further, it shows an ultimate strength of 31,627 pounds per square inch at 407 deg. F., the loss being only 5.6 per cent.

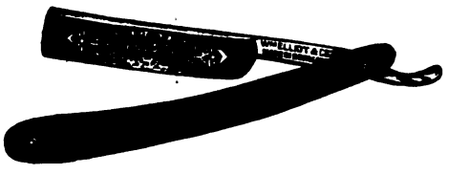
A table is appended which shows in summarized form the results of these experiments upon six different alloys, as follows:

Alloy	Tensile Strength at 70 deg. F.	Tensile Strength at 407 deg. F.	Loss Per Cent.
No. 1	21,790	15,640	28.2
No. 2	29,010	22,410	22.4
No. 3	24,510	22,059	9.5
No. 4	33,633	30,675	8.8
No. 5	33,710	31,305	7.1
No. 6	33,520	31,627	5.6

No. 1 is the steam metal alluded to above and which is in common use among valve manufacturers.

No. 2 is a metal which we ourselves use at times and is fairly strong and durable at comparatively low temperatures.

No. 3 represents one of our earlier experiments illustrating the advance along the line of research, but indicates too low tensile strength.



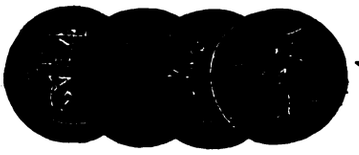
No. 4 is the "government" mixture, so-called.

In addition to the rare quality of maintaining the high tensile strength at high temperatures, this metal also shows wearing qualities which are very remarkable; and as wearing qualities in the moving parts of a valve are of the utmost importance, the "government" mixture was again taken as the unit or standard, and it was found, by means of a special machine in which the movements of the parts of a valve were imitated exactly under extreme conditions of friction and at high temperature, that this metal wore away at about one-third the rate shown by the "government" mixture mentioned above.

This alloy has also been found to be very tough, resisting shock or water hammer with greater success, and is, in fact, far less brittle than any other of the metals tested.

WM. ELLIOT & CO., RAZORS

are made of the finest grade English steel, highly and correctly tempered, hollow ground and concaved, and finished by the most efficient German cutlers



"Elliot" razors are universally considered to be the best razors manufactured and sell strictly upon their merits. *Write for our new catalog. The most comprehensive exclusive razor catalog published.*

HIGH DUTY METAL.

(Concluded from page 38.)

In strength under compression it again showed marked superiority, as the flow of the metal was extremely uniform under high pressures, much more so than any other alloy upon which these tests were made.

Further, and this is very important, this metal makes sound, tight castings. Our tests prove this conclusively, and this quality works to the benefit of the user equally with ourselves.

In every respect, then, this "High Duty" Metal may be said to be the metal par excellence for the manufacture of valves and cocks for extreme temperatures and pressures, and we believe it to be well named.

We are taking this means of announcing that our entire lines of Medium Pressure Brass Valves, designed for pressures ranging between 125 and 175 pounds, and our new line of Extra Heavy Brass Valves, designed for pressures up to 250 pounds, are now and will hereafter be made of this "High Duty" Metal.

We are also prepared to furnish any of our goods now made of our excellent standard brass mixture, made up in this "High Duty" metal, thus giving our customers the advantage of valves having over 40 per cent. greater strength and efficiency in the lighter weights at an advance in cost of about 25 per cent.

In general, we believe that we have discovered a metal whose name is expressive of its substantial merit, and that its use marks a long step in advance in valve construction.

L. & I. J. WHITE CO.'S TOURING EXHIBIT.

L. & I. J. WHITE CO.'S TOURING EXHIBIT.

We present herewith an illustration showing the beautiful Touring Cabinet of Fine Tools which has been prepared by the L. & I. J. White Co., Buffalo, N. Y., for the purpose of exhibiting it at the conventions of the Hardware Associations this Winter, it having already been seen and admired at the National Hardware Association Convention at Atlantic City, N. J., last month. That it gives an excellent idea of the perfect goods turned out by this old-established manufacturing company goes without saying, for they have been making them now for seventy years.

TAKING NO CHANCES.

A Scotchman went to a dentist with a toothache. The dentist told him he would only get relief by having it out.

"Then I must hae gas," said the Scotchman.

While the dentist was getting it ready the Scot began to count his money.

The dentist said, somewhat testily, "You need not pay until the tooth is out."

"I ken that," said the Scotchman, "but as ye're aboot to mak' me unconscious I jist want to see hoo I stan,"—*Ex.*

HUMOROUS LOGIC.

It is understood that when the next jury goes out on a Standard Oil case the court will be asked to exclude hymn books from the jury room.

There is thought to be about Gould enough left in the Countess Boni to cause her to put up a good strong fight to retain the money, at least.

The New York postoffice must now be under control of the "Purity in Politics League." We see a letter carrier has lost his job for accepting a nomination for Congress.

That California professor might as well not put his new language on the market, if there is to be no cuss words. What is the use of learning a language which reduces a man's power of expression.

That Ohio fireman who accidentally swapped his grip for one containing $48,000 in bonds, and never knew he had made the trade until he was arrested, probably wonders what would have happened if he had really known, for, not knowing, he was locked up on a charge of grand larceny.

The newspapers have of late been running items which claim that there are injurious germs in fresh eggs. We suppose the next claim to be made will be that these germs are killed by cold storage. We would almost be ready to accept the statement as true that the eggs are killed that way. They taste like it.

The Presbyterians have been holding a factional church war down in Warrensburg, Mo., which included padlocks on the church door, court proceedings, etc. All souls who need saving will do well to wait the court's decision, so they will be sure to get off with the official starter.

That Kentuckian who recently died and requested that a bottle of whisky be buried with him was evidently looking further in the future than his friends supposed. Some thought it strange no mention was made of a sprig of mint, but it takes ice, also, to make a mint julep.

Charles Roberts, a building contractor of Fargo, N. D., recently parted with his automobile. He left it standing on the street, and a small boy evidently thought it was operated by mule power and that the mule had balked, at least he built a fire under it, and the gasoline tank did the rest.

That report from New Orleans that an island has been found near there where the inhabitants execute their prisoners by binding them to a tree in a swamp and letting the mosquitoes bite them to death, sounds like execution by slow torture, but those who have had personal experience with the Southern mosquito will not agree that the torture could in any way be termed slow.

A newspaper suggests that George B. Cortelyou is a man of destiny, and that one or two more jumps will land him in the presidential chair. Possibly this newspaper is like the Swede girl whose best fellow went on board the ship with her, and stayed too long. As the ship pulled away from the shore she said: "Yump, Olie, Yump! I tank you can make it in two yumps."

F. A. PARKER.

HARDWARE IN HOLLAND.

If the American manufacturer would send able representatives to Holland much would be gained. I learn from interviews with the heads of many principal houses that where ignorance exists concerning American products, there is invariably a desire for information regarding them. Manufacturers who do not deem it practical to send representatives to Holland and are desirous of securing Dutch trade should send catalogues and printed matter to dealers in both the Dutch and English languages. When a retail dealer handles American goods, no matter in how small a way, this advertising matter should be supplemented by show cards for window display.

AGRICULTURAL IMPLEMENTS AND HARDWARE.

A great part of Holland has been reclaimed by draining and so rendered extremely valuable for agricultural purposes; the fertility of land thus reclaimed being very great. The agricultural industry is accordingly large and creates a corresponding market for all implements therein employed. This market is at present principally supplied by Great Britain and Germany, though American farming implements were imported during the year 1905 to the value of $201,819.

American mowers and binders are in good favor and sales for these are gradually increasing. Many of the American manufactured implements are built too light for satisfactory use in Holland. This is especially true of the American hay rake, which is practically useless here as built for domestic trade, the grass in this country growing very coarse and heavy. The English and German manufacturers understanding the conditions of the country build implements suited to its needs. In smaller farming tools the American manufactured articles are well liked and find a ready market in spite of English and German competition. I am informed by a large dealer in Hardware that American stoves and kitchen utensils can find a good market here if only they be strongly constructed and a reasonable price is demanded. The assertion is often made that first shipments of American articles are always of good quality, but are after followed by those of inferior make. A strong, well-made article is wanted first, last, and always—one up to the standard in every particular.

German and English manufacturers take great care in minute details. The American manufacturers desiring to successfully compete with the manufacturers of these nations must do likewise. I think good sales of American butter churns could be made here, the present importation of this article being of Canadian manufacture. American machine lathes, shaftng, hangers, iron and wood pulleys are finding a good market here.

MODEL ONE

Made of galvanized metal and cast iron ends; 14 inches long. Galvanized drawer, will not rust.
Plain, Japanned ends, not covered, **$1.00 to Dealers**
Carpet covered, **$1.25 to Dealers**
Discount to Jobbers

CARRIAGE HEATERS

PROFIT MAKING LINES

REED MANUFACTURING CO.'S GOODS.

In this age of strife for commercial supremacy and competition, quality of material and excellence of workmanship are often lost sight of in the struggle to produce an article a little cheaper than anybody else can, and forcing the quality down in many cases until it becomes difficult for people who want a good article to make sure that they are getting what is represented. The Reed Manufacturing Co., Newark, N. Y., long ago realized that

PIE PLATES.

SEAMLESS MILK PANS.

people wanted good goods, goods that they could depend upon, and they have made a reputation for themselves by filling that want. They have built up an enormous business by doing just as they agree and standing behind their goods. They take

PUDDING PANS.

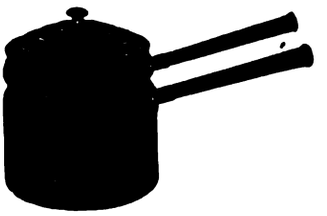
pride in the fact that Flintstone Enamel Ware is fast becoming a leader and is being appreciated by the trade. They use only the very highest class of ingredients and have an intelligent

PRESERVING KETTLES (without covers.)

force of employees who are skilled in combining them, which insures a high-grade product. Flintstone is unaffected alike by heat or cold and is as hard and durable as the rock which

SEAMLESS BERLIN KETTLES (enameled covers.)

gives it its name. Its absolute purity alone would commend it, as no poisonous ingredients are used, and it is guaranteed against chipping or cracking, which is a matter of no little importance since it has been stated that appendicitis has been caused by poisonous and poorly blended enamel ware.



There has also been a great demand for copper nickel-plated ware, which is a very beautiful and durable line. It is made of the best material and is full weight. The trimmings are

SEAMLESS COFFEE POTS (enameled covers.)

neat and attractive and the shapes are very artistic, and like the rest of the line, have great merit.

For seventeen years they have made their famous Anti-Rusting tinware, which they have guaranteed against rust and which they have stood behind in every instance. This ware has become a standard, especially in wash boilers.

SEAMLESS RICE BOILERS (enameled covers.)

Their Monarch Boilers are quite unique—they have a special machine constructed by expert mechanics especially for them which makes it possible to turn out four boilers a minute and they are kept busy too as the demand is great. This machine makes it possible to do what could never have been done without it, that is, wiring the top of the boiler with a 5/16 hard drop forging, which makes it practically impossible to defect it one-sixteenth of an inch, as has been tested by having men weighing over two hundred pounds standing on the overturned

SEAMLESS BERLIN SAUCE PANS (enameled covers.)

boiler without a bit of effect. The cover is a piece of art all by itself—perfectly seamless, stamped out of one piece of plate, with a one-inch rim, rim and cover all one piece, fitting the boiler like a glove with a stationary cold handle riveted to the top with six rivets, furnishing one of the finest boilers on the market, full size, full weight and fine workmanship.

Their Galvanized iron ware is in a class by itself, tubs, pails, garbage cans, oil cans, etc., made of good materials, guaranteed against leaks, and up to the high standard maintained all through their works.

POPULAR TALKS ON LAW

Copyrighted 1905, by William C. Sprague, President The Sprague Correspondence School of Law.

CONTRACTS.

No. 8. Contracts of Infants.

Infants, or minors, are persons, male or female, under the age of twenty-one years. In all but a few States, however, females become of age at eighteen. The law relating to infants' contracts is for the protecting of the infant himself. He is assumed not to be able to protect himself. The age limit, twenty-one years, was fixed in the law many years ago. Perhaps were the law to be formulated anew the limit would be set lower. Young men and young women enter upon business life nowadays earlier than formerly. However, in no jurisdiction, so far as we have learned, has there been any serious attempt made to set the limit of infancy lower than twenty-one years, except, as stated, in the case of females.

It is common to hear it said that an infant's contracts are void, that one under age cannot make a binding contract. This is an unsafe statement of the rule, if, indeed, not an incorrect one. It were better to say that infants' contracts are voidable, that is, he may avoid them if he so desires; but there are even exceptions to this, as we shall see. If an infant's contracts were void neither party could be held to them, but it is clear in the law that if the infant wants the contract to stand he can compel its performance on the part of the adult dealing with him; in other words, the plea of infancy is a personal privilege, and one of age who makes a contract with an infant is bound so long as the infant performs his part of the contract.

A contract that is voidable on the part of the infant may, upon his reaching maturity, be ratified by him, in which case both parties will be bound. Where his contract is voidable, as is generally the case, he must avoid it before he becomes of age or at once after becoming of age, or he will be held as having ratified it.

There are instances where the contract of an infant is valid and cannot be avoided by him. These contracts are such as are made for the necessaries of life under certain circumstances. In a sense it is scarcely proper, however, to say that he is bound by his *contract* for necessaries. He is, strictly speaking, not bound as on a contract at all; in other words, not bound to pay the price that he agrees to pay, but only for the reasonable value.

A question arises as to what are necessaries. By "necessaries" is not meant what is absolutely necessary to barely keep the infant alive. The rule as generally stated is that the infant is bound for the value of such necessaries as are reasonably useful in maintaining him properly considering his station in life. What, therefore, would be deemed a necessary with one person would not be deemed so with another. A poor boy not moving in society that is accustomed to evening dress, would not be held bound on a contract to buy a full dress suit. A boy whose station in life, whose associates and circumstances require the use of evening dress, with the alternative of his appearing ridiculous, would be held bound under such a contract on the theory that the suit was a necessity. A contract for articles of mere luxury or ornament made by an infant would not be valid and binding on him.

Then, again, it must be shown, in order that a contract for necessaries be held good, that the infant was not supplied with them by his parents, guardians, or otherwise. The same rule that is stated above holds with reference to contracts for medical attendance in sickness, and for the expense of a common school education. Contracts made by the infant for these, when not furnished by the parent or guardian, or otherwise, would be upheld as valid. Food and clothing, of course, come under the rule. A contract for a college education would not be binding. In other words, whatever the infant contracts for, in order that the contract be valid or binding upon him, must be reasonable in quantity, quality and kind, and suited to his station in life, and not be furnished him by parents, guardians, or from other source.

Contracts entered into by an infant to conduct a business or relating to a business are voidable. One who pays a child money on a contract with him for service does so at his peril. The child's earnings belong to the father and not to the child, particularly if the child lives with the father. If the child, however, has been emancipated, the rule is different.

As to property generally, the infant may take property and hold it, but once it is his, he cannot make a contract selling it or conveying it that is not voidable by him.

In the matter of the ratification of a contract by one who has reached maturity, it should be stated that the ratification must be of the whole contract. One ratifying a contract made in infancy cannot ratify part and avoid part; he must either ratify all or avoid all. One who has bought property in infancy and not paid for it cannot, upon reaching maturity, keep the property and avoid the contract as to payment. And so with an infant who has obtained property on a contract; if he desires to disaffirm the contract, he must return the property. He cannot both retain the property and refuse to pay for it. If, however, he has wasted or squandered or lost or destroyed the property and cannot return it, he is not held liable for it.

In this connection it is interesting to note that in general an infant is liable for fraud, slander, assault, conversion, and other common law torts in the same way as an adult is; but generally it has been held that when an infant falsely represents himself to be of age and thereby induces another to make a contract with him, the infant is not liable.

(To be continued.)

STAR CORUNDUM WHEEL CO.

The Star Corundum Wheel Co., Detroit, Mich., now located on Twenty-first street in the old Stearns laboratory building is the latest of Detroit infant industries to outgrow its baby clothes. From the inadequate quarters and facilities of its present plant the concern will within a few months remove to a large, new factory on Cavalry avenue.

The company recently purchased a whole block of land from Ralph Phelps on the Wabash railroad between Cavalry and Military avenues, and the new factory will cover 175 feet of frontage and be 170 feet deep. The building will be of reinforced concrete and steel, and absolutely fireproof.

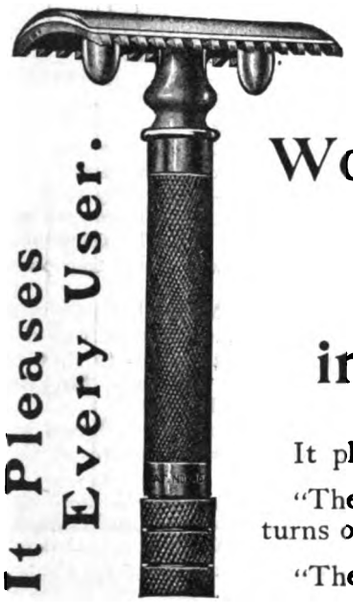
The business of the concern is the making of emery and corundum wheels. With the opening of the new plant the manufacture of these goods will be on a much more extensive scale than at present, three processes being used, the vitrified, silicate and elastic. The output will be three or four times greater than at present, and the number of employees will be increased probably 150 men within the coming year and to a greater number later on.

The company has built up an extensive market in the United States and also in foreign countries where the emery and corundum wheels made by this Detroit concern are in great demand. The company has agencies in London, Paris, Brussels, Rotterdam, Berlin, Moscow, Gothenburg and Christiania.

Plans for the new building have been prepared by Field, Hinchman & Smith, and the contracts for the construction let as follows: Masonry, George D. Nutt; structural steel, H. B. Lewis; roofing and sheet metal, Purdith & Candler; plumbing, O. A. Wurm; painting and glazing, Anderson & Pip. The construction work will begin at once and the contracts call for the building complete and ready for occupancy by January 1 next. The officers of the company are Reuben Kempf, chairman, and John R. Kempf, secretary and treasurer.

DUTCH TRADE CONDITIONS.

Special Agent Arthur R. Butman made a study of the import business of the Netherlands, and submits some of the results of his investigations to the American export interests in the following letter from that country:



"Holland has a population of 5,500,000 people, and, including the province of Limburg, an area of 12,650 square miles. In the broad sense of the word, Holland is not a manufacturing country, and with its entire absence of national prejudice against American products and the direct means of transportation available from the United States affords a good market to the American manufacturer and merchant desirous of cultivating trade with the country. The Dutch people are naturally a tenacious race, so that if once the American exporter secures this trade he will be certain of a continued market for his goods; provided, of course, that he meets Dutch requirements. In the foreign trade of Holland, as shown by the following table representing exports and imports for consumption, it will be seen that Germany is far in the lead:

In imports many free goods are included for home consumption, though they leave the country. In exports, also, direct transit goods are not included. I find that there seems to exist an almost universal prejudice against German productions, but owing to the proximity of the country and the energetic efforts of the German manufacturer to introduce his products, together with the low price demanded for the same, and his careful attention to the requirements of Dutch taste, the German continues to hold the market.

HARDWARE DEALERS RECORD

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Bradshaw, Neb.—R. C. Buckley will engage in the Hardware business.

Canton, N. Y.—The Hardie Company has been incorporated to deal in Hardware. Capital, $200,000. Directors—L. C. Albro, F. Hesse, and D. L. Holbrook, New York.

Eufaula, Ala.—The Foy Hardware Company have filed a certificate of incorporation. The company is organized with a capitalization of $25,000. The incorporators include J. E. Foy, J. P. Foy, S. W. Foy, W. H. Foy, and S. A. Bulloch.

Everly, Ia.—C. H. Peterson has opened a new Hardware store.

Hamlin, Tex.—The Riter Hardware Co. has been incorporated with a capital stock of $10,000.

Moline, Ill.—A new Hardware store is to be opened about the middle of this month in the Tremblay block, corner of Seventh street and Eighteenth avenue. It will be under the proprietorship of Paul DeBaker and Mr. Van der Vannet.

Norwich, Conn.—The Eaton-Chase Co. has been incorporated with a capital stock of $75,000. The firm will commence business with $20,000 and will conduct a wholesale and retail business in Hardware, sporting goods, electrical contracting, etc. The incorporators are H. B. Cary, F. W. Cary and S. B. Palmer, all of Norwich.

Scribner, Neb.—The Hoffman Hardware Co. has been incorporated with a capital stock of $10,000.

Willimantic, Conn.—The Jordan Hardware Company has filed a certificate of incorporation. The authorized capital stock is $54,000, all paid in. The incorporators are Fred D. Jordan, William P. Jordan, and James H. Hurley.

Changes and Improvements.

Aberdeen, Md.—James A. Wiles, who has for the past fourteen years conducted a Hardware store in this town, has sold his business and entire stock to Eugene Hughes and Nelson Worthington, of Havre de Grace. They took charge November 1.

Allentown, Pa.—George T. Hersh, vice-president of the F. Hersh Hardware Co., has retired from active business pursuits though not relinquishing his financial interest in the concern. George F. Graham has acquired an interest and will have charge of the sales department.

Alliance, O.—Linford & Unger, Hardware, roofing and plumbing firm, located on South Union Street, have sold their Hardware department to the Raryman Bros. of Deerfield.

Aurelia, Ia.—H. J. Prisch has sold his Hardware business to J. A. Johnson and J. H. Templeman, and the new firm will be known as Johnson & Templeman.

Bethel, Mo.—Thomas Afflick has purchased the Hardware store of William Kraft.

Birmingham, Ala.—Papers have been filed recording a meeting of the stockholders of the Wimberly-Thomas Hardware Company at which a motion was adopted to increase the capital stock of the company from $150,000 to $200,000.

Broken Bow, Neb.—W. S. Kennedy has succeeded to the Hardware business of Kennedy & Son.

Cairo, Ill.—E. C. Halliday, who for many years has been one of Cairo's leading Hardware merchants, is about to retire from the business, having sold his building at 616 Commercial avenue, and his entire stock to Harry W. Rendleman.

Cairo, Ill.—H. W. Rendleman of Alto Pass, who bought E. C. Halliday's Hardware store, has sold the stock to the Woodward Hardware Co.

Cedar Rapids, Ia.—M. Moorehead and H. Williams have purchased the Gitchell & Barnes Hardware stock and have taken possession.

Chattanooga, Tenn.—Hall-Melton Hardware Company has changed the corporate name to the New Chattanooga Hardware Company.

Coffeyville, Kans.—Clark Bros. have sold their Hardware business to Murphy Bros.

Colby, Kans.—J. L. Bottorff has succeeded to the Hardware business of Bottorff & Evans.

Corinth, N. Y.—A. J. Thomas has sold his interest in the Hardware business of Thomas and Sturdevan to his partner Jesse Sturdevan, who will continue the business.

Cortland, N. Y.—In order to give them more room on account of their increasing business, Muller & Son, Hardware merchants, have lately built a large addition to their store. The building is located in the rear of the main building and is two stories high. The lower floor is to be used for their tin department, while the upper floors will be used for storerooms.

Emporium, Pa.—Addison Stephens and Earl Saunders have formed a partnership and purchased what is generally known as the Walker Hardware store and the business is now in their possession.

Goldsboro, N. C.—Material is being placed for the erection of a rear wing to the Yelverton Hardware Company's Walnut street store which will front 30 feet on John street. It will be of brick, two stories and double front on John Street.

Harrington, Wash.—Newland Bros., who have been in the Hardware and implement business here for eight years, have disposed of their $17,000 stock to W. H. and W. S. Thompson of this city.

Howe, Neb.—W. H. Lohr, a Hardware dealer for a number of years here, has sold his business to C. A. Keel.

Ida Grove, Ia.—Gnam Bros. have purchased the Hardware store of Morgan & Walker.

Idana, Kans.—C. B. Park has purchased the business of the Roach Hardware Co.

Ione, Ore.—W. B. Snodgrass has sold his Hardware store to E. D. Godfrey.

Ionia, Mo.—O. L. Price has purchased the Hardware business of Argenbright Bros.

Lakewood, N. M.—S. F. Urban has sold his Hardware store to W. T. Post.

Lawton, Okla.—Benbow-Horton Hardware Company are having plans drawn for a proposed three-story brick building to be erected upon their lots at the southwest corner of Fourth Street and C avenue. When completed the building will cost in the neighborhood of $35,000. It will be 90x100 feet. The basement will occupy the entire ground space and will be used to receive all the goods.

Macedonia, Ia.—Smith & Denton have been succeeded in the Hardware business by Wiggington & Denton.

Malvern, Ia.—M. Cunningham will discontinue his Hardware business.

Moorhead, Ia.—A. T. Daily and son have sold out their stock of Hardware to Mustard & Parker. The invoicing is being done and the new firm will take possession at once.

Mt. Pleasant, Mich.—J. H. Doughty, for 39 years a business man of this city, has sold his Hardware stock to F. C. Clark, the Hardware merchant. Mr. Doughty will retire from business.

Mullinville, Kans.—C. E. Lewis has sold his Hardware business to W. B. Culley & Son.

Nebraska City, Neb.—C. O. Krogh has sold his Hardware store to W. M. Martin.

New Bern, N. C.—The Cutler-Blades Hardware Co., have completed the arrangements whereby they will increase their floor space. They have purchased the store on South Front Street occupied at present by D. L. Roberts, and will join it by brick annex to their present store.

New Brunswick, N. J.—The Strong Hardware Company has been making some extensive improvements to the second floor of its store. New shelving has been put in the place and the whole interior repainted in white. The place has been made very attractive.

New Iberia, La.—The Erath Hardware Company has changed hands, and will hereafter be conducted by Alexis and A. F. Voorhies, who have purchased the interest from Mrs August Erath, widow of August Erath, who conducted the business for a number of years previous to his death. This is one of the largest Hardware firms in this section. Messrs. Voorhies intend to greatly enlarge the business.

Owego, N. Y.—The J. S. Houk Hardware store will soon double its available room, having leased the basement and first floor of 182 Main Street, adjoining 184 Main Street, that it has occupied for thirty years, and the two stores will soon be connected by two archways.

Port Clinton, Ohio.—C. H. Wolf has purchased J. N. Washburn's interest in the Washburn-Wolf Hardware Co. and has associated with him in the Hardware business J. J. Huber.

Rockville, Ind.—Benjamin F. Yates has purchased the Hardware stock and building of C. Benford & Son and taken possession. The price paid was $12,000.

South Haven, Kans.—W. O. Proctor has purchased the Hardware business of Ruthrauff Bros.

Spokane, Wash.—The Hardware firm of Knudson-Winans Company will occupy new quarters on or about the first of December. The store located on the corner of Hogan and Sprague has become inadequate for the needs of the business, and so a change will have to be made.

"ALLPINE"

PAINTER'S TURPENTINE

There is absolutely no difference between The Best Turpentine and "Allpine." **"Allpine" Painter's Turpentine is the Best.** It contains no adulterants of any kind but is the true product of Long-Leaf South Carolina Pine trees---positively the best paint solvent for all painting purposes.

WHY?

Simply because it contains more **PINENE** and is an "unsaturated" compound which protects the paint and makes it wear longer---outwear the other kind. Sold in 5-gallon cans---every can guaranteed, and hermetically sealed at our stills.

Try a Sample Order. It will convince you quicker than a barrel of talk.

Our "Turpentine Tips" gives the facts. Shall we send it?

HARDWARE MANUFACTURERS' RECORD

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, etc.

Brooklyn, N. Y.—The Higbee-Barbour Manufacturing Co. has been incorporated with $150,000 capital to carry on a Hardware business. The directors are: N. M. Higbee, W. N. Barbour, Brooklyn, and G. F. Buchholz, Brooklyn.

Buffalo, N. Y.—The Meyers Steel Fence Co. has been incorporated with a capital of $500,000 to manufacture the Meyers patent steel fence posts and rails.

Columbus, O.—The Columbus Plow Co. has begun the operation of its new plant. The plant has been completed for some time and all the machinery has been placed in position, but a delay in securing natural gas connections caused a postponement of the opening of the plant. The new factory is one of the most modern in the city. The capacity of the company is more than doubled and it is expected to give facilities for the manufacture of 2,000 plows and 100 harrows annually. The plant consists of a main building 116x132 feet. The old plant on Mound Street will be abandoned. The company was incorporated a year ago with a capital of $30,000. William McGlinchay is president and general manager and Albert Riswenbacher is secretary and treasurer.

Dryden, Ark.—Articles of incorporation for the Hiett Plow Company have been filed. The corporators are J. W. Hiett, Lewis Sacks and M. P. Huddleston, with Lewis Sacks as the president. The capital stock is $10,000, and of this amount $3,500 has been paid in. The company proposes to manufacture plows.

Lafayette, Ind.—Ross Gear and Tool Company has been incorporated with a capital stock of $50,000; directors: William Ross; David Linn Ross; David Edward Ross.

Meriden, Conn.—F. W. Loll Mfg. Co. has been organized in Connecticut to manufacture light Hardware and has established its factory at No. 45½ Pratt Street.

New York, N. Y.—Jenkins Automatic Washing Machine Company has been incorporated; capital, $10,000. Directors—M. Jenkins, M. R. Jeffords, and J. Lewis, New York.

New York, N. Y.—Nestor Manufacturing Co. have been incorporated for the purpose of manufacturing tools, implements, machinery, etc.; capital, $50,000. Incorporators: P. B. Jennings, F. W. Geissenhainer, M. S. Cunmer, New York City.

Portsmouth, N. H.—Robert L. Ellery has leased the east wing of the Portsmouth forge plant and is equipping it as a machine shop. He will manufacture high grade tools. Mr. Ellery will employ a considerable force of skilled mechanics and will begin actual work in a short time.

St. Louis, Mo.—Advance Hardware Mfg. Co. has been incorporated by S. B. Crissey, E. F. Crissey, M. L. Crissey, G. W. Henderson and F. G. Udell, to manufacture and deal in Hardware, etc. Capital stock, fully paid, $25,000.

Traverse City, Mich.—The Edward Parsons Co. has been organized to operate a ... factory in this city. It has $30,000 capital, $15,000 paid in, and will begin operations the first of the year. The company has orders ahead to keep 125 men busy for a year.

Whittier, Cal.—The Woodworth Knife Works have bought the property at 114 North Pickering Avenue, and are installing a plant for the manufacture of all kinds of cutlery. The works will be in full operation in a few weeks and it will give employment to a number of persons. S. M. Woodworth is the manager of the company and Mrs. S. M. Woodworth is the secretary. New machinery is arriving for the plant from New York and is being installed as fast as possible.

Changes and Improvements.

Anderson, Ind.—The Anderson Tool Co. has erected a two story brick and stone building 125x50 feet to be used as an assembling room. This building adjoins the other factory buildings on South Jackson Street.

Anderson, Ind.—The Woolley Foundry and Machine works have begun on the foundation for a large addition to their foundry room. The new building will be erected north of the machine shop and will be constructed of brick and stone.

Boston, Mass.—The Samson Cordage Works, manufacturers of solid braided cords and cotton twines, have recently nearly doubled the size of their plant.

Chelsea, Mich.—The one-story building on the corner of North Main and Railroad Streets, used for a warehouse by the Glazier Stove Company, is being torn down to make room for a large modern three-story building which will be erected in its place.

Cleveland, O.—The Standard Tool Co. is erecting a new factory building on Central Avenue, S. E. It will be a one-story brick building, sixty-seven feet by forty-two in size.

Dayton, Ohio.—The Chamberlin & Evinger Machine Company have acquired from the Patterson Tool & Supply Company the manufacture of the latter's well-known Miami Valley Lathe, and ground has already been broken for the erection of a substantial factory building on Essex Avenue, Edgemont, along the Big Four tracks. The structure will be a substantial brick building, 40x60, and will be modern in equipment. The new firm is at present established in the Armory building, Sixth Street, and expect to occupy the new factory by January 1. Harry T. Chamberlin and Elbert R. Evinger, the new manufacturers, were formerly machinists at the N. C. R., and in addition to the manufacture of the Miami Valley Lathe will also make other tool machinery.

Detroit, Mich.—The Michigan Stove Co. is planning to build two additions to its already extensive plant on Jefferson Avenue, the enlargement being rendered necessary by the extensive growth of the steel and gas range business. The main addition will be seven stories high with a frontage of 64 feet on Jefferson Avenue, and 150 feet deep. A new three-story structure, 75x150 feet will be erected in the rear of the present buildings.

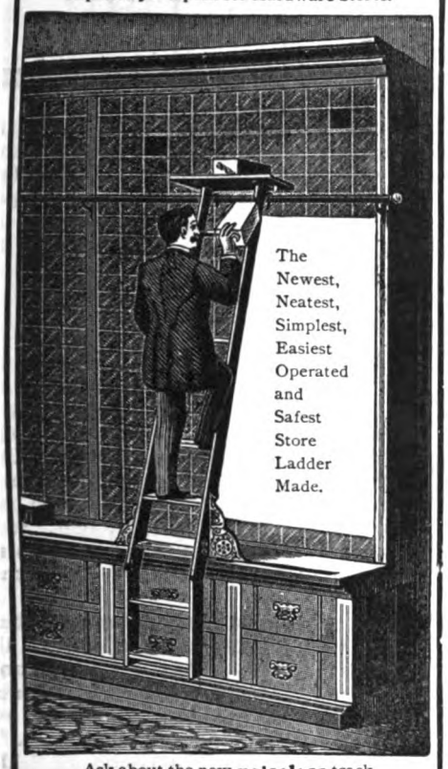
Evansville, Ind.—The Advance Stove Co. has recently completed a $30,000 addition to its plant in Pennsylvania Street. The addition will not only increase the capacity of the plant but has already made it possible for the owners to employ twenty-five more skilled workers than formerly needed.

Hastings, Mich.—Emil Tyden, a prominent manufacturer of this city, has decided to move the plant of the Consolidated Press & Tool Company, in which he owns a controlling interest, from Chicago to Hastings. The company is now employing about eighty skilled mechanics and will double its capacity. Arrangements are already under way to move part of the plant here at once and the remainder will be brought as soon as possible.

Lansing, Mich.—A. O. Bement, former president of the firm of E. Bement's Sons. has rented a factory in Lansing and will engage in the manufacture of stoves and ranges. He proposes to begin at once with a company capitalized at $10,000.

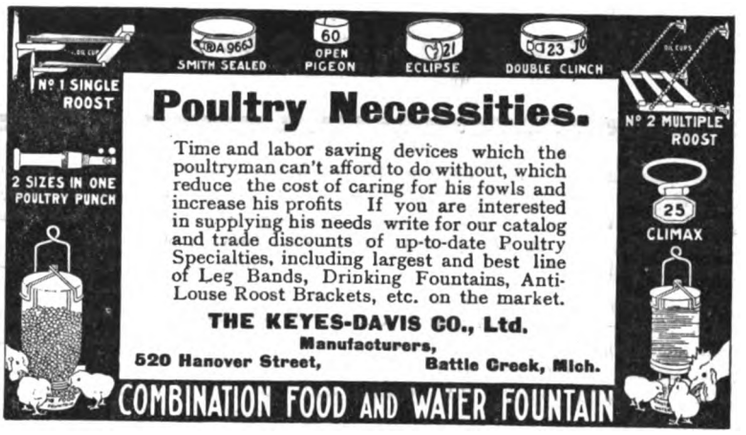
New Britain, Conn.—The Skinner Chuck Company are building an addition to their plant and are increasing their equipment of machines and tools as rapidly as possible.

Omaha, Neb.—Plans have been completed by Stroud & Co., manufacturers of scrapers, grading tools, grading machines and so on, to double the capacity of their plant at Twentieth and Ames Avenue and also to install a large retail lumber yard. Two extensions to their buildings are being made, one 50x120 feet and the other 40x100 feet. A foundry will be established, where the company will make its own steel and iron castings.



Rockford, Ill.—Work on the new addition to the Eclipse Gas Stove Company on South Main Street, has been started and will be rapidly pushed, as the contract calls for the completion of the two-story factory addition and office, within sixty days time. This part of the addition will face South Main Street and will be built of white pressed brick.

Rome, N. Y.—A large and modern plant is to be erected next Spring by the James A. Spargo Wire Company on a plot of ground consisting of twelve acres, purchased from the Rome Factory Building Company in East Rome. The main building will be 400x450 feet, one story high, with concrete floors. It will be a factory style steel structure on brick walls. The company was organized three years ago and has outgrown its present location on East Dominick Street. The concern furnishes employment to about 100 persons and is obliged to run day and night and even then can not keep up with its orders. It is expected that the force will be doubled when the new mill goes into operation.



Rutland, Vt.—Extensive improvements are being made at the Howe Scale works. A new smelting stack or cupola have been built and preparations have been made for the building of a new core oven at the foundry. The former will have a capacity of 40 tons, about twice that of the one that has been in use, and the oven also will double the capacity of the work in that department.

BICYCLE AND SPORTING GOODS RECORD

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Amory, Miss.—Amory Hardware Co., has been incorporated by E. D. Gilmore, A. C. Thompson and others with a capitalization of $4,000. They will handle sporting goods.

Birch Hill, Sask.—F. W. Gerber has established a Hardware and sporting goods store.

Buffalo, N. Y.—Incorporation articles have been filed by the Buffalo Metal Goods Co., with a capitalization of $10,000. F. C. Atherton, S. McDougall and W. F. Emerson are the incorporators. They are manufacturers of the Atherton coaster brake.

Caldwell, Idaho.—Boyes Hardware Company is the name of a new concern handling sporting goods.

Columbus, O.—A firm known as the Berger Mfg. Co. has been organized and is located at Long and Third Streets. The firm, which is a partnership of J. H. Mackie, president of the Columbus Sporting Goods Co., and Charles Berger, of New York, will manufacture sporting goods.

Detroit, Mich.—The Detroit Canoe & Oar works, with a capital of $20,000, have filed articles of incorporation.

Elkhart, Ind.—H. A. Knevels has opened a new bicycle store at 129 South Main street.

Homestead, Pa.—The Homestead Sporting Goods Co., have recently organized and opened a wholesale and retail store under the management of P. S. Coulter.

Kroneau, Sask.—Dent and Tucker have opened a new store and will carry fire arms, etc.

Lincoln, Neb.—The Lincoln Cycle Company has taken out papers of incorporation with $20,000 capital. B. D. Wood and Fred Grotte are named as the incorporators.

Miami, Fla.—W. W. Prout, C. W. Merrill and A. Dickinson have formed a company to do a general bicycle and automobile business in that resort. The company has applied for a charter.

Montreal, Can.—The Dominion Cartridge Co., have organized an American department under the direcion of C. Edw. Wood, for several years identified with the Simmons Hardware Co., St. Louis. Stocks are now being carried at three branches in the United tates, located at New York, Syracuse and St. Louis.

Morristown, N. Y.—The Thousand Island Boat & Engine Co., have incorporated with a capital stock of $20,000 and will soon have a large factory at Morristown. The officers are: President, G. I. Lloyd, of Syracuse; vice-president, John Donald, of Hammond; secretary and treasurer, M. N. Donald of Morristown. Mr. Lloyd recently conducted a bicycle and engine factory in Syracuse, but has sold that business to Edward Kimmey.

Richmond, Va.—Kennedy Bros. & Kellam have incorporated with a capital stock of $40,000 to conduct a wholesale and retail sporting goods and Hardware business, succeeding the Hardware branch of Sitterding-Carneal-Davis Company. D. C. Kennedy is president of the concern with J. E. Kennedy, secretary.

St. Louis, Mo.—The Hurck Cycle Co has incorporated as the Hurck Motor & Cycle Co., with $5,000 capital. John Hurck and Alfred J. Carpenter, with 240 shares each; Maud Hurck and Mary Carpenter with ten shares each, are named as the corporators.

Strathcona, Alberta.—McCombs and Somersall are to open up a Hardware and Sporting goods store.

Suffern, N. Y.—William Taylor ha opened his sporting goods store in the Washington building.

Toronto Junction, Ont.—Hallett & Noden have opened a Hardware store and will carry a line of sporting goods.

Winston-Salem, N. C.—A charter has been granted to the Forsyth Sporting Goods Co., for incorporation with an authorized capital of $25,000. The incorporators are Chas. Rodenhamer, Russell Vaughn, G. C. Thomas and W. E. Beck. They will handle all kinds of sporting goods and expect to open for business early in November.

Changes and Improvements.

Akron, O.—The Enterprise Mfg. Co. are building a large four-story addition to their factory to take care of their increased business in fishing tackle.

Aurora, Ill.—O. L. Erwin & Co. have dissolved; O. L. Erwin purchases entire interest.

Caro, Mich.—R. B. Parker has purchased the stock of sporting goods belonging to McPherson & Co., and will add to the already large assortment.

Charlotte, N. C.—A. Burwell, Jr., who has been conducting a retail Hardware business at No. 25 North Tivon Street, has given up the Hardware business and will hereafter devote his time to his automobile and bicycle business, in the rear of his old stand.

Elmira, N. Y.—The Reliance Motorcycle Mfg. Co. is now making ready for removal from Addison, N. Y., and expects to be in possession of its new plant in Elmira, N. Y., during the current month.

Horton, Kans.—E. P. Connet has bought out the sporting goods business of T. V. Weinholt.

New York.—Wagner Motorcycle Co. has removed to 2384 Broadway.

Santa Ana, Cal.—J. A. Hankey has sold half interest to Walter Congdon; new style is Hankey & Congdon.

South Fork, Pa.—J. D. Stewart has sold his sporting goods and Hardware store on Main Street to John S. Wicks and will move to Williamsburg, Blair County, Pa., where he will open another store of the same line.

Springfield, Mass.—The Duckworth Chain & Mfg. Co., has added a roller chain to its line. It is of one-inch pitch, employs double rollers, and is especially adapted for motorcycle use.

Troy, Idaho.—Olsen & Johnson, who conduct a sporting goods department, are building a large addition to their store building.

Westville, N. S.—The Sutherland Rifle-Sight Company will erect a $20,000 factory.

Winnipeg, Man.—The J. H. Ashdown Company and the Marshall-Wells Company are both erecting large warehouses for their increasing trade in Hardware and Sporting goods.

Miscellaneous.

INVENTOR WAITS LONG.

Twenty-five years ago a young man with a scheme for a carriage to be run by a gasoline motor, called upon a large manufacturer of vehicles and farm implements. The young man had spent three years upon his patent—its success meant fortune for him, and also triumph over the men who had laughed at him. So he used his best eloquence to induce the manufacturer to put his invention on the market.

But the manufacturer shook his head. "You have been wasting your time on that scheme," he said. "And if I went into it I would be wasting my money. No, sir—even if it did work, nobody would ever dare to ride in your 'explosion buggy.'"

That young man was George B. Selden, and what this manufacturer said was also said by dozens of others. To-day here is in use in the United States about 70,000 "explosion buggies," and about 70 per cent. of all gasoline automobiles in this country or imported into it are licensed under the Selden patent—the royalties paid during the last three years, it is said, amounted to $814,183.—*Technical World.*

Embarrassments.

Youngstown, O.—A petition of involuntary bankruptcy has been filed by Reese & Seaborn, dealers in guns, fishing tackle and bicycles. The firm gave their liabilities at $4,200 and their assets at $3,300.

MANUFACTURERS RECORD

(Continued.)

St. Louis, Mo.—St. Louis Glue Manufacturing Company have increased their capital stock from $8,000 to $26,000. Assets, $28,052.69; liabilities, $17,387,28.

Wynne, Ark.—The Automatic Yoke Co. have purchased the Wynne Hoop Plant, and all correspondence should be addressed to the former company at Indianapolis, Ind.

Fires.

Ansonia, Conn.—The Ansonia Novelty Co., manufacturers of shears, scissors and metal specialties, have sustained a loss of about $7,500 on finished stock and $1,600 on building by a recent fire.

Beloit, Wis.—The Machine Knives Works of R. J. Dowd & Co., has suffered a $10,000 fire loss. The origin of the fire is not known.

Port Huron, Mich.—The plant of the Mills-Elliot Co., manufacturers of refrigerators and other woodenware, has had a narrow escape from destruction by fire. The blaze started from a stove in an upper floor, but prompt discovery and effective work of the fire department saved the plant. The damage will be about $1,200. No insurance was carried.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

Capewell Horse Nails Can Be Used Successfully in Hot and Dry Climates

THE CAPEWELL HORSE NAIL CO., GREAT BEND, N. D.
Hartford, Conn.

Dear Sirs:—

I feel that I owe you a few words of praise for your first-class nails, as I have tried nearly all kinds and find yours the only nail I can drive in **these hard feet of our western horses** without bending the nail, or splitting the hoof, and best of all, every nail clinches without breaking one of them. I consider your nail the best that money can buy. Yours truly,

THE GREAT BEND IRON WORKS,
CHAS. TRITTEN, President

"I consider your nail the best that Money Can Buy."

Made By

THE BEST

KEUFFEL & ESSER CO. NEW YORK.
CHICAGO. ST. LOUIS. SAN FRANCISCO.

Attractiveness

orderliness and plenty of room will make your store a trade winner. How? By using

PIQUA
ADJUSTABLE BRACKETS

They will give you at least 30% more room; will do away with props—partitions—with moving into larger quarters. They'll give your goods better display, too.

Catalog H for Hardwaremen tells of number of brackets required; how to install them, etc. *Send for it to-day.*

THE PIQUA BRACKET CO.,
PIQUA, OHIO.

That's IT!

The Universal Chair Seat

It is better and cheaper than cane or leather—more durable than either.

Pretty good proof of their excellence, isn't it, if John Wanamaker and other large Department Stores, as well as the argest chair makers use them?

Try a sample lot. Anybody with a pair of shears can mend any ordinary bottomless chair with **The Universal Chair Seat.** That's why they sell so well. Try and see.

Quality Tells
When Henry Disston was asked the question:
"What do you put in your saws?"
He replied:
"Good steel and honest work."
UPON THIS FOUNDATION IS BUILT
DISSTON QUALITY
"If you want a saw it is best to get one with a name on it that has a reputation. A man who has made a reputation for his goods knows its value as well as its cost and will maintain it."
HENRY DISSTON & SONS., Inc.
Established 1840.

Aluminum Oil Heater

Sold the World Over

The Heater of a Million Sales

More than any words from us these 1,000,000 sales testify to its wonderful, its unapproachable **quality.**

And we have yet to receive our first heater returned as unsatisfactory. Could testimony be stronger?

Its success lies in its **Grand Safety Burner,** not alone the greatest but the *only* safety burner made.

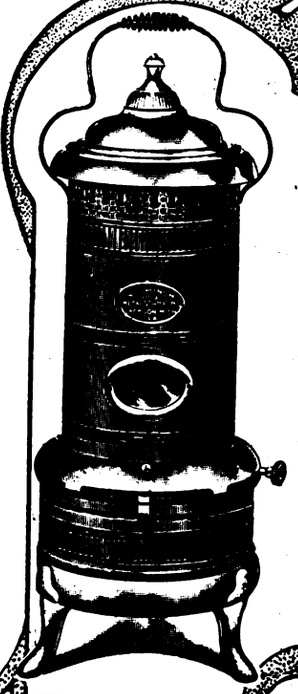
The reasons are many—here are some:

Solid flame spreader—no perforations to clog up, hence cannot smell.

Safety device—cannot smoke.

Wick does not enter oil fount—cannot explode.

Is not this unquestionably the heater to sell your customer?



Write us, asking any questions you desire.

Note Construction of Grand Safety Burner

A—Flame Spreader. B—Air space outside of Wick Tube. C—Air Space inside of Wick Tube. D—Wick. E—Outside Casing to Burner. F—Air Space between Fount and Outer Casing. G—Fount for Oil. H—Feed Pipe conducting oil from Fount to Burner. I—Shield resting on top of Fount with Air Space underneath.

Special $40 Offer for Foreign Markets

Upon receipt of $40 00 in U. S. Gold or its equivalent, we will wrap and crate ready for steamer and deliver f. o. b. GET BUSY

That is the one secret of success in the Hardware trade. The rapid sales and quick turning over of capital that

A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

The Crystal Coffee Mill

THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

The Jewel Coffee Mill

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

The Gem Mop Head.

THE FAMOUS GEM is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE EIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

HARDWARE

GRANT-HASSON HARDWARE COMPANY, Morristown, Tenn., on January 1 will succeed the Grant Hardware Company. The officers of the new concern, which has been incorporated with a paid-in capital of $25,000, will be E. M. Grant, president; J. D. Hasson, vice-president; William Lyle, secretary and treasurer; Charles Andre manager. The company will do a wholesale and retail business in Hardware, Stoves, Tinware, Implements and Vehicles.

THE RUBEL HARDWARE COMPANY has been organized at Lebanon, Ky., with the following officers; John Rubel, president; W. H. Rubel, vice-president; W. W. Knott, secretary, and J. M. Knott, treasurer. The capital, $15,000, has been paid in. This company will occupy a room in the new Masonic Temple, 36x 128 feet, and a warehouse 40x60 feet. A jobbing business will be done in the following lines: Builders' and Staple Hardware, Guns, Cutlery, Stamped and Enameled Ware, Stoves and Ranges, Roofing, Pumps, etc. The company is in the market for shelving and other fixtures to be delivered about February 1, and also requests catalogues and other printed matter relating to the above lines.

TELESCOPIC RIFLES SET THE PACE.

In the 100-yard championship match of the Election Day shoot at Greenville, N. J., A. Hubalek scored highest honors—2,258 points—on German Ring Target. Mr. Hubalek was equipped with Stevens-Pope Rifle and Stevens Rifle Telescope. F. C. Ross won second honors—a score of 2,238. Mr. Ross shot a Stevens rifle fitted with Stevens Rifle Telescope. It is a significant fact that more than two-thirds of the crack shots who competed at this important tournament, used Stevens 'scopes. The field for these practical accessories is constantly expanding and the day is not far distant when Stevens Rifle Telescopes will be used as extensively as Stevens rifles themselves, to produce perfect scores and make record target shots. It is interesting to note in this connection, that the bull's eye as viewed through a Stevens Telescope, is simply an image of bull's eye—not the real bull's eye. The image of bull's eye is formed at spot where the cross hairs are laid, making the two coincident—both equally distinct. The middle aged or elderly person in using the ordinary sights can perhaps see the bull's eye distinctly and the sights, but not both together, as one or the other will blur. If he concentrates his mind on the sight of the rifle, the bull's eye becomes blurred—if he concentrates his mind on the bull's eye, the sight becomes blurred. This is owing to the lack of accommodation which affects every person aged from forty years up. Full data and illustrations concerning the famous Stevens Telescopes will be found in Special Telescope Catalogue issued by the J. Stevens Arms & Tool Co., Chicopee Falls, Mass.

A REMARKABLE CHARITY.

The famous Bowery Mission Bread Line, now in its fourth year, at which every morning, at one o'clock, during the winter months, one thousand homeless and destitute men and boys are provided with a breakfast of hot coffee and rolls, will resume operations at Thanksgiving, midnight, and continue to Easter morning, 1907. Last year 144,000 were thus assisted, and altogether over half a million have had a weary night's tramp agreeably interrupted by this inexpensive, yet very welcome refreshment. The directors of the Bowery Mission have appointed Mr. John C. Earl, of 222 Bible House, New York City, Financial Secretary, succeeding Dr. Simon Trenwith, lately deceased.

NEBRASKA RETAIL HARDWARE ASSOCIATION.

The Nebraska Retail Hardware Association will hold its annual meeting in Omaha February 4, 5, 6 and 7, 1907, and in connection therewith will present also a Hardware Exposition. As this is the first attempt to give an exhibition of this kind, they desire to see the trade well represented, which, as they always have a good meeting, they are confident they will have no trouble in obtaining. J. Frank Barr, the progressive secretary, has been in correspondence with manufacturers throughout the country that could not help being interested, and many have given their assurance they will help to make the new feature a grand success. Diagrams of the space to be disposed of can be obtained of the secretary, at Lincoln. The exhibition will be given at the Auditorium.

NEW YORK STATE ASSOCIATION OF HARDWARE JOBBERS.

At the annual meeting of the New York State Association of Hardware Jobbers held at the Eagle Hotel, Kingston, N. Y., on Thursday, November 15, the following officers were elected:

PRESIDENT—A. J. Lowery, Utica.
VICE-PRESIDENT—E. C. Neal, Buffalo.
SECRETARY-TREASURER—Joseph Born, Syracuse.
DIRECTORS—Hobart Weed, Buffalo; Irving D. Booth, Elmira.

PEDDLERS.

A Washington judge has decided that the law licensing peddlers is unconstitutional, and the general trend of legal opinion seems to be along the same line. A careful study of the lay of the land will afford many a merchant insight into peddlers' methods and light for meeting their business in a way adequate and satisfactory. Nine times out of ten, local merchants can secure the business where their goods and prices are compared with those of the peddler. The advantage the latter individual has is in being on the ground with the goods. There is nothing which will take the place of personal contact, and goods and price comparisons. This method will not only defeat the aims of the peddlers, but will sell your own goods as well.

"U. S." METAL POLISH PASTE.

The manufacturer of "U. S." metal polish paste states that his product is an easily applied and non-injurious metal polish, producing a quick, brilliant and lasting luster. It has been used for years by discriminating buyers of polishing materials. Those who are not acquainted with the "U. S." are asked to write George William Hoffman, the manufacturer, for leaflet of particulars. Address him at 95 East Washington Street, Indianapolis, Ind.

THE LOCKWOOD COMPANY.

The Lockwood Company, 97 Chambers Street and 79 Reade Street, New York, is a newly-organized company succeeding the Allerton-Clarke Company at the same address. The business will be continued along the same general lines as heretofore, representing the same manufacturers, principally among which are the Lockwood Manufacturing Co., Builders' Hardware; F. & N. Lawn Mower Co., F. E. Kohler & Co., Seneca Chain Co., Starr Bros. Bell Co., Nicholls Mfg. Co., Weldless Framing Square; C. J. Kimball Co., high-grade Hand Tools; Chicago Flexible Shaft Co., and a number of others well known to the trade. The same working staff will be retained in the New York store, where a large stock of goods is carried. The officers are: Alfred J. Wright, president, formerly with the Yale & Towne Mfg. Co.; George B. Main, vice-president; Richard Battin, Jr., treasurer, and W. G. Van Ness, secretary.

DISTRIBUTING BOOKLETS.

Is the manufacturer's literature put to the best use in your store or is the expense he incurs to help you sell his goods practically wasted? Certainly the last is true if his pamphlets are scattered promiscuously about the counters, torn up for wrapping-paper, used to fill up empty space in packing-boxes or laid back on the shelf to accumulate dust and clutter up the space that should be better occupied.

One of the neatest, most convenient and most efficient methods is to use a rack similar to the wall pocket type employed by railroad companies at the larger stations, with a supply of one pamphlet (and but one) in each pocket. Arrange these so that none of the larger ones will cover the subject name of the one next above it and set the whole where people who come into the store can look it over and help themselves to the pamphlets in which they are directly interested.

Probably some will be taken by collectors, by children, and by inquisitive people; but any of these classes, especially the last two, may become or influence possible customers; in any event there is less waste than where the haphazard plan of distribution is made use of.

The extra convenience and neatness will more than pay the trifling cost of the rack during the years for which it is good, if taken care of. Then when the manufacturer's agent sees a special effort on the dealer's part to make the most of the advertising sent him the impression is a favorable one. That dealer will be sure to come in for due consideration when any advertising favors or favors of any kind are being dished out by that manufacturer to the retailer.

NOVEMBER 25, 1906

Editorial Trade Review

The last fortnight in the Hardware markets has been filled with anticipated changes and preparations for what may be expected by January 1. The advances, although large in number, are not by any means unreasonable when we take into consideration the increased cost of material and of manufacturing at the present time. There seems to be considerable conservatism shown in making changes; the manufacturers evidently do not want to scare the trade into a belief that any radical advances are contemplated that will be of such moment as to affect the next inventory unfavorably, but will adjust the cost properly, even when inventoried at the market price.

The pressure upon manufacturers for goods ordered for winter continues, but in a modified degree; while deliveries continue in large volume, in an endeavor to complete orders already in hand. The car shortage is of lessened moment, and is found not quite so embarrassing except on the heavier requirements. The necessity for looking after the holiday requirements covering a large variety of goods for the trade, engages the attention of those in the trade who cater intelligently for that especial season, and deserve a fair proportion of profit from covering the buying field successfully. As so many of the finer kinds of goods enter into a stock selected with this end in view, a Holiday stock has the effect of making the store essentially attractive and facilitating sales.

In their programme of purchases for next year the jobbers have to be prepared at this time, with their orders for staples that are always booked for delivery a long way ahead, and the quantities have to be of that safe bulk that with a brisk trade can be added to, if it should be found necessary. Every effort is made at this fag end of the season in such goods, to even up the stock and place on future memoranda the safe quantities they cannot open the season without having on the manufacturers' books. The question that agitates the mental activity of the sanguine buyer is the one regarding the prosperity of the coming year and in what way it will affect the plans of the trade generally.

The season of the annual conventions of the Retail Hardware Associations will soon be upon us, and preparations are being made on every hand to make the affairs the most memorable of any season yet; by the dealers encouraging the Exposition of the manufacturers' products to so large an extent, and assisting the jobber by familiarizing the dealer at first hand with their manifold merits and interesting possibilities. This will have an effect of testing the advantages from a selling standpoint of the retailer, of many goods that may be later found in a jobber's stock endorsed in advance, by having been seen and viewed to advantage at the State Convention, representing 500 to 1,000 members, all active participants; and this might prove truly a blessing in disguise.

CURRENCY REFORM.

Following the report on reform of the currency by the special committee of the New York Chamber of Commerce, a commission of fifteen prominent bankers from different parts of the United States representing the American Bankers' Association, met in Washington and agreed upon the general features of a bill for submission to Congress. This action was taken in concert with the Chamber of Commerce Committee and prominent members of the Congressional Committee on Banks and Banking.

With concerted action on currency reform by the commercial organizations of the various cities, the American Bankers' Association, representing practically all the banking capital of the country, and the active help of the Administration it is believed a conservative currency reform bill will be passed at the forthcomming session of Congress.

The report of the commission of the American Bankers' Association sets forth its conviction that the existing bank note system is wholly unresponsive to the demands of commerce. It does not expand with the needs for currency in the crop-moving period, causing stringency, nor contract when the uses for currency are less extensive, causing redundancy.

Furthermore, the committee adds, we find that the banks are under the necessity of parting with their reserve money to supply the demand for currency at certain seasons, although that demand would be quite well satisfied if banks could supply their credit notes instead of depleting their reserves and causing a contraction injurious to business. To meet this situation the National Banking Act should be so altered as to permit under ample safeguards the issue of credit bank notes which would automatically adjust the volume to the demands for currency. Such notes can be issued under provisions which will insure absolute safety to the note-holder, an ample supply of currency to the public, relief from the disturbed commercial conditions which follow the present depletion of reserves when an increased volume of currency is required, and finally the certain retirement of the notes when they have fulfilled their purpose in the hands of the public.

The commission also rightly observes that "while this matter is one that affects every business interest, we believe that it concerns the general public even more deeply than it does the bankers. It is obvious that borrowers during three or four months of the year are forced to pay a materially higher rate of interest than would be necessary if banks could supply the currency demand by issuing their credit notes instead of depleting their reserves and being forced to demand the repayment of loans in order to replenish their reserves."

When the subject is more clearly understood by the business men of the country, the commission believes that demand for legislation which will permit issues of credit notes will come even more strongly from borrowers, whom it will most benefit, than from bankers.

The commission unanimously agreed upon the following principles which, its members believe, underlie a correct solution of the currency problem so far as it relates to the issue of bank note currency:

"A credit currency should be issued by the national banks of the country under proper restrictions.

"A bank note is essentially the same in principle as a deposit payable on demand. It is a book deposit converted into such form that it passes current. It resembles in character a demand certificate of deposit or cashier's check—simply a current deposit liability of the bank.

"It is important in any plan seeking to provide a more flexible

Digitized by Google

currency that no measures should be taken which would impair the market value of United States bonds.

"Authority to issue credit notes under the same regulations should be extended alike to all national banks, but should not be extended to any national bank until it has been actively doing business for one year nor to any national bank which has not a surplus equal to 20 per cent. of its capital.

"Credit notes should be taxed at a rate which will produce a guaranty fund sufficient to redeem the notes of failed banks. Such guaranty fund should be deposited with the Government and out of it the Government should promptly redeem the notes of failed banks.

"Banks should keep the same reserves against credit notes outstanding as are now required by law against deposits.

"Active daily redemption of credit currency is the proper and only means of making it elastic, preventing redundancy, and automatically adjusting its volume to the actual requirements of commerce. All banks issuing such notes should be required to maintain adequate facilities for their prompt redemption in cities conveniently located in all sections of the country, so that all notes issued, however widely they circulate, can at no time get beyond a reasonable distance from a redemption city.

"We therefore unanimously recommend the enactment into law of the following, having the firm conviction that thereby will be provided a bank note currency safe beyond peradventure, and automatically varying in volume as needs of commerce vary.

CREDIT BANK NOTES.

"First. Any national bank having been actively doing business for one year and having a surplus fund equal to twenty per cent. of its capital shall have authority to issue credit notes as follows, subject to the rules and regulations to be determined by the Comptroller of the Currency:

(a) An amount equal to forty per cent. of its bond-secured circulation, but not to exceed twenty-five per cent. of its capital, subject to a tax at the rate of 2½ per cent. per annum upon the average amount outstanding. Provided that if at any time in the future the present proportion of the total outstanding unmatured United States bonds to the total capitalization of all going national banks shall diminish, then the authorized issue of credit notes shall be increased to a correspondingly greater percentage of its bond-secured notes.

(b) A further amount equal to 12½ per cent. of its capital, subject to a tax at the rate of 5 per cent. per annum upon the average amount outstanding in excess of the amount first mentioned.

"The total of credit notes and bond-secured notes shall not exceed the capital.

RESERVE.

"Second. The same reserves shall be carried against credit notes as are now required by law to be carried against deposits.

GUARANTY FUND.

"Third. The Taxes provided upon credit notes shall be paid in gold to the Treasurer of the United States, and shall constitute a guaranty fund for the redemption of notes of failed banks, and for the payment of the expenses of printing and the cost of redemption. In order that the Guaranty Fund may be ample from the beginning, any bank making application to take out credit notes for issue shall deposit with the Treasurer of the United States in gold an amount equal to 5 per cent. thereof. The unused portion of this initial payment shall be an asset of the contributing banks respectively, and shall be refunded from time to time when this may be done without reducing the Guaranty Fund below an amount equal to 5 per cent. of the Credit Notes taken out.

REDEMPTION.

"Fourth. The Comptroller of the Currency shall designat numerous redemption cities conveniently located in the variou parts of the country. Through the agency of the banks in suc cities adequate facilities shall be provided for active daily redemption of Credit Notes.

"Fifth. The provision of existing law limiting the retiremen of bond-secured notes to $3,000,000 per month shall be repealed.

"Sixth. All public moneys above a reasonable working balance, from whatever source derived, shall be currently deposited from day to day in national banks without requiring collateral security or special guaranty therefor, but in no case shall the balance carried with any bank exceed fifty per cent. of the capital thereof. All banks receiving such public moneys on deposit shall pay into the United States Treasury interest thereon at the rate of two per cent. per annum."

The earnest attention to this question by all business men, and their active co-operation with the forces now at work to accomplish currency reform, will force Congress to take early action on a matter of vital importance to continuance of our present unparalleled prosperity.

MEETING THE MAIL ORDER STOVE TRADE.

A recent number of an agricultural periodical contains the advertisements of fifteen dealers in stoves. Five of these refer intending purchasers to the local Hardware stores and ten make a bid for direct sales by mail. Most of them are seasoned advertisers. They know by experience whether it pays them to advertise or not and if it did not they would cease to do so. Evidently they sell goods by advertising and it looks as if Mr. Local Dealer was losing some of his legitimate trade.

A certain nation made a great military power of its most despised competitors by defeating them once and showing them how to do it. If Mr. Local Dealer would only profit by the lessons these lost sales ought to teach him it would be possible for him to make some of the stoves he does not sell more profitable than some of those he does; only he must not be above learning from his enemy, the mail order house, nor may he adhere to the belief that there is nothing in common between the two methods of doing business. As a matter of fact the local dealer has all the *natural* advantages; the catalogue concern all the *artificial* advantages, created by system and up-to-date business principles.

Many Hardwaremen make the mistake of believing that the mail order man's real stock in trade is merely cheapness, something he cannot afford to compete with on account of the injury it would work in his reputation among his better class of customers. This has been true, but is not true to-day, Out of the fifteen advertisers referred to, seven represent high-priced goods and make their bid for trade distinctly upon merit; either quality or special features. Their goods may not justify their claims, but their prices place them in the category with the dealers' standard lines, where competition is open to the local man. This is evidence that there is an outlet for high-priced goods even among patrons of the mail order houses and the local dealer does not have to draw upon the junk pile in order to compete.

Perhaps no other time is more propitious for approaching a man on the stove question than when he is at home leisurely reading his evening paper. He has time to think about it. Other matters are not vexing him. His thoughts are naturally less upon his business and more upon his home. Perhaps he has known all along that he must get a stove; still there is no harm in telling him of it and talking it over with him if it is done at the right time and in an unobtrusive manner. The mail order man takes advantage of this by putting the matter up to him at whatever time he feels like taking time to read the advertisement. Besides, most men who need an article do not like to admit it, even to themselves, until they have acquired enough information on the subject to become interested. Compulsory interest is a poor thing to trade on. If a man just buys because he supposes he has to have a stove and may as well take that as any other, the salesman who has had him in hand is a pretty poor stick. The average man begins in that condition. It is for the salesman to show up something that will arouse his enthusiasm. The mail order house does this through skillful advertising. If the local dealer cannot compete with them here, with all the advantages of window display, personality, pleased neighbors, personal interviews and personal examination of the goods themselves the catalogue house is not to blame. It has learned the lesson of not only talking but of saying something worth while. Right here is one of the points at which the local man is prone to fail.

The average customer does not care a rap whether you have been at the same old stand for days or years; what he wants to know is stoves. It does not matter to him that you have a great variety, for he only wants one. Single that one out and tell him about it, same as the catalogue houses do; then, if it isn't just the kind he is looking for, he will value a gentle hint that there are plenty of others in stock with variations. Nine-tenths of the advertising done by the retail stove men tell about the shop they keep or their big reputation, or something that tickles their own vanity. So far as such advertisements teach to the contrary, a stove may be a big block of iron with a flat place on the top to set a kettle on.

Most of the improvements made in stoves and other lines that have been placed in the hands of the local dealer by the manufacturer first reach the attention of the public through cheap imitations of the real thing, advertised by the catalogue houses. Who, for instance, but a mail order stove man, first told the public of a thermometer attachment to the oven door? The local man could have supplied us with that feature long ago, he tells us, but nobody knew it except himself and a few confidential friends. His advertising, if he advertised at all, told about his long experience, his efficient service, his big stock,

Digitized by Google

etc. Why in the name of top-notch temperature didn't he know enough to tell us about this thermometer instead of sending us off to the mail order house to find it out? Naturally, when we did find it out, we looked a little farther and with a friendly eye into the output of the house that had introduced to us this pleasing novelty.

Many lines of Hardware seem too trivial to warrant special mention in an advertisement. This granted or not, stoves do not come under any such category. Nearly every family has to have them in some form. They are costly enough and there is enough margin of profit in them to justify a little earnest effort on the part of the dealer and of careful selection on the part of the customer. This makes the stove field especially inviting to the writer of skillfully worded advertisements and renders it a favorite assaulting ground for the catalogue house. What a grand chance for the legitimate dealer to meet the attack with a good stock of facts and Anglo-Saxon. The average stove purchaser is from Missouri; he wants to know, and you've got to show him. If you can't do that he will go to the catalogue house, where they will try to.

When the catalogue houses confined their competition to the one point of price the local dealer was handicapped by his own reputation until his people had a chance to get their stoves and test them. Now that this sort of thing has killed itself and the mail order people are compelled to solicit trade on claims of superiority and special convenience, the local dealer has the big end of it by means of his own advertising in local papers, by his window displays, by various methods of appeal available only to the man on the spot and with a personal acquaintance of the place, certainly interest any and every prospective buyer or attract the attention of any whom the mail order advertising has already interested. In meeting the latter over terms of price it had to be largely on the other man's ground; in locking horns over quality the mail order man has to fight the battle on the grounds of his local competitor.

But there is yet another point from which the mail order house is gunning heavily for victims; terms of sale, and here the advertisements are more than usually deceptive. Here again the local dealer has all the real advantage; only he must use it if he wishes to reap the benefits.

Most of the mail order concerns, doubtless forced by memories of the low-priced worthless goods with which they flooded the public but a few years ago, offer in glaring headlines, "30-day free trial;" "No money until after examination," etc. Simmered down they simply agree to ship the stove for a small deposit, subject to examination at the freight office; then if found satisfactory (and what newly-blacked stove would not pass muster under the inexperienced eye, especially if crated), the balance of the money is paid the freight agent and the stove delivered for the "free trial;" that is, it may be taken home and set up. If at the end of thirty days it proves so utterly worthless that the purchaser is willing to take it down, recrate and return it to the freight office and reset his old stove until another can be obtained or else go without, the money is supposed to be returned; at least that is the agreement. The local dealer who cannot puncture the bubbles of this highly inflated offer and give genuine inducements in their stead hardly merits success.

The free examination in his own store is an easy matter and a much more satisfactory one to both dealer and customer than a hasty squint in a freight office. Neither is any deposit required before making it. Then what stove, if it will stand at all, will not stand ordinary usage for a period of thirty days without showing enough defects to warrant the trouble of its return? The local man can duplicate this offer or multiply the time by three and still be safe, in standard goods. Occasionally the catalogue house offers a little time on part of the payment, good reference of course being required. Certainly the local dealer with his personal knowledge of his people could duplicate any such terms necessary with responsible people. If the catalogue houses seemed more generous in their credits than business prudence justified it would be easy to convince an intelligent customer that the man who paid his own bills must also pay the bills that the house lost through unwise credits.

There are many weaknesses in the offers of the mail order houses that the alert business man can see readily enough, but it is well to get them before the public with as little appearance of rivalry as possible. Interpret the real meaning, not sneeringly (for that reflects upon the interested reader's judgment), but rather by way of coming at the terms that he has asked to have duplicated, then try, if possible, to do a little more than he has asked. Trust to your customer to discover for himself the objectionable features of the advertised offer after you have brought them out in the lime-light sufficiently. He will think more of you and, more important still, will not feel that you think less of him and of his judgment. If shown one of these "thirty day trial" offers, reply at once, "Why certainly I will agree to take the stove back and refund your money, same as these people do, if it proves unsatisfactory. Thirty days is not time enough in which to really test a stove though; I will make it sixty." That tells him the story quite as well as to preach a sermon about how these catalogue people are trying to soak the inexperienced, perhaps with some remark thrown in about any fool knowing that thirty days was no test for a stove; it leaves a better taste in the mouth of the customer, too. It creates the idea that you are willing to treat the customer in all fairness and meet every reasonable test and that you are not laughing at him for asking it. Neither does it give any impression of venting petty spite on a competitor; but it shows up the incompleteness of the thirty-day test. The hollowness of the advertised offer may be still further brought out by urging a more careful examination of the stove while in the store and a comparison with other stoves. Tell him how you want him to look it over carefully before selecting and be suited now; that after he gets it home and set up he would probably hesitate to tear it out and change even if it didn't quite suit; so to be careful now. No need to tell him that the catalogue house relied more on his reluctance to do so much hard work all over again than on the merits of their goods; he will see that, once the idea is suggested to him in the other form. Again he will think more of you and will not fear that you think less of him. A discreet man can tell an intelligent man a good many things without saying them to him, and the truth is pretty sure to have more weight when absorbed than when just listened to.

To recapitulate, then, meet these mail order assailants of your stove trade

First; by advertising in the local papers, as they advertise in general mediums, to catch the attention of the man who needs a stove. Supplement this with window displays, stove talks, a regular stove campaign, during the proper season.

Second; by telling the people something that *is* something about stoves. Give them a plain, Anglo-Saxon talk on the oven thermometer and what it means to the housewife. Tell them what material should be used in making durable stoves. Explain the difference in stove wearing qualities between sulphur-charged iron and silicon iron; also the scrap iron affairs of unknown composition. Give a brief talk on "free examinations," at your store; another on trial tests; on any of your other troubles that the catalogue house advertises or your customers put up against you. Don't try to tell it all at once. One at a time, please.

Third; by meeting every offer with terms as liberal or more so; only first be sure just what the terms really are and don't be fooled by deceptive advertisements.

Fourth; if a customer leaves you and sends his order to one of these houses, don't lose your head or your temper. Learn what you can of his purchases; profit what you can by his experience. He may, in the end, have helped your business more than he has helped his own.

Fifth; remember that *all* stove advertising helps a little in awakening an interest in stoves and that all which is awakened will render your own advertisements more attractive providing they are real advertisements of stoves and not of your personal achievements. The very best time to sell goods of any kind is when some special interest in those goods has been awakened. The local dealer has the situation and the goods. If he is the man, if he has the ability of the true salesman, he need have no fear of these invading advertisers, but may rather welcome them as doing needed mission work in the presenting of the article itself, leaving to "the man on the spot" the pleasant task of engineering his own individual sales.

✦

PITTSBURGH AUTOMATIC VISE AND TOOL CO., Pittsburgh, Pa., have just issued a catalogue of the "Pittsburgh" Automatic Two-Way Vises, including Iron Workers', Solid Jaw, Wood Workers', Pipe, Single Swivel, Railroad or Heavy Chipping, Automobile, Jewelers', Experimental and Patent Vises, sectional views of which are given of the last named. The catalogue will be found of interest both because of its uniqueness and because of the Vises.

SEPARATION AGREEMENT ANNULLED BY SUBSEQUENT COHABITATION.

QUESTION.—A man and his wife who could not live amicably together, separated and entered into a contract of separation by which the husband agreed to make payments to a trustee for his wife's support. After they lived apart for several years, they decided to live together again and resumed their marital relations. A new disagreement having arisen, can the wife still compel the husband to support her as provided for in the separation agreement?

REPLY: Separation agreements made in contemplation of a separation which has already taken place, or is immediately to take place, whereby the husband agrees to make payments to a trustee for the wife's support, have uniformly been held to be valid and enforcible so long as the parties continue to live apart. But if the parties resume their marital relations and again cohabit as man and wife, the effect is to annul and destroy the separation agreement. The articles of separation are no longer in force. Consequently if a new disagreement arises and the parties again separate, the wife is not entitled to enforce the provisions of the old agreement.

MINOR—RIGHT TO WAGES.

QUESTION.—A man employs a boy who is under age to work for him, and pays the wages to the minor. After such payment he receives a notice from the boy's father that the boy spent the wages instead of paying them to the father, and that the father will hold the employer liable for the wages. Nothing was said at the time the boy was hired as to whom the wages should be paid. Can the father compel the employer to pay them over again?

REPLY: The general rule is that a father is entitled to the wages of his minor child, and unless circumstances can be shown warranting the conclusion that it was understood that the child might receive his earnings, payment to him will not be a defence to an action brought by the father. In some States, as in New York, this rule has been changed by statute. The New York statute provides, "Where a minor is in the employment of a person other than his parent or guardian, payment to such minor of his wages is valid, unless such parent or guardian notify the employer in writing within 30 days after the commencement of such services, that such wages are claimed by such parent or guardian; but whenever such notice is given at any time, payments to the minor shall not be valid for services rendered thereafter." It follows in New York that if the father has notified the employer that he claims his child's wages, the employer pays the child at his peril, and may be compelled to pay them over again to the father in case the minor does not turn them over to his father. But before such notice, under this statute, payment to the minor is valid.

TITLE BY ACCESSION.

QUESTION.—A owns a piece of steel worth $1. B steals it and sells it to C, who believing that he has a right to do so, makes it into a tool worth $20. Who owns the tool?

REPLY.—The tool still belongs to A, the owner of the bar of steel. C, of course, could get no title to the metal by purchasing it from a thief. Nor did he get any title by reason of the work performed by him, because it did not amount to a change of species. If one person performs work on an article or the materials belonging to another, the article in its complete form still belongs to the original owner of the article materials, even though the value of the work may exceed the value of the original article. The only exception to this rule is the case where an innocent purchaser of materials, believing he has title to them, makes them into something of a *different species* as where wheat is made into bread, or grapes into wine, or corn into whiskey. In such case the new product belongs to the person who manufactures it.

ARGENTINE AS A MARKET FOR UNITED STATES' GOODS.

By W. J. JOHNSTON,

Publisher of the *American Exporter*, who visited South America at the same time as Secretary Root, to study commercial conditions in our sister Republics.

The recent International Conference of American Republics at Rio de Janeiro, which I had the honor of attending, and the tour of Secretary Root have done much to bring the United States and the different South American countries together to the advantage of all concerned. Anything therefore, showing the resources and possibilities of the republics of the South is of interest at this time.

Argentina—one of our best foreign markets and, next to Brazil, the largest country of South America—in many respects resembles the United States and, like her, has agricultural resources that are almost unlimited. A combination of favoring circumstances, moreover, gives our Southern neighbor important advantages over many other countries.

For example, the Argentine is able to place her products on the markets of the world at prices almost beyond competition, owing largely to her geographical situation, her excellent climatic conditions, the relatively low price of land and the ability to utilize labor on the farms during the entire year, added to the fact that her live stock can be bred and fattened on the prairies; that the cost of labor is less than in such producing countries as the United States, Canada or Australia, and that practically every foot of her soil can be cultivated.

MR. ROOT'S RECEPTION.

On my return from South America, I was asked by the ubiquitous reporter what foundation, if any, there had been for the reports that the propaganda of American solidarity advocated by Secretary Root had not always been received with favor in South America, and that Mr. Root had even met with a hostile reception in Buenos Ayres.

It gave me pleasure to reply that I witnessed the reception of Secretary Root in Brazil, Uruguay and Argentina and that I did not see how the arrangements in Buenos Ayres to do him honor could have been improved. The city was beautifully decorated, and at night was a blaze of light. It was not alone the officials, but the people who cordially welcomed the United States Secretary of State.

THE FEELING TOWARD THE UNITED STATES.

I talked with all classes of Argentinians, and can say that the feeling toward the United States in that country, as in others I visited, is one of respect and admiration. Wherever I went I found United States manufactured goods much in demand. In fact, they are often given the decided preference, even when the prices are higher than those of the British or German.

Our trade with South America, however, labors under the serious disadvantage of having to be carried on through the medium of foreign houses, and often by men not only personally unacquainted with the operation of American machines, but also naturally inclined to favor the manufacturers of their own country. That United States manufacturers are doing the trade they are in South America notwithstanding this handicap, suggests what might be done in these countries if the merits of American goods were enthusiastically impressed upon buyers by American salesmen.

PREFERENCE FOR AMERICAN GOODS.

In the Argentine, as in other countries I visited, I called upon the principal importers and dealers and also upon some of the larger consumers, as well as upon officials, editors, bankers and other men of affairs.

The manager of one of the leading German houses in Buenos Ayres—a branch of a well-known German firm—told me that the business had been established in Buenos Ayres to sell exclusively goods made in the Fatherland, principally agricultural implements and Hardware. Customers, however, wanted American goods as better adapted to the conditions existing in Argentina. Most of the wares now sold by the firm are from the United States. Recently, by the way, this particular house remitted an American corporation manufacturing agricultural implements a million dollars in a single payment.

I was shown through the warehouses of another firm in Buenos Ayres—an English house, which also now handles principally American goods. This concern carries a stock aggregating in value $4,000,000 American gold. There are in Buenos Ayres many other large houses—British, German, French and Spanish—every one of which makes almost a specialty of American goods. I regret having to add, though, that there are practically no American merchants or dealers in Argentina, Uruguay or Brazil.

VISITING AN ARGENTINE "ESTANCIA."

It was my privilege to travel on the special train which the Argentine Government provided to enable Mr. Root to visit and

Digitized by Google

see for himself how a typical "estancia"—what we in the United States would call a ranch or stock farm—is conducted. I had there the pleasure of also meeting and talking with a number of owners and managers of estancias and getting their views at first hand.

The special train, by the way, was one of the finest I have ever seen. The engine and the exterior of the cars were appropriately decorated with United States flags and bunting. The engineer in charge of the train was from the United States. At the end of the journey Secretary Root shook him warmly by the hand and congratulated him on the splendid run he had made.

The special car of Dr. Jose Figueroa Alcorta, President of the Argentine Republic, was attached to the train, for the use of Mr. Root and those who accompanied him. President Alcorta himself was a member of the party. So were the Minister of Foreign Affairs, the Minister of Agriculture, the President of the Provincial Chamber of Deputies and a number of other distinguished Argentinians.

At the different stations which the special train passed crowds were present to wave greetings to the United States Secretary of State. Villanueva, the station for the Vivot estancia, was gaily decked with United States and Argentine flags. A huge banner extending all across the principal street bore the words of welcome, "Viva Sud y Norte America."

A three-mile drive in four-in-hands brought the party to the estancia. After an informal reception and a luncheon that would have reflected credit upon the culinary resources of any country house in the United States or in Europe, Secretary Root and those who accompanied him were shown over the estancia.

This consists of six square leagues of land, or 26,570 acres. There are on the place 15,000 cattle of the Durham breed, 20,000 sheep and 3,000 brood mares. The animals are high class, many of them being blooded stock. For example, the highest price ever paid for a bull raised in Argentina was for one from the Vivot estancia. The Argentinians pay liberally for good cattle from the United States, England, etc., and are now raising some excellent stock of their own.

The estancia house, or homestead, is surrounded by an artistic collection of other buildings, including several chalets and a handsome private chapel. These give the place more the appearance of a small village than of a farm. Telephones connect the estancia house with the outlying posts of this vast tract of grazing and agricultural land.

THE MARKET FOR AGRICULTURAL IMPLEMENTS.

That United States manufacturers have already greatly benefited by the immense agricultural activity of Argentina is best demonstrated by the fact that we sold her during the last five years over $20,000,000 worth of agricultural machines and implements alone. Nearly all of these were supplied by a few of our larger manufacturers, who are represented in Argentina. High prices are charged for the goods, so that there is large profit to the dealer.

I am satisfied that other manufacturers, as yet doing little or no business in Argentina, can develop a good demand in that country for their apparatus, machinery and supplies. A number of prominent dealers to whom I talked were anxious to secure salable specialties in the agricultural and other lines.

Although the owners of the plantations are wealthy, they take pride in giving their personal attention to the work of their estancias. They are men of culture, some of them having been educated in the United States or in England. They read and keep informed as to what is going on in other countries. They therefore realize that the conditions in the United States are much the same as in their own country, and for this reason are much interested in the progress made here and in the implements and machinery we manufacture.

Even the Europeans who purchase land and make their homes in Argentina—the immigration during 1905 was 221,622—show a preference for United States implements and machinery.

IMPORTS AND EXPORTS OF ARGENTINA.

The Argentine Republic embraces an area of 1,135,840 square miles. Pastoral industry may be said to constitute the mainstay of her prosperity. Scattered over the country are about 120 million sheep, 30 million cattle, 55 million horses, 3 million goats and 1 million pigs.

The population in 1903 was estimated at 5,005,853 and is now about 6,000,000. In other words, Argentina covers a territory more than one-third the size of our own country and has almost as many people as Canada.

One city, Buenos Ayres, has 1,000,000 inhabitants; Rosario has 140,000; La Plata, the new capital of the province of Buenos Ayres, 90,000, and Bahia Blanca more than 50,000. These comprise the principal ports of Argentina. There are, however, in the republic, four other cities each of 25,000 inhabitants; fourteen more of 10,000 each and eight others of 5,000 each.

The imports into Argentina—principally agricultural implements, machinery, Hardware and other articles such as are made in the United States—have increased from $88,973,000 in 1897 to $197,974,000 in 1905. For the six months ending June 30th, 1906, they were $112,905,000. The total imports from the United States in 1905 were $28,429,200, and for the first half of 1906, $15,840,790.

The exports from Argentina—consisting almost wholly of products of the soil—have grown from $92,123,200 in 1897 to $311,544,000 in 1905. For the first half of 1906 they were $160,164,062.

In a letter written to Secretary Root, during his recent visit to Buenos Ayres, Mr. Francisco Seeber, ex-Mayor of Buenos Ayres and author of the well-known work "Greater Argentine," said: "Our exports this year will amount to $55 per head, as against the United States' $18; our imports to $39, as against the United States' $12."

THE CITY OF BUENOS AYRES.

A few words about this magnificent South American capital may not be out of place.

Founded in 1535, the city of Buenos Ayres has not only some age to its credit, but as a truly cosmopolitan city, and in its energy, life and advanced civilization, it may fairly claim to rank with the greatest. Standing tenth in the list of cities of the world, and second only to Paris itself as a Latin centre, Buenos Ayres is a positive revelation to the traveler who sees it for the first time. The wide avenues and the beautiful parks with which it abounds, the palatial buildings and residences, the luxurious clubs and theatres, the extensive and well-organized system of electric street railways (with a mileage of more than 300, and which in 1905 carried 179,186,434 passengers), the well-edited newspapers (whose daily editions contain cable news from all parts of the world, including extracts from the English and Continental journals of the same day), the high standard of education obtaining among the better classes, the style, dress and manners of the people, the immense display of electric light, the incessant activity, the vast amount of shipping (3,536 vessels entered the port in 1905), and indeed every phase of life, combine to give to Buenos Ayres something of the movement of London with the brightness and gaiety of Paris.

Out of a total population of a little over 1,000,000, the foreigners in Buenos Ayres include about: Italians, 230,000; Spanish, 105,000; French, 28,000; Uruguayans, 28,000; British, 6,000; Germans, 6,000; Austrians, 3,500; Swiss, 2,500; other nationalities, 22,000.

It may interest readers of this publication to know that the well-known daily *La Prensa*, of Buenos Ayres, occupies the handsomest and best equipped buildings of any newspaper in the world. The same enterprising publication maintains in New York its own bureau, which every evening cables it the important news of the day.

MEMPHIS FIRMS REORGANIZE.

Two important changes have been made in the large Hardware companies operating in Memphis, Tenn. The partnership of Thomas, Barnes & Miller, which has conducted a wholesale Hardware business there for several years, has been dissolved and a stock company, to be known as the Miller & Barnes Hardware Co., has been formed, with a capital of $175,000. W. G. Thomas, a member of the old partnership, has sold his interest to Messrs. Barnes and Miller, and has retired from any connection with the firm. The capital stock has been greatly increased by the stock company, and it will enlarge its scope of operations.

The Pidgeon-Thomas Iron Co. has made application for a charter, with a capital of $100,000. This firm is the successor of the Manogue-Pidgeon Iron Co., which has been in business here for many years. John Manogue, one of the partners in the old firm, has sold his interest to W. G. Thomas, who retired from Thomas, Barnes & Miller. The incorporators are: Phil Pidgeon, W. G. Thomas, C. B. Frazier, George Randolph and Thomas I. Clarke. The company will add sawmill supplies and other iron and steel products to its business.

E. S. HULBERT & CO., INC.

The business of E. S. Hulbert & Co., Bernardston, Mass., manufacturers of cutlery, has been incorporated under Massachusetts laws as E. S. Hulbert & Co., Inc., with a capital stock of $25,000, and the following officers: President and treasurer, Alonzo Alvord; clerk and general manager, Henry L. Crowell; directors, Messrs. Alvord, Crowell and F. B. Dennison, who is the factory superintendent. The corporation takes over the real estate owned by the late E. S. Hulbert, and will continue the manufacture of the special line of high-grade cutlery which has been known to the trade since the business was established in 1846. The company has recently installed a new engine, and it is the purpose of the management to increase the output of the factory.

HONEST ROOFING ONCE MORE TO THE FRONT

We present herewith two editorials which appeared in the *Metal Worker* of recent date, which marks the change taken by the roofing tin manufacturers of this country that will revolutionize the use of roofing tin. The American Sheet and Tin Plate Co., of Pittsburgh, inaugurated this step, but all other Terne Plate manufacturers will soon get into line. In the future, it will not be necessary for the architects, builders, roofers or the property owner to take some other person's say-so regarding the quality and the coating on Terne Plates. All brands will bear weight of the coating plainly on every sheet, and therefore there cannot be substitution. The result will be that a great many more Terne Plate Roofs will be laid, and the old-time satisfaction will again be realized in all cases where care has been given to the subject.

PUTTING ROOFING INDUSTRY ON HIGH PLANE.

We congratulate the tin roofers of the United States; we congratulate the architects and the public; we unequivocally record our approval and hearty commendation of the courageous stand now occupied by the manufacturers of terne plates upon the insistence that the tin plate business shall stand upon the rock foundation of "the square deal." *The Metal Worker* takes pride in reciting that this industry which, since the enactment of the McKinley bill, has come to be regarded as a monument to the skill, energy and sagacity of American ingenuity, is among the first, without coercion, to catch up the war cry of the twentieth century and in its refrain announce to the world that the proper conduct of business demands a high moral standard.

The sale of roofing plate is to be revolutionized. For decades, for a century or more, this article of commerce has been sold by private marks, by twisted, thread-worn meaningless appellations, such as "Old Style," "Old Method," "Redipped." In early days, no doubt, these terms meant something, but in the scramble for business through these long years they have become hopelessly confused, and the buyer of roofing plate has found himself groping about with a bewildered and faltering step among the honest or dishonest assertions of this salesman or of that. All this is to be changed—the architect, the roofer or the house owner, provided only he can read—is to be able to secure precisely what he pays for, and is to be able himself, without any technical knowledge, to determine this point absolutely.

The American Sheet & Tin Plate Company officially announces that it has decided, on all of its brands of roofing plate, to stamp each sheet with the amount of coating it carries per box of 20 by 28, and not only this, but every waster plate is to be stamped "waster." This will in a large measure prevent the possibility of misrepresentation in second, third or fourth hands and insure to the one calling for such a plate a square deal. That the company which has taken the initiative in this innovation runs some risk of a loss of business during the period when architects, builders and roofers are being made familiar with such a frank statement of quality must appear evident to all who give more than superficial attention to the far-reaching action. The move strikes at the very heart of the industry. It concedes to the tin roofer more than he has asked; it crushes the malpractice of years in one fell stroke, and with firm grasp uplifts the business to a plane of dignity and honor. As such it enforces co-operation, it demands the support of all manufacturers, of all roofers, of all architects, of all builders.

Eliminating single interests, a broad view of this bold advance more fully explained in another column leaves no doubt that the integrity and plane of the whole roofing industry will be raised by simple co-operation.

A SQUARE DEAL IN ROOFING PLATES.

The tin roofer now has the opportunity of buying just what he wants and of knowing just what he gets when he buys roofing plates. His demand has been urgently presented for a change which would give him this information correctly. All of the old confusion as to quality and grade has been swept away by a notable departure which is a long step in the right direction. It is what President Roosevelt might term a square deal in roofing plates. The American Sheet & Tin Plate Company has arranged to stamp on each sheet of terne plate it manufactures, not only the brand, as has heretofore been done, but also, and vastly more important, the number of pounds of coating which it carries. The buyer of roofing plates is to be still further protected, as the company will stamp on all waster plates the word "waster" in letters ⅜ inch high. This very important step has been announced to jobbers, and is favored by all the leading jobbers to the extent that they have ordered the company to stamp on all their private brands the number of pounds of coating which they carry. Beyond question this is more than the roofers, who have been conferring with the manufacturers for almost a year, expected could be accomplished in so short a time.

These newly stamped plates will probably make their appearance on the market about the first of the year. In addition to stamping the plates, the company announces that a much closer inspection of the sheets turned out is being made than heretofore, all tending to secure to the buyer sheets so coated as to stand successfully both the exposure to weather and the ravages of time and service. The reduction in the number of grades which has been requested is not open to the same positive treatment, but when all roofing plates carry a stamp with the number of pounds of coating on them all who are interested know the grade they are getting and the opportunity for substitution with all its pernicious effect is destroyed. The stamping of the plates in a large measure disposes of the question or satisfies the desire for a reduction in the number of grades, and yet allows a freedom to the buyer which is essential to meet the requirements of some customers. That the difference in cost of roofing plates is in a large measure due to the weight of the coating they carry can be readily explained to those who do not know it, as can also be explained the increasing advantages of plates carrying the heavier coating.

This new stamping of the plates will give important information not only to the tin roofer, but to the architect, the builder and the final owner of any building covered with a tin roof. Many architects have confessed to the confusion which the variety of brands and claims made for plates brought to them, when the selection of the tin for covering some important building must be made. The builder and the owner of either a new building in course of construction or the property owner has experienced an equal confusion when earnestly seeking for light on the roofing plate question. Under the new method of stamping the conscientious roofer has a fairer chance in competition, and when the plate has been decided upon which is to cover the roof all of his competitors are on an even footing with him. The opportunity of those who were unscrupulous and used a multitude of brands to induce a customer to prompt the substitution of one of lower grade and value for one of higher cost than serviceability has been practically destroyed.

This departure has not been made without some risk of a loss until the loyalty of the tin roofer to the best interests of his business has been tested. This step taken by one manufacturer offers the roofer an opportunity for a choice of both his methods and plates. The roofer should join in the work of acquainting architects, builders and his other customers with the relative value of plates carrying different weights of coating. If the best interests of all concerned in this new enterprise are considered there can be no question that the average price of covering roofs with tin plate throughout the country will substantially advance. This will make it incumbent upon the tin roofer to cultivate that art of selling which induces the customer to purchase that which is sure in the tin roof to give increased service for the increase in price. It is important that the jobbers of tin plate have shown their favor to this positive presentation of the quality on each plate in spite of the fact that it is said the jobbers make the largest profit from their private brands. It is equally true that those who supply tin plate to the roofers have endeavored to meet the demands of their customers for plates of cheaper goods. Now those who want low priced plates can secure them, but in the full knowledge that they do not have the qualifications for satisfactory service which the higher priced plates possess. That there may have been a shuffling of brands to the disadvantage sometimes of the roofer, and frequently to his customer, is probably the cause for some of the discontent with existing conditions which led to a demand for some change for the better. We would counsel the roofer to prepare himself for some lively work before builders and owners are willing to meet conditions fairly. Many will desire to buy a plate with 25 or 30 lb. coating at the same price as a plate carrying but 12 or 15 lb.

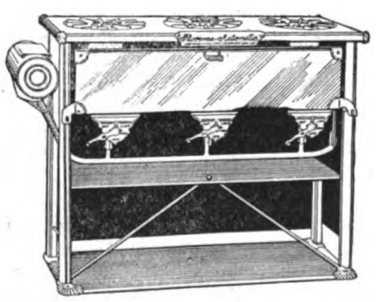
WHAT THE STOVE MANUFACTURERS ARE DOING

THE S. M. HOWES CO.

The S. M. Howes Co., 40-46 Union Street, Boston, Mass., are placing upon the market this season their most recent production in the way of Ranges, which is the Howes Monarch, "Premier" style, and is illustrated in the accompanying cut, and referred to by the manufacturers in the following terms:

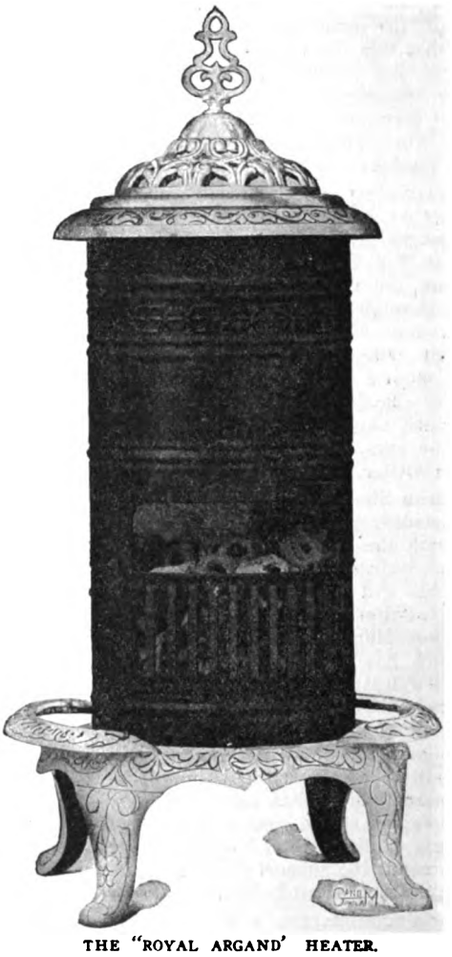


MONARCH RANGE, "PREMIER" STYLE.

"This is our latest style, having all our former improvements and the additional advantage of plain, smooth castings, which are easier to keep clean. This range has removable rails and oven thermometer, and is the most complete and up-to-date one we have ever offered. The firebox is of ample size and the flues are large, easily heating the oven at any time of day. We furnish dockash, triangular or plain grates, reservoirs, wood-fixtures, coils, high closets, etc."

CENTRAL OIL & GAS STOVE CO.

The Central Oil & Gas Stove Co. of Gardner, Mass., U. S. A., are placing on the market the "Florence Automatic Wickless, Valveless, Blue-flame Oil Stove" containing exclusive features which appeal to the modern housewife by their wonderful simplicity and economy in the use of fuel and adaptability to the various requirements of the kitchen, where varying degrees of heat are necessary. In place of the ordinary wick or valve with their attendant woes, the Florence Automatic uses a lever, by means of which the flame is instantly regulated to any desired height by raising or lowering the burner bowl. When through using the stove the burner bowl is raised as high as it will go; this causes the surplus oil to drain out at once, saving that much fuel, and the stove goes out quickly.



THE "FLORENCE AUTOMATIC" OIL STOVE.

The Florence Automatic is made in four popular sizes, one of which is shown herewith and, while it has been on the market successfully since 1898, it has been quite radically improved for the season of 1907 and should prove a valuable line for the enterprising dealer. Full descriptive catalogues and prices will be furnished by the manufacturers on application.

ALBANY FOUNDRY CO.

The Albany Foundry Co., Albany, N. Y., are the manufacturers of the Royal Argand Odorless Blue-Flame Gas Heater, height 30 inches, weight 32 pounds, with 9-inch polished blue-steel drum, and finished in black or full polished nickel.

The burner and mixer shield are of cast iron, heavy and durable and so proportioned that perfect combustion is assured. There are no gauzes to burn out, no drilled holes to corrode and clog and no frail or perishable parts. The burner is bolted in three places to the base which insures base heating by contact to the practical extent of 110 degrees. The air circulating flue. The superfluous heat which is deflected to the floor is taken by the air circulating flue located in back of drum, upward to the baffle plate which in turn deflects it downward across the fire thereby diluting the products of combustion, while still intensely hot, to an odorless state and emits same through the ornamental top. The open grate effect. This Heater is supplied with an artificial fuel of a highly incandescent nature which heats to a bright glow almost instantly and produces a most cheerful effect together with greatly increasing the heating capacity.

THE "ROYAL ARGAND" HEATER.

At a consumption of 24 feet per hour, this stove will heat a large room in fifteen minutes, and can thereafter be turned down to the minimum. The artificial fuel will retain its glow, and radiate a dry and odorless heat at a remarkably low cost. The ornamental top is hinged, and can be swung backward, affording a cooking top.

Material and construction. The material in this Heater is of the highest possible quality. The drum is formed of mirror-finished polished steel. It retains its original color, and will not blister, peel, chip or become pinholed as is common with ordinary black iron. The castings are made from the very best grades of coke and iron, and are smooth and carefully fitted. Nickel-plating is heavy, highly polished and very durable. Every Heater is thoroughly tested, and inspected by an expert before it is permitted to leave the factory.

BRIDGE & BEACH MFG. CO.

The Bridge & Beach Mfg. Co., St. Louis, Mo., are the manufacturers of the "Royal Superior" Range with Reservoir and High Closet for Coal or Wood, being a square-oven cast range. A very durable and well constructed all cast range; can be furnished with or without reservoir; bracket with ten shelves, or polished steel warming closet, as desired. Constructed for water coils or water heaters. Large, square 18 and 20 inch ovens. Extra large fire boxes, with removable duplex grates, and an extension for wood. Fire backs guaranteed to last five years for coal. Drop draft door, sliding draft damper in top plate; handsome cast base; superior ribbed covers and centers; reducing ring cover. Full nickel top band with corners. Nickel ash guards. Nickel oven door frame, panel and handle. Oven door lined with polished steel and balanced. Encased Enameled Reservoir is detachable, and has patent damper, Japanned covers and nickel panel. The "Royal Superior" has proven a success, and seems to be what the merchant has been wanting—an immense seller.

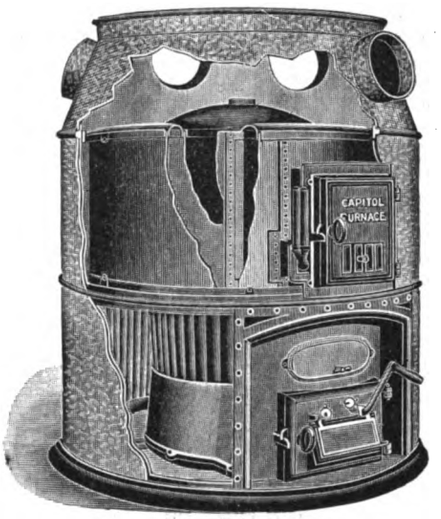
THE "ROYAL SUPERIOR" RANGE.

GALUSHA STOVE CO.

We illustrate the latest cast iron range of the Galusha Stove Co., Rochester, N. Y., which is the "Norman Classic," designed to supply a demand for a cast iron range with very little ornamentation, with nickel parts, such as there may be, all removable and easily cleaned, at the same time a range of good capacity and one which has an established reputation as a baker and fuel saver.

THE "NORMAN CLASSIC RANGE.

To meet this growing demand they have placed on the market the "Norman Classic" range. The cut shows you the stove from a photograph taken from "life," giving its rich plain appearance and style of mantle shelf.



The only nickel parts on this stove are the bands, which are finished by their celebrated silver nickel process. The grates are removable without disturbing any of the fire box linings. The fire box is of their patent round cornered design, which permits of no clinking of the cinders or ashes. It is long, wide and deep, of big capacity. The stove can be fitted with water-front if desired, or it can be sold with water tank at rear.

The oven is high, perfectly square and deep. The flues are lined with plaster paris cement, which retains the heat for baking power, and in this way economizes largely the fuel which is consumed.

It has a large, deep drop broiler door. The draft door and hearth plate are made together, which gives an absolutely air-tight base. The castings are made of the best quality of silver gray iron, and have a finish that is excelled by none. This stove is made in both 18 and 20 inch ovens, wih or without reservoir, and is furnished either with high mantle shelf or back rail, according to the taste of the buyer.

MONROE FOUNDRY AND FURNACE CO.

The Monroe Foundry and Furnace Co., Monroe, Mich, are the manufacturers of the Floral City Capitol Furnace for hard coal, soft coal or wood, which they have made to meet the demand for a furnace with a so-called Horse-shoe Radiator.

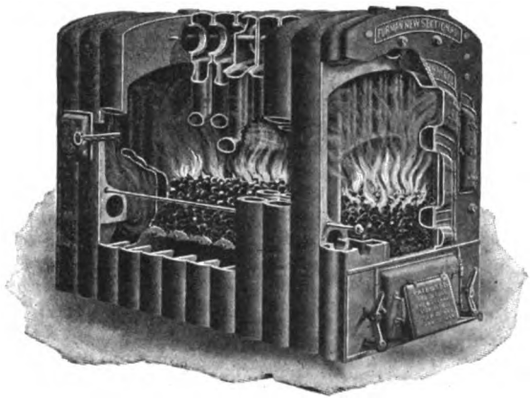
THE "FLORAL CITY CAPITOL" FURNACE.

This furnace is not put out with a view to producing a competition furnace, considering price only, as are many furnaces of similar appearance now on the market. Their policy has always been to make only the best, and in the construction of this furnace they have striven to produce a durable, powerful and economical heater embodying all the best features of up-to-date furnace construction. The distinctive, as well as the most important feature of this heater is the dome or body with the other return flue or horse-shoe radiator. This dome is high enough to give an extra large combustion chamber, and at the same time make a furnace low in height and therefore well adapted for low basements. Ample air space is left between the dome and inner circle of outer radiator, and the radiator itself is of ample dimensions.

THE HERENDEEN MFG. CO.

The Herendeen Mfg. Co., Geneva, N. Y., was established in 1868 and incorporated in 1888. For a generation they have been continuously engaged in manufacturing, in increasing numbers, Furman Boilers. These Boilers are now made in many styles—Round, Sectional, Brick-set, Asbestos-covered, etc., as shown in their various catalogues, and they believe they contain every real improvement that this long manufacturing experience and skill have been able to produce.

The well-known economy of fuel and ease of management of Furman Boilers are largely due to four principles of construction:



1st. All fire strikes directly against the large water-heating surfaces at right angles.

2nd. The water in Furman Boilers is divided into small units, thereby absorbing heat quickly.

Digitized by Google

3rd. The vertical movement of water through Furman Boilers insures rapid and powerful circulation.

4th. Furman Boilers have large fuel capacity, thereby requiring minimum of attention.

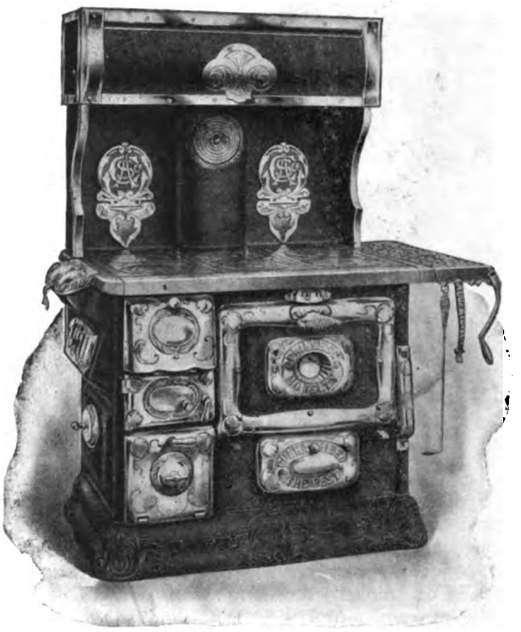
THE "FURMAN" BOILER.

As an investment, they will return large dividends in improved health, increased comfort and fuel saved.

A very elaborate catalogue of the Furman Boilers may be had of the makers on request of any one in the Trade.

M. TRAVILLA.

M. Travilla, Quincy, Ill., is pushing the sale this season of the "Marshall" hard coal base burner, which has been on the market for a number of years, but has been pushed on its merits during the last three years until it has reached a sale of upwards of 1500 a year. We illustrate the heater herewith.



THE "MARSHALL" BASE BURNER.

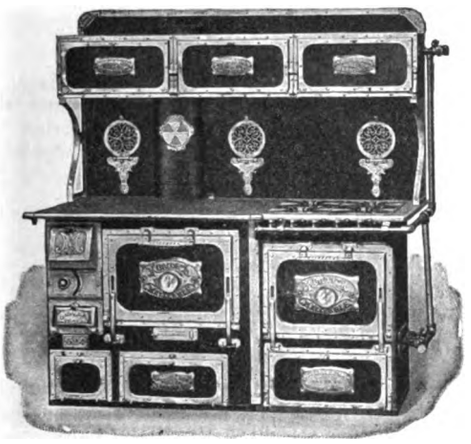
This stove is one of the most powerful heaters ever made as a hard coal or coke burner, being a full base heater, having four three-inch columns which the hot air must pass through, being drawn from the bed of fire to the dome of stove, thence down the four columns to the base of the stove. It makes an entire circuit of the base, thence out via the back flue or pipe collar, which is six inches in diameter, and extends from the base of the stove to flush with the main top, thus causing the heat to pass through the stove three times before entering the stove pipe, and in addition the heat from the main body of the stove, making it a quadruple heater. It has heavy fire-brick lining, large fire-pot, heavy draw center grate, large ash pan. All flues are broad and deep, poker door in front is large and made for convenience, screw dampers in ash box door, mica doors in front, mounted with best planished iron, and put together perfectly air tight, this being very essential in the successful burning of hard coal. It is a perfect fire-keeper and very economical. Patterns and designs are original. The urn, urn bottom, name plates, regulator, foot rails, knobs and hinge pins, screw dampers and four top caps are nickel-plated.

ABRAM COX STOVE CO.

The Abram Cox Stove Co., Philadelphia Pa., and Chicago, Ill., are manufacturers of the Princess Novelty Range, of which we give an illustration herewith. The Princess Novelty is a cast-iron right-hand-oven Range, furnished with an improved form of Duplex Grate for hard coal or with Triplex Grate for soft coal. Grates may be drawn out and replaced through open grate door without removing any bolts, as quickly and easily as the drawer of a bureau. Capacious firebox with rounded corners. Convenient cleanout under nickeled cleanout panel below oven door. One nested ring cover. Drop oven door with spring attachment. Oven door lined with heavy plate metal, bringing inside of door flush with oven bottom when door is

THE "PRINCESS NOVELTY" RANGE.

open. Oven door, when open, forms very large, firm shelf, a great convenience for basting, etc. Inside of oven aluminized—a neat, clean and durable finish. Aluminized oven rack of beautiful design, may be placed at five different positions. Pouch feed projecting well out from end of Range. Screw draft plates in end of Range, in ashpit door and draft pipe—these plates close tightly and enable the user to control the draft exactly as desired; they are a marked improvement over the old style, loose-fitting slides. Extra deep ashpit. Unusually capacious sheet metal ash pan, finished in aluminum. Large smoke collar, unobstructed by lugs or bolts. Top made of four heavy outer plates with three panels set therein to hold the lids and cross pieces. The Princess Novelty is furnished either in Belanoir Bronze, or in permanent Black and Nickel. We recommend the Belanoir Bronze as the finest and handsomest finish ever applied to a Range. The permanent Black and Nickel is also a very effective and durable finish. Entire top in a permanent and beautiful burnished gunmetal finish. Top oven plate heavily ribbed and very durable. Improved quick-acting sheet flue system, so constructed as to insure rapid and uniform heating of the oven. Heavy sliding oven and draft damper, operated from top of Range. Damper rod and damper removable without disturbing any other part. Reservoir has large tank and is furnished with special heat-deflecting damper. The thermometer in oven door is of the latest and best type, very sensitive and accurate, and a great convenience to the careful cook. The following parts of the Princess Novelty Range are finely and heavily nickeled when the Range is finished in permanent Black and Nickel: Ashpit door, cleanout panel, grate door, wood door, oven door frame, name plate, door spring box, door handles and knobs, screw valve plates, ornaments, brackets and top trimmings of high closet and high shelf. Corresponding parts are highly burnished when Range is furnished in their incomparable Belanoir Bronze finish.



♣

The retailer who is now advertising lawn mowers, corn planters, mosquito killers and chagre cures is doing more to help the mail-order houses than the consumer who sends them his order. Who wants to trade at an out-of-date store? What up-to-date store will advertis that way?

Digitized by Google

MALLEABLE IRON RANGE COMPANY.

Malleable Iron Range Co., Beaver Dam, Wis., have recently added to their assortment a line of Gas Ranges, and Gas Attachments for use in connection with Monarch Ranges, which we illustrate herewith. To assist the dealer, they issue a Monarch Cook Book, filled with recipes of good dishes that may be made on the line of Ranges they manufacture, and a booklet entitled "Our Plan," in which they detail methods that cannot but be found extremely useful in the sale of their product. They issue a handsome catalogue of their Malleable Iron Ranges, filled with superb half-tone illustrations that present a very fine appearance. From this catalogue we make the following extracts, conveying an idea of the energetic way they benefit their customers, and which gives an outline of their persistent methods of helping the dealer:

NO. 47, "MONARCH" GAS SECTION.

"We believe in helping the dealer sell our Ranges, and to that end we have spent thousands of dollars on national and local advertising—not simply to impress a name—but to get the dealer and the customer together—to turn actual sales to the dealer.

Our Advertising Department is in charge of a Range Advertising Expert, whose work has shown the most wonderful selling results ever obtained for stoves or ranges. Our Advertisements deal with the ordinary range dissatisfaction, and show why the Monarch overcomes them all, why the Monarch saves fuel, and why the Monarch is the most economical range to buy. We run these advertisements during the regular range-buying season in the leading magazines, periodicals and farm journals, which we know will have the largest circulation in your particular locality. We make an offer in our advertisements that brings the intending purchaser face to face with you over the range.

We have a Cook Book prepared for us by one of the best known and highest authorities on domestic economy in America.

This Cook Book contains a thorough talk on the Monarch, showing why the Monarch cooks better, uses less fuel and is the economical range to buy. It is a real book (not a pamphlet), with 144 pages handsomely printed on heavy paper, with board covers, bound in cloth. In our advertisements we offer this splendid book free to any one who intends purchasing a cook stove or range within a year.

We send the book to you. We send the inquirer an order with directions to go to you for the book. Thus you see each inquirer we interest in our national advertising in your locality must go into your store to obtain his or her Cook Book.

Those inquirers who do not buy a Monarch immediately, together with those people whose names you send us on a special card (we supply you free) as being interested in Monarchs—as likely purchasers, are then given over to our successful range salesman. We at once commence a series of personal letters—not printed forms—telling all about the superiority of the Monarchs and seeking by every possible sales argument to sell the Monarch. Whenever he effects a sale by this means you obtain the full benefit—your profit is not cut in the least.

Now that's our plan, Mr. Dealer. Do you see anything in our plan for you? If you don't, or if there's any question in your mind, we'll be glad to hear from you."

BONNET-NANCE STOVE CO.

The Bonnet-Nance Stove Co., Chicago, Ill., offering their new Triumph Steel Range, has this to say about competition:

Much is said nowadays in regard to Catalogue House competition, but little, if anything, has been done to thwart this competition either by the stove dealer or by the stove manufacturer, notwithstanding their futile efforts in that direction. It is a well-known fact that Catalogue House trade has been built up solely by educating the public to believe the Catalogue House undersells the retail merchant, and while this is partly true, yet in many instances inferior goods are offered for sale by the Catalogue House which the retail dealer could not and would not sell.

We have a scheme, which with the co-operation of the stove dealer, we believe will be of real benefit to him and ourselves;

"TRIUMPH" STEEL RANGE.

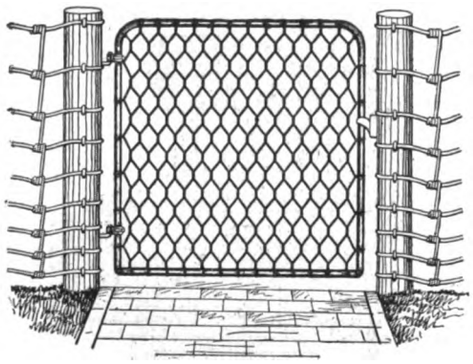
but to make this scheme operative, we must have your personal assistance, as success depends upon hearty co-operation of all stove dealers. We call your special attention to the enclosed cut of range, which you will readily recognize as being extensively advertised in your local paper and farm journals by a prominent catalogue house. How many times have you been brought face to face with this competitive range?

The "net cash" price that we ask for this range will enable you to realize a handsome profit, but would suggest that you make your price considerably lower than the Catalogue House price, for obvious reasons. We ask that you set this Triumph range up attractively in your show window, issue circulars and advertise it in your local papers. We will furnish cuts at actual cost. This range will help you sell not only your other stoves, but your other goods as well, as it will prove to your customers that you can undersell the Catalogue House, and leave the inference that your other goods are equally low in price.

Will you not contribute your assistance toward crushing this Catalogue House competition, which not only threatens you but us as well? Please remember, that the success of this scheme depends solely upon the assistance we receive from you and other dealers, and if we do not get your assistance, we shall be compelled to withdraw our offer. However, if we get the support we anticipate, we shall then get out another pattern that will be equally effective in breaking this kind of competition, and thus slowly win back to you and other dealers the legitimate stove trade that has fallen into the lap of the Catalogue House.

Let us have your views in this matter, and please make any suggestions which you think will aid us along these lines. Above range is the Triumph Six-hole Steel Range, and is made from polished blue steel, has six covers, one of which is sectional, asbestos lined, cast flue strips and flue cup screw draft registers, duplex grate, cast base, and full nickel trimmed like the best grade ranges.

♣



OSBORN MFG. CO., Cleveland, Ohio. Catalogue No. 121 of Brushes and Brooms, Foundry Supplies and Hardware Specialties. Former lines of brushes, etc., have been largely increased and a number of new ones have been added. Attention is called to the numerous lines of brushes for special purposes, which will be found in this book; for example, there are, in addition to a full assortment of brushes, brooms, etc., for the general trade, complete lines especially designed and manufactured for Railroads, Foundries, Painters, Platers, Heater and Boiler Manufacturers, Shoe Manufacturers, Brewers, Bakers, Butchers and Packers, Creameries and Dairies, Canning Factories, etc.

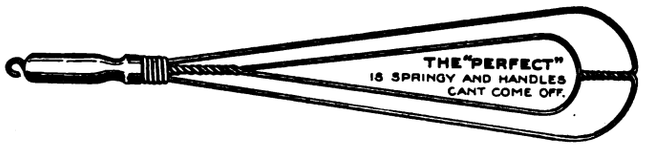
NEW GOODS AND SPECIALTIES

CYCLONE FARM GATE.

Cyclone Woven Wire Fence Co., Waukegan, Ill., and Holly, Mich., are the manufacturers of the wire Farm Gate which we illustrate herewith. This Gate has a galvanized wire filler, and is hand-woven diamond mesh, which is drawn very tightly, and furnishes such a rigid brace against sagging that a gate 16 feet



CYCLONE FARM GATE.

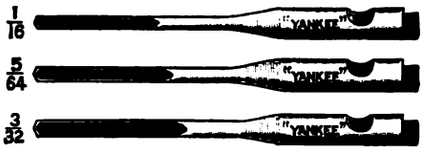
long made by this company requires no outside bracing, and will hold their shape against any strain. The frame is tubular steel, all fittings malleable. These Gates are sold to the trade at a very low price.

"PERFECT" CARPET WHIP.

C. K. Hutchins Co., Buffalo, N. Y., manufacture among various salable articles the "Perfect" Carpet Whip, as illustrated herewith. It is manufactured from stiff coppered No. 10 wire. The outside wires coiling around the handle give a spring to

"PERFECT" CARPET WHIP.

the whip, while the inner twisted wires passing through the handle make the combination complete. It is claimed as an important feature that the handle will never come off. They also make a high grade carpet whip from the finest steel spring wire the same size. The "Perfect" are put up one dozen in a package.



YANKEE SPIRAL RATCHET SCREW DRIVER NO. 35.

North Bros. Mfg. Company, Philadelphia, Pa., have added to their line of Yankee Tools, the Spiral Ratchet Screw Driver No. 35, illustrated herewith. In construction it is the same as the company's Nos. 30 and 31, so familiar to the trade. It drives

YANKEE SPIRAL RATCHET SCREW DRIVER NO. 35.

screws in or out, ratchets in or out, and is arranged to hold rigid when closed or extended. The bits are straight, so that they can be used to drive screws through holes in insulators, etc., where the flattened blades will not pass. One of the best features of the new tool is its size, it being smaller and lighter than the numbers previously made, this one measuring seven inches in length when closed, without bit, and weighing complete less than seven ounces. Its entire length with bit in chuck is 9½ inches closed, and 12½ inches when extended. Extra long screw-driver bits, the same width as regular bits but two inches longer, projecting four inches beyond the chuck, can be furnished. These

DRILL POINTS.

drill points are offered 1-16, 5-64 and 3-32 inch sizes, which are attached as shown in Fig. 2. Larger drill points than these should not be used with this tool. The countersink which can be furnished is shown in Fig. 3. The company explain that the

COUNTERSINK.

tool is intended for electrical workers, cabinet makers, carpenters and mechanics having a large number of small screws to drive, where a lighter weight tool will be more sensitive and convenient than the standard pattern, No. 30.

PARAGON CYLINDER WASHER.

Paragon Manufacturing Co., 541 Monadnock Block, Chicago, Ill., are offering the Washing Machine illustrated herewith. In

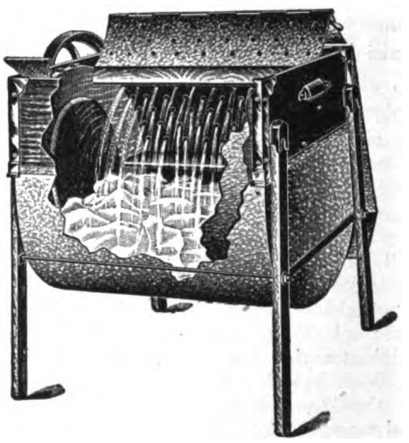


FIG. 1. PARAGON WASHING MACHINE.

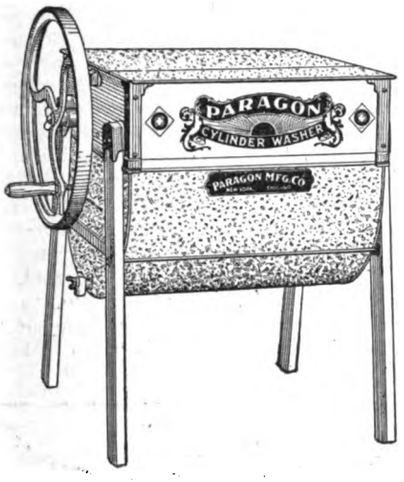
Fig. 1 the Washer is broken away to show the action of the water. As the cylinder revolves the cross ribs carry the wet clothes upward and drop them rapidly and forcibly back into the water. The garments are tossed and tumbled in the moving hot water, while the soap suds and steam, which are forced again and again through the fiber of the fabrics, clean the clothes quickly without injury. The entire tub, the whole perforated circumference of the cylinder and the cover, are made of a fine grade of

Digitized by Google

galvanized steel. The metal construction eliminates disagreeable odors. The exterior of the Washer is shown in Fig. 2. The ribs and side walls are smoothly finished to guard against wear



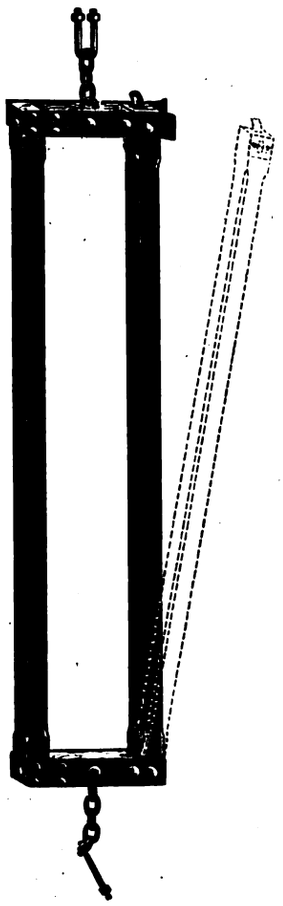


FIG. 2. PARAGON WASHING MACHINE.

and tear of the clothes being washed. Strong and heavy catches are used to prevent the door opening when the cylinder is revolving.

"WARNER'S NO. 1" COW STANCHION.

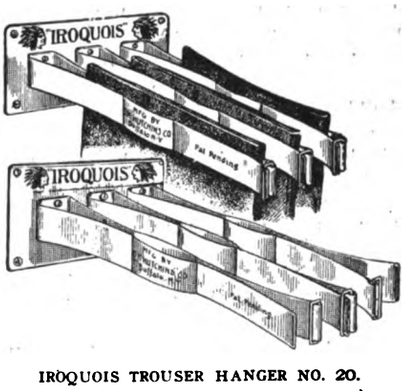
A. H. Warner & Co., Bristol, Conn., are placing before the Hardware trade "Warner's No. 1" Cow Stanchion, which is illustrated in the cut shown in this article. This Stanchion is constructed of thoroughly seasoned hard wood, without mortises or tenons with the cuds reinforced by steel bands securely bolted.

WARNERS COW STANCHION.

Hanging by a chain at the top and bottom the Stanchion yields to every motion of the cow. The almost continual motion tends to loosen the nut where a single bolt is used. A staple bolt is furnished for the top chain. When in place the staple bolt will not turn and the nuts will not loosen. The joints are made positively rigid by correct placing of bolts with 4 1-2 inch pin at right angle, making a strong, stiff frame. In rigidity, it is claimed, it outdistances all other stanchions. By an ingenious device, an entirely new feature in stanchions, when open the loose bar is held automatically in position so that it is impossible for it to fall. This saves all groping to find it and stooping to pick it up from the floor. In whatever direction the stanchion may swing, the bar is always where it belongs. It is never under foot of man or beast. The improved catch is absolutely certain in its action and is the most easily operated fastening known. A cow cannot loosen or open it in any way. To open, only one hand is used, the upright spring is released by a pressure of the thumb. By a slight outward motion of the hand the bar passes out and into position. A child that can reach it can operate it.

HOME COMPANION TOOL SETS FOR CHRISTMAS.

The Goodell-Pratt Co., Greenfield, Mass., are offering the Hardware trade their splendid Home Companion Tool Sets, particularly suited as Christmas gifts. As shown in accompanying cut No. 710, they contain a very complete assortment of high grade tools of exceptional value to the household, office or workshop.



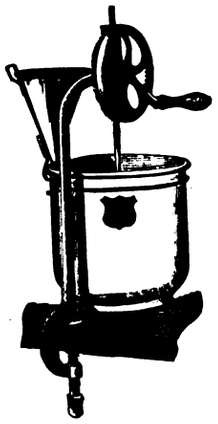
HOME COMPANION TOOL SET.

1 Ratchet Screw Driver, 6 inch; 1 Ratchet Screw Driver, 1½ inch; 1 Hand Shave, 1 Hack Saw Frame, 6 Coarse Teeth Blades for same, 3 Fine Teeth Blades for same, 2 Extra Fine Teeth Blades for same, 1 Polished Bone Saw for same. 1 Glass Cutter, 1 Cocobolo Handle Automatic Drill, 8 drills for same, from 1-16 to 11-64; 1 Universal Tool Handle for holding: 1 Gouge, 2 Chisels, 1 Screw Driver, 2 Brad-awls, 1 Gimlet, 1 Reamer, 1 Saw; 1 Nail Set, 1 Prick Punch, 1 Saddler's Drive Punch, 1 Solid Punch, 1 Oil Stone.

They are conveniently arranged in a polished hardwood case, useful for odd jobs anywhere. They should sell at sight. To aid the dealer in their sale, this company will furnish paper models of these tool sets, about 5x3 inches in size, which when opened show not only the tools in the box, but a printed list of them with price. Now that the holiday season is approaching, dealers should lose no time in getting a supply of these models, as they will prove a material help in selling these tool sets.

IROQUOIS TROUSER HANGER NO. 50.

IROQUOIS TROUSER HANGER NO. 20.



C. K. Hutchins Co., Buffalo, N. Y., are placing on the market the newly patented Iroquois Trouser Hanger No. 50, which is

Digitized by Google

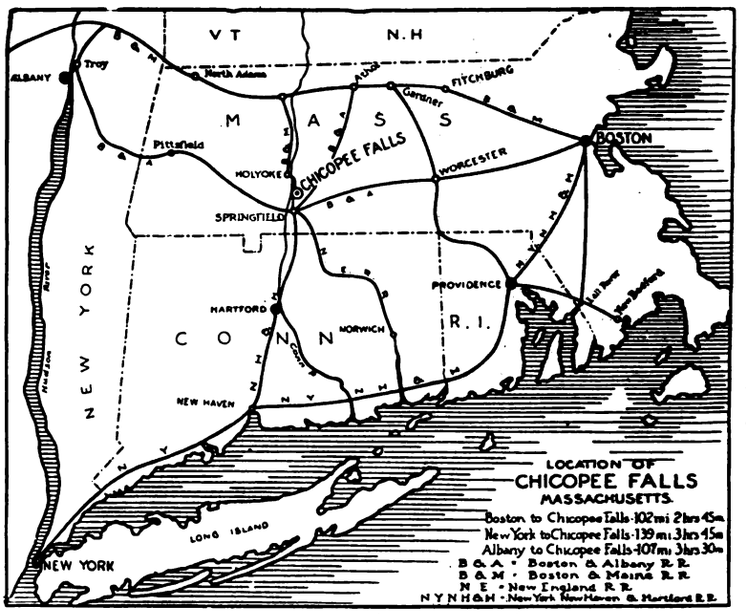
illustrated in the accompanying cut. The Hanger is made of steel, which is nickel-plated inside and out to prevent any possible marking of the trousers. It only projects from the wall far enough to hold three pairs of trousers, and consequently economizes space. Being very handsomely finished, it makes an attractive article for the purpose, and one that will be found to be a departure from the ordinary cheap goods. It is made to sell for 75 cents, and the manufacturers will send sample prepaid on receipt of price.

CHRISTY IMPROVED MIXER.

Christy Knife Co., Fremont, Ohio, are the manufacturers of the Christy Improved Mixer, which is an article for the preparation of mayonnaise dressing, beating eggs, whipping cream, etc., and which we illustrate herewith. Attention is called to the simplicity of construction. First, a standard provided with a clamp for securely fastening it to the table, and a main gear wheel for operating the separate devices used. Next, a china mixing bowl encircled by a wire band, the outer point resting against the standard and the upright point supporting the oil cup. The oil reservoir is a nickel-plated, cone shaped funnel,

CHRISTY IMPROVED MIXER.

with a spout extending from the bottom to carry the oil away from the side of the bowl and provided with an oil feed regulator on the inside, extending to the bottom, covering the opening in the spout, and clamping over the top of the rim; by raising or lowering, the flow of oil is under perfect control. The cup is provided with a socket for receiving the wire clamping the bowl, holding same in position while operating the machine. The Mayonnaise Paddle has a shaft and gear, which when placed in head of machine is held in position by a clamping bottom, the gear engaging main gear on standard at top.. The paddle is designed especially for making mayonnaise, and it being essential to success to exclude instead of beating air in the dressing.



The egg beater and cream whip, unlike the mayonnaise paddle, has two small gear wheels on the shaft, engaging the large wheel at the top and bottom, causing the flyers to whirl both ways with great rapidity and ease. The flyers resting upon the bottom of bowl take up and thoroughly æreate every particle of egg or cream.

WIMBERLY & THOMAS HARDWARE CO.

A building that will have a greater floor area than any in the state, it is said, is that which the Wimberly & Thomas Hardware Company will erect for their warehouse and wholesale department on the south side of Avenue A between Eighteenth and Nineteenth Streets, Birmingham, Ala. Contractors will begin work on the building within a short time and it will be completed by June 1. It will have a front of 250 feet and a depth of 140 feet. The building will be of brick, four stories high and of mill construction with 170 caissons. Each floor will contain 36,000 square feet. A private spur of the Belt line will parallel the rear of the building, being sheltered by the second story. Two elevators enclosed in shafts of hollow tiling, situated so as to communicate with the cars, will lift the freight to the upper floors. A stairway will also be enclosed in each elevator shaft, thus leaving no way for a draft in case of fire. As a further means of reducing insurance rates there will be a complete sprinkler apparatus on each of the four floors. Architect W. C. Weston has spent several months in perfecting the plans of the building. The retail department of the firm will remain where it now is, at 2013 First Avenue.

CHICOPEE FALLS, MASS., THE HOME OF STEVENS GOODS.

The J. Stevens Arms and Tool Co. have been asked so often "Where is Chicopee Falls?" that they decided to have the accompanying map made, giving the exact location, electrotype of which we have received, and which illustrates the location so that "he who runs may read." It is a small town, as Eastern cities are rated, the census for 1905 giving it 20,191 inhabitants, including Chicopee and Chicopee Falls, which are under one city government. Chicopee Falls is only twenty minutes street-car ride from Springfield—one of the most accessible points in New England, and the electric cars that pass the Union Station, pass their office door. Springfield is on the main line railroads between New York and Boston, Albany and Boston, and Montreal or Quebec to New York, and numerous branch lines radiate therefrom. As may be seen, Chicopee Falls is in the firearms district. The map is not distorted, nor cities moved about indiscriminately, as railroads do, to show how direct their lines are, neither does it show many of the branch lines or electric roads that network this part of Massachusetts.

A most cordial invitation is extended to one and all to pay them a visit, that all may know them better, also learn where and how the Stevens goods are made. They say they will not ask anyone to buy goods, but will do their best to make their visit a most enjoyable one.

F. H. LAWSON CO.'S NEW CATALOGUE.

F. H. LAWSON CO., Sales Department 437-439 Main Street, Cincinnati, Ohio. Catalogue No. 11. In an introductory note the company say regarding this catalogue: "This catalogue illustrates only such goods as we manufacture ourselves. In addition we carry a complete line of House Furnishing Goods generally, including Gray Enameled Ware and Blue and White Enameled Ware, etc. Also Roofing Plates, Bright Charcoal and Coke Tin Plates in standard and odd sizes always in stock. Sheet Steel Roofing, such as Pressed Standing Seam, Roll and Cap, Self-Capping, V Crimp, Corrugated Sheets 2½, 1¼, 5/8 inches, Beaded Siding and Ceiling, Metal Clapboard Siding, Imitation Brick Siding, Rock Face Stone Siding, Comb Capping, etc., etc. We carry in stock constantly Sheet Iron of every description and of various gauges and sizes, viz.: Galvanized Sheet Iron, Cold Rolled Sheet Steel, Wood's Smooth Boiled Iron, Uniform Color Sheet Steel, Wellsville Polished Sheet Steel, Planished Iron and Jacket Iron. Sheet Zinc, Sheet Copper and Brass, Brass and Copper Wire, Brass and Copper Rods, Brass and Copper Tubes, Brazier Copper Rivets, Cut Copper Nails. A full and complete line carried in stock at all times to meet the demands of the Tinner, Cornice Worker and Roofer in general, viz.: Galvanized Conductor, Galvanized Gutter, Galvanized Elbows, Galvanized Cut Offs, Roofing and Furnace Cement, Conductor Strainers, Conductor Hooks, Tinners' Rivets, Roofing and Slating Nails, Stove Bolts, Mica, Dampers and Damper Clips, Speaking Tubes, Elbows, Whistles, etc. We also mention Tinners' and Cornice Makers' Machines and Tools. Our stock of metals is always complete, viz.: Pig Tin, Bar Tin, Pig Lead, Bar Lead, Slab Zinc, Antimony, Bismuth, Cadmium, Aluminum, Babbitt Metals, Half and Half Solder, Roofing Solder, Spelter Solder."

RECENT TRADE PUBLICATIONS.

Universal Caster & Foundry Co., 1170 Broadway, New York, have issued an illustrated catalogue and price list of Piano-Forte, Metallic Bedstead and Furniture Casters. This catalogue has been revised, and shows the numerous styles, sizes and patterns manufactured by them. This company are in a position to supply all wants promptly, and guarantee their product. Under the name of Philadelphia Casters they manufacture Toler's Steel Horn, Star, Ball-Bearing, S, and Ordinary. Included in the contents will also be found English, Plate, Round Shallow Socket, Square, Neck Grip and Oblong Casters; Truck Casters, Table Brackets, Shelf Blocks and Lounge Feet. These goods are manufactured at their factory, 108-130 Adams Street, Newark, N. J.

J. Stevens Arms & Tool Co., Chicopee Falls, Mass., are sending to the trade a booklet intended for the holiday season, on the front cover of which is displayed a picture of old Santa Claus about to enter the office of this company to stock up on Stevens Firearms. The booklet is devoted to what this well-known company are doing for the merchant who handles their popular line, believing that "Co-operation is the life of trade." In their announcement they state: "A perfect combination—Stevens ideal holiday goods and the judicious advertising behind them. Our attractive, forceful Christmas advertisements make a powerful appeal to millions of the consuming class in hundreds of diverse publications. Be prepared for the enormous Stevens Christmas demand we have created. Your customers will be influenced and become ready purchasers of our popular Rifles, Shotguns and Pistols. The Stevens Christmas magazine advertisements will appear in the leading National publications and Sporting and Outdoor periodicals. These mediums have a combined circulation of upward of 3,858,155 copies, and figuring at a conservative estimate of four readers to each copy, makes it possible for over 15,432,620 people to see our advertisements in the magazines, etc. Realize what our stanch co-operation means! Get the benefit of our invaluable support by carrying a large line of the Stevens. All leading jobbers handle our goods and are in position to supply your wants at the lowest market figures. Be sure you specify our makes when ordering. Order now! There are no substitutes for the Stevens."

D. W. Bosley Co., Fulton and May Streets, Chicago, Ill. Catalogue of Felt, Excelsior, Double Rubber, Single Edge Rubber, Flexible All Rubber, Metallic Rubber and Cushion All Felt Weather Strips, Rubber Window Cleaners, Bar and Counter Cleaners and Floor Scrubbers. This company also make to order special styles of Weather Strips of wood and rubber combined, in genuine oak, imitation walnut or polished mahogany, as well as Weather Strip Packing for refrigerators, ice boxes and coolers.

F. B. Shuster Co., State and Mill River Streets, New Haven, Conn., who are designers and builders of Automatic Wire and Metal Working Machinery, have presented us with a catalogue of Straightening, Cutting and Riveting Machines. Regarding this catalogue the company state: "We take pleasure in presenting to the trade our new catalogue of Automatic Wire-Straightening and Cutting Machinery, and Riveting Machinery which form a portion of our standard line of manufacture. In this edition we have not given individual illustrations of each size of the machines, but simply show one machine of a certain class, representing one of the several sizes and styles of machines we build. We have also illustrated some of the special types of Straightening and Cutting Machines for handling strip and sheet metal, which we have, at different times, been called upon to build to suit the requirements of our customers. Other lines of machines we build are Drilling and Countersinking Machinery used in Hardware manufacture; Foot and Power Presses, Butt Milling and Drilling Machines, Foot and Power Sprue Cutters, and Wire Forming Machinery of all descriptions, of the best material and workmanship. As John Adt was the inventor of Automatic Wire-Straightening and Cutting Machines, which were manufactured by John Adt & Son, established in 1866, and whom we succeeded, we can justly claim to be the pioneers in the manufacture of this line of machinery. Since acquiring the business we have endeavored to sustain the reputation of our predecessor, and to bring our machines to the highest standard, also to introduce in the manufacture of our goods modern machinery, which would facilitate our work, and systems whereby records of all machinery built are so filed as to enable us to duplicate parts. We have made special efforts to reconstruct our machines so as to permit the use of special tools and fixtures in connection therewith, which increases their utility."

Pike Mfg. Co., Pike, N. H., and 151 Chambers Street, New York, are sending out their Ninth Edition Illustrated Catalogue, in which will be found a large assortment of Scythe Stones for Scythes, Sickles, Lawn Mowers, Kitchen Knives, and all farm and household tools; Axe Stones, Washita, Arkansas, India and Turkey Oilstones; Oil and Water Stones, Razor Hones, Grindstones, Silver Mounted Goods, Knife Sharpeners, Gold Testing Stones, Saw Jointers and Skate Sharpeners, Glass Cutters' Requisites, Soapstones and Dental Goods. Among the additions to their already large line not found in their Eighth Edition are: "Stonoil," Coverfast Oilstone Box, Pike Selling Assortments, Corundum Wheels, etc. Views are also given of their various factories, mills and quarries, and the Pike Mfg. Co. will be glad to send a copy of this catalogue on request, as they have a generous supply of the same. Everything relating to this class of goods will be found within its pages.

Manning, Bowman & Co., Meriden, Conn., with New York office at 25 West Broadway, have published a highly interesting booklet containing sixty recipes for the Chafing Dish, with instructions how to use this article, and information as to supplies for the same. Illustrations are given of the "Perfection" Chafing Dish Lamp, the M. & B. Vapor Lamp, Spoons and Forks for the Chafing Dish, "Ivory" Enameled Food Pan or Blazer, and an 8-piece Chafing Dish Outfit, nickel or silver-plated and mounted with stag-horn handles, consisting of 3-pint Chafing Dish, 16-inch satin center Waiter, Spoon, Fork, Skimmer, Toaster, Cutlet Dish and Flagon. The recipes show a great variety of toothsome dishes that can be prepared with its aid. This catalogue also contains illustrations of bottles of Chafing Dish Alcohol, Nickel Polish, and their Meteor Circulating Coffee Percolator. These represent lines of goods which the Hardwareman could profitably handle, and this catalogue will be found a valuable aid. This company are also manufacturers of Bath Room Fixtures, Bar Goods, Table Kettles, English Pewter Prize Trophies, Hotel Ware, Soda Fountain Accessories, etc.

Edwards Mfg. Co., Eggleston Avenue, Fourth and Fifth Streets, Cincinnati, Ohio, and 52 Broadway, New York, who are known as "The Sheet Metal Folks," have issued a mammoth catalogue illustrating and describing Sheet Metal Building Material. This catalogue, the company state, is the most complete catalogue of its kind that was ever issued, and has taken months of preparation. Everything in the above line of goods that could be thought of is included in the contents, such as Conductor Pipe, Eaves Trough and Hangers, Roof Gutters, Crestings, Finials, Roofing, Corrugated Sheets, Steel Brick Siding, Imitation Terra Cotta Siding, Shingles, Metal Fire-Proof Windows, Building Fronts of Galvanized Iron or Copper, Bay Windows, Cornices, Weather Vanes, Ventilators, Skylights, Enrichments, Garlands and Wreaths, Scrolls, Rosettes, Leaves, Shells, Capitals, etc. All those interested in metal building material should send for a copy of this large and complete catalogue.

Cassady-Fairbank Mfg. Co., 6106-6130 La Salle Street, Chicago, Ill. Catalogue of Hardware Specialties. This company have a very complete factory for the manufacture of their product, with the following departments: Tool—All kinds of Dies and Machine Tools; Stamping—Anything in Steel, Brass, Zinc, Copper and Aluminum; Automatic—Everything in Screw Work up to 2¼ inch; Hand Screw—All classes of Hand Screw Work; Blacksmith—Light Tool Work of all kinds; Wood Working—Handles, Dowels, etc.; Annealing—All classes of work; Case-Hardening—Gears and general line; Tinning—All classes of work; Enameling—On Steel, Iron and Wood. They solicit contract work in all departments. Everything that can be thought of in the Hardware specialty line is given in the pages of this catalogue, and it should be sent for by the Hardware dealer who wishes to keep an up-to-date stock.

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED NOVEMBER 12, 1906.

414,692. HATCHET. W. Fowler, Milton, Del.
414,710. WASHING MACHINE. C. A. Japhet, Winchester, Kans.
414,720. LOCK. E. J. O'Keefe, New York, N. Y.
414,732. SPRINKLER. F. Splittstoser, North Branch, Minn.
414,737. CARPET STRETCHER. A. M. Wairadt and G. A. Colban, Cedar Rapids, Iowa.
414,771. WHEEL WRENCH. G. T. Hutchinson, Edgar, Neb.
414,772. MONKEY WRENCH. W. H. Kaltenbeck, Stamford, N. Y.
414,799. PIPE AND NUT WRENCH. G. Donahue, Yonkers, N. Y.
414,974. PRUNING IMPLEMENT. C. Dunham, Amboy Centre, N. Y.

PATENTS ISSUED NOVEMBER 13, 1906.

835,514. ICE CREAM FREEZER. J. H. Genter, Albany, N. Y.
835,591. WASHING MACHINE. N. Allgier, Syracuse, N. Y.
835,644. WASHING MACHINE. R. C. Smith, Innisfail, North-West Territories, Canada.
835,698. COMBINATION TOOL. R. Bartholomaus, Dresden, Ger.
835,727. TOOL OPERATING AND HOLDING DEVICE. Wm. H. Donnelly, Maroa, Ill.
835,794. SOLDERING TOOL. S. Kohn, New York, N. Y.
835,990. WRENCH. B. Tindall, Framingham, Mass.
836,075. COMBINATION TOOL. L. S. Loudon, Kansas City. Mo.

PATENTS EXPIRED NOVEMBER 19, 1906.

415,187. PADLOCK. William F. Beardsley, Oxford, ... C.
415,195. MOP WRINGER. C. Gillmann, East Park, N. Y.
415,198. RATCHET DRILL FRAME. G. E. Heinbach, Lewiston, Pa.
415,245. DEVICE FOR FILING SAWS. H. O. Gadberry, Cawker City, Kan.
415,301. WASHING MACHINE. D. H. Sherwood, Salem, Ore.
415,355. DOOR CHECK. W. W. Atteberry, Chesterfield, Ill.
415,589. NUT LOCK. W. H. Trammel, Huntington, Ind.

PATENTS ISSUED NOVEMBER 20, 1906.

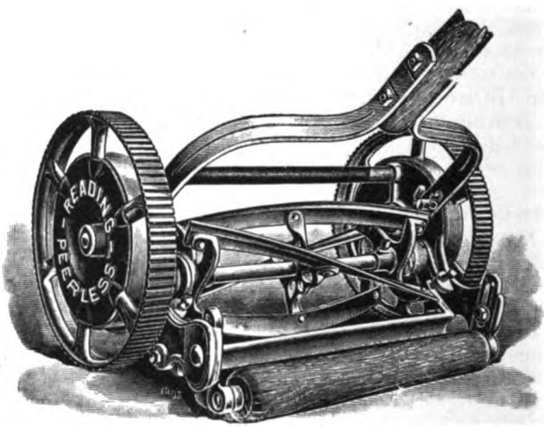
836,095. WINDOW FASTENING DEVICE. J. H. Cook, Flatbush, N. Y.
836,112. COMBINATION STEP LADDER AND IRONING BOARD. H. B. Haley, Pittsburgh. Pa.
836,144. LANTERN. C. K. Schade, Canton, Ohio.
836,289. LOCK AND LATCH MECHANISM. H. G. Voight, New Britain, Conn.
836,300. LOCK MECHANISM. C. J. Caley and H. G. Voight, New Britain, Conn.
836,437. WRENCH. S. B. Cochran, Glen Easton, W. Va.

"ENTERPRISE" FISHING TACKLE.

After more than a quarter of a century of successful operation the Enterprise Manufacturing Co. of Akron, Ohio, justly lays claim to leadership in the industry of manufacturing fishing tackle and faces the future with largely increased facilities and every expectation of continued development. The company was incorporated in 1880, with Mr. E. F. Pflueger as the leading spirit. Many of the company's most successful products were the result of his inventive genius and his inventions are protected by numerous patents owned by the company.

On E. F. Pflueger's death in 1901 his four sons, J. E. Pflueger, G. A. Pflueger, E. A. Pflueger and C. T. Pflueger succeeded to the management of the company's extensive business and have since conducted it with marked success. The extent of its growth and prosperity may be judged from the fact that in the season of 1906 the Enterprise Manufacturing Co. sold from 100,000,000 to 150,000,000 fish-hooks of their own manufacture—and that is no fish story either. It indicates something of the fondness of the American people for the gentle art, though all of the output of the Enterprise works was not used at home. As a matter of fact, a good percentage of the company's product of fish-hooks was exported to foreign countries and used by foreign fishermen. The old-time foreign prejudice against American-made hooks is rapidly subsiding and the export trade of the Enterprise Manufacturing Co. is reported to be growing at a very satisfactory rate.

In order to keep pace with increasing trade, the company has recently made a large addition to its manufacturing plant at Akron, having thereby nearly doubled its producing capacity. The new building, which is on the eve of completion, is a five-story brick building, 100 by 50 feet in ground dimensions, and occupies a convenient site on Ash Street, the Enterprise Company having purchased the property through to Center Street. Three hundred to four hundred hands will be employed henceforth, and the shipping facilities of the company will be greatly increased by the addition of factory space and grounds.



The fishing tackle catalogue of the Enterprise Manufacturing Co. for 1907 is an index to the size and importance of its business and is full of interest for all jobbers and dealers in tackle. It is a mammoth affair containing hundreds of illustrations of the company's products, all the fish-hooks, for example, being pictured in their actual sizes; from tiny "limericks" to big hand-made cod and halibut hooks.

An interesting section of the new catalogue, which bears the distinctive number F 25, is devoted to Pflueger's artificial flies, the most popular patterns of universal reputation, suitable for trout and bass, being listed, illustrated and described. All sorts of spinners and mechanical baits are included in the pages of the catalogue and quotations are given on all sizes. A large section is devoted to reels, floats, etc., and innumerable accessories of the complete fishing outfit are duly listed.

Typographically, Catalogue F 25 is all that could be desired. The pages are of large size, enabling the numerous cuts to be properly displayed, and the descriptive reading matter is interesting and to the point. Dealers can secure this fishing tackle catalogue on request.—*Ex.*

READING BALL BEARING PEERLESS LAWN MOWER.

The Reading Hardware Co., Reading, Pa., have made such a grand success of their Peerless Lawn Mower, which we show in the illustration herewith, they have been compelled to take the manufacture of it from the Builders' Hardware Department of their works and give it separate factories, fully equipped with the most complete machinery of the latest improved pattern, being mostly of their own invention, and calculated for the manufacture of Lawn Mowers on the largest scale, in order to be equal to the demand. The Reading line of Lawn Mowers is now complete in every respect as to patterns, styles and sizes, embracing as it does, in addition to the Peerless, the Century, National, Monarch, Quality, Sterling, Keystone and Junior. The Peerless Mower shown in the illustration is a ball-bearing machine, having 10-inch driving wheels, 4 blades and furnished with bicycle cone bearings, the cones being made of tool steel hardened and ground, with steel balls 5-16 inch in 1 1-2 inch ball races. The knives on reel and also the lower cutter-bar are made of tool steel and tempered. It is made in 4 sizes: 14, 16, 18 and 20 inch, and beautifully decorated in white and carmine with gold striping, forming a perfect ensemble. In fact it is claimed to be the highest grade Lawn Mower that can be produced from the best material throughout.

READING BALL BEARING PEERLESS LAWN MOWER.

HIS HORSE'S INTELLIGENCE.

A farmer had a horse and was anxious to sell, and one day while driving one of his summer boarders the horse stopped so frequently as to lead the boarder to ask:

"What ails your horse that he stops so often? Is he balky?"

"No," replied the farmer, "he's all right. It's simply he's so darned afraid somebody will say 'Whoa,' and he won't hear it, that he stops to listen."

OUR BRITISH LETTER.

(From Our Special Correspondent).

London, November 14, 1906.

STOVES IN PLACE OF FIREGRATES.

A casual glance through the pages of British stovemakers' catalogues shows that Englishmen are gradually inclining towards American ideas of heating their houses, shops and offices. Until a few years ago, the open firegrate was considered an essential feature in every British home. They were also largely used for heating public buildings, offices and shops; but during the last few years, stoves and heating schemes have been adopted. Many of these are heated by petroleum oil, and the hot air conveyed in pipes and flues all round the rooms and halls. Hot water and hot air are now largely adopted, and stoves constructed on the American principle, especially portable stoves, are being gradually introduced. Some improvement also has been effected in open firegrates; compartments for heating hot air, and conveying it to other rooms having been introduced in several instances. One of the most effective schemes is that brought out by J. P. Prior; special grates have been on view at recent London exhibitions.

ASSOCIATION WORK.

The Ironmongers' Federated Association is making active progress, devoting much attention this winter to the formation of new branches. Chiefly aiming at the formation of district associations, and grouping the small towns and even villages where only one or two ironmongers ply their trade together. Secretary Smith is visiting the different local associations, with the view of strengthening their membership, and creating greater interest in the work. Unfortunately the chief difficulty experienced is to secure suitable men as local secretaries. Those who at present doing the best work are drawn chiefly from the smaller class of ironmonger, and have to devote most of their time to their own businesses. However, such men are doing good work, and the majority of the secretaries, none of whom are paid, devote much energy towards the spread of the movement. A large meeting was held last week in Gloucester, which is the center of an extensive agricultural district, an area which also includes some large market towns, among the hardwaremen in them being several firms of magnitude and note. It is difficult to obtain new members, especially among the larger ironmongers, so many of whom are afraid of being coerced and compelled to fall in line with schemes adopted by the majority. But this prejudice appears to be gradually diminishing, and in connection with the recently formed association in Gloucester, there are several large ironmongers who are an acquisition to the Federated Association. The recent appointment of committees by the Central Board simplifies the work somewhat, and a wise grouping of the members of those committees enables the work to be carried on with greater ease than if the members resided in different parts of the country. At present the attention of the Central Board is being given to the incoming incorporation, which will probably be carried out in the course of the next few weeks.

THE FORTHCOMING CHRISTMAS TRADE.

British ironmongers, and especially those catering for a cash trade, expect to reap some benefit from Christmas sales, and many are now laying in stocks of novelties, fancy Hardware and sundry attractive goods suitable for Christmas presents and New Year's gifts, the demand for which appears to increase rather than diminish. Among the new goods suitable for this particular department are some exceptionally good art metal goods, including art bronzes, fire ornaments and household furnishings, as well as electro-plate table appointments and cabinet work.

THE CRUSADE AGAINST TIPS AND ILLICIT COMMISSIONS.

The new Act of Parliament which comes into operation next year, entitled "The Prevention of the Corruption Act," receives the heartiest support of all commercial men, and is likely to be vigorously put in force against any offenders. The practice of receiving commissions on orders placed, and for services rendered, by employees, has grown to such an extent during recent years that legislation has become a necessity. The evil which affects the larger as well as the small manufacturing firms prevents fair competition, and is often the means of contracts and orders being placed with firms whose goods are by no means the best, and often at prices which are not the lowest obtainable. The tips and commissions received by architects and others, although in some cases different to prove, have shown considerable, and it is only firms who follow this practice who are able to secure remunerative work. The Act which makes such commissions illegal will doubtless have the desired effect, and will enable firms who are desirous of maintaining a strict system of commercial integrity to secure a larger share of the orders going. Even retail ironmongers are by no means free from this unhealthy practice. Many have found it impossible to carry on their businesses profitably without giving commissions and tips to game keepers, estate agents, and others; at Christmas time the amount they have been called upon to pay, either in the gifts of money or goods, being a severe tax upon their resources. The new Act will therefore be welcome, and it is hoped it will be the means of checking the growing tendency of the age.

A NEW FEATURE IN HARDWARE TRADING.

The impetus given to the miniature rifle trade, owing to the energetic way in which Lord Roberts, the popular British General, has taken up the education of the youths of this country in shooting practice, and the way in which many advocate the introduction of rifle clubs, a large trade in miniature rifles has sprung up. Ironmongers are making satisfactory efforts to secure the new business, and are already stocking some of the best known types of miniature rifles. Those guns made by the Birmingham Small Arms Co., are of the very best possible quality, and are being sold extensively, but there is a demand for a less expensive type of gun, and one most popular being the rifle manufactured by the J. Stevens Arms & Tool Co., whose rifles and ammunition are being sold in this country from their London Depot. The "Ideal" rifle No. .044½, which is accurate and well finished, being much appreciated by young and old. There is no doubt that target practice has been much neglected in former years, and the average Englishman, who is neither connected with the army or a sportsman, knows very little about shooting. Now, however, that so much prominence is being given to the .22 bore rifles, men who have thought little or nothing about the advantages of being able to shoot straight in the past, are now inquiring for guns and are either joining clubs or setting up private ranges of their own. This desirable national quality will, if encouraged, mean a much larger trade in such weapons in the future, as well as a steady demand for ammunition and the various sundries connected with sporting proclivities. Doubtless the manufacturers of the United States will come in for a good share of the business which is now being created in guns and ammunition.

IRONMONGERS AND THE GAS STOVE INDUSTRY.

During the past year or so I have referred in several of my letters to the rapid strides made in the gas stove industry, and to the enterprise of ironmongers in taking up this business. Quite recently negotiations between several of the leading gas companies and members of Ironmongers' associations have led to the amicable arrangements between gas companies and ironmongers now in force in several parts of the country. Gas companies who have hitherto regarded ironmongers as opponents, and often as opponents not worthy of their consideration, are now realizing that ironmongers may become valuable helpers in spreading the use of gas stoves and cookers, and they are showing themselves willing to grant members of the Hardware trade facilities for taking up agencies, and working in conjunction with them. Indeed, the arrangements which have already been made augur well for the future of the gas stove industry in general, and for that portion of it conducted by ironmongers in particular. The multiplication of store rooms cannot fail to be advantageous, and when it is realized that every ironmonger who becomes an agent has in his employ at least several assistants, all of whom will become actively engaged in pointing out the advantages of the use of the gas cookers to their numeerous customers, it is not difficult to realize that the sale and use of such appliances must rapidly increase.

THE MOTOR CAR INDUSTRY.

The great Motor Show which opens to-morrow (15th inst.) bids fair to be one of the largest exhibitions of motor cars and vehicles ever held in this country. The whole of the space available at Olympia, the large building in which the exhibition is to be held in London has been taken up, and there is every prospect of the attendance being a record one. Cars of every description will be on view, and nearly every maker of note in Great Britain will be represented. There will also be motors from the United States, and most of the Continental centres on motor car construction.

Digitized by Google

The ironmongers of this country take little part in the sale of motor cars, and but few of them act as agents, although it would appear that a good business is done in selling motor cars on commission, and there seems to be no special reason why ironmongers should not take a much greater share in this business than they do at present. The sale of accessories, however, is becoming more and more a part of the Hardware business, and many sell motor spirit to motorists and motor cyclists. In my next letter I shall refer to the Stanley Cycle Show, the most important exhibition connected with the cycle industry held in this country, an annual event which is looked forward to by all engaged in the sale of cycles, and by cyclists, as on that occasion manufacturers take care to have something new to show their clients, and generally bring out their improvements and new accessories at this annual exhibition, which opens at the end of this present month.

THE MUNIFICENT N. C. R. PROPOSITION.

Six automobiles as awards in a prize contest. Sounds like a pretty big affair, doesn't it? Such a contest is now being waged among the American salesmen of a big manufacturing company with headquarters at Dayton, O.

This company is offering six Stoddard-Dayton runabouts as prizes to stimulate the members of its selling force to better work this fall. Every salesman—there a 492 of them in America—is given a chance to win one of the machines. During September and October elimination trials were conducted. The contest has now narrowed down to 48 men. In December only 16 will be left in the running. Six of these will win autos on January 1.

The National Cash Register Company, which is offering the auto prizes, has tried many plans for keeping its salesmen at the top notch of their speed all the time. After a great deal of experiment the officials of the Company are convinced that valuable prizes pay for themselves many times over. Many men will work harder for a prize than they will work merely for commissions or salary. As the men always get their commissions into the bargain they are doubly satisfied after the contest for the prizes is over and all the more ready to enter into another one. The Company is satisfied because the contests bring business.

The great question with many manufacturing concerns nowadays is how to sell their product. The millionaire president of one of America's biggest manufacturing companies, speaking of the product of his own factory, once said: "Most anybody could make these machines, but it takes genius to sell them." This has been the experience of many other manufacturers. So it has come to pass that more and more energy, brains and money have been put into the two great moving forces of business—advertising and salesmanship. Big concerns are putting forth every effort within their power to increase their selling forces and to make them more efficient.

The N. C. R. Company has long been noted for its fine force of salesmen. Perhaps no company has been at so much pains and expense to secure competent men for salesmen, in the first place, and to train them well in the second place. After a good man has been obtained and educated the next thing is to keep him working at top speed, to keep him "gingered up," as the sales manager would say, and it is for this purpose that the prize contests are conducted. In all contests a large amount of personal notice is given, through a daily paper issued by the Company, to the men who win prizes, or make a good showing for them. The liking for this notice is an element of human nature which enters strongly into any contest and proves as much of an incentive as the prizes themselves.

The Stoddard-Dayton runabouts, which are to be the prizes in the present contest, are beautiful four-cylinder cars, distinctly high grade in ev ry particular. They develop fifteen to eighteen horse-power and sell for $1,500 each. Officials of the N. C. R. Company, after looking over many types of autos, fixed upon these as the best they could buy.

There will be a fight for every one of the six automobiles, which means that every one of them will be paid for many times over by the increased business secured. The effect of this generous and timely prize offer was noticeable immediately. During September and October the American Selling Force broke all previous records for those months, selling nearly two million dollars' worth of registers.

REVIEW OF THE MARKETS.

WIRE NAILS: About the time of going to press with our last issue, an announcement of an advance of 5 cents per keg in the prices of Wire Nails and Staples, and $1 per ton in the price of Barb and Smooth Fence Wire was made by the American Steel and Wire Co. This advance has been justified by the conditions prevailing in these commodities for some time, a heavy demand for Nails and the price of raw material being held at high figures strengthening the market, which was thus prepared for it. The output of Wire products has been limited by shortage in steel and the inadequate car facilities afforded. Low stocks are reported among the Western houses that usually carry extensive assortments. Present quotations consequently are as follows, f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days or 2 per cent discount for cash in 10 days.

Carloads to Jobbers	$1.90
Carloads to Retail Dealers	$1.95

New York. Well assorted stocks are reported among the local jobbers at the present time, so that the good trade prevailing can obtain all the goods they require. The following base prices were announced November 21 by New York jobbers; To retailers, carloads on dock, $2.09; less than carloads, on dock, $2.13; small lots at store, $2.20 per keg.

CUT NAILS: The Cut Nail Association, under the understanding previously had of meeting the advance on Wire Nails whenever it takes place, previous to the next meeting, as far as the Association members are concerned, the secretary of the Association has officially notified the trade of a 5 cent advance in the price of Cut Nails, making the revised quotations as follows. f.o.b. Pittsburgh:

Carload lots to Jobbers	$1.95
Less than carload lots to Jobbers	$2.00
Less than carload lots to Retail Dealers	$2.10

Iron Cut Nails at all points west of Buffalo and Pittsburgh are held at 10 cents advance on price of Steel Cut Nails.

New York. Many principal sizes of Cut Nails are still reported quite scarce in the local market, local jobbers receiving shipments quite tardily and free from a fullness in regard to assortment. An advance in price to $2.20 base for small lots at store, was announced by jobbers on November 21. The market has been irregular for some time, small lots at store ranging from $2.05 to $2.10 base, and for popular sizes $2.15 has sometimes been obtained. Jobbers have concluded that in view of the advance at mill of 5 cents on November 12, a uniform price at store should prevail.

BARB WIRE: The advance of $1 per ton already referred to was made at the time. The new business affecting the line of Wire products is by no means large at this time in the season, specifications on contracts making the principal movements. Quotations are held firmly at the advance as follows:

	Painted.	Galvanized.
Jobbers' carload lots	$2.05	$2.35
Retailers' carload lots	2.10	2.40
Retailers' less than carload lots	2.20	2.50

SMOOTH FENCE WIRE: An advance of $1 per ton was announced on this Wire product at the same time as the others, taking in all grades of Smooth Fence and Coppered Wire. The activity continues in this branch of the business, which, combined with specifications on contracts, is quite large and heavy and the mills are very much behind on deliveries. Revised quotations are as follows, f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

Jobbers' carload lots	$1.75
Retailers' carload lots	1.80

COAT AND HAT HOOKS: An advance in the price of Wire Coat and Hat Hooks amounting to about 10 per cent. was announced by several manufacturers. To correspond with the new level of the market, a fair quotation to retail merchants would be 75 per cent. discount.

WROUGHT DOOR BOLTS: Manufacturers of Wrought Door Bolts this week advanced their quotations about 10 per cent. Wrought Barrel Japanned Bolts, Wrought Barrel Bronzed, Spring, Shutter, Square and Square Neck Bolts are included in this class.

STRAP AND T-HINGES AND WROUGHT BUTTS: New quotations show an advance in the market of approximately 10 per cent., as will be observed from the new schedule of base discounts given below. The retail trade may expect about the same concessions as have ruled heretofore, which may be fairly represented in a general way by extra discounts of from 10 and 5 to 10 and 10 per cent.

Strap and T-Hinges.

Light Strap Hinges	65%
Heavy Strap Hinges	70%
Light T-Hinges	60%
Heavy T-Hinges	50%
Extra Heavy T-Hinges	66 2-3%
Corrugated Heavy Strap Hinges	70%
Corrugated Extra Heavy T-Hinges	66 2-3%

Wrought Steel Butts.

Reversible and Broad	75%
Light Reversible and Light Narrow	75%
Loose Joint Narrow Light Inside Blind, etc.	70 & 10%
Back Flaps, Table and Chest	70%

STEEL AND IRON SQUARES: The manufacturers of Steel and Iron Squares have advanced the price of this line to 75 per cent. discount for one case of four dozen, 70 and 7½ per cent. in less quantity than a case, orders for five cases and over obtaining a lower price.

PLANES: Several of the leading manufacturers of Iron Planes have just marked up their quotations about 5 per cent. The market on this line may now be represented in a general way by a discount of 60, 10 and 5 per cent.

WASHERS: The market for Wrought Iron or Steel Washers is still an open one. Advances are not at all uniform, but prices to retail trade are not now based on better than 5.60 to 5.80 off list.

COLD PUNCHED NUTS: The following prices on Cold Punched Nuts have been announced:

	Off list.
Cold Punched, plain, blank, square	4.80c.
Cold Punched, plain, blank, hexagon	5.10c.
Cold Punched, C. T. & R., blank, square	5.10c.
Cold Punched, C. T. & R., blank, hexagon	5.70c.
Cold Punched, plain, tapped, square	4.80c.
Cold Punched, plain, tapped, hexagon	5.10c.
Cold Punched, C. T. & R., tapped, square	5.10c.
Cold Punched, C. T. & R., tapped, hexagon	5.70c.

HOT PRESSED NUTS: The following prices on Hot Pressed Nuts have been announced:

	Off list.
Hot Pressed, blank, square	5 c.
Hot Pressed, blank, hexagon	5.40c.
Hot Pressed, tapped, square	4.70c.
Hot Pressed, tapped, hexagon	5.10c.

BOX STRAPS: On account of increased cost of material and in sympathy with similar goods, the leading manufacturers of Box Straps have advanced their prices 10 to 15 per cent.

SHEET ZINC: Under date of November 17, an advance in Sheet Zinc is announced, the price now being $8 per 100 lbs. in 600-lb. casks of the thicknesses from Nos. 9 to 22, inclusive, and of the widths from 32 to 58 inches, and of the lengths from 72 to 96 inches, f.o.b. mill.

GALVANIZED WARE: Quotations on Galvanized Ware and also on the various classes of Tinware are now based on the low list, which has been pretty generally circulated among the trade. The present market prices to retailers on Galvanized Pails and Tubs may be fairly represented by a discount of 10 and 7½ per cent. from this list and on Coal Hods by a discount of 10 and 5 per cent.

MANUFACTURED — BY — **NICHOLSON FILE CO., - Providence, R. I.**

BOLTS, CARRIAGE, MACHINE, ETC.: Carriage and Machine Bolt prices have again been advanced, the following being the quotations named for retail merchants, although it is probable that jobbers will shade these figures for a time:

	Per Cent.
Common Carriage Bolts, ⅜x6, smaller and shorter, cut thread	70 and 12½
Common Carriage Bolts, longer or larger than ⅜x6	60 and 2½
Machine Bolts, ⅜x4 or shorter and smaller, with H. P. or C. P. Plain Nuts, cut thread	70 and 12½
Machine Bolts with H. P. or C. P. Plain Nuts, larger or longer than ⅜x4	60 and 7½
Machine Bolts, all sizes, with C. and T. Nuts	60
Machine Bolts, ⅜x4, smaller and shorter, without Nuts, with cut threads	75 and 5
Machine Bolts, other sizes, without Nuts, 6 in. and shorter	65 and 5
Machine Bolts without Nuts, longer than 6 in.	65
Machine Bolt Blanks	60 and 7½
Bolt Ends, with H. P. or C. P. Plain Nuts	60 and 7½
Bolt Ends, with C. and T. Nuts	60
C. P. Coach Screws	75 and 5
Cone Point Lag Screws	75 and 10
Forged Set Screws and Tap Bolts	50 and 5

Regarding the terms of payment which manufacturers of Bolts and Nuts recently altered to 30 days, net; 1 per cent., 10 days, it is authoritatively stated that these terms are now strictly enforced on their business and that there will be no deviation from them.

STOVE HOLLOW WARE, ETC.: Manufacturers of Stove Hollow Ware, etc., have advanced their quotations, due to the higher cost of raw material. On the new level the market to the retail trade is represented in a general way by the following discounts:

Stove Hollow Ware:	
Plain or Unground	60@60 and 5%
Ground Ware	50@50 and 10%
Enameled Ware	45 and 10@50%
Country Hollow Ware, per 100 lb	$2.75
White Enameled Ware:	
Maslin Kettles	65@65 and 10%
Covered Ware:	
Tinned and Turned	35 and 10%
Enameled	45 and 10%
Clue Pots:	
Tinned	30 and 10%
Enameled	35 and 10%

Sugar Kettles and English Pots are approximately 12½ per cent. higher.

ROPE: The following prices may be said to represent the market:

	Cents per Pound.
Pure Manila, 7-16 and larger	12¾ to 13½
B Quality Manila	11½ to 12
Pure Sisal, 7-16 and larger	9¼
No. 2 Sisal, 7-16 and larger	8 to 8¼
No. 1 Jute, ¼ and larger	8¼ to 8½
No. 2 Jute, ¼ and larger	7¾ to 8

LINSEED OIL: The following advanced quotations are announced November 16 on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....43 cents per gallon.
In lots of 5 barrels or more.....42 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Double Boiled Linseed Oil, 2 cents per gallon higher than raw.
Regular Boiled Linseed Oil, 1 cent per gallon higher than raw.
Calcutta Oil.....70 cents per gallon.

THE ALBANY TRADE.

We are pleased to report a continuance of the excellent trade conditions that have been in effect in this locality for quite a period. The recent slight fall of snow has given an impetus to trade in certain lines that otherwise would not have occurred. Where all the snow shovels go puzzles one until they take a little trolley tour around the city and see how many miles of sidewalks and crossings there are to be cleared. A snow shovel does not command much consideration after Winter is over and if the small boy uses it for a sliding board and leaves it in the street or away from his home, it is irrevocably lost and the Hardware dealer gets the benefit the next season. So it is with any goods in the Hardware line that are now furnished at such reasonable prices as to preclude the necessity for taking care and preserving as the seasons pass by. We are certainly becoming extravagant and wasteful and the dealer in such commodities as referred to above, reaps the benefit.

The recent advance in prices on nails, wire, strap and T hinges and some other lines, has strengthened the views of those who thought possibly a sag might happen about the first of the year. Such forebodings of lower prices can be thrust aside. We believe the decree has gone forth from the ore beds up to the finished article that no lower price than the present may be expected for quite a period. The demand for goods is greater than the supply. The bins and shelves and racks show badly assorted stocks. The unsatisfactory promises which the makers give rel-

Digitized by Google

ative to shipments, show plainly that a great scarcity of leading lines exists. Just such a condition is within the recollection of some of the older dealers only, and it is quite refreshing to have this cycle coming around again, bringing to mind the remembrance of former prosperous times. Notwithstanding the strong tone of the market, the jobbers show a persistency in selling some goods at extremely close prices which the retailer who is on the alert, takes advantage of in order that he may sort up his stock on a good basis for the Spring trade.

The holiday business will doubtless be a record-breaker, as the amount of money which seems to be available by all buyers, will make a brisk demand on the merchant for table and pocket cutlery, razors, scissors, dressing cases, chafing dishes and many similar goods which now constitute a regular part of the Hardware dealer's stock. A little touch of cold weather will inaugurate a heavy retail demand for skates. The jobbers are shipping on hurried calls the orders taken some time ago and the season is itself opening earlier than is usually the case. The many improvements and new features which have appeared in this line, make it very interesting and we predict a large sale in these novelties that appeal strongly to the young people, who extract so much pleasure from skating. It is a pleasure to report such a good condition of affairs and we hope that it may continue for an indefinite period. ALBANY HARDWARE & IRON CO.

Charles H. Turner, President.

THE CLEVELAND TRADE.

Pig Iron, Pig Tin and Copper have advanced to the danger point, manufactured goods are still low compared to the price of raw material and will likely advance from present prices unless raw material declines, and the fear is that we shall soon be beyond the limit where prices can remain. The conditions remind us of old times when panics were a part of the regular programme. The hope has been indulged that we might avoid extreme prices, but signs indicate that we may not. It is not the result of corporation greed but it is exorbitant demand. The get-rich-quick scheme by extreme prices is not so attractive as it once was, and it is not desirable. The large combinations have steadily opposed it, and business men have cordially come to approve of their action. Legitimate business is promoted by the prevention of speculation. The old method that stranded ninety per cent. of those entering business is not desirable. The one danger threatening business, is extreme prices, that will prevent consumption. All other indications favor the outlook for prosperity. This fact is so apparent we may hope good sense will prevail, and a panic be prevented. The money and business of the country are on the right side, and while this is not an absolute guarantee it will in this, be likely to prevail, and make 1907 an unparalleled success.

THE LOCKWOOD-TAYLOR HARDWARE CO.

THE PITTSBURGH TRADE.

Trade continues very active in Pittsburgh. Early Winter weather stimulated the demand for gas stoves and other Winter goods. Sale of builders' Hardware is also very good, and early demand for holiday goods is noticeable. The continued advance in prices has apparently gone well through the entire line. On such goods as low-priced padlocks, the advance cuts into merchants' profits. These goods have an established retail price of twenty-five cents, which cannot well be changed, so that the loss of profit falls upon the merchant, and especially the wholesaler. Pittsburgh experienced the darkest day in her experience on November 15. At 3 P. M. it was as dark as midnight, and continued nearly as bad through the day. The atmosphere was clear, no fog nor smoke, and a light rain falling. Some peculiar conditions in the upper atmosphere must have held our usual smoke-cloud over the city like a lid.

LOGAN-GREGG HARDWARE CO.

THE DAVENPORT TRADE.

Each mail brings important changes in price of goods, most of which are advances. These changes seem to be practically all along the line and evidently the end is not yet. With the apparent stringency in the money market, this condition of the Hardware market seems unusual. Locally there is a temporary stringency in money, caused by the extraordinary amounts being used just now in timber land investments in the great Northwest. Banks quote interest at six per cent. and the demand is active at this rate. The Davenport banks in the aggregate have on deposit about twenty-two millions. A new bank here, The Citizens Trust & Savings Bank, opened its doors on the third day of November, capital and surplus $200,000. The deposits for the first day were about $112,000. Our savings banks are paying four per cent. interest on deposit. Crops have been unusually large and are bringing high prices. Sales for November are fifteen per cent. above the corresponding month in 1905. Collections are fair. SICKELS, PRESTON & NUTTING CO.

THE COLUMBUS TRADE.

Never in our history has business been in the condition it now is. The demand for goods is phenomenal and the scarcity unprecedented. Manufacturers' representatives are not after orders for prompt shipment, but for shipment within three to six months. Most of them will tell you they have all the orders they can fill this year. We are constantly getting advice to get specifications in early if we expect delivery in time for season's requirements.

Prices are steadily advancing. It keeps salesmen busy making changes. We fear some articles have advanced too much while others are still low enough. An advance of $45.00 per ton on wool twine seems to be unreasonable, while $3.00 per ton on wire and nails during the year is very small and ten per cent. on steel butts and strap hinges is modest. Scythe snaths without doubt are being sold below cost. The new price for wire cloth and poultry netting is not unreasonable. While the heavy demand and increased cost of raw material and labor is the basis of advances, there is danger of boosting prices too high. We hope manufacturers will keep prices where they legitimately belong, for the farther you have to drop, the greater the jolt. The old adage that everything that goes up must come down, is as true of merchandise as a pumpkin.

The demand for Guns and Ammunition has been unusually heavy, but if the purchasers don't find more game than the writer found on his first day's trip, they will not have to replenish their supply. There is quite an interest manifested in the coming State Hardware Convention that will be held in our city in the Spring. The arrangement for Manufacturers' Exhibit will be the best ever afforded them. Columbus is the right place for such conventions, on account of location and ability to take care of visitors.

THE SMITH BROS. HARDWARE CO.

THE SAN FRANCISCO TRADE.

About six weeks ago HARDWARE made the announcement, the first publication to do so, that Frank Rittigstein, one of the few very prominent Hardware merchants of Oakland, and president of Alameda County Retail Hardware Dealers' Association, had found Miss Sadie Lewek of Marysville, Cal., to be the woman of his choice and willing to become Mrs. Frank Rittigstein for better or for worse. Incidental to all this a wedding ceremony was performed the other day and now this Hardware man and his bride are on a business and pleasure trip visiting the Hardware manufacturing and jobbing centers of the East.

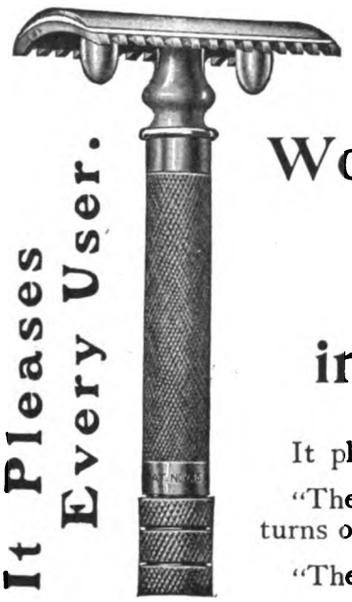
The Fire Commissioners accepted a check this week for $250 donated by Dunham, Carrigan & Hayden to the widows' and orphans' fund of the Fire Department in appreciation of the gallant efforts of the firemen in extinguishing two fires near the Hardware firm's place of business.

San Francisco was never as now so greatly over-supplied with thieves, thugs and murderers, and Hardware men generally, like very many other business men, are applying for permission to carry pocket guns, all of which of course is good for the sporting goods merchants. A few days ago W. O. Hopson, a Hardware merchant at 544 Clement Street, was struck down and made senseless at the noon hour when all but he were at luncheon, and the cash drawer was robbed.

Another Pacific Coast window display advertising contest is to be inaugurated by the Dover Manufacturing Company of Canal Dover, Ohio, manufacturers of the "Asbestos" Sad Irons. Their first Coast contest of this kind for Hardware dealers, a few months ago, was won by the Honeyman Hardware Company of Portland, $100 being the prize. Two other prizes, $50 each were won, respectively, by the Rice & Rice Hardware Company of Roseburg, Ore., and the Boyle Hardware Company of Ogden, Utah.

The old ante-disaster Hardware business conducted in the name of Buchanan Brothers is being revived by William Buchanan, of the original firm. He has located in a temporary building on the fire site, No. 1738 Larkin Street, and will carry a full line of Builders' Hardware, tools and household goods, in connection with the manufacturing of all kinds of brushes.

Otto A. Bremer, a quarter of a century in the sporting goods business before the earthquake and fire at 820 Kearny Street, and Thos. L. Lewis, who was formerly connected with the Remington Arms Company and Union Metallic Cartridge Company, have formed a co-partnership and opened a sporting goods store at 140 Van Ness avenue.



The Hammer-Bray Hardware Company, an incorporation, has done well, the trade say, in admitting to their association and installing as treasurer Frank Albright, who is reputed to be an all bright young man with a legion of friends he made during the many years he traveled the Pacific Coast territory for the W. W. Montague Company.

feature line in an illustrated front view ad of the Dean Hardware and Tool Company, in a local paper. Father Dean, proprietor of the store, is represented in the photographic picture as steadying his little tot of a boy who is standing in a wheelbarrow.

Martin Foard of Astoria, Oregon, was visiting the San Francisco trade last week and viewing the ruins. In his city he stands at the head of the Foard & Stokes Hardware Company, that has within the last few weeks been incorporated with a capital stock of $50,000. Including Mr. Foard, the incorporators are Frank R. Stokes, V. Boelling, F. A. Leahy, C. Le Blanc and J. G. Hayberg.

INDUSTRIAL PRESS ASSOCIATION.

WASHINGTONIAN PHILOSOPHY.

Habit is unquestionably the thing that most influences human life. A man's habits are the man himself, and if his habits are good the man is good and if bad we have a bad man. Habit is what made the absent-minded college professor put a car ticket in a letter and toss it on the platform of a car while he stuck the postage stamp on his own forehead and tried to crawl into the letter box. Habit is what makes men polite to women and makes you start to dinner to a house you moved from a week before. Habit is what makes you walk confidently across your room in the dark and stub your toe on the chair that some other person's habits of carelessness left in a place where it did not belong.

* * *

John Ruskins says, "It is only by labor that thought can be made healthy and only by thought that labor can be made happy," and as labor or love or dress or most every human characteristic is only a matter of habit it behooves every man, woman and child in this land of sin, sorrow, overdue bills and gum boils to get into the work habit. The optician or clerk who allows himself to get accustomed to coming down in the morning to his place of business with the idea of doing as little work for that day as he possibly can is the man who has just turned into the road at the end of which is t tumble-down shack that is to be his future home, and over the gate is the one word, Failure. Work, as I say, is a matter of habit. If any living man, no matter how lazy he may be by natural disposition, will make up his mind that, come what may, for thirty days he will work every minute during business hours, he will contract the habit of industry that will make it easy for him to hustle for the rest of his days. There is hardly a clerk—particularly a lazy one—who does not envy the men above him, who according to his idea do not have to work. Of this type of clerk there are few indeed who recognize that the quickest way to get to the point where you do not have to work is to work your hardest.

* * *

Work is the only salvation of a man. Nature hates useless things. In Mexico the dogs are hairless, while in the Alps the coat of hair on the St. Bernard dogs is amply heavy to protect them from the rigors of the climate. There is little doubt that the Mexican hairless dog was once covered as well as the St. Bernard, only the climate of Mexico made the heavy coat useless and prevented the pup from catching fleas that the climate provides so bountifully.

What happens? The hair disappears because it is useless. The man who loafs and postpones from day to day just as surely loses his ability to do things in a prompt and energetic manner as the dog loses his hair. The habit is getting in its work.

* * *

The man that is always hunting for work is the last man that has the boss hunting work for him, and is the last man in the store that has disagreeable jobs given him. The proprietor of a store is just as human as the people who work for him and will be well aware when he is giving orders that no one wants to carry out, that the lazy man is very likely to be the one to have these jobs to do. You have a man in the store that you think is a favorite of the boss, I know. Did you ever sit down and think over your own actions in the store and compare them with his and wonder why he is favored instead of you? If you will, you will find that he is busy all the time and that you have lots of time to glance over the papers and to chat with other fellows in the store. There is another feature of this being busy all the time; a man who knows he is going to keep right on working until the store closes has no particular incentive to get through the job he is then on, as he knows it will only be to take up something else, so he works more carefully than the fellow who is hurrying to get his work done, and the result is that the ever busy man not only does more work but he also does it more thoroughly.

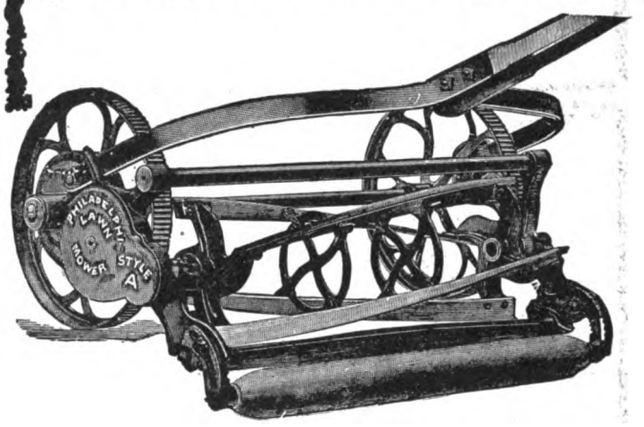
* * *

Get the habit. Go to work when you go in the morning, and the minute you are through with a customer go back to it again. When there is no work in sight make some. Pull out the old drawers and overhaul the old stock. Work first, last and all the time, and when the day of reckoning with the boss comes you can be as independent as a hog on ice, for it he doesn't see your merit the other fellow down the street will. Work is the only thing that counts. Get the habit.—*D. C. Washington in Optical Journal.*

Genuine Philadelphia Lawn Mowers are only made by The Philadelphia Lawn Mower Co.

All Others Are Imitations!

Our Style A Is the Only



ALL STEEL MOWER MADE

It has 10 inch wheel, 4-blade cylinder, train of 3 gears, double ratchet, making both wheels drivers.

The revolving cutters are without bar in center as we make no mowers with rod thru center of revolving cutter for bearings, all have large, long bearings, and are the most satisfactory Lawn Mowers made. We have others shown in 1906 Catalogue. You ought to have a copy and see our complete line.

3101-09 Chestnut St., Philadelphia, Pa., U.S.A.

THE SPIDER

"NEVER-BREAK"

that will not scorch or burn even the most delicate dainty, sauce or gravy.

Will not absorb grease or flavor.

Does not get smeary, dirty, unsanitary.

Always clean, sweet, hygienic. Never warps.

Name always stamped on the handle.
You should have our complete catalog.

THE AVERY STAMPING CO., Cleveland, Ohio.

Exclusive Manufacturers.

Digitized by Google

We Are the First!

Yes, we are the first of the manufacturers of Terne Plates to suggest and adopt the plan of stamping the amount of coating carried by our brands of Roofing Tin, and of stamping all wasters as such.

This is the "square deal" which all Jobbers, Architects, Roofers and Property Owners have needed for so long—and already the move has shown a good effect.

In future, don't merely specify American Ternes, American Extra, American Special, American Old Style A, 2A, 3A, 4A, 5A, MF, or U. S. Eagle New Method—but examine the boxes when these arrive and see that the contents indicate exactly what you purchased. If the sheet isn't stamped with the coating, look along the edge for the mark "Waster."

If you'll use these precautions you'll find Roofing Tin to be the most satisfactory roof covering you can use—but you can't expect an 8-lb. Terne to do the work of the old time or present day 30 to 40-lb. coated plates.

Send for our booklet "From Underfoot to Overhead" if you would know how a high grade Terne Plate is made, and use MF ROOFING TIN, "The Terne which turns the elements," if you want the best Roofing Tin that can be had.

"ATLANTIC"
High-Grade
Wash Boilers

TIN, COPPER and GALVANIZED IRON

Strongest and Best Made Boiler on the Market

Full Weights---Full Sizes.

We are now making a flyer of our Special Copper Boiler---write for our special prices on it. Our new Seamless Cover is a marvel of lightness and strength.

"Atlantic" Galvanized Striped Ware

is among the highest grade goods offered to the trade. Made from smooth Galvanized sheets. Heavy wiring and wide seams make it strong and durable. Add it to your line, it is a great seller. New catalogue now on the press. Write for it.

Atlantic Stamping Co., Rochester, N. Y.

185 Ames Street.

Hight's Union Combination Square

All the Combinations available all the time.

Five Tools in one: 8-inch Try Square, Bevel, Butt Gauge, Marking Gauge and Mitre

If you want to keep your stock up-to-date you must get next to this Square, for when it gets to the workmen it outsells any tool of its kind ever offered. They buy Hight's Combination Square and generally discard their other tools in this line.

The slot in the blade with the notches—to use for a gauge—is a winner.

If it's Dollars you're after this Square will catch them for you—all you have to do is to pass it along to the workman, it and he does the rest. Prices and full description sent on application.

The best tool of its kind on the market.

THE HIGHT MFG. CO., 837 Spitzer Building, Toledo, O.

HARDWARE MANUFACTURERS' RECORD

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, etc.

Atlanta, Ga.—The Georgia Plow Works of which J. B. Hightower is president; Geo. V. Brown, vice-president, and S. J. Bradley, secretary and treasurer, has completed its big factory at Copenhill, near Atlanta, and is now open for business. The plant is one of the best equipped in the south and is promised an important place in the manufacturing world.

Bernardston, Mass.—E. S. Hulbert & Co. has been incorporated to manufacture cutlery; capital, $25,000. President and treasurer, Alonzo A. Alford; clerk, Henry L. Crowell, both of Bernardston, Mass.

Boston, Mass.—The Multiplex Safety Razor Co. has been incorporated with a capital stock of $10.000. Incorporators: Franklin S. Frisbie, Malcolm H. Baker, Robert H. Benny, Francis C. Martin.

Buffalo, N. Y.—Judge Manufacturing Co. has been incorporated to manufacture tools, machinery, etc.; capital, $10.000. Incorporators: John R. Judge and Mary H. Judge, No. 205 Chester Street; Corden T. Hackett, No. 536 Ellicott Square, all of Buffalo, N. Y.

Columbus, Ohio.—A new Columbus industry has been incorporated under the name of the International Saw & Tool Co., with a capital stock of $50.000. The incorporators are Andrew Krieger, James S. Glenn, D. D. Davidson, John Cummins, Austin Z. King and W. L. Merwine. They will manufacture a patent inserted tooth circular saw invented by Mr. Krieger. The factory will be erected in the Factory Street district.

Durham, N. C.—The Combination Lock Co., a corporation of this city, have recently been granted a charter, organized and elected officers. All the stock in the company has been sold with the exception of a few shares. The company is preparing to find a suitable location, and have purchased all necessary machinery to place this new combination lock on the market. They will begin work at the earliest possible moment. At a meeting of the stockholders several days ago officers were elected as follows: President, W. A. Fulford; vice-president, J. W. Smith; secretary, L. W. Grissom; treasurer, J. M. M. Gregory.

Milwaukee, Wis.—The Smith & Post Co. has been incorporated to manufacture tools; capital, $100.000. Incorporators: Thomas L. Smith, Paul W. Post and Edgar B. Simmons.

New York, N. Y.—Jenkins Automatic Washing Machine Co. has been incorporated for the purpose of manufacturing automatic washing machines; capital, $10.000. Incorporators: M. Jenkins, M. R. Jefferds, I. Lewine, E. O. Schernikow, J. E. Taylor, New York City.

New York, N. Y.—M. C. Clamp Co. has been incorporated to manufacture clamps and clamp devices, tools, etc.; capital, $25.000. Incorporators: Le Roy Clark, No. 56 West 71st Street, New York; Alfred H. Meech, Chatham, N. Y.; Henry Scofut White, No. 95 Mercer Street, Plainfield, N. J.

New York, N. Y.—New Rochelle Iron Works has been incorporated as a manufacturing iron works; capital, $5,000. Incorporators: L. Diamond, R. Shapiro, W. Nissenson, New York City.

Reading, Pa.—American File Renewing Co. has been incorporated as mechanical engineers, etc., tool makers, founders, cutlers, etc.; capital, $50.000. Incorporators: M. DeLevante, R. S. Baldwin, A. W. Near, C. Dickson, W. H. Dodge, New York City.

Syracuse, N. Y.—Allen-Chiles Manufacturing Company has been incorporated to manufacture a hydraulic family clothes washer; capital, $50.000. Directors: W. H. Allen, S. C. Chiles, J. B. McDonald, Syracuse.

Worcester, Mass.—Cutter Horse Nail Co. has been incorporated to manufacture horse nails, etc.; capital, $20.000. President, Elbert A. Jones, No. 78 Pleasant Street, Worcester, Mass.; treasurer, Solomon M. Cutter, Ashland, Mass.; clerk, John K. Warren, No. 78 Pleasant Street, Worcester, Mass.

Changes and Improvements.

Atlanta, Ga.—The A. A. Wood & Son Co. intend in the near future to place on the market several wagon makers' tools of new design.

Atlanta, Ga.—The Southern Saw Works has put in a new tempering furnace, grinder and drilling machinery, increasing its capacity. It has also opened an office and salesroom in the center of the city, at No. 59 South Forsyth Street.

Chester, Mass.—Clayton B. Fay, for some years connected with the manufacture of emery wheels in Cortland, N. Y., has secured a site and proposes to erect immediately a mill for the manufacture of wheels.

Columbus, Ohio.—Contracts have been awarded by the Lattimer-Williams Manufacturing Co. for a large addition to the stove factory on West Spring Street. Work on the addition will be begun at once and will be rushed to completion.

Columbus, Ohio.—The Capital Lock Nut & Washer Company, which has a plant in South Columbus, has placed $30.000 additional preferred stock on the market, which is rapidly being taken by the present stockholders. The stock is being sold at par and the money will be used to enlarge the equipment of the plant, which is not yet nine months old. Orders for more than six months are booked ahead.

Conneaut, Ohio.—The Conneaut Shovel Co., which before its recent organization was known as the Rouberg Co., is rebuilding the plant and practically doubling its capacity. The most modern shovel machinery is to be installed, including new forming, drilling and smoothing presses, punches, etc. The new company has secured about three acres of land adjacent to the New York, Chicago & St. Louis Railroad. In addition to the Rouberg ore shovel, which has heretofore been made, the company will put on the market the Magar Union coal shovel.

East Douglas, Mass.—The overseers of the several departments of the axe manufacturing plant of the American Axe & Tool Co. are getting ready for the available room in the upper shops for the prompt continuation of axe manufacture. The grind shop at the Lovett mill, for a year unused, is being fitted for the work of a dozen grinders, more than half the force before the fire. William E. Correll of the forging department, and Harry D. Mowry, inspector of tempering, will have forces at work in portions of the shops not in use for nearly a year.

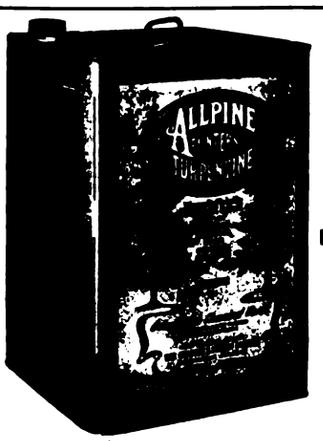
Fitchburg, Mass.—The Simonds Manufacturing Co., manufacturers of saws, machine knives and files, are to build another addition to their works, to be 40 by 60 feet and three stories. The building will take care of the increase in the company's hand saw and circular saw departments.

Grand Rapids, Mich.—The Grand Rapids Hand Screw Company have contracted for the erection of a new factory building to be located on Jefferson Avenue. The new building will be 60 by 600 feet and will consist of two stories and a basement. The contract price is about $50,000. The new building will about double the capacity of the company. Work will begin immediately, and a large force of men will be set at work. It is expected that the building will be completed in the early Spring.

Indianapolis, Ind.—The John Deere Plow Co. has just closed an important contract which will enable the company to greatly extend its cream separator trade. The company has heretofore handled only in Indiana the Simplex line of separators made by D. H. Burrell & Co. of Little Falls, N. Y. Under the new arrangement Ohio and Michigan have been added to the territory.

Keyport, N. J.—The cutlery works at Keyport have been sold to the Sherman Razor Company. The razor company demanded a bonus of $1,500 for settling in the town, which has been raised by the citizens. It is expected that the factory will be started in operation within the next two months.

Newark, N. J.—The Heller Bros. Co. are building a three-story brick addition 40 by 150 feet, to their file plant and a rolling mill, 70 by 200 feet, to their steel plant. The company expects to have both buildings equipped with machinery early next year. These additions have become necessary to enable the company to make prompt shipments of its products.



New York, N. Y.—The Gillette Safety Razor Co. have opened a branch factory at Montreal to supply the Canadian trade.

Oswego, N. Y.—The Oswego Tool Company is still branching out. Beside the new shops now running on the West Side of First Street, the original plant on the East side of First Street and the foundry to be built on the Hillside Park property the tool company has closed a deal whereby it becomes the owner of the Findlay Machine Shop next south of the original plant on First Street.

Philadelphia, Pa.—Liveright Bros., successors to Mayer & Co., file manufacturers, are adding a number of tools to their equipment which will enable them to double the present capacity of the plant. This concern has in view the general enlargement of its works and is considering the removal of its plant from the present location.

90 Per Cent Adulteration

Or 100 Per Cent Pure Turpentine

Which do you buy--and sell--to your paint trade? Remember: 90 per cent so-called "Turpentine" is adulterated with petroleum. It makes

the paint "powder" and blow away. Can't tell by the smell either, because it's the contamination by "crude dip" which gives it that sweet odor.

"ALLPINE" PAINTER'S TURPENTINE

We guarantee to be absolutely pure. It fulfils the Navy Department's specifications for pure turpentine. Contains **Pinene** but not a drop of Benzine—Naphtha—Gasoline, so destructive to paint. Sold in 5 gal. cans—Sealed at the stills—Opened only by punching hole beneath screw cap.

"Allpine" is the Best Turpentine. Ask for Turpentine Tips.

Whiting, Iowa.—Robert Whittier has sold his Hardware store to A. T. Daily.

Wellman, Ia.—E. S. Bonnell has sold his Hardware business to the Hoffman Hardware Co.

New Bedford, Mass.—Manufacturers' Supply Co. has been incorporated to manufacture Hardware. Capital, $25,000. President, Henry C. Denison; treasurer and clerk, Arthur D. Delano, both of New Bedford, Mass.

St. Boniface, Man.—The Northern Hardware Company have purchased the bankrupt stock of F. M. Jean, and will conduct the business under the above name with J. E. Riley as manager.

Taylor, Neb.—W. L. Johnson has purchased the Hardware business of J. Rusho.

Vici, Okla.—F. E. Popplewell has succeeded to the Hardware business of Stoddard & Popplewell.

Watertown, N. Y.—Connell & Rice, Hardware dealers, have transferred their stock of goods from 12 Washington street to 26 Court steet, occupied by E. B. Irvin's Hardware store. Mr. Irvin is about to retire from business and Connell & Rice have purchased his stock and leased his store.

Fires.

Antwine, Okla.—The Hardware store of E. A. Vanderveld has been destroyed by fire. Loss $7,000. Insurance $5,500.

Armstrong, B. C.—In the recent fire the Hardware store of Armstrong & Livingston was destroyed.

Birmingham, Ala.—Fire in the six-story frame building of the Prowell Hardware Co., here, has caused a loss of about $300,000.

Chester, W. Va.—Fire has destroyed the Hardware store occupied by James Fowler.

East Douglas, Mass.—Fire in the plant of the American Axe and Tool Company has caused a loss of $30,000. Before the flames were under control three of the shops with their contents were destroyed.

Jersey Shore, Pa.—Jersey Shore had a destructive fire entailing a loss of $4,000, when the large warehouse of the Hogue Hardware Co. was totally destroyed with all its contents.

Rankin, Pa.—The Hardware store of William H. Vaught at No. 100 Braddock Avenue, has been damaged to the extent of $8,500 by fire.

Redkey, Ind.—Fire broke out recently in the brick block occupied by the Williamson Bros., Hardware merchants, destroying harness, buggies and other machinery to the amount of $3,000, fully covered by insurance.

Sentinel, Okla.—In the recent fire the Hardware store of A. I. McAllister was damaged.

Virginia, Minn.—The Hardware store of Siegel Bros. & Co. has been destroyed by fire, with a total loss; insured for $3,000.

Burglaries.

Bechtelsville, Pa.—Irwin B. Kehs' large Hardware store has been visited by burglars who took $12 worth of goods.

Dillsburg, Pa.—A number of shot guns and revolvers valued at several hundred dollars have been stolen from the Hardware store of Smyser, Creager & Co.

Ellendale, N. D.—The Hardware store of N. H. Bjornstad has been burglarized. An examination disclosed the fact that two revolvers, a lot of pocket knives, about 800 Peters shells and about 500 revolver cartridges were missing.

Huntingdon, Pa.—B. F. Fink's Hardware store on Washington Street has been entered by robbers and $150 worth of goods taken, among them being six shot guns, one-half dozen revolvers, razors, penknives and scissors.

Kearny, N. J.—Burglars entered the new Hardware store of James H. Callis, 4 Kearny Avenue, recently, and stole a quantity of pocket knives, razors and revolvers to an estimated value of $150.

Middle River, Minn.—Burglars blew the safe of Nelson & Olson's Hardware store and secured $200 in cash and valuable notes and papers.

Perrysville, Ind.—Jones & Son's Hardware store has been broken into. Three revolvers, one set of silver knives and forks and seventy-five pocket knives were taken, all valued at about $100.

Springfield, Vt.—The Hardware store of Lafountain, Staples & Co. has been entered and articles from the machinists' tools, revolver, ammunition and cutlery stocks, amounting to over $600, are missing.

Claremont, N. H.—The Hardware store of Boynton & Ellis, in Hotel Claremont, has been broken into, and $5.77 in cash stolen from the register, and machinists' tools to the value of more than $100.

Granger, Tex.—The Granger Hardware Company here has been burglarized. The thieves secured about $100 worth of merchandise, consisting of razors, knives, pistols and targets. So far there is no clue.

Hope, Ark.—Burglars gained entrance to K. G. McRae's Hardware store recently. They rifled the cash register, opened the safe by the combination and stole one hundred dollars in cash, two checks, three pearl-handle knives and four Colt's revolvers.

Midway, Pa.—Burglars entered the Hardware store of Dickson & Wallace, and carried off property which the members of the firm say was valued at $700.

Newport, N. H.—The store of the Nourse Hardware Company has been entered by burglars and guns, rifles, ammunition, etc., to the value of $100 were stolen.

Petersburg, Va.—The large Hardware establishment of Charles Leonard on Bank street, has been entered and robbed. The only articles missed were thirteen Smith & Wesson and Colt revolvers, valued at about one hundred and fifty dollars.

South Hill, Va.—The Daniel Hardware Company of this place has been robbed; about $150 worth of goods being taken. The stolen articles consist principally of firearms.

St. Peter, Minn.—Ransom & Lindberg's Hardware store has been burglarized and a revolver, a quantity of cartridges and several jack knives taken.

Embarrassments.

Addington, I. T.—The Pioneer Hardware Co.'s doors have been closed on account of an indebtedness of $6,000.

Montreal, Canada.—Antonio Laurendeau and C. Levesque, carrying on business under the name of the St. Lawrence Hardware Co., have consented to assign at the demand of J. E. Merizzi.

New York, N. Y.—A petition in bankruptcy has been filed against Charles Muller, a wholesale dealer in Hardware at 88 Chambers Street. Judge Hough of the United States District Court appointed Charles C. Burlingham receiver with a bond of $4,000. Liabilities are $15,000 and nominal assets $12,000, consisting of stock $5,000 and accounts $7,000. Mr. Muller was a salesman in this line for many years and began business for himself in April, 1905.

Three Oaks, Mich.—Charles R. Sherrill, an implement and Hardware dealer, has filed voluntary bankruptcy proceedings in which he places the aggregate of his debts at about $6,000, and claims to have about half the amount in assets.

Walkerton, Ind.—Attorney Charles M. Krieghbaum has filed a petition in bankruptcy for Milo R. Haak, a Hardware merchant. The liabilities are given as $3,500 and the assets at $2,500.

MANUFACTURERS RECORD

Middletown, N. Y.—Louis L. Buck, formerly of this city, has entered the firm of Buck Bros., dealers in Hardware, etc., at 28-30 West Main Street, this city, in the place of Floyd H. Buck, recently deceased. The firm will continue under the same name as before and will consist of Charles B. and Louis I. Buck.

Reading, Pa.—The Griffin Co. have decided to increase their output. A new building is in course of erection, and with its completion the floor space of the plant will be increased about one-third.

Tonawanda, N. Y.—The Miller Foundry & Specialty Company, manufacturers of brass fittings and plumbers' supplies, have located their new factory at North Tonawanda, where it will have largely increased facilities.

Wallingford, Conn.—The Williams Co., formerly the Williams & Goldenblum Co., has sold its entire output of hack saws and band saws to the Smith & Hemenway Co. of New York, and in consequence the corporation has been dissolved and the business will hereafter be operated as a firm.

West Pittsburgh, Pa.—Announcement is just made that the Garland Nut & Rivet Co. is to begin at once with the erection of a large addition for the manufacture of bolts and rivets. The new part will adjoin the warerooms and run the entire length of the old plant.

Winsted, Conn.—The Franklin Moore Bolt Co., John B. Adams, president, has leased the foundry on Lake Street, owned by A. W. North of Hartford and will operate it in connection with their bolt works.

Worcester, Mass.—The Worcester Metal Goods Co. has purchased the plant and business of the Grilley Co., of New Haven, Conn., manufacturers of metal specialties, and will move the business to No. 17 Hermon Street, Worcester, where 5,000 square feet of manufacturing space has been taken.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

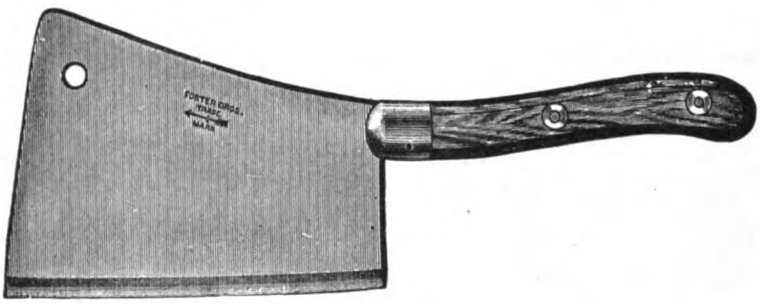
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chattillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

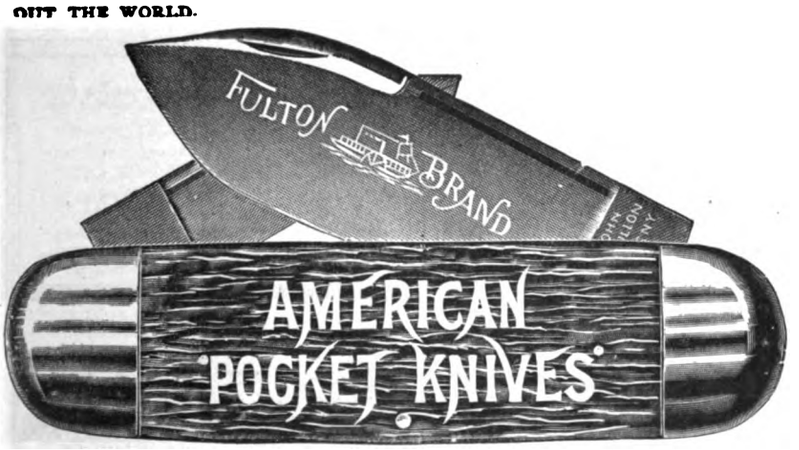


has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York.

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.



These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.

Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

ESTABLISHED 1835

JOHN CHATILLON & SONS, New York City.

85 to 93 CLIFF STREET and 12 JACOB STREET.

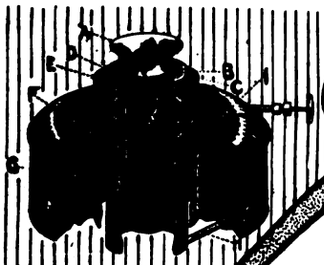
Is proving itself sure to become the standard tool of its kind.



Made in three sizes. No. 6—6 in. No. 10—10 in. No. 13—13 in.

The only kick coming on us is that we did not fill orders promptly. We did not expect so heavy a demand. It was not our fault.

If you tried to get this tool from your jobber and became discouraged because he was one who could not get his order for them, we now advise you that this condition has been overcome by our building a large country factory where they are being made by the thousands, and every order whether sample or stock, is shipped promptly. So, Try, Try, again.

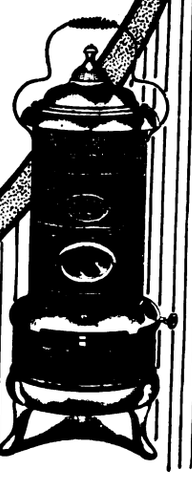
? ? ? TRUE TEMPER ? ? ?

Note Construction of Grand Safety Burner.

A—Flame Spreader. B—Air Space outside of Wick Tube. —Air Space inside of Wick Tube. D—Wick. E—Outside Casing to Burner. F—Air Space between Fount and Outer Casing. G—Fount for Oil. H—Feed Pipe conducting oil from Fount to Burner. I—Shield resting on top of Fount with Air Space underneath.

Aluminum Oil Heater

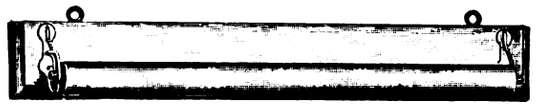


The heater that attracts attention, that holds the interest, that is overflowing with selling points.

People live on the floor, not on the ceiling. Yet in using other oil heaters the upper half of the room is hot—the lower half cold. Not so with the Aluminum Heater.

A damper across the center of the stove throws the heat **downward** at will. Do you note the significance of that—the unique possibilities in it? **It radiates the heat from the bottom and sides**—just like a base burner.

Get in line now with the shrewdest and most successful dealers in the United States and Canada by ordering the Aluminum Heater—either of your jobber or us.



Let us send you our booklet free. We will be glad to.

A NEW MONEY MAKING LINE FOR HARDWARE DEALERS

Mr. Hardware Dealer:—We have a proposition to offer you on which you can build up an excellent trade—one there's good money in.

It isn't one of the worn-out, thread-bare kind, but a new, live, line that will fit in with your regular business just fine.

It's one that pertains to the poultry industry and if you have given any attention to this field you will realize something of its great money making possibilities. Over $1,000,000 is spent every year for incubators, brooders, supplies, etc.

Why not get your share?

Never thought of it, have you? Well, the wide-awake hardware men are going to put in this line of goods and those who "get busy" first will get the best cinch on the trade.

When we say to you there's money in our proposition—that it's no trouble to interest buyers we know it to be a fact.

Over eighteen thousand people interested in them last year alone.

Just drop us a line saying you want full information and we'll tell you how to start a profitable side line there's money in.

Don't pass this by—it's worth hundreds of dollars to you and only costs a 2c stamp to get in touch with this new branch of trade.

GET BUSY

That is the one secret of success in the Hardware trade.
The rapid sales and quick turning over of capital that

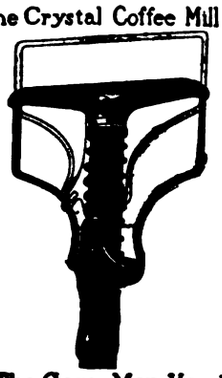
A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

The Crystal Coffee Mill



THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

The Jewel Coffee Mill

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

The Gem Mop Head.

THE FAMOUS GEM is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE EIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

SOUTH DAKOTA RETAIL HARDWARE ASSOCIATION.

The officers of the South Dakota Retail Hardware Association have secured the large new auditorium at Aberdeen for their annual convention, which will be held on January 31, February 1 and 2. It has also been decided to rent floor space to mnaufacturers and jobbers for exhibition purposes. Those desiring to secure space are requested to write to Otto E. Mueller, Aberdeen, who is first vice-president of the Association, and who has been delegated to take charge of this feature of the convention. The Association is also intending to issue a journal in connection with the meeting, advertising for which is solicited, E. D. Hawkins, president, Vermillion, having this matter in his care.

AIR COMPRESSOR LUBRICATION.

One of the dangers in air compression, says *Engineering Magazine*, which has not been fully recognized until within a quite recent period, is the liability to explosion in air compressor cylinders when the heat of compression is caused to exceed the flashing-point of the oil used for cylinder lubrication. Several more or less serious accidents of this nature have been recorded within a period of three or four years. With this statement in mind, and with an abundance of data to draw from, the Joseph Dixon Crucible Co., Jersey City, N. J., draws attention to the many striking advantages of Dixon's Ticonderoga Flake Graphite as a cylinder lubricant for air compressors. Among other features Ticonderoga flake graphite is unaffected by high temperatures. It cannot be "carbonized" or ignited. It cannot possibly give off explosive vapors. It will not accumulate dust or grit. It does not clog discharge valves. It allows a great reduction of oil supply. It avoids the danger of receiver explosions. It improves piston fit and lowers friction. It saves oil, repairs, trouble and money. A wealth of interesting data and information on the subject of air compressor and air drill lubrication is presented in a twenty-four page pamphlet, which is sent free of charge to all who are interested in the subject.

STEVENS SPANISH ABRIDGED CATALOGUE.

J. Stevens Arms & Tool Co., Chicopee Falls, Mass., are distributing the latest edition of their Spanish Abridged Catalogue, which illustrates and describes in detail all the Stevens staple numbers. Owing to the company's rapidly increasing export business with Spanish-speaking countries, they have issued these handy little books of reference, which are equally adaptable for mailing and counter distribution. This catalogue will be furnished gratuitously to the trade, imprinted with dealer's name and address, transportation charges to be borne by consignee.

THE CONTINENTAL COMPANY.

The Continental Company, Penobscot Building, Detroit, Mich., have recently issued catalogues for 1907 covering the Screens manufactured at the different factories for which they act as sole agents. The following manufacturers' products are handled by this company: A. J. Phillips Co., Fenton, Mich.; Porter Screen Mfg. Co., Burlington, Vt.; Wabash Screen Door Co., Minneapolis, Minn., and Memphis, Tenn.; Philadelphia Screen Mfg. Co., Philadelphia, Pa.; Queen Anne Screen Co., Burlington, Vt., and Owosso Mfg. Co., Owosso, Mich. The various catalogues are well illustrated and printed, and include in the contents full lines of the Screen Doors, Window Screens and Window Screen Frames offered by the above mentioned makers.

THINK OVER MISTAKES.

How many of us are in the habit of thinking over mistakes? Man is naturally proud and dislikes to become his own inquisitor. If we do not think over our own shortcomings and oversights, somebody will do the thinking for us. The time is coming when the standard of business will be the very most and the very best service for a dollar. The standard in past time has been to give as little and get as much as possible. This is an erroneous standard. The drift of business and the spirit of the times are in the other direction. The secret of business in times past has been to hide inferiority, to make things look better than they are, to indirectly deceive the customer by making him think he is getting something better than he really is; but all these standards of business are gradually being undermined, and a broader and a safer foundation is being laid, which is no more or no less than the Golden Rule. Strange as it may appear, the Golden Rule is gradually and assuredly becoming the basis of business.—*Harness.*

BRASS MANUFACTURERS' MEETING.

The National Association of Brass Manufacturers held its annual meeting at the Hotel Astor, New York City, on the 14th and 15th ult. There was over eighty per cent. of the members present. The question of the cost of raw materials and the present time and prices of goods as well, were carefully considered. A committee was appointed to establish a uniform list on tubular goods, with instructions to report at the next meeting of the Association. The following officers were elected for the ensuing year: President, E. F. Niedecken, Milwaukee, Wis.; Trustees: A. S. Hills, Haydenville, Mass.; E. C. Regester, Baltimore, Md.; A. D. Sanders, Chicago; W. D. McRae, Detroit, Mich.; H. F. Hodge, Minneapolis, Minn.; W. F. Schoenberger, Cleveland, Ohio. E. C. Regester, Baltimore, was appointed Eastern representative, and J. J. Ryan, Chicago, Western representative, on National Committee of Confederated Supply Associations. The next meeting of the Association will be held at Milwaukee, Wis., in February.

THE BRISTOL CO.'S NEW CATALOGUE.

The Bristol Co., Waterbury, Conn., and 114 Liberty Street, New York, have favored us with their new Catalogue No. 44 of Bristol Recording Pressure Gauges. The company have added a large number of ranges to those published in their No. 13 catalogue, and several of the old charts have been replaced by modern ones, whose increments are uniform. These have been grouped according to size and capacity, which enables one to find without difficulty the type of instrument best suited for their work. In this catalogue they have listed their new Portable Pressure Gauge, which is designed for use where permanent installation is not necessary. Under the heading "Applications" the company state: "Bristol Recording Pressure Gauges are capable of recording pressures of all kinds of fluids. They are, therefore, used by the thousands wherever a reliable record of pressure will determine the best operating conditions; compel the maintenance of such conditions, and consequently insure safe and economical operation. They have become an inevitable feature of the equipment of modern steam power plants, electric light and power stations, gas and water works, blast furnaces, hydraulic plants, coal mines, breweries, sugar refineries, etc. Bristol Gauges are made in all ranges for pressure or vacuum and can be arranged for chart speeds of any rate between one revolution in five minutes to thirty days. Special Gauges are furnished for ammonia, and oil seals can be supplied with Gauges which are to be subjected to corrosive fluids." This catalogue will be gladly sent upon application to any one interested.

FENCING THE WHOLE COUNTRY.

We are able to say upon the authority of President Harry Ward, of the Ward Fence Company, Marion, Indiana, that never before in the history of the wire and ornamental fence business has there been such overwhelming evidence of the general prosperity of the people of this country. Mr. Ward speaks with a wide general knowledge of farm conditions especially, as he has probably sold more Farm and Poultry fence in every State in the Union than any other man in the business. The Ward Fence Company have done the largest business this year that they have ever done, and Mr. Ward considers it conclusive that farmers, chicken raisers and country people everywhere are in even a better financial condition than they have been at any time during the past ten years.

Mr. Ward is an enthusiastic business man and puts a lot of enthusiasm into the several books on fences and ornamental wire work that his company makes, including the "Don't Rust Fence," which has taken the place of the old-time wire fence that rusted in two or three years.

"Don't Rust Fence" is so heavily galvanized that it simply can't rust. It is the cheapest kind to buy.

Any of our readers will probably find it well worth their while to write to Mr. Ward and ask for these books, which will be sent free on request. They will give you an idea of the improvements that others are making on their places in Farm and Ornamental Wire Fencing and Gates, Wrought Iron and Steel Fencing and Gates, Barb, Plain and Galvanized, and all sorts of similar improvements that cost less money nowadays than even split-rail fences used to cost.

It will be well worth any man's time to write a postal card to Mr. Ward and ask him to tell about Fence conditions.

J. W. PENTZ, - - - - - - General Manager.

DECEMBER 10, 1906

Editorial Trade Review

The year that will close its records in a few weeks has been for the Hardware trade a remarkable one in several respects, and the promise which present conditions hold out for the future seems to every one to be certainly a continuance of the prosperity which has streaked with gold the fortunes of the past. It is a moment for congratulation by all its beneficiaries, with a prayer for its future welfare.

The advance in prices which already set the pace, backed up by many orders booked so far, indicate an amount of business in large volume; the expansion of the trade by demands upon the manufacturers for needed supplies which will form the foundation of our future wealth, will severely task the abilities of the makers to furnish. With a liberality of sentiment that promises a square deal, jobbers are quoting prices based on stock, or old orders that have been bought at lower cost of material, in many cases dividing the profit that present quotations promise.

There is one course which retailers are reluctant to pursue, and that is to mark up the goods to present quotations without delay. There is no doubt that remunerative prices have come to stay, and all should share in the general good which changed quotations make in the general cost. Retailers are loath to pursue a course of this kind for fear that their neighbors may derive some advantage by selling their old stock at a price probably less than they could purchase new stock at. Doubtless they neglect until forced to change the selling price of a whole stock, but some method of accomplishing something of the kind should be entertained at once. Not only are the goods quoted at higher prices to purchase fresh stock, but the difficulty of obtaining the same is growing greater every day.

The last advance of Nails has taken the trade somewhat by surprise, it was so sudden. No one in the trade but believes it to be justified on the score of a difficulty in obtaining steel, among other things. But the heavy demand that prevailed previous and since the advance of last month and the marked condition of the iron market, which is in an unprecedented state of prosperous promise for the coming months, is reflected in an article in another column.

Holiday goods are increasing the stocks and beautifying the appearancce of the Hardware stores by their early arrival. The holiday season in old times, when no preparation was made for anything but inventory, used to be looked upon as the dullest of the year, but modern methods have changed all that, backed up by good crops in the way of agricultural achievement, and the best of wages in the lines of industrial excellence, and the bulging pocket-books of all classes empty themselves in the interest of a Christmas prodigality.

THE IRON MARKET.

The iron markets continue in a very strong position, and there is still no sign of any let-up in the urgent demand for either pig iron or billets for immediate use. Buyers who have been hoping for some relaxation in the market are now commencing to realize and appreciate that conditions now prevailing are practically unprecedented in the history of the trade. Every modern blast furnace and coke oven in the country is not only working up to its fullest capacity, but the producers are also working what have been regarded as obsolete plants for all they are worth to fill orders. We have heard predictions mace in various quarters about the consumption going ahead too fast, and prices for steel billets having been marked up too high for a continuation of healthy trade conditions; but from our canvass of the situation among the leading interests during the past week, we feel safe in saying the outlook is suggestive of a continuance of the present activity and high prices. Some of the big interests with whom we talked during the week and who are regarded as conservative and among the best judges, believe consumption will continue on about the present scale of activity throughout the coming year. The only danger is in the possibility of speculators later on coming into the market and forcing the situation to a greater tensity.

The condition of the market to-day is in such shape that quotations on pig iron at present are purely nominal. Basic and Bessemer irons would bring to-day for anything like prompt shipment pretty near any price holders might ask. There have been offers made for prompt shipment lately as high as $25 per ton. Foundry irons are in the same condition and also about the same as to price, while steel billets are in such demand that we know they are being shipped from mills on the sea coast right into the heart of the Pittsburgh district. This is almost an unprecedented situation, for it means that anybody having any billets for prompt shipment can practically name their own prices. We have heard of sales made in the last few days for $33 per ton, and in one of which there were some negotiations as high as $34 and $35 is predicted for the near future. The scrap market is also being cleaned up very rapidly.

We understand the leading interests are now trying to buy billets anywhere for shipment to Pittsburgh. This goes to show the extent to which the United States Steel Corporation must be booked ahead on its output. It costs about $2.50 per ton to ship billets from the sea coast into Pittsburgh and they can make them there from $2 to $3 per ton cheaper than our local manufacturers. Careful investigation shows the leading manufacturers are sold well ahead into the third quarter of next year and a great many are really sold ahead for the whole year; and this they say insures a continuance of activity and high prices for some time to come, especially as there is no danger of overproduction being permitted, as the United States Steel Corporation now practically controls the situation in this respect.

In discussing the highly prosperous condition of the Steel Corporation, it is probably true that it has more orders booked ahead than it cares to publicly admit. One thing is certain, and that is it has a very prosperous year ahead and is making more money now through its economies and greater concentration than ever before in its history. It is not selling any rails higher than $28 per ton, but they could be easily advanced to the present quoted price of steel billets of $33 per ton if the management of the corporation should care to change from its policy of keeping the price of steel rails fixed at $28.

Prices for finished products do not show a profit now to the manufacturer, paying as high as $34 per ton for billets, but it is believed that after the independent companies have sold far enough ahead, the leading interests may decide to advance prices more in keeping with the present high price of the raw material.

Digitized by Google

THE WOMAN'S WINDOW.

The central attraction is silverware, which may be elaborate or simple, according to material, placing the taller pieces in the center, with knives forks and spoons of various patterns in a semi-circle at the sloping base. Just outside of these, other cutlery is naturally grouped, including all sorts of knives used in culinary matters, bread knives, cake knives, carving sets, paring knives, etc. Shears and scissors make another attractive band in the display, ranging in size and use from the heaviest to those used in the finest embroidery. Scissors for manicuring, cutting buttonholes and combination scissors sets are here included. Still further out on the sloping foreground are fancy cake pans and cutters, sandwich cutters, egg beaters, asbestos mats and holders, and any novelties among kitchen utensils. A row given to the brushes of various sorts now entering into household economics, for hands, nails, vegetables, dish-washing, and scrubbing, form an interesting margin. Or it may be made up of kettles and pans, griddles, waffle irons, cake or bread maker, ice cream freezer, bread and meat slicer, and carpet sweeper, the larger implements being kept sufficiently in the rear and at the sides not to cut off a full view of the small r objects above. Doorbells or tea trays suggest other marginal borders. In the rear may be placed washing machines, clothes wringers, and churns—all large and cumbersome machines serve as a background.

Call attention in the local dailies to the character of your holiday window display. The man who has been forced to the drygoods store for his wife's Christmas present, there to select from goods the quality, real value, and appropriateness of which he knew comparatively little, will eagerly grasp at the chance of finding something of interest to women in his own field of trade.

Woman, on the other hand, lured through curiosity or misgivings (for as a rule she considers the Hardware store of almost as little use to her as a barber shop) investigates the meaning of the announcement. And the common-sense woman is almost sure to find in the motley collection not only something which she is glad to hint to the other member of the firm as a necessity, but other things suitable for friends. An improved sad iron may go to assist in the laundering of the doilies and fancy embroideries previously lavished upon a friend. For the gift of pure fancy is substituted that of utility.

THE HOLIDAY TRADE.

A walk down any business street from now until next January will reveal on either hand lines of window advertising more than usually attractive, but all suggestive of the holiday trade. In times past this has generally been regarded an occasion when there was nothing doing for the Hardware dealers; why, nobody seemed to really know. He carries many things in stock that the Christmas purchasers crowd about the counters of department stores to secure in inferior quality, or rush from place to place in search of, knives, razors, shaving sets, skates, drawing instruments, dog collars, carriage robes, whips, guns, revolvers, sleds, baby carriages, bicycles, hammocks, fishing outfits, magnets, besides innumerable household and professional supplies, not to mention such useful family gifts as carriages, sleighs, etc.; quite a list, isn't it?

It is safe to assert that every extensive line of Christmas purchases includes some things kept by some Hardware stores, and this can be said of few other mercantile lines. If the public knows this why is the Hardware store less crowded than its neighbors during the holiday season? If the public does not know it, who is to blame? Who told the public that the jeweler, the druggist, the stationer and the dry goods merchant were in line for the holiday trade but those merchants themselves?

No Hardware store, nor any other store for that matter, can obtain the confidence of the holiday shoppers that has not first obtained that of the Hardware man himself enough to make him want to tell other people what a fine assortment he has. Too often his window continues throughout all seasons a confused stack of hoes, rakes, wheel-barrows, axes, shovels, hammers, and crowbars, with a plow or two in the back-ground; certainly not an attractive outlook for the holiday shopper. Occasionally this confusion of mechanical tongues continues throughout the entire shop, as though the proprietor thought this variety of stuff would impress upon people the wide range of his stock. If one were to go into such a place and ask, say, for a suitable Christmas present for a boy, some such conversation as this would likely follow with the annoyed and puzzled clerk:

"Well, I really don't know. How would he like a knife?"

"He has a good knife."

"How about skates, then?"

"We have no water near us."

"Then I don't exactly know what we can do for him. You might look around a little; perhaps you can find something."

The would-be customer pokes around in the dust a little and soon goes out disgusted. This may seem an extreme case but the writer can call out many places from memory where extremes like that are quite in order and many more where there exists some modification of the above conditions.

It never occurs to such a clerk that the boy may own a dog and be rejoiced at a handsome collar for it; that a gun would probably be a most acceptable article; that a pony stands in the way of that boy's father, which really needs a pony outfit; or, if he is too small for these, as few boys ever are, that a miniature engine with its usual equipment of mechanical toys ought to be in stock and possibly may be; or that a chest of juvenile carpenter's tools has many times in the past been the cause of happy hearts and bleeding fingers.

The moderately equipped Hardware store need not be weighted down with extra stock to any great extent to be kept in line for the holiday trade; simply bring the right lines to the fore. Let the solid business with its heavy, unattractive demands, retire to the back-ground for a little while and show up the frills and ruffles. They have been treated as a side line so long that half of the clerks do not know of their existence; bring them out, knock the dust from them and let your employees know they are in stock. A complete list of gift goods would be a wonderful assistant to many a forgetful clerk; give each clerk a copy and then clean up enough samples to show them what color the article is painted so they will know what to look for. Almost any retailer who has never done this will be surprised at the extent of his own list. The resurrection of these forgotten items, too, will prove a stimulant to the clerk, if he is the right sort of clerk, and will turn his sensibilities into holiday channels. It is a good plan to consult the clerks about this list beforehand, weeks before, and set them to overhauling the obscure corners of the store and their own memories for additions to it.

Then tell the public about what you have and keep on telling them. Take the hoe and garden rake out of the window for a little while unless you can use it there to good advantage for some attractive bit of display; at all events take the dust and confusion out. The store that wants Christmas trade must get in harmony with the Christmas spirit. Something that will attract the child or its mother is very apt to win; the man is pretty sure to follow the judgment of his better half and offspring. For the man himself brings out something that his wife knows all about the use of and that is certain of her approval. She may take to smoking outfits and the like but she does not always; better depend upon something more like shaving sets against which she cannot by any possibility have conscientious scruples. Fountain pens and articles of which she knows the use are more likely to appeal to her than professional instruments that might be useful to him in his profession but mysteries to her.

The window and show-case display arranged for, talk about the same lines in the newspaper advertising. Connect the latter with the store itself and give the whole that holiday flavor. Refer to the window designs in the newspaper advertising. If you can arrange something so attractive that the papers will themselves say something special of it, good; if something that will become the talk of the town, a good deal better.

Send invitations to your patron friends to visit you and assure them you have also unloaded a good supply of holiday atmosphere. Perhaps a printed copy of the list you made out for your clerks will, if attractively arranged, convince them that you have some claims upon their holiday attention.

After all, the whole secret of extending the holiday trade in the Hardware store depends upon three things and how well they are done:

1st. Know yourself what articles you have and what you need that would be suitable for Christmas shoppers.

2nd. Let your clerks know what you have and listen to what they think you need; then use your judgment as never before.

3rd. Let the public know what you have and try to show them it is what they need to satisfy the longing of some friend.

Do all of these as other merchants do and the Hardware store of the future will soon be recognized as quite as much a Christmas shopping ground as the majority of their more popular neighbors.

WORLD'S FAIR IN 19 9.

Alaska-Yukon-Pacific Exposition at Seattle will exploit Northland and Oriental trade—to cost $10,000,000. Queen City raises $650,000 for enterprise in one day.

DOES ADVERTISING PAY.

This is a question a Hardware man ought to ask himself, and is a question not easily answered. The direct returns from a special advertisement are not easily seen, and it often seems that an investment in newspaper advertising does not bring back the amount spent. The great object of all advertising is to place before the possible customers the merchandise which the merchant has for sale. To do successful advertising this must be kept constantly and continually in mind.

HOW TO REACH THE CUSTOMER.

It would be almost useless for a man having bonds to sell, to send circular letters to the inmates of an almshouse. Just as useless for a manufacturer of cheap glassware to advertise in a high priced, exclusive magazine, taken largely by the wealthy class. In the same way, it is almost useless for the Hardware man to advertise some classes of merchandise in the daily newspaper. He must ever bear in mind that although men are the readers of newspapers, still few men sit down and read the advertisements. The Hardware man who has given the matter much thought, must come to the conclusion that it is necessary for him to advertise in his local newspaper that class of merchandise which appeals to women, as it is the women who are readers of the advertisements in the newspaper.

It is, therefore, of great importance for the dealer in writing up advertisements to constantly bear this fact in mind, to remember the people who are to read his advertisements.

HARDWARE THAT WILL RESPOND TO ADVERTISING.

The merchant is now asking himself what goods in his stock can he advertise in order to reach new customers, in order to enlarge his field, and thus to increase his business. Going carefully through his stock, some such line as house furnishing goods, kitchen supplies, table cutlery, and silverware and cut glass being especially goods that will appeal to a woman, are those from which he will find results will come the quickest in newspaper advertising.

LARGE SPACE NOT NECESSARY.

Good position and well worded matter will be found often to bring better results than large space. For example, a six inch ad, single column, placed directly under reading matter will be found to be more effective than three times the space with other advertisements on the back page of the paper. Catchy headlines, followed up by a plain statement of the goods offered for sale, and the use of a small cut in the six inch space, the entire advertisement surrounded by a border, will attract more attention than the same matter loosely put together.

ADVERTISING SHOULD BE HONEST.

Just as the merchant is in business to sell goods and to make money, so he must remember that his advertising is not only to bring new customers to his store, but to permanently build up his trade. The basis of all successful business is confidence, and the merchant must remember that if his advertisement is misleading in any way, he will destroy confidence, and injure rather than improve his business. It is better to understand the value of an article in advertising, than to overestimate it.

ADVERTISING SHOULD BRING NEW CUSTOMERS.

One of the most successful retailers in a Western city recently said: "I attribute my success, very largely, to the fact that I have the people with me." The successful Hardware man must follow this same idea and strive ever in his advertising to so appeal to the people that they are with him, and every customer who comes to the store in response to the advertisement, will be not only as a customer for the moment, but becomes a permanent customer of the house. It is, therefore, necessary to follow up all advertising, with not only fair treatment, but courteous treatment, and in this way advertisnig will be found to bring profitable returns for the money invested.

HAMMERNAIL.

HANDY REFERENCE CHARTS.

Some one has said that next to knowing a thing it is important to know how to find out. No Hardware dealer can carry all the details of his business in his head; it is a necessity for him to make the "where to find out" as convenient for himself and his employees as can be made. It is often surprising how lax clerks may be in finding out the simpler things that might be of such value to the would-be customer and possibly stand between him and a sale; but some of this seeming indifference may be due to mere lack of knowledge. The clerk knows that he doesn't know; he don't know where to find out and gradually acquires the habit of not caring enough to exert himself. If the information were in such convenient location that there was no excuse for him to refuse it some of his indifference might never be acquired. A customer may want a nail just long enough to reach about through two one-inch boards and not quite penetrate. If the clerk knows that a six-penny nail is two inches long and a five-penny a quarter-inch shorter he is prepared to serve that customer a good deal more satisfactorily than if he has to measure several sizes. If he don't know it is probably his own fault; if he has no convenient place to find out it is the fault of some one higher up.

It would not cost much or take much time for a clerk during spare moments to prepare a table or chart giving the length of the various sizes; also their gauge and approximate number to the pound, and paste this sheet up in some place convenient to the nail bins. Not more than one or two clerks in the entire establishment perhaps, need ever use it, but it might be worth the trouble just to keep one clerk right and spare the temper of one hasty customer. With helps of this sort at hand the chances are that the one clerk will not remain in need of such a chart so long as he would otherwise; but there are many other lines of goods wherein a similar help will be of liberal service.

Sometimes a new man will be taken on the force; what a world of annoyance and embarrassment such a set of charts will save him and his fellow clerks while he is learning the business. All the time, too, it is drilling into him the tendency to find out for himself without bothering other people.

Teach the clerks that no facts about the most common article are too trivial to be important; then place the information where they can have ready access to it. If this is done the unusual question of some over particular customer will be far less likely to be met with uncivil words or blank looks.

NATIONAL CONVENTION FOR THE EXTENSION OF THE FOREIGN COMMERCE OF THE UNITED STATES.

We have received the following communication from the committee referred to and hasten to lay it before our readers:

Recognizing the fact that the people of all the States are deeply interested in measures designed to increase the consumption of our products abroad, the undersigned committee begs to announce that a National Convention for the purpose of considering and devising measures for the enlargement of our foreign trade and to promote the demand abroad for the products of our farms, workshops and mines, will be held in the New Willard Hotel, Washington, D. C., beginning at 10.30 A. M., Monday, January 14th, 1907.

The obstacles which have hampered our efforts to develop the commerce of the United States with foreign countries are evident to everyone familiar with that trade. That those obstacles should be removed at the earliest possible moment is unquestioned if we are to attain pre-eminence instead of remaining, as we are, far in the rear in the struggle with Europe for foreign commercial supremacy.

A consideration of the subject of the extension of our trade abroad will suggest to every informed business man a number of topics, each of which, although a part of the whole, should be considered separately. The committee feels that whatever means are adopted by the Convention, in order to be immediately effective, must be based on a recognition of economic conditions as they now exist. All discussions should, therefore, be germane to the object in view, which is that of securing prompt and practical results. Each topic to be discussed and the name of the speaker must be in the hands of the committee on or before December 20th, 1906, for printing in the programme.

We feel assured that the National Government will give the full weight of its influence towards the success of this movement and that Congress will promptly and adequately respond to any well supported demand for legislation which may be deemed beneficial to the interests of the country as represented in the Convention.

The committee has the very great pleasure to announce that the Honorable Elihu Root, Secretary of State of the United States, has consented to address the Convention and will give it the benefit of his observations and experiences, and of the information acquired on his recent tour of the South American countries, the object of which was to bring about closer relations between those countries and ourselves. The result of that tour having been eminently successful, it is believed by the committee that the present time is ripe for this move for the betterment of our relations, on business lines, with our South American neighbors on whom Secretary Root created so favorable an impression.

Soliciting co-operation and a prompt response, which may be addressed to the Secretary. Cornelius N. Bliss, Franklin Murphy, Herman A. Metz, Charles A. Moore, William McCarroll, Lewis Nixon, Henry W. Peabody, Charles A. Schieren, Isidor Straus, E. S. A. de Lima, Chairman, Special Committee of the New York Board of Trade and Transportation; **Frank S. Gardner, Secretary, 203 Broadway, New York.**

ALASKA-YUKON-PACIFIC EXPOSITION AT SEATTLE.

SEATTLE.—At the present time much interest is centered here in the work of creating the Alaska-Yukon-Pacific Exposition, which will be held in 1909, opening June 1 and closing October 15. Although three years remain before the fair will be opened to the public, the management is hard at work perfecting and carrying out plans to make the enterprise worthy of the purposes it will aim to accomplish. Beginning with the idea of making the western world's fair original in every possible way the management has succeeded admirably up to the present time, and if the financing of it, which broke all exposition records, can be taken as a criterion of the manner in which the plans already outlined will be carried out, there is no room for doubt as to the originality that will characterize the 1909 fair.

On October 2 last, five months after the incorporation of the exposition company, which was effected May 7, the people of Seattle were called upon to finance the enterprise by subscribing in one day to its capital stock of $500,000. In a generous and public spirited manner they over-subscribed to the extent of $150,000, making the total amount available with which to begin work, $650,000. No other city for any purpose ever equalled such a feat. "Seattle spirit," for which the people of the Queen City are noted, was responsible for this remarkable achievement. More than a half million dollars in one day is a large amount of money to be raised in a city of 200,000 inhabitants. The slogan adopted by Will H. Parry, chairman of the ways and means committee was, "Everybody Helps, and everybody did help, with the result that an average of more than $3.00 was subscribed by every man, woman and child in the city.

As soon as the capital stock had been subscribed, John C. Olmstead, the noted landscape artist of Brookline, Mass., who laid out the Chicago and Portland expositions, was called to Seattle and he is now busily engaged in designing the grounds and arranging the buildings. He has pronounced the site as, scenically the finest ever utilized for such a purpose.

Henry E. Reed, director of exploration, is now busily engaged in making arrangements for the States to participate. He has Major T. S. Clarkson, special commissioner in the field, visiting the governors of all the commonwealths. So far Major Clarkson has met with unprecedented success. Every governor he has talked with has signified his intention of recommending a liberal appropriation for a building and an exhibit. Mr. Reed is also carrying on an extensive campaign to secure the 1909 meetings of national conventions. The executive committee of the exposition has appropriated $100,000 for the live stock show, which will be on an extensive scale, and from present indications promises to be the most successful ever held. The management is receiving letters from all over the country endorsing the object of the exposition, and pledging support from different localities.

The primary purpose of the fair is to exploit the resources and potentialities of Alaska, Yukon and the Pacific Northwest, and to make known and foster the vast importance of the trade of the Pacific Ocean and of the countries bordering upon it. Different from other fairs, the Alaska-Yukon-Pacific Exposition will not celebrate any particular event. The awakening of the Pacific, the wonderful achievement in all lines of effort of the countries in and bordering thereon, and the important role the commerce of the great ocean plays in that of the world, are the most noteworthy things the fair will celebrate. It will be a great international exposition. Historical sentiment will not be depended upon to arouse interest and induce participation.

In the first place the fair will show the world, through its exhibits, that Alaska can produce other things besides snow and gold; it will give the general public a better conception of the resources, advantages and possibilities of the territory, and of its geographical and climatic conditions. The same is also true of Yukon.

The fair will increase the commerce of the Pacific by teaching the merchants and manufacturers of the Orient and Occident the needs of the people of their respective markets, and how to secure and hold the business. Oriental buyers and Occidental sellers, as well as Occidental buyers and Oriental sellers, will be brought closer together to their mutual advantage, through exhibits collected with that aim in view.

The exploitation of the Pacific Northwest—in fact the entire western country—will be, naturally, another important result that will be accomplished by the Alaska-Yukon-Pacific Exposition. The Lewis and Clark fair and its attendant publicity placed this section prominently on the map. The interest that exposition created beyond the Rocky Mountains in this section will be stimulated and increased during the next three years. With the foundation in exploitation laid by Portland to build upon, the attendance at the 1909 fair and the subsequent benefits to follow will be on a large scale.

It is estimated that the fair will cost $10,000,000. The amount the exposition company will spend and the United States Government and State of Washington appropriations will make a fourth of this amount, and the sums the States, foreign nations, exhibitors and concessionaires will expend will aggregate the remaining three fourths.

The exposition site comprises 255 acres of the campus of the Washington University. In its virgin state it presents everything to please the eye. There are tall, stately giants of the forest forming beautiful vistas, gentle slopes, commanding terraces and unsurpassed stretches of water front. The grounds border for more than a mile and a half on Lake Union and Lake Washington. The Olympic and Cascade mountains are in plain sight, and an unobstructed view of the perpetual snow peaks of Mt. Rainier and Mt. Baker may be obtained. In constructing the buildings and laying out the grounds every care will be taken to preserve Nature's own handiwork.

Different from former fairs, the Alaska-Yukon-Pacific Exposition includes in its plan the erection of permanent buildings. Many of the large exhibit palaces will be substantially erected and they will remain as the property of the University after the fair closes, to be used for educational purposes. Thus the Washington State appropriation will be used for a permanent good, aside from the benefits that will accrue to the commonwealth from the fair. The States and nations will be invited to erect buildings of a permanent character, which will give them an opportunity to install lasting memorials of their progressiveness.

SELLING RAZORS.

Do you know enough about a razor to be competent to sell them? Possibly, because your customer may know still less about them; but can you tell him as much about them as you would like to know if you were in his place? Suppose your own physiognomy were in danger of paying a tri-weekly tribute to mistaken judgment. There is more than dollars in it, though, of course, a man is pretty apt to want his money's worth of shave too. A poor hoe or scythe may sometimes be operated by applying a little more muscle, but a poor razor is not built upon that plan. One likes to have the evidence of a razor's "having been" without too much physical evidence of its "being." Does the kind you sell meet with that requirement or do you know how to select one that does?

If the razor you are selling does not give good satisfaction and the fault is in the razor you should find it out before the jobber's representative is with you again; if it is in the sharpening, as it frequently is, it might pay you to kindly show your customer the difference between honing a razor and grinding a handsaw. If you cannot do that then try and sell him something else that will make good, before you leave him, if it's nothing more complicated than a hammock or a clay pipe.

Nothing will send a customer in disgust to the nearest barber or a department store more quickly than a poor razor. That is because it hurts him. He has instant, constant and convincing evidence of its cussedness every time he uses it, against which all the argument of all the agents in the world would avail nothing. The retailer cannot charge the quality of the steel and the question of its proper temper takes him beyond his depth in the realms of microscopy; he must depend upon the guarantee of a reliable razor-maker; but it is possible for an ignorant customer and even the dealer himself to ruin the best of blades. He should understand that a good razor is a delicate affair; that contact with over-hot water or even allowing it to lay in the bright sunlight in the show-case may change the temper materially and spoil the finest handiwork of the maker. It is the dealer's place to let the customer know this.

Perhaps there is no easier method of approaching the leathery folds of a conceited customer's think machine with a few germs of truth than by trying to sell him some good sharpening device. Even if you know he is not going to buy it there is far more opportunity to give him hints about the proper care of a good razor than in the sale of a razor itself. In the latter case he may think you are assuming that he doesn't know how to care for a razor and resent the idea. If you are trying to sell him a hone it is possible to drop a good many hints about razor management and still have it appear that you are only trying to sell him something else and not trying to dictate concerning his treatment of the article he has just purchased.

✤

It requires much skill to advertise for nothing. Mark Twain has just suffered the exclusion of one of his books from the public library, and got plenty of advertising space on the front page of the big dailies. Caruso also managed to get a few thousand columns of advertising space that could not have been purchased.

LEGAL CORRESPONDENCE

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

LIABILITY OF MORTGAGOR WHO HAS SOLD PROPERTY.

QUESTION.—A man mortgages his house and lot for $2,000 and sell it subject to the mortgage. It afterwards the mortgage is foreclosed and the property is sold and yields less than $2,000, who must stand the loss?

REPLY.—A mortgage is usually given to secure the bond of the mortgagor. If the mortgaged property does not yield enough to satisfy the debt, the mortgagor may be held liable for the deficiency, even though he has sold the property. A person purchasing property subject to a mortgage does not become personally liable for any deficiency arising after the property has been sold and the proceeds applied on the mortgage debt, unless he expressly assumed and agreed to pay the mortgage.

LICENSE TO STRING WIRES REVOCABLE.

QUESTION.—I gave a telephone company oral permission to attach their wires to one of my buildings. This they did and have since paid me $5 a year for the privilege. Can I compe. the company to take the wires down if they will not pay an increased rental?

REPLY.—Your oral permission to attach wires to your building was a mere license. Such license is revocable at pleasure, even though the person to whom it is given may have acted on the faith of it. You cannot, of course, revoke the permission as to the past, so as to make unlawful whatever has already been done. But you may do so as to the future and compel the company to take down the wires. The only way in which it may acquire an irrevocable right to use your building to support its wires is by a deed or conveyance, such as is nece sary to convey an interest in real estate.

BANK—INSOLVENCY—SHAREHOLDER'S LIABILITY.

The Supreme Court of the United States held, in the case of McDonald et al. vs. Dewey et al., that one who relies upon a sale of shares of stock in a national bank, made with knowledge of its insolvency, to escape his liability as a shareholder, under section 5151 of the Revised Statutes, for the debts of the bank, has the burden of proving that the vendee was financially responsible to the extent of the assessment, and that one who, with knowledge of the insolvency of a national bank, transfers his stock to an irresponsible vendee with intent to evade his liability for the debts of the bank, can only be held responsible for the unsatisfied debts existing when the fraudulent transfer was made.

STOCKHOLDERS—SALE—VOIDABILITY.

The United States Circuit Court of Appeals for the Eighth Circuit held, in the case of Jones vs. Missouri-Edison Electric Company, that any sale of corporate property by majority stockholders to themselves, and any disposition by them of the corporation or of its property to deprive the minority stockholders of their just share of the latter, or to get gain for the majority at the expense of the minority, is a breach of trust which renders the sale or disposition voidable and the property recoverable at the suit of the corporation or of a minority stockholder on his own and its behalf, and the fact that the minority stockholders may maintain an action at law for the value of their stock is no bar to their suit in equity to avoid the contract and transaction. The court said that they have the option to avoid the transaction and follow the trust property in equity or to affirm it and to recover as damages at law the value of their stock.

CARRIER—LIABILITY—RETAINING BAGGAGE.

The Supreme Court of Appeals of Virginia held, in the case of The Chesapeake & Ohio Railroad Company vs. Beasley, that the liability of a railroad company as common carrier for baggage coming into its station was not terminated where it retained the baggage to weigh it, and within an hour thereafter locked it in the station for the night, the passageway in the meantime being so blocked by freight cars that it would be practically impossible to remove it, and it was destroyed by fire during the night.

TAXATION—MERCHANDISE—NON-RESIDENT.

The Supreme Court of Iowa held, in the case of The Merchants' Transfer Company vs. Board of Review, that merchandise shipped by a non-resident manufacturer in bulk to a storage company and stored by it awaiting orders for distribution to purchasers was subject to local taxation.

Trade Meetings

THE MINNESOTA RETAIL HARDWARE ASSOCIATION.

At the regular meeting of the Executive Committee of the Minnesota Retail Hardware Association, Wednesday, November 28th, arrangements were completed for the holding of the twelfth annual convention at St. Paul. The dates selected are February 26th, 27th and 28th, and March 1st, 1907. Headquarters will be at the Ryan Hotel, and convention will be held at a nearby hall. Each morning will be given over to the exhibitors and regular sessions of convention will commence at 1.30 at which time it is requested that exhibitors will close their displays so that members can give their full attention to the convention work. Much interest is manifested, and with the increased membership it is believed that this will be a large and successful meeting.

Quarterly meeting of directors of the Retail Hardware Mutual Fire Insurance Company was also held on same day and a gratifying statement of financial condition presented. The insurance business showed a large increase over the amount written during the corresponding period of previous year, and it was decided that the return premium or dividend for 1907 should be forty-five per cent., payable at the expiration of policies during the coming year.

M. S. MATHEWS,
Secretary.

STATEMENT OF CONDITION, QUARTERLY MEETING, NOVEMBER 28, 1906.

Gross premiums written in 1906, $81,545.26	
Insurance in force August 31	$3,925,200
Written during last quarter	929,550
	$4,854,750
Less Renewals and Cancellations	527,450
Insurance in force	$4,327,300
Ratio of Losses to Premiums, 32%.	
Ratio of Expense to Premiums, 13%.	
Return Premium for 1907, 45%.	

NEW ENGLAND HARDWARE DEALERS' ASSOCIATION.

The secretary states: "The dates of the convention of the New England and the National Retail Hardware Association, to be held at Boston, have been set as June 18 to 21, inclusive, 1907. The headquarters will be the New American House. Committees have in charge the matter of exhibits and a guide book to Boston, in addition to routine plans. Features of the convention will include discussions of the most important trade topics by the best informed authorities available.

NEW ENGLAND HARDWARE DEALERS ASSOCIATION.
F. Alex. Chandler, *Secretary.*

OHIO HARDWARE ASSOCIATION.

The Secretary writes in reference to the Convention of the Ohio Hardware Association to be held at Columbus, on February 26, 27 and 28, that "the outlook for the Columbus Convention is the brightest we have ever had. We shall have a thousand members for the Columbus meeting. The exhibit feature is attracting attention. We have rented the entire Memorial Hall to be used exclusively for exhibition purposes. Space is going very rapidly, and is being taken by the representative manufacturers and jobbers of the United States. The officers are working very hard to make the exhibit as well as the convention successful in every detail. Admittance to Exhibit Hall will be strictly by badge or ticket. We are receiving new members every day. Merchants whom we have been unable to interest before are now sending their applications for membership. Headquarters will be at the Southern Hotel, where a large number of rooms have already been engaged for the convention. This indicates that merchants are giving the matter thought and attention earlier than ever before."

FRANK A. BARE, Secretary.

FOR SELF-EXAMINATION.

By B. A. CHAMBEAU.

Any merchant who rigidly observes seventy-five per cent. of the following rules is pretty sure to be successful. Any clerk who rigidly observes sixty per cent. of them will be in mighty big demand.

Don't allow idlers to loll around the store.

Don't forget to send bulky purchases home for the customer.

Don't hesitate if desired to change a purchase for a customer.

Don't leave your counter until the customer leaves the store.

Don't be afraid to thank a customer who recommends your goods to some one else.

Don't forget to ask the friend who comes in to chat to do it in the back room.

Don't neglect an opportunity to make a friend of a customer. Confidence begets patronage.

Don't expect the clerk to take more interest in the business than you do yourself.

Don't deride the clerk before customers.

Don't expect a clerk to know a thing because it is simple to you. It may have been different in his last place.

Don't forget that a good clerk never makes the same mistake twice, while an indifferent one does.

Don't forget that there is no need of your telling of your ability. If you possess any those interested will find it out. This applies only to clerks; with the proprietor it is the other way around.

Don't forget that the clerk who accomplishes most is the one who makes least fuss about it.

Don't forget that the "forget to charge" habit is quite prevalent among many store inhabitants. A cash register system properly conducted, eliminates it.

Don't forget that the man who sits down the minute that the boss goes out is very often seen standing around waiting for a job.

Don't forget that the fellow that has to be told what to do, when to do it, and how, is usually the fellow who thinks he knows it all.

Don't forget that it is not volume of business alone that makes one prosperous. It's making each sale yield a margin of profit.

Don't forget that while haggling over a nickel a dollar may slip through your fingers.

Don't forget that the employer or clerk who reads his trade journals is usually the best posted business man in the shop.

Take as much interest in your employer's business as if it were your own.

Do not try to get all you can, giving nothing. Do more work than is demanded.

You can't be a half-hour late ever morning and make your employer believe that you have his interests at heart.

Do your work well to-day and you won't have to do it over again to-morrow.

A sullen countenance is not pleasant to look upon for either an employer or a customer. Trusting your own disgruntlement on those around you is a poor investment.

Don't take so much interest in the ball games and theatres that you haven't much thought left to devote to your work, and don't have too many funerals in your family.

Give good value for the money you receive and you will be sure to succeed.

Put yourself in your employer's place.

Put yourself in your clerk's place.

The road to success is none the less worth traveling on because it is not short or easy.

Always set a good example. Do not lie to the clerk or to the customer and expect the clerk to tell you the truth.

Have confidence in your employees until they prove themselves unworthy; but keep temptation out of their way, keep your eyes open, and remember when contemplating chastising, that a swift and sudden jolt is worth a hundred taps.

A cheap man is a poor investment.

Respect your clerk, and treat him accordingly, or don't keep him.

Encouragement often does more good than finding fault. Reprimand only justly. When it comes time to reprimand the same man the second time for the same mistake—just fire him.

THE PASSING OF THE MONTHS.

Where electric or other motor power is available for light moving objects the following window design proves most attractive and it has the additional advantages of giving exclusive prominence to a variety of objects in succession and of being readily adapted to various seasons or local occasions. It is, however, particularly suitable for the holidays.

For the frame work, take a large umbrella with the cover removed. Attach a stiff wire very firmly to the outer end of each rib for a rim. The handle must be straight, and to reduce friction as much as possible, should be brought to a point and a round-headed screw inserted. Run this lower end through a hole in a hard-wood board or plank, bored smoothly and loose enough to allow easy turning, but sufficiently snug to prevent wabbling. If the screw-head rests upon some smooth, hard surface like a glass or granite plate, the friction will be materially reduced. The upper end of the handle also works in an easy fitting socket for support. A grooved wheel for carrying the band from the motor may go near either and according to convenience and ease of concealment. The covering of this frame depends upon the occasion. For the holiday season it should be covered and festooned with evergreen and holly, care being taken to have everything swing clear of all stationary objects.

From the rim suspend a number of stout wire supports or holders, all, of course, trimmed to harmonize with the general decorative plan. These may vary in number according to the variety of display desired, but should be evenly spaced. For the holidays a most appropriate number is either twelve or fourteen, one for each month of the approaching New Year and, if desired, one for the Old Year himself, and one for the New Year. Each should, of course, present in miniature some object of particular interest to the season it represents. For January let a Brownie doll ride in upon a skate, followed closely by his twin brother, February, on a fine coaster. March brings a farmer doll in on a sulky plow of the design on sale; while in April the Brownie once more gains possession and rides to his task of renovation, brush in hand, in a paint keg. May presents an industrious lad pushing a tiny lawn-mower, to be followed by the June bride, in her wedding finery, running a carpet sweeper around the circle. The July boy would hardly be American if he was not accompanied by a toy cannon or a fishing outfit. In August a dreamy maiden reclines at ease in a lawn swing or hammock only to have her revery broken into by September's rollicking Irishman with his wheel-barrow load of anything that gives the best touch of local color. In October the youth of the land is, of course, a regular arsenal of fire-arms and hunter's regalia; while the November snow-shovel boy soon afterwards rides upon the scene and into our affections on the vehicle of his future toil. Of course, the children's patron saint comes in as December's representative, seated in a handsome cutter and accompanied by bells, robes, blankets, all of the latest design and richest hue. Then, if the year itself is to have place in the cycle, the decrepit old fellow totters in bearing his scythe only to be hurried out of the way by the pricks of the fork held in the hands of his cupid successor who trudges proudly at his heels.

This same frame, differently trimmed, is capable of infinite variety of occasion. A couple of weeks before Christmas its denizens might each bear in hand some appropriate gift suggestion, the figures, of course, being prepared to represent different members of the family. The boy, father, mother, half-grown girl, young lady, and grand-mother, not forgetting the baby and perhaps including the callow youth just hunting for the place to shave.

For local trade conventions, too, this will prove a drawing card. If a carpenters', the ribs should represent the girts and rafters of an unfinished structure, to which each Brownie carpenter is supposed to give some touch with the tool he carri as he passes. If the gathering is one of plumbers, slip rubber or tin tubes upon the ribs and paint them to represent water pipes and let the revolving figures bring in the appropriate tools and faucet trimmings. Other trades will suggest their own modifications and can be shown up with very little extra work, as can any other special day or special season of either local or general interest.

PAINTING THE LILY.

At a banquet held in a room, the walls of which were adorned with many beautiful paintings, a well known college president was called upon to respond to a toast. In the course of his remarks, wishing to pay a compliment to the ladies present, and designating the paintings with one of his characteristic gestures, he said: "What need is there of these painted beauties when we have so many with us at this table?"

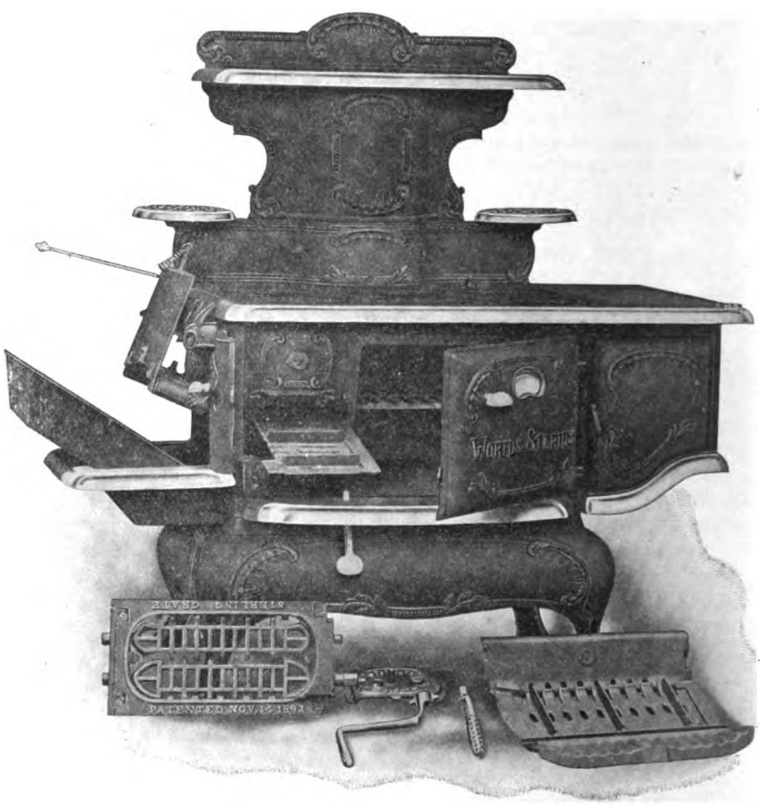
WHAT THE STOVE MANUFACTURERS ARE DOING

GEORGE M. CLARK & CO.

George M. Clark & Co., Chicago, Ill., are placing before the market this season the Jewel Steel Heater, which is made for coal or coke, for wood or cobs, in four sizes, and which we illustrate herewith. Some of the principal features which we desire to call attention to are:



THE JEWEL STEEL HEATER.

The top and bottom are of heavy steel drawn from one piece. As the stoves are machine-made throughout, the joints are perfect and practically air tight. The fire pot is of heavy cast iron with shaking draw center grate. These heaters have the central draft tube construction. The tube is of heavy cast iron and removable if desired. A slide controls the flow of air into the tube, and to it is fastened a bar which projects beyond the swing cover so that it can be operated without moving the top of stove. By removing bottom section of central draft tube the stove is changed to an Oak Heater. There is a sliding draft check damper directly under flue collar on body of stove. The body is made of very heavy "Oak Body Steel," ornamented and stiffened by swedges. The upper nickel ring is drawn steel, nickeled and scalloped on its inner edge, and will not tarnish. The upper and lower doors are very large, fitted with cold handles, and are perfectly tight when closed. Instead of having a register draft in the ash-pit door, there is a square nickeled door, hinged at the bottom. This nickeled door drops forward at the top to admit air, and when dropped clear down the shaker can be used through the opening and the grate shaken down without the usual escape of dust and ashes. The full width ash pan with bail and handle is a feature of these stoves.

SILL STOVE WORKS.

The Sill Stove Works, Rochester, N. Y., are the well-known manufacturers of the celebrated "Sterling" Ranges, one of which line, the "L," we have the pleasure of presenting to our readers under the following description:

"L" World's Sterling Ranges for hard coal, soft coal or wood.

THE "L" WORLD'S STERLING RANGE.

Two sizes: 5-hole top; two sizes: 6-hole top. Ovens 18 and 20 inches square, and the usual choice of 7, 8 and 9-inch covers. With or without water fronts, reservoir, pipe shelf, high warming closet or gas attachments. In connection therewith the company say:

"When the 'K' 'Has No Equal' Sterling Range, with its many new features, was placed on the market, it became apparent that improvements were also expected on our other lines. That we have succeeded amazingly with the World's Sterling is seen by examining the above cut or, better yet, the new range itself. The entirely new design is chaste and simple. All superfluous nickel has been left off, while the nickel bands now on the range can be quickly removed without touching bolt or screw. The smooth plain surfaces appeal to all who do not care for the more elaborate ornamentation found on our other ranges. While retaining all the essential features of the 'W.B.' pattern, including the numerous 'Sterling Patents' which have made 'Sterlings' famous, we have added several new features such as improved damper, removable nickel, fire-box linings for hard coal, soft coal or wood and coil water front, with extension. The advantage of having a high Warming Closet on either the four-hole or six-hole World's of this series will be appreciated."

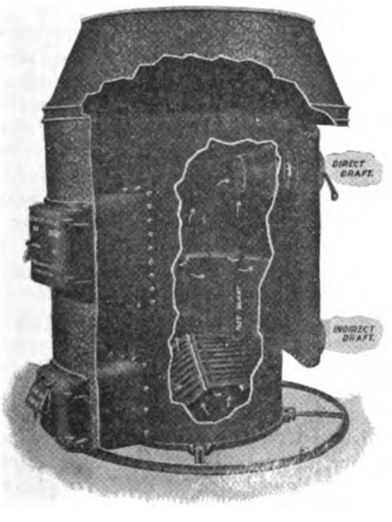
LINCOLN STOVE AND RANGE CO.

The "Lincoln Base Burner" is the latest production of the Lincoln Stove & Range Co., a young but very enterprising concern located at Fremont, Ohio. In placing this base burner on the market they make some very strong claims which, however, they demonstrate very clearly.

First, that the "Lincoln Base Burner" has the largest heating capacity of any stove on the market. The fire box is made

Digitized by Google

with full inside measurement, 14 inches, 15 inches and 16 inches. By means of the special flue construction, "the Lincoln 3 Flue," they claim to secure a larger radiating surface than on any other base burner. The fire chamber is also of special construction so



"THE LINCOLN BASE BURNER."

that all heat is radiated direct into room, there being no dead air space. Every stove is a powerful double heater, circulating flues being double the ordinary capacity. They claim great economy in fuel because with enlarged heating capacity by their special flue construction there is no increase in the consumption of coal, but rather a decrease. The last claim is that they have the most artistic design and finish, and the beautiful lines of the stove and the fine nickel certainly carry out their claim. The illumination is especially fine, mica lights being large and unobstructed by scroll work. Everyone interested in base burners will be glad to receive their special printed matter, which the company will send on request.

THE STANTON HEATER CO.

The Stanton Heater Co., Martins Ferry, Ohio, are the manufacturers of the Stanton Upright Steel Furnace, for hard and soft coal or wood. The illustration herewith shows interior of firepot, grate, fire-brick liners, hot blast tubes, casing and radiator.

STANTON UPRIGHT STEEL FURNACE.

Is made of locomotive fire box steel, 3-16 inches thick, the same material as used in the Stanton Seamless, which has withstood the most severe test for thirteen years. Every point is tightly riveted, making a smoke and gas-tight furnace. The head of radiating sheet or main drum is flanged and dished by hydraulic pressure, and securely riveted to radiating sheet. Bottom of main drum is left open, and furnace sets on a cast iron bottom, which forms bottom of ashpit, and to which is bolted the bottom casing ring.

GRATE.

Is of the shaking and dumping pattern, and firmly supported by lugs on grate rest. Grate can be shaken to remove ashes, and dumped to remove any clinkers that may form.

LINERS.

Regular fire brick are used for lining fire box, making a durable and inexpensive lining. Should a brick crack or burn out it can be replaced by owner without tearing down the furnace.

RADIATOR.

In order to make the furnace effective to the fullest extent and reduce the amount of fuel used, a radiator of American Bessemer steel is connected to radiating sheet or main drum at the smoke outlet. This radiator is provided with a damper, so products of combustion may pass directly to the chimney when the feed door is open, or down to bottom of radiator, and through tee to smoke pipe. All seams are riveted, and are smoke and gas-tight.

HOT BLAST.

A simple and effective hot blast is made by connecting hot blast tubes with openings in the grate rest. The hot blast air is taken through check door and ashpit to openings in grate rest, and thence to top of fire, where mixing with the smoke and gas, perfect combustion is formed.

FEED DOOR.

The feed door is large, 12 by 14 inches, which is a great convenience in putting in the grate, grate rest and liners, or replacing any part that may be needed, or in firing the furnace. The ashpit door is large, 10 by 12 inches, and will admit a large shovel to remove ashes.

THE PRESSED RADIATOR CO.

On October 4th, the Kinnear Pressed Radiator Co. took action at a regular meeting looking toward the change of their name to the Pressed Radiator Company.

This action was later ratified and the company is now operating under the new name.

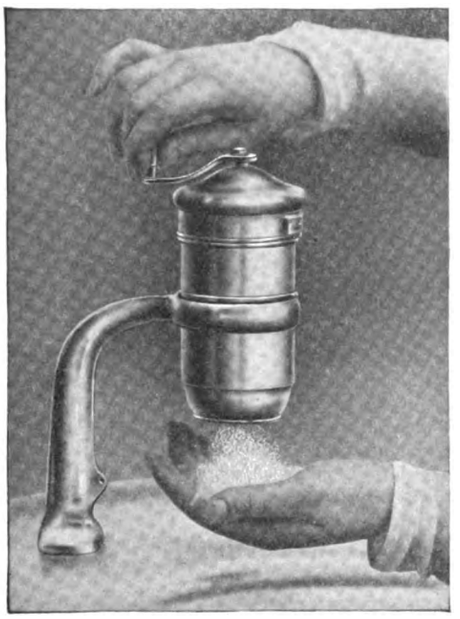
The Kinnear Pressed Radiator Co. was incorporated on Feb. 1st, 1905, succeeding the Kinnear-Hood Steel Company which was organized in 1901 for the manufacture of Pressed Radiators.

The headquarters of the original firm were located in New York City until the incorporation under the name of the Kinnear Pressed Radiator Co., when they moved to Pittsburgh and a plant was located in West Pittsburgh.

Their present manufacturing plant is modern in every detail. It is equipped throughout with automatic machinery operated entirely by electricity. The building is 600 feet long and includes 54,000 feet of floor space. It is of steel and concrete construction, but one story in height, and much attention was devoted to the securing of the best possible light and ventilation.

The Pressed Radiator Co. advise us that their business is rapidly growing and that the outlook for 1907 is most promising.

The headquarters of the company are located in commodious offices in the Bailey-Farrell Building at Pittsburgh and they have established numerous branches in different cities as follows; New York, Flatiron Building; Chicago, First National Bank Building; St. Louis, S. H. Brooks & Co., 312 S. 8th Street; Kansas City, Hoist Building; Toronto, Ont., 302 Queen Street; London, England, 19-21 Tower Street, Upper St. Martin's Lane; Seattle, 408 Occidental Avenue; Indianapolis, State Life Building; Oakland, 922 Franklin Street; Detroit, Buhl Building; San Antonio, Moore Building; Minneapolis, 407 Boston Block; Milwaukee, 69 2nd. Street.



SOMETHING NEW IN STOVES.

R. H. Gray, of Columbia, Mo., has just been granted a patent on an improved carbureter for gasoline stoves, which appears to be a good thing, and he desires to have this invention manufactured and placed on the market. The mechanism appears to be quite simple, and is actuated by a quarter turn of one valve stem, whereby the gas in the carbureter at the time the burner flame is extinguished is entrapped and retained for the next fire, thus incidentally preventing the waste of the unused gas by escaping through the burner after the stove is shut down, as some other stoves do. The flame may be instantly and completely extinguished when desired; no waiting for the flame to flicker and die out as in other stoves.

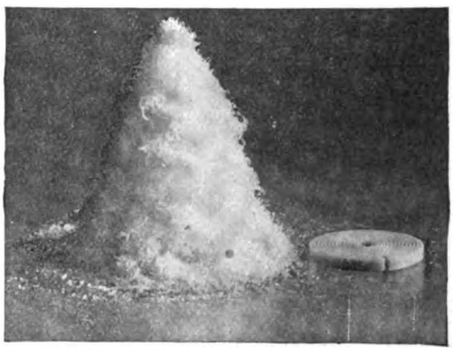
THE SHAVER SYSTEM OF SOAP ECONOMY.

The Hygienic Soap Granulator Co., 227-229 Fulton Street, New York, are the manufacturers of the Shaver System, a new method for the hygienic and economic use of toilet soap in the toilet rooms of department stores, clubs, hotels, railroads, public and private institutions, offices and private residences. The Shaver System comprises the Hygienic Soap Granulator and the peculiarly shaped cakes of soap for use in the device. As shown herewith, the Granulator is a handsome nickel-plated, cylinder-shaped receptacle, fixed upon a standard at the side of the wash basin. The cylindrical cake of soap is contained in this recep-



THE HYGIENIC SOAP GRANULATOR.

tacle, and the bottom of it rests upon an ingenious cutting mechanism, which is so operated that, by turning the handle at the top of the device, there pours out at the bottom, into the palm of the other hand, a plentiful supply of fine granulated soap. If you should look at these granulations under a microscope, you would see that they are of a peculiar form; that is, exquisitely fine, elongated, tubular flakes. The point is that these tiny tubes of soap are filled with air, and being light and flaky in character they permit the air and water to circulate freely through them, and thereby instantly form a delightful and cleansing lather. The Granulator is handsome in appearance, compact, and an ornament to any washstand. All that is necessary to obtain the soap is to give two or three turns of the handle. Hence, the hands never come in contact with the cake, and each user is provided with a dry, clean and fresh supply of fine granulated soap,

SHOWING SHAPE OF SOAP USED.

and the dirt and mussiness that are invariably to be found where the ordinary cake soap is used are entirely done away with. The company installs the Hygienic Soap Granulator under a nominal rental charge of $1.00 per year for each Granulator, which is practically to cover installation, maintenance, and wear and tear on the device. In cases, however, where the consumption of soap exceeds 20 pounds per year, this charge is remitted in soap. The installation of the Granulator is in itself a very simple operation. It is supplied with supports which fasten at the side of the wash-basin, or with brackets which render it easily attachable to the wall above or near the basin, to meet individual requirements. Where the company has a representative on the ground, it makes the installations. Otherwise the Granulator and soap are sent accompanied by simple instructions necessary to enable one to put it in position quickly and easily, so that there need be no hesitation about the difficulty of its installation. A

SOAP AFTER PASSING THROUGH GRANULATOR.

handsome booklet which graphically describes all the information needed regarding the installation of the Shaver System, finely illustrated, and showing its application to the toilet facilities of a number of large establishments, will be furnished upon request.

SPRAYING AND WHITEWASHING MACHINES.

The Dayton Supply Co., Dayton, Ohio, are the manufacturers of high-grade machines for Whitewashing, Cold Water Painting, Disinfecting, Spraying Trees and Flowers, etc., etc. We present a few illustrations which show the utility of several of them. Fig. 1 shows the Progress Spraying and Whitewashing Machine. It is practically a little water-works system on wheels, as it develops a pressure exceeding 80 pounds, and will raise the liquid more than 80 feet higher than its own level. One of the styles, The Progress, Jr., includes 12 gallon galvanized iron tank, mounted on 26-inch iron wheels, having 23-inch

FIG. 1.

FIG. 2.

FIG. 3.

width of tread; one No. 1 Climax Pump and one Automatic Agitator for keeping liquid stirred; 8 feet of ½ inch discharge hose, suction hose, eight feet of spray rod in three pieces, one strainer, one wrench, one stop cock, one misting nozzle, one general spraying nozzle, one whitewash nozzle, and one solid steam nozzle for fire extinguisher. The Climax Spray Pump is shown in Fig. 2. This pump has been on the market for twenty years, and is in use all over the world. The working parts of this pump are brass, the cylinder being of seamless brass tubing; other parts requiring strength are made of malleable iron. It is built for hard usage, and for all kinds of spraying services. The legs may be removed when it is desired to attach pump to a barrel. In Fig. 3 is shown the Simplicity Automatic Sprayer, all brass in construction, for all kinds of spraying purposes. It is adapted to be carried from the shoulder, or it may be set upon any surface as shown in the illustration. To operate the sprayer, put 3½ gallons of liquid in tank, pump up 50 lbs. air pressure, (about forty full strokes) and the outfit is ready for use. The pressure developed will enable the operator to apply the spray, automatically, for some time, by opening the stop cock. The tank can be recharged while the sprayer is working. The apparatus is provided with a uniquely contrived brass air pump, simple and easy to operate.

The valve is so arranged that the washers may be renewed without removing the pump from tank. By turning the handle so as to engage a claw device on it, the handle will serve as a convenient means for transporting the outfit. The equipment includes one 4-gallon all brass tank; one 1¼ inch by 18 inch brass air pump; one length of ½-inch discharge hose; one length of spray pipe; one shoulder strap for converting to knapsack; one stop cock; one misting nozzle; one general spraying nozzle; one solid stream nozzle for fire extinguisher. This sprayer is of brass throughout, and is highly polished.

RECENT TRADE PUBLICATIONS.

FERNALD MFG. CO., INC., North East, Pa. Catalogue No. 3 for 1907, containing illustrations of their Quick-Shifts and Anti-Rattlers, Malleable Clip Ties, Ladd, Burton, New 1901, Wire Drive and Gem Anti-Rattlers, Fernald Double Trace Holders, Dash Rein Holders and Miller Wagon Jacks. A line of Third Seats is also included in the contents as well as Success and Triumph Bits, Whip Sockets, Buggy Boot Springs, Brake Springs, Tongue and Pole Springs, Axle Washers, Bridle Fronts, Team Fronts, Tail Ties, Elgin Wrenches, etc. A complete description is given of each article, and those interested in these goods should send for a copy of the catalogue.

DILLE & MCGUIRE MFG. CO., Richmond, Ind. 1907 catalogue of Lawn Mowers, with price list. In their announcement to the trade, the company state: "The Dille & McGuire Manufacturing Co. having been established in 1870, thirty-six years of experience, with a large and steadily increasing trade, is a sufficient guarantee that our goods are not only first-class, but that we are able to take care of those entrusting their orders to us. In presenting this, our thirty-sixth annual catalogue, containing illustrations of twelve styles of hand mowers and one pony mower, we feel sure every desire can be fully satisfied, and that you will be able to select such machines as will be quite suitable to your trade. Owing to the large and increasing demand for our high-grade mowers, we have again found it necessary to add new buildings, as well as improved special machinery, increasing our capacity, at the same time giving more warehouse and shipping facilities. By this means we will be better able than ever to take care of orders and make prompt delivery. Each and all of our mowers are constructed upon the best mechanical principles; they are simple and easy to understand; are durable, having many new and valuable features; are not liable to get out of order; are guaranteed to do the finest work and give entire satisfaction."

W. H. DAVENPORT FIRE ARMS CO., Norwich, Conn. Catalogue of the various styles of Single Breech Loading Shot Guns and Rifles manufactured by this company, which includes their '96 Model Plain Gun, Acme, Automatic Ejector, Davenport Crest, "Elita," Goose, Trap and Hammerless Guns; "Brownie" Rifle and component parts of same. A price list of parts is also given. A very interesting and instructive part of the catalogue is entitled "Hints for the Novice," which is bristling with information for the would-be sportsman, and all those who are lovers of hunting will do well to send for the catalogue, which will be gladly forwarded by request.

ROSTAND MFG. CO., Milford, Conn. Catalogue of Fire Place Fixtures. The patterns of this company represent new designs as well as many of the old Colonial lines, which they have reproduced. This line includes Brass Andirons, in a variety of very artistic designs, as well as Brass Fenders; Brass Fire Sets; also those of Polished Steel with Brass Handles; Black Andirons, Cast Brass Jamb Hooks, Door Knockers and German Fold Fenders. All goods are furnished in Polished Brass unless otherwise ordered, although the company are prepared to furnish any finish desired. List prices will be quoted on Polished Brass, and Old or Burnished Brass Finishes. Any old styles desired in Brass or Copper Metals will be gladly reproduced.

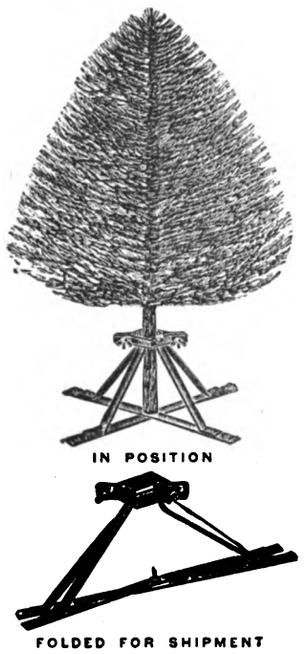
JOSEPH DIXON CRUCIBLE CO., Jersey City, N. J., have recently published a pamphlet including in its contents an essay on "Air Compressor Lubrication." In a prefatory note, the company say: "For those who are interested in this important subject, in view of the rapidly increasing use of compressed air, and for those who have personally experienced the difficulties and dangers of operating compressors and desire to avoid further trouble, we have prepared the following essay in which are considered:—The causes of ignitions and explosions in discharge pipes and air receivers. The function and value of Dixon's Flake Graphite as an air-cylinder lubricant, from the theoretical as well as the practical standpoints. Methods of feeding flake graphite, and secondary advantages in graphite lubrication as suggested by the applications of compressed air for special purposes. We have also included a chapter on the practical benefits of graphite lubrication for rock drills because of their intimate association with many compressed air installations."

ROCKWELL ENGINEERING CO., 26 Cortlandt Street, New York. Catalogue F of Rockwell Fuel Oil Burning Appliances, including Low and High Pressure Oil Burners, Rockwell Fuel Oil Pumping System, Positive Pressure Blowers, Steel Fan Pressure Blowers, Fuel Oil Burner Plates, Oil Hose for unloading Tank Cars, Fire Tiles for Oil Burners, etc. This company are also manufacturers of Brazing Furnaces, Rivet Heating Furnaces, Pot Furnaces for lead and cylinder hardening and for melting soft metals, Flue Welding Furnaces, Metal Melting Furnaces, Annealing and Hardening Furnaces and Heating Machines.

LEATHER AND BRASS MFG. CO., Auburn, N. Y. Pamphlet devoted to Air Compressors for inflating pneumatic tires, heating soldering irons, air hoist and pneumatic tools, tempering and brazing, operating sand blast machinery, cleaning delicate machine work, dusty switch boards, etc. These Compressors are small and compact, very simple and durable. They are fitted with check valves of the company's own invention, which do not heat, water jackets being therefore unnecessary. They issue a special circular for each style, giving full description, which they will mail on request, as well as the pamphlet under consideration.

H. W. JOHNS-MANVILLE CO., 100 William Street, New York, have just issued a new booklet descriptive of their line of Asbestos Household Articles, and the use to which the same may be put. The contents include inexpensive articles of every-day use, which add much to the comforts and conveniences of the home, such as Table Covers and Luncheon Mats; Table Padding, Baking Sheets, Stove Mats, Griddles, Pie Plates, Omelet Pans and Toasters; Stove Lining and Polishers; Iron Holders, Flat-Iron Rests, Document Boxes, Insoles and the Manville Fire Extinguisher. This is a novel line of goods, and one which should appeal strongly to the trade. The catalogue may be had upon application.

EMPIRE RUBBER MFG. CO., 88-90 Reade Street, New York, have recently issued a Price List of the goods of their manufacture, which include Rubber and Cotton Fire, Mill and Garden Hose; Steam, Air-Brake, Brewers', Engine and Suction Hose; Rubber Belting, Packing, Valves, Gaskets and Jar Rings, Corrugated Matting, Pressed and Perforated Mats, Rubber and Enameled Carriage Cloth. The factory of this company is located at Trenton, N. J., and they have the best possible facilities for shipping by rail or water to all parts of the United States. In issuing this price list, they have confined it to as brief a description of their line as it was possible to make, giving only an outline of each department. Their factories have been recently enlarged, and are equipped with the latest improved machinery, and every facility for filling orders promptly.



BRIDGEPORT EMERY WHEEL CO., Bridgeport, Conn., have distributed to the trade their catalogue of Emery Wheels and Grinding and Polishing Machinery, belt or motor driven, with direct or alternating-current motors. In a note of introduction the company say: "On the following pages are illustrations showing our line of emery wheels and grinding and polishing machinery. We desire to call attention to the various changes we have made in our former line of grinding machinery as well as to the new lines recently brought out. The machines are made with the latest improvements, the result of many years experience in the emery-wheel and grinding machine business. There is no class of machinery where the strength and weight are more important, and our machines are very heavy and rigid. Metal is arranged so as to reduce vibration to the lowest point. A light, cheap machine is a menace to the life of the workman, less work can be turned out with it and it is an expensive machine in the end. We can readily make the necessary changes to adapt our machines to the requirements of special manufacturing and are constantly adding new machines to our line. Each machine is carefully tested before leaving our works and accuracy is guaranteed. In addition to the machines shown, we are bringing out a line of edge and surface grinders which we are unable to show in this issue."

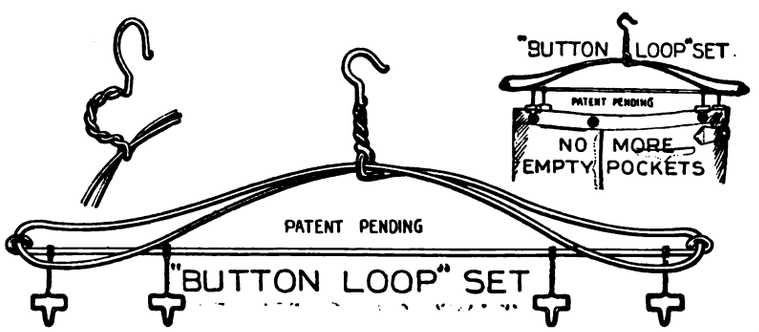
NEW GOODS AND SPECIALTIES

LITTLE GEM CHRISTMAS TREE HOLDER.

The C. A. Peck Hardware Co., Berlin, Wis., manufacturers of metal specialties, have just placed on the market the Little Gem Christmas Tree Holder shown herewith in use and folded for shipment. This seasonable specialty is made entirely of wrought steel, is 16 inches in diameter, and 6 inches high. It is adjustable to a tree of one and one-half inches in diameter and larger,

IN POSITION



FOLDED FOR SHIPMENT

LITTLE GEM CHRISTMAS TREE HOLDER.

and it is declared will hold it firmly in place without danger of tipping. A screw which will be observed in the base at the center sets into the bottom of the tree, while thumb-screws are provided for fitting the adjustable collar above which it is supported by braces. The device has no loose parts and folds compactly for shipping, weighing twenty pounds to the dozen. It can be retailed at fifty cents. It will sell over any counter in the country "just before Christmas."

BUTTON LOOP SET.

Among the many novelties of utility manufactured by the C. K. Hutchins Co., Buffalo, N. Y., the Button Loop set is prominent. We give an illustration of it herewith. It consists of a

polished nickel rod of No. 9 wire, having a ring in the center to hang it by, and which is provided with four loops on which a pair of trousers may be hung by the suspender buttons, right side up, which makes it unnecessary to remove the contents of each pocket before using the device. The use of the Hanger is made obvious by our illustration, and shows what the company term it, the Button Loop Set, which comprises a shoulder-shape, offset coat hanger with trouser hanger attached, the latter of which is sold at a price that enables it to be retailed at 10 cents, and the complete set can be sold at 25 cents.

THE CRONK GARDEN MATTOCK.

The Cronk & Carrier Mfg. Co., Elmira, N. Y., are introducing to the Hardware trade the Garden Mattock of which we give an illustration herewith. In place of two separate blades riveted to the eye as formerly made, the present blade is made in a single piece, which is made as shown, in two sizes: No. 13, with 3 by

THE CRONK GARDEN MATTOCK.

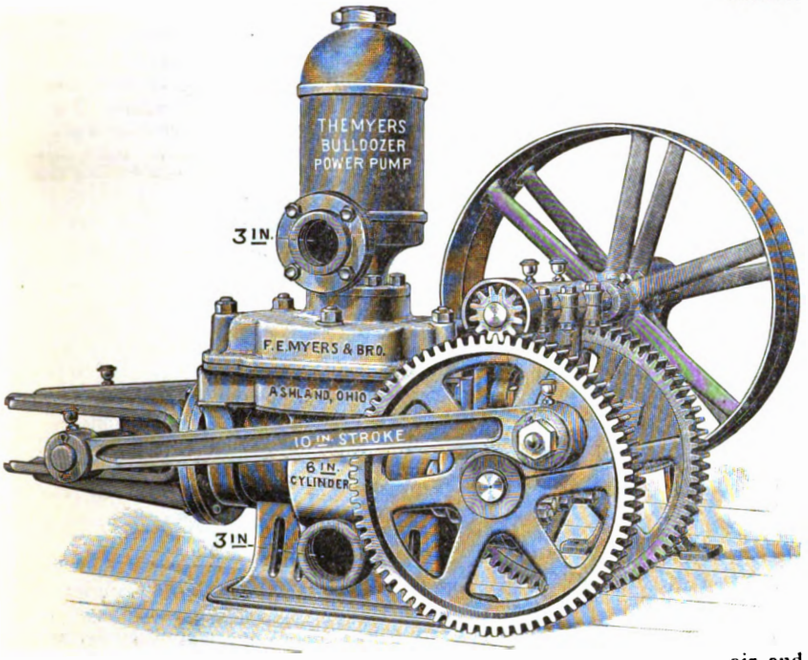
1¼ inch blade, and No. 14 with 3½ by 1¾ inch blade. The size of the handle has also been increased over that of the old-style tool. The two sizes weigh from 30 to 33 pounds per dozen.

BUFFALO COMPRESSED AIR FORGE NO. 21-C.

The accompanying cut represents a forge operated by compressed air, designed for indoor use, which may readily be taken apart and reassembled if it is desired to ship it any distance. The weight of the forge allows it to be easily handled by one man and carried to any part of the shop. The forge is for use in rivet heating in structural steel work, boiler shops, or railroad shops where compressed air is available. The forge is entirely automatic and obviates the necessity of riveters waiting for rivets while some one turns the crank. Enough rivets can be supplied to keep two or three gangs of riveters at work.

NO. 21-C.

NO. 20-C.



The mechanism for supplying the air to the fire consists of the fan wheel, which is safely inclosed within the cast iron fan casing so it cannot become injured. A small jet of compressed air impinges on the fan blades, causing them to revolve and draw in 40 times the volume of compressed air used through the inlet to the fan casing, forcing it all through the clinker-breaking ball tuyere, which is furnished with the forge. The forge is put on the market by the Buffalo Forge Company, Buffalo, N. Y. The company also makes another style of the same forge, No. 20-C, for outdoor use, which is of barrel construction, made of sheet steel with a dash to protect the fire from the wind. This forge

Digitized by Google

has a bowl 6 in. deep and 18 in. in diameter. The ample fire-pan adapts the forge not only to rivet heating, but also to work of a much heavier nature, such as general repair work, and it will produce a welding heat on a 4-inch iron in less than ten minutes.

MYERS BULLDOZER POWER PUMP, FIG. 1196.

F. E. Myers & Bro., Ashland, Ohio, are placing upon the market their latest Pump creation, The Myers Bulldozer Power Pump, which is built with six-inch brass-lined cylinder, ten-inch stroke. It has a maximum capacity of 5,800 gallons per hour and is back geared 6 to 1. The pump is mounted on one base. The valve cap is held in position by ¾-inch stud bolts, and by removing these the valves can be reacehd for repairs. The pump throughout is considerably heavier in construction than

MYERS BULLDOZER POWER PUMP, FIG. 1196.

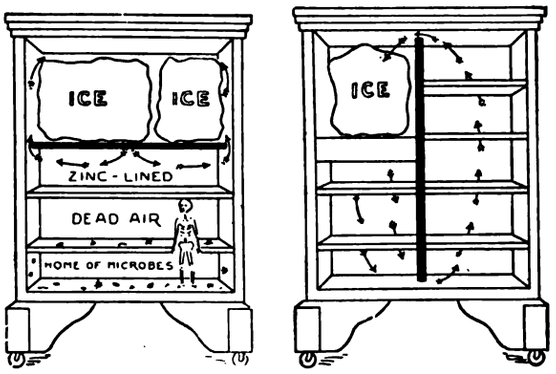
the balance of their Bulldozer line, this pump being especially designed for extremely heavy work. The power is transmitted to the piston by two sets of gears, one on either end of the main shaft, thus increasing the strength. The cylinder is formed by the main body of the pump, which is bored and lined with a heavy seamless drawn brass tube six inches in diameter with a 10-inch stroke. The valve seats are of the Grid pattern. The valves are hard rubber 4½ inches in diameter, fitted with coil spring which assists in closing, and also prevents slipping under heavy pressure. The gears are double, with 2½ inch face, with extra heavy teeth, back geared 6 to 1. The piston rod is brass covered and driven from both sides, which insures perfect alignment. The plunger is hemp packed. The guide for piston rod is mounted direct on cylinder head, has bored ways for cross head. The shafting is 1½ inches for belt pulley and 2 inches for gears. The pulleys are 24 inches in diameter, by 4 inch face. Suction and discharge tapped for 3-inch pipe. Speed not to exceed 40 strokes. Capacity at 40 strokes per minute 5,800 gallons per hour. Elevation against which this pump will operate is 150 feet perpendicular or equal pressure when properly piped and not restricted.

THE ICE QUEEN REFRIGERATOR.

The Mills-Elliott Mfg. Co., Port Huron, Mich., are the manufacturers of the Ice Queen Refrigerator which they introduced to the trade in obedience to the demand for a refrigerator that is constructed according to the best known scientific and mechanical principles of refrigerator construction.

Their idea in making the body round was to make room for more provision capacity, economize space in the home usually wasted by refrigerators of other makes, and also have an article that could be placed in the dining room and be in harmony with the surroundings. The Ice Queen has no corners or crevices to harbor germs, and in eliminating square corners, a great saving of ice is effected, as there is no unnecessary cooling of vacant space, and the absence of corners allows of it being easily cleaned. The base of provision chamber is made level or flush with door, making it much easier to clean than one with depression. The shelves which revolve on four roller bearings, are very substantial, unimpeded by posts or obstructions, and made in such a manner as not to obstruct the circulation. They are a great convenience, enabling one to remove any article without disturbing or upsetting anything. The interior of provision chamber is in white enameled metal. The cold air passes through an aperture in the bottom of the ice chamber into the provision compartment, and is drawn back behind the walls into the ice chamber, and over the ice whereby all odors given off by provisions are condensed, allowing all impurities to pass off with melted ice. In regard to outer construction, it is built of thoroughly seasoned selected hardwood, finished in high-polish golden oak, fitted with brass locks and hinges,, and mounted on self-retaining casters. The waste pipe is close to the front, removable, therefore readily cleaned. The drip cup is arranged to form a trap to keep warm

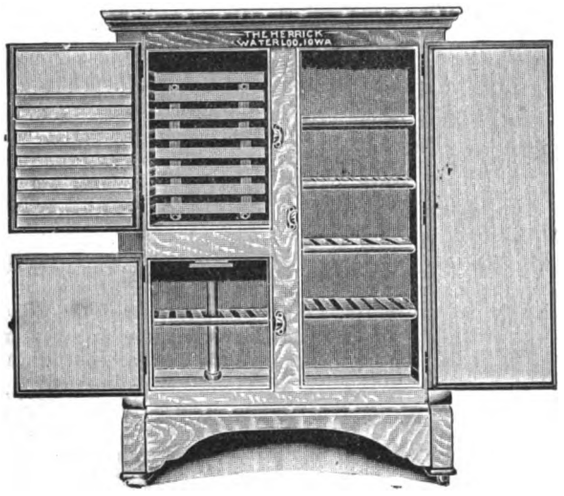
THE ICE QUEEN REFRIGERATOR.



air and odors from entering. All odors and gases being drawn up over the ice and condensed, allowing all impurities to pass off with the melted ice, the pure dry air returns to the provision chamber, providing hygienic conditions for the preservation of food. The front base is hinged at the top, so that it can be raised if a drip pan is desired, hiding same from view after dropping base. The bottom of ice chamber is tested to stand a pressure of 600 pounds, making it impossible to break down by throwing in heavy cakes of ice; it is also made to slant towards drip pipe, thereby discharging the melted ic and impurities quickly. They use their patent metal ice rack, which they claim to be the cleanest and most durable made.

NEW HERRICK REFRIGERATOR.

The Herrick Refrigerator and Cold Storage Co., Waterloo, Iowa, are the manufacturers of a full line of refrigerators, to which they have added for this season so many valuable improvements as to make them worthy of the name of the "New Herrick," which is noted in their new catalogue. By means of their perfected system made up of open center draft pans, air ducts, and other scientific construction, they gain a point which is indeed one of the most important features of the refrigerator. They mean by this the circulation. Without circulation the interior of the refrigerator would be damp and mouldy, and the articles would spoil. Their system is constructed on thoroughly scientific principles. The walls are always dry, sweet and clean, and after several years' use there is absolutely no mould to be found and no foul smell so common in refrigerators where this circulation is sluggish. The importance of a sanitary receptacle for the storage of perishable goods is recognized by all, since it has been found that much sickness is traced directly to unsanitary conditions in connection with the foods, etc., taken into the system. The circulation of their refrigerator is a strong, cold, dry air current which is forced through every square inch of the refrigerator so as to leave no dead air in any part. The construction is such that the air is forced through all the compartments, removing all odors and gases arising from the articles stored, and delivering them through a process of nature entirely outside of the refrigerator. The walls are always dry,



Digitized by Google

sweet and clean, which condition is understood to be absolutely necessary when spruce lining is used. Owing to this perfect circulation, butter, cream, milk, meats, berries, fruits, etc., may be stored at the same time without danger of taint and contamination to the most susceptible. One very important feature which should command the thorough inspection of the user is the insulation, as it is a feature nearly always overlooked, but is without doubt one of the essential points which are required

SHOWING COURSE OF CIRCULATION.

to make a satisfactory refrigerator. In this respect, the company realize the benefits derived from building every refrigerator honestly, and being very particular about the packing of the insulation. The basis of the insulation is a heavy packing of mineral wool, one of the best non-conductors known. They use a very high grade of this mineral wool, and it is so packed in the walls that there is no chance for sagging as it is held

NEW HERRICK REFRIGERATOR.

firmly in place. This heavy insulation makes the refrigerator very economical in the consumption of ice, and is indeed a great factor in reducing the cost of operation. The durability of their refrigerator is very important; the company claim that in the many thousands manufactured by them no dissatisfaction is found in this respect. There is no waste room or dark, inaccessible, unsanitary corners; from the smallest refrigerator to the largest, every square inch of the storage compartments as well as the ice chamber is easily accessible. The cases of all refrigerators with the exception of the two smallest sizes, are constructed of solid oak, making them durable as well as finely finished. The doors are made overlapping, so they are practically airtight. The trimmings are of the latest improved patterns, and a new design used by them exclusively. The fastenings, hinges, etc. are all nickel-plated, and are so constructed that they close the doors tightly. All refrigerators are mounted on casters, and even the largest refrigerators can be moved with ease. Their latest improved trap is one of the most convenient in use. This trap carries off the water from the ice-pan at the same time excluding any warm air which might work through from the outside. The pipe is made up of heavy galvanized iron, and the bell and trap are heavy gray iron castings galvanized. In their glass-lined refrigerators, the drain tube is nickel-plated. Their trap can be cleaned and replaced in less than one minute, so that it is very convenient as well as durable. The pans used in their refrigerators are constructed of heavy galvanized iron and are seamless so there is no possibility of leaks.

WETHERILL'S CARRIAGE HEATER.

M. Wetherill, Syracuse, N. Y., is placing before the Hardware trade his seasonable models of Carriage Heaters shown in the accompanying illustrations. Model One, shown in Fig. 1, is made of galvanized metal furnished with cast-iron ends. It is 14 inches long, and has a drawer made of galvanized

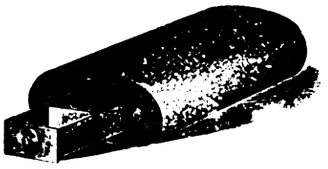


FIG. 1—MODEL ONE.

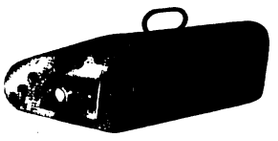
metal, which protects it from rusting. It is made in three styles: one, plain with japanned ends, without covering; one of same design, but is carpet-covered, and the other same as the last carpet-covered and nickel-plated ends. Model Three, see Fig. 2, is made from galvanized steel throughout, with double walls,



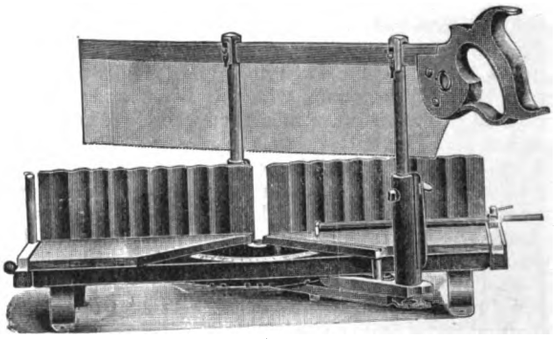


FIG. 2—MODEL TWO.

and heavily nickel-plated cast iron ends. The drawer of galvanized steel has sheet brass end, and is quite attractive in appearance, being carpet-covered, handsome and strong. The heaters are heated by a briquette of heater coal, which is furnished by the manufacturer at a nominal price, put up in cases of 12 dozen.

GOODELL "STEEL" MITRE BOX.

The Goodell Mfg. Co., Greenfield, Mass., are the manufacturers of the "Steel" Mitre Box illustrated in the accompanying cut, which they firmly believe will be found in quality entirely in a class by itself. In the first place, the box is made of Bessemer Steel, thus doing away with all liability of breakage, and making it much stronger and firmer than any box previously put

GOODELL "STEEL" MITRE BOX.

on the market. The backs are made of cold rolled steel, corrugated to ¼ inch in depth and ½ inch in width, allowing perfect clearance for saw-dust. Besides the angles used on regular boxes, by simply turning the lever, it can be instantly set and locked at any desired angle. It is graduated, by means of which much time is saved in making changes, especially if two opposite cuts are wanted at exactly the same angle. It has automatic stops to hold up the saw, allowing the operator to use both hands in placing the work. These are not complicated in using, but simple and instant acting, the saw being released by simply pressing down on it. The guides are made long, thus holding the saw very steadily when raised to the highest capacity. These boxes give 10½ inches width at right angles and 7¼ inches at mitre, taking much wider work than most other makes. All sizes can be furnished with extra angle attachment to increase angle above 45 degrees, and there goes with this a gauge for sawing duplicates of any length up to 20 inches. These are interchangeable, and being placed on the ends, can be put on old or new boxes at any time and are sold separately when desired.

DOUGLAS PUMPS.

W. & B. Douglas, Middletown, Conn., are one of the oldest pump manufacturers of the United States, having been established ever since 1832. They have recently issued a catalogue showing the great variety of pumps that may be handled by the Hardware trade proper, from which we make the following selections:

FIG. 264.

CISTERN PUMPS.

Fig. 264 is the up-to-date edition of the original Douglas Revolving Stand Cistern Pump, known the world over. It is extensively used for cisterns or wells 25 feet deep or less. To avoid freezing, the brake should be raised to its extreme height, thus tripping the valves.

FIG. 120.

FIG. 205.

PITCHER PUMPS.

Their line of Pitcher Pumps has the same careful attention that all Douglas products receive. Most of them weigh a little more than those of their competitors. Note that the rod is of special forging. Fig 120 is an open spout and open top, while Fig. 205 is a round spout and open top.

FIG. 211.

FIG. 494.

FIG. 495.

ANTI-FREEZING LIFT PUMPS.

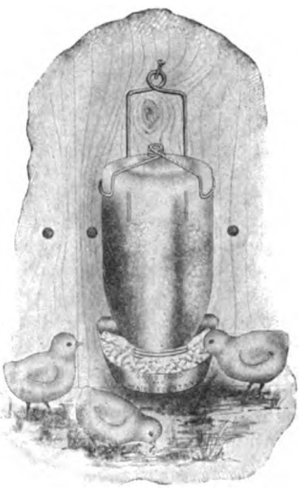
Furnished with bolted or screw working-cylinder, as ordered. Fig. 211 is heavy enough to readily operate a 3-inch cylinder on lifts of 50 feet.

ANTI-FREEZING PIPE PUMPS.

The lower cylinder and plunger are just the same as in their other set-length pumps. The upper section will stand a lot of hard work. These are also furnished with a 3-inch screwed working-cylinder unless otherwise ordered. Fig. 494 is a lift pump and Fig. 495 is a force pump.

FIG. 498.

FIG. 209.



HOUSE FORCE PUMPS.

Fig. 498 has a drawn brass tube cylinder and can be changed to either right or left hand by loosening two cap screws. This pump can be furnished with either one of four kinds of discharge fittings, viz.: As shown in cut; with pipe flange instead of spout; with cock spout; with air barrel and cock. Fig. 209, Pendulum Pump, will stand the most work and is recommended where spraying of lawns, etc., is contemplated.

These are the styles that can be handled successfully and at a profit by the Hardware trade, and everything different from these designs will be shown in the catalogue which they have recently published, which is a very complete one, with similar size cuts as shown in this article. W. & B. Douglas have been in business longer than any other pump manufacturers in the world. The management is in the hands of the Douglas family, and intend that none shall excel them in quality of goods and square dealing.

THE DAVIS FOOD AND WATER FOUNTAIN.

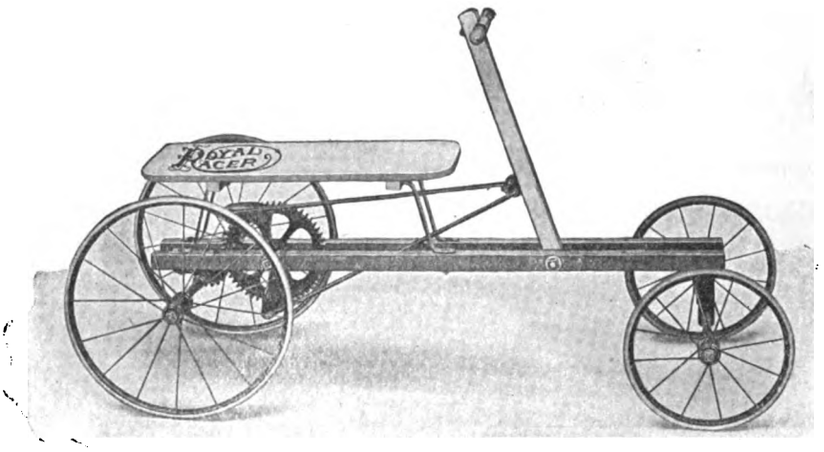
Among the poultry specialties manufactured by the Keyes-Davis Co., Ltd., Battle Creek, Mich., one of the most popular is the Food and Water Fountain, which is meeting with a rapid and continuous sale, and which is shown in the illustration herewith. It is claimed to be the only Fountain which can be satisfactorily used for either water or grit, oyster shells, etc. It can be used

THE DAVIS FOOD AND WATER FOUNTAIN.

with any size bottle or with pint, quart or two quart glass jars, a large bottle being considered best for water and a pint jar for feeding grit, shells, etc. When it is considered how essential to poultry raising a pure water supply is, these fountains become practically indispensable. Open dishes soon become fouled, rendering the water unfit to drink, and inviting disease, frequently furnishing a place where the young chicks get drowned. The

Digitized by Google

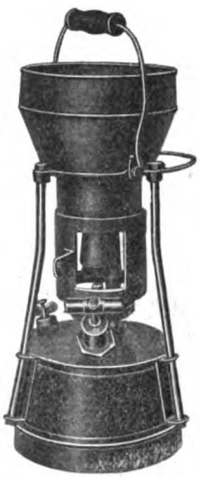
Davis Fountains keep the water cool and pure, and are easily and quickly emptied, cleaned and filled. The Fountain is not necessarily taken apart for filling. By merely slipping the bottle to one side of the cup it can be filled, replaced and inverted.



THE DAVIS FOOD AND WATER FOUNTAIN.

Water freezing in an inverted bottle will not break it, because there is ample room for expansion both up and down. The Fountain is made to be sold at a moderate price. Weight about eight pounds per dozen. Bottles or cans are not included with Fountains.

THE ROYAL RACER.



The H. N. Thayer Co., Erie, Pa., are the manufacturers of the Royal Racer, an ideal machine of the kind which is graphically illustrated by the accompanying cut. The Royal Racer is claimed to be a perfect speed car, having no dead center to contend with. The length of stroke can be controlled by the operator. Geared on an entirely new principle that with one fourth the ordinary effort of any hand car on the market, its mechanical construction may be relied upon to furnish the greatest speed. It is built in three sizes: Nos. 1, 2 and 3, with frame 30, 36 and 54 inches, the latter of which is a tandem. Wheels are of 10 and 14 inch diameter, with rubber tires of 1-2 inch. The Royal Racer is an admirable article for exercise, and the boy using one can make it a pleasure and healthful recreation without being compelled to waste his energy on any cumbersome and badly designed machine.

THE ROYAL RACER.

THE BARTHEL KEROSENE FURNACE.

The Barthel Blow Lamp Co., 294 Washington Street, Boston, Mass., are the manufacturers of the Barthel Kerosene Furnace shown in the accompanying illustration. The Furnace is made in two patterns. The one shown in cut is Style A, and is equipped with a removable hood, and is the style usually employed by plumbers. The hood is of standard size, and will admit a melting pot. In Style B, the Furnace is equipped with removable hood, lined with asbestos, and is designed for the use of roofers, tinsmiths and others who use soldering tools. Among the advantages claimed for this Furnace are: Superior construction in every part, particularly pump, burner and container. Perfect combustion of oil and a greater heat than can be produced by any apparatus of its size in the world. Absolute safety at all times and under all conditions. Simplicity, reliability and durability. That it can be taken apart and cleaned in a few minutes. No coil. It is claimed that every part of the Barthel Kerosene Furnace is constructed of first-class material. Nothing is slighted in the minutest particular. The fittings are all brazed into the container. The flame tube is of gun metal and is brazed to the vaporizer. The pump is of brass, and with its automatic valve, is specially constructed for the furnace.

THE BARTHEL KEROSENE FURNACE.

FOURTEENTH ANNUAL SIX-DAY BICYCLE RACE.

Sixteen teams will line up for the long grind, and motorcycle match races will be run daily.

These sixteen teams, representing the pick of the long-distance riders in the world, are those finally and officially selected to compete in this year's bicycle race, to be held in Madison Square Garden amphitheatre, New York, during the week December 10-15 inclusive.

OUR CANADIAN LETTER

TORONTO, December 5, 1906.

CANADA'S NEW TARIFF.

On November 29 Finance Minister Fielding made his annual budget speech in the Dominion Parliament and announced the changes in the new tariff which went into force immediately and will probably stand unchanged to any degree for at least four or five years as both political parties in Canada are now committed to the high tariff idea.

The new tariff is, roughly speaking, the old tariff in new clothes. Changes are few, particularly in Hardware articles. Agricultural machinery has been reduced from 20 to 17½ per cent., axes, scythes and sickles from 25 to 22½; shovels and spades from 35 to 32 1-2; gasoline from 2 1-2 to free, and manufactures of lead from 35 to 30 per cent. Baths, bath tubs and silverware have been increased from 20 to 35 per cent., and glue from 25 to 27 1-2 per cent. The general opposition to the proposed tin plate duty asked for by J. Wesley Allison, a company promoter, killed the proposal and tin plate remains free. The higher duty asked for on American stoves coming into the Canadian Northwest was also refused and the old conditions rule.

The British preference of 33 1-3 per cent. remains practically unchanged with the exception of an increased preference on metals and the German surtax continues. The new tariff is arranged in three columns, the general tariff, the British preference and an intermediate schedule. The latter column does not yet apply to any country, but is a standing offer to any country willing to enter into a reciprocity arrangement.

The new dumping clause provides that the dumping, or special duty, shall be the difference between the selling price to the importer in Canada of an article of a class or kind made in Canada, and the fair market value of such articles sold for home consumption in the country of export, but not to exceed 15 of such fair market value for home consumption in the country of export.

The iron and steel bounties have been continued for another four years on a sliding scale and each Canadian industry will be subsidized to the extent of millions of dollars during that time. This move has again revived the rumor that the United States Steel Company would establish a plant near Sandwich on the Detroit River.

Nothing has been done regarding the anti-combine clause under which Hardware manufacturers, plumbing supply men and others were prosecuted last winter. This is a disappointment as the existing law is very indefinite and places many hardships on business men's associations.

PREPARING FOR RETAIL HARDWARE CONVENTIONS.

The Executive Committee of the Retail Hardware Associations in Western Canada and Ontario will hold meetings during Christmas week to prepare programs for the coming conventions in Winnipeg next February and Toronto next March. There are many important matters to come up for discussion and action. In Western Canada the chief problem recently has been the proposal for all association members to refuse credit to anyone from November 1 to April 1. While united action was not taken this year many merchants are doing this on their own account. In Ontario the most important work is the endeavor to establish a mutual fire insurance company. The members have not responded in sufficient numbers as yet to make the proposal likely of immediate adoption.

Merchants have been too busy lately to give much attention to association matters. The year's business has reached a record total but the absence of snow so far has held back holiday trade in the country districts considerably. Jobbers stocks are very low in some lines and the advanced prices on many lines have encouraged buying.

HARDWARE TRADE HAPPENINGS.

Richardson & Sneyd, manufacturers' agents, Toronto, have been appointed Canadian agents for Wheatley Bros., cutlery manufacturers, Sheffield, England.

W. M. Gordon, of Watt & Gordon, Hardware dealers, Winnipeg, is a candidate for alderman in that city.

The Marshall-Wells Company's new warehouse at Winnipeg and J. H. Ashdown's additions to his wholesale warehouse are both nearly completed.

New Hardware businesses have been established in Canada recently as follows:,H. B. Hughes, at Lavoy, Alberta; L. Mahen, at Penetang, Ont.; Thomas Wallace, at Lamont, Alberta; Thomas Black, at Orillia, Ont.; and M. A. Rodman on Dundas street, Toronto.

Amoit, Lecours & Lariviere, who have the finest retail Hardware premises in Montreal, are enlarging and will have 23,350 feet of floor space when completed.

E. C. Atkins & Co., Indianapolis, have moved their Canadian saw sample room in Toronto to better quarters at 77 Adelaide Street east. C. D. Ten Eyck is the company's pushing representative in Canada.

Business transfers amongst Canadian Hardwaremen recently include: T. H. Elliott, Bayfield, sold to J. H. Worsell & Co., Goderich, Ont., who will run the Elliott business as a branch store. M. Fraser has bought the business of J. J. Storey, Wawanesa, Man. The Imperial Elevator Company have taken over C. A. McDonald & Company's store at Mortlach, Sask. W. H. Pain, Milestone, Sask., has sold his business to the Evans Hardware Company. H. Hiscox has purchased Heath & Howard's store at Vermillion, Alta. W. A. Sturdy, Revelstoke, B. C., has taken over the Hartney, Man., Hardware Company's business. Whitton & Drummon, Toronto, are going out of the Hardware business in favor of the dairy supply business. Nichols & Reuouf, Victoria, B. C., have sold their business to Mr. Griffin of Atkins & Griffin, Shoal Lake, Man., and Mr. Griffin has taken in a partner and will make the store one of the finest retail stores on the Pacific Coast. The St. Lawrence Hardware Co., Montreal has assigned and D. McKenzie & Son, Strathmore, Sask., have sold out.

The Williams Gauge Company, Pittsburgh, are establishing a factory at Montreal and have opened up a branch office at Toronto.

The Booth Copper Co., Toronto, are to erect a $5,000 factory building.

J. E. Paine, managing director of George Wostenholm & Son, cutlery manufacturers, Sheffield, has been making a tour of Canada.

J. W. Allen, Hardware merchant, Newmarket, has been enlarging his store.

E. M. Fulton, president of the Consumers' Cordage Company, Montreal, died in New York last month and E. A. Walker & Son, Grenfell, Sask., died suddenly of heart failure in November.

Frank R. Oliver, Saskatoon, Sask., has sold his Hardware business to accept a responsible position as manager of a manufacturing concern at Smith's Falls, Ont.

J. E. McRobie, Winnipeg, secretary of the Western Canada Retail Hardware Association, has been elected president of the Northwest Commercial Travelers' Association.

Rice Lewis & Son, Toronto, have purchased a site for a new metal warehouse and will enlarge their wholesale Hardware department.

W. J. Butt, formerly of Lennox & Butt, retail Hardware dealers, Winnipeg, has withdrawn and become a manufacturers' agent, representing the Bridgeport, Conn., Hardware Co.

Stewart & Wood's paint warehouses in Toronto were damaged by fire and much stock destroyed on November 28.

W. F. Fairman, president of the Dominion Wire Manufacturing Company, Montreal, has retired and W. H. Farrel, formerly superintendent of the American Steel Manufacturing Company's works at Donora, Penn., has succeeded to the position.

The Hardware Specialties Manufacturing Company, Chambly Canton, Que., have gone out of business and sold their plant.

The Lufkin Rule Co., Saginaw, Mich., are erecting a Canadian factory at Windsor, Ont.

The Consolidated Hardware Company, Hamilton, Ont., is a new concern incorporated to manufacture nails, tacks and Hardware specialties.

John J. Foote has resigned as manager of the St. John, N. B., branch of the McClev Manufacturing Company, London, and has taken a position in the head office. His place has been filled by M. F. Irwin, formerly general sales manager of the company.

Wm. Wyatt, for 37 years a stove and tinware merchant, at London, Ont., has removed to Western Canada where he expects to locate permanently.

Digitized by Google

REVIEW OF THE MARKETS.

WIRE NAILS: The American Steel and Wire Company announced on December 4 an advance of $2 per ton in the base prices of Wire Nails. The trade was taken somewhat by surprise at this advance, although the advanced prices for raw material justified a heavier advance on November 10th than was ordered at that time. The orders based on the advance on that date flooded the company, as the trade took its moderation as a warning of what might happen. Early Spring deliveries are now in process of being provided for, and at prices considered moderate for the condition of the market. Quotations are as follows, f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in 10 days:

Carloads to Jobbers.....$2.00
Carload lots to Retailers..... 2.05

New York.—The advance announced by the American Steel and Wire Co. on December 4 very naturally resulted in an advance by the local jobbers to a corresponding extent. The good weather conditions favorably affecting outdoor work keep up the demand later than usual this season. New York quotations are now made on this new basis. To retailers carloads on dock, $2.19; less than carloads on dock, $2.33; small lots at store, $2.30.

CUT NAILS: In accordance with the understanding previously agreed upon that the price of Cut Nails should, on an advance being made on Wire Nails, at once be increased in a corresponding ratio, quotations were changed as follows, f.o.b. Pittsburgh:

Carload lots to Jobbers.....$2.05
Less than carloads to Jobbers..... 2.10
Less than carloads to Retailers..... 2.20

Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 10 cents advance on Steel Cut Nails.

New York.—Cut Nails cannot be obtained in the local market in anything like the average assortment, many sizes being still quite scarce. The advance in price at mill affects local prices, and small lots at store are now on a basis of $2.30.

BARB WIRE: The advance of $2 per ton announced on December 4 by the American Steel and Wire Company applies on Barb Wire as well. Demand is light as is usual at this time of season. Quotations are as follows:

	Painted.	Galvanized.
Jobbers, carload lots	$2.15	$2.45
Retailers, carload lots	2.20	2.50
Retailers, less than carload lots	2.30	2.60

SMOOTH FENCE WIRE: The advance of $2 per ton made in the price of wire and wire products by the American Steel and Wire Company on December 4 included Smooth Fence Wire. Specifications to supply the demands of fence manufacturers are received by the mills in large volume daily, making the mills still behind the orders, although not so much as formerly. Quotations are as follows, f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

Jobbers, carloads $1.85
Retailers, carloads 1.90

The foregoing prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

ROPE: The following prices may be said to represent the market:

	Cents per Pound.
Pure Manila, 7-16 and larger	12¾ to 13½
B Quality Manila	11½ to 12
Pure Sisal, 7-16 and larger	9¼
No. 2 Sisal, 7-16 and larger	8 to 8¼
No. 1 Jute, ¼ and larger	8¼ to 8½
No. 2 Jute, ¼ and larger	7¾ to 8

LINSEED OIL: The following advanced quotations are announced November 16 on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....43 cents per gallon.
In lots of 5 barrels or more.....42 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Double Boiled Linseed Oil, 2 cents per gallon higher than raw.
Regular Boiled Linseed Oil, 1 cent per gallon higher than raw.
Calcutta Oil.....70 cents per gallon.

THE CLEVELAND TRADE.

The sale of goods by jobbers for future shipment is extremely large, and will make the business for the first half of the year of 1907 of large volume. Most of these goods have been contracted for, from manufacturers in the regular way, but are for unusually large amounts. Most of these contracts are accompanied by specifications and date of shipment. If manufacturers have over-sold and will be unable to furnish the goods the result will be serious. Some of the manufacturers have taken contracts not to exceed certain amounts; these amounts are excessive and much larger than either party expected would be furnished on such contracts, but the change in price has been so radical they are more than likely to be called for. Now if such manufacturers have failed to contract for material to furish the entire amount of these contracts they are unfortunately situated, and there will be a strong temptation for them to ship goods on later orders at better prices. Retailers should make their orders this season for early shipment to avoid disappointment, as later shipments may fail to come in time, or fail to come altogether. Goods that have been contracted for before December are a profitable investment if they are furnished in the first half of the year, for if they have not already advanced, they are sure to do so. Manufacturers have been extremely slow in advancing prices, some of them have shaded their own profits, in trying to avoid it, until they were reluctantly compelled to act, and then have as a rule been too conservative. In many cases it has taken several advances to save them from actual loss. Most of the goods in the Hardware line are lower in price than they will remain, if no further advance takes place in raw material. It is safe yet to carry full stock, and very important that goods be secured early.

THE LOCKWOOD-TAYLOR HARDWARE CO.

THE PITTSBURGH TRADE.

The closing month of 1906 finds business moving at the top of the wave with every indication of continuing to move at the same rate for months to come. Quite a flurry has been raised over the supply of wire cloth and netting for the coming season. As matters stand to-day many jobbers cannot count on receiving over their usual supply, as makers refuse to accept orders for anything beyond their production up to February 1st, 1907. These goods have been sold without profit for several years and it may be that this will result in something better, both for the makers and merchants. We do not think the average retailer realizes the difficulty jobbers have had for a year past in keeping up their stocks. It requires both bullying and begging to get goods from manufacturers even after months of waiting. Holiday Hardware is in good demand, especially in cutlery. Builders' Hardware continues to move freely at the advanced prices.

LOGAN-GREGG HARDWARE CO.

THE ST. PAUL TRADE.

Surely the entire country is prosperous and we are reaping our share. In talking with many manufacturers, we come to but one conclusion and that is that the demand far exceeds the supply and the result is higher prices. This is logical and surely right, and even without considering the supply and demand situation, it is a fact that raw material of all kinds and labor is much higher and advancing, which are good reasons for advances. With so much business in sight, goods of some kinds are worth a premium and we feel that for the first six months of next year there will be a great shortage. So the merchant who gets his goods in early will be the one best supplied. Take the American Sheet & Tin Plate Co. They are three months behind on all their products and it is so with other articles, until we cannot but feel that the early buyer will have an advantage over the other who will not buy until his need is for immediate shipment.

HACKETT, WALTHER, GATES HARDWARE CO.

THE MINNEAPOLIS TRADE.

Local trade in all lines is good. This is true of jobbers and retailers. There is some trouble in the country on account of the fact that the railway companies could not handle the crops and at many points grain elevators are overflowing and thousands of bushels of grain are dumped on canvass "paulims," ex-

posed to the weather and consequently suffering more or less damage, because the farmers after threshing have no store houses to take care of the grain, and they haul it to town and the elevators are obliged to take care of it as best they can. This makes a great loss, which all comes on the farmer. The grain movement has been a little better the past week, but is in decidedly bad shape and likely to continue so for an indefinite period. No doubt taking all things into consideration, the wheat crop was over-estimated. Bad weather through threshing and conditions mentioned above will make quite a material shrinkage in volume of crops. The greater part of the crops are still in the hands of the farmer. There seems to be little trouble with collections this past month locally. In spite of general advance in the market, goods are being sold on very much closer margin and in fact generally speaking without any profit whatever being added to present costs. W. K. MORISON & Co.

THE SAN FRANCISCO TRADE.

A resume in a local paper of November's general trade came under notice this last week of the month. While it extolled the coast's exceedingly active continuance of general trade, it contained an extended paragraph relating to the State's business activity and busy times prevailing in this city, to wit: In the Hardware and household goods lines the demand is unprecedented for the season of the year. Southern California is forging ahead at a rapid rate and their active season is just beginning. Central California has been waiting overlong for the rainy season that broke in upon us this last November week with a three days' downpour and a whistling wind storm that tore its way through San Francisco at a gait of from twenty-four to forty-six miles per hour, but the clear weather preceding the week was favorable to trade. Northern California is enjoying an increased business in all lines. Mining, lumbering and farming have experienced a most prosperous season and at the present time there are no signs of abatement.

The general trade of San Francisco was never so heavy as at the present time. The bank clearings of the week amounted to $59,134,848.45 and an increase of $14,159,943 as compared with the clearings of the corresponding week last year. These clearings were the largest in the history of the city for a like period. As compared with the business of other cities of the United States, San Francisco now ranks sixth. For some years she has ranked seventh in commercial importance, but now she has exchanged places with the great iron center, Pittsburgh.

The Hardware trade of San Francisco continues superlatively good, the only difficulty experienced being in obtaining goods. The jobbers are having an enormous trade both locally and in the country and the retailers continue busy. There is some complaint in retail circles that more business could be done, that there is a slight falling off in the demand as compared with a few months ago. This is a perfectly natural condition of affairs. While we do not believe there is any falling off in the general volume of business, the fact that there has been such a large number of new Hardware stores established would necessarily cause a division of trade to such an extent that those who enjoyed the open field a few months ago are now beginning to feel the effects of greater competition. The up-to-date Hardware dealer makes as much preparation for the selling of holiday goods as other merchants these days. Years ago the dullest period of the season for the Hardwareman was Christmas time, now it is one of the busiest. The merchant should lay in some attractive novelties. The cutlery stock should be tastily displayed. Carving sets and plated-ware are always salable Christmas time, if the goods are shown attractively and advertised unstintedly. The Hardwareman must not expect to have a demand for holiday goods unless he places them in display and letting the people know through the medium of printers ink that he has them. Many of the stores are selling children's vehicles; there is good profit in the line and the Hardware store is a good place of distribution. Sporting goods is another line that should be pushed forward during the holidays, as every boy in the land wants a gun for Christmas and guns from a pop-gun to a rifle should be kept in order to satisfy all demands. There are hundreds of novelties that the Hardware store can sell at this time and make a good profit. In normal times in San Francisco, not now, this is known as the dull period in standard Hardware sales, but for all hereafter there should never be trade dullness at Christmas time, as there is no business that can meet this seasonable trade better than the Hardware.

Traveling Hardwaremen from the territory north of San Francisco returned a few days ago with these news items:

Tyler & Prior, of Harrisburg, Ore., have dissolved their Hardware business. A. J. Hill has purchased W. L. Tyler's interest. Thompson & Thompson are the successors to Newland Bros., Hardware and implements, Harrington, Wash. The Hunt Hardware Company of Colville, Wash., has been incorporated. H. Pitcher has started in the Hardware trade at Meridian, Idaho. Stothard, West & Halverson have bought out the Minidoka Hardware Co.'s store at Twin Falls, Ida. N. D. McCutcheon & Co., Hardware merchants at Idaho Falls, Idaho, have incorporated. J. E. Neherbas is opening in the Hardware business at West Seattle, Wash. Y. G. Rehberg has bought H. A. Morgan's Hardware store at Genesee, Idaho. E. B. Tucker & Sons have bought out the Jefferson Hardware Company of Jefferson, Ore. W. A. Dougherty has just opened a Hardware store at Tenino, Wash. HOW TO SELL A WOMAN A FOOD CHOPPER.

These days of butchering and fresh meats are the time paramount to interest her. Do not take offense if she turns in disgust from the tiny affair as rather a legitimate part of a doll's culinary outfit, but give proof of the rapidity of work, together with advantage gained by the little room in which it can be tucked away when not in use.

Convince her that it is more than a speedy substitute for the chopping bowl in converting the waste bits of meat into delicious fillings for sandwiches; that the work is not only quickly but evenly done. Onions and horse radish, tear producers by the old process, are rapidly and painlessly disposed of. By using the finest attachment spices may be bought in bulk and ground at home, thus leaving no chance for adulteration. Nuts can be ground into nut butter, a most delicious and wholesome filling for sandwiches, or chopped fine or coarse as desired, and added to cake, frosting or candy.

New kitchen devices cover so wide a range of work. The owner of a food chopper uses it almost daily the year 'round, and is continually coming upon new ways for its use.

SPOKANE, WASH., BREVITIES.

Measures regulating peddlers and itinerant dealers and various other matters for which legislation is sought from the incoming legislatures of Washington, Idaho and Oregon, will be discussed at the second annual convention of the Inland Empire Implement and Hardware Dealers' Association in the Spokane Hotel, January 16 and 17. E. C. Lucas of Davenport, Wash., president of the association, will preside, being supported by R. L. Spiker of Lewiston, Ida., and W. H. Urbahn of Spokane, vice-president; J. A. Fridaker and E. W. Evenson of Spokane, treasurer and secretary. The full program has not been completed. However, there will be drives, a theatre party and a reception and banquet.

The Knudson-Winston Hardware Company will occupy its new quarters at Sprague Avenue and Pittsburgh Street early in January. The building is of brick and is 50x90 feet. The building will be lighted with both gas and electricity, and will have modern plumbing. The basement will be lighted with prismatic sidewalk lights, and will have a sidewalk elevator. This concern was the Knudson-Jacobs Company until W. M. V. Winans bought Mr. Jacobs' interest at the first of this year.

A. H. Anderson & Co., are planning to build a actory for threshing machines at Moscow, Ida., in the near future. The machine to be made is a combination harvester and thresher, operated by four horses. It is an invention of Mr. Anderson. Jerry Day, a Moscow mining man, is furnishing the financial backing. The promoters have asked for a bonus of $10,000 and the erection of the factory in Moscow depends largely upon the decision of the city in regard to this request. If the bonus is not secured, the factory will be built elsewhere in the Inland Empire.

The Davis Hardware Co., has succeeded the Stamwood Hardware Co., at Stamwood.

Ben Gruhs, of Spokane, contemplates putting a large Hardware store at Russell, Ida.

The Western Mercantile Co. has purchased the stock of Hardware and implements of L. C. Fischer & Co., at Sprague.

C. A. Andrews of St. Louis and D. Lenfesty of Spokane have purchased the Hardware business of Fargo & Co., at Walla Walla.

D. H. Harper, of Prosser, is planning to open a store at Auburn, where he will carry a large line of farm implements as well as Hardware and furniture.

D. H. Harper has transferred his Hardware and furniture business at Prosser to his sons and a corporation has been formed to be known as the Harper Hardware and Furniture Co. It is capitalized at $10,000.

The Hardware firm of Cox & Barnett, Walla Walla, will soon be succeeded by a corporation composed of local business men and Walla Walla farmers, with a capital of $100,000. The company will be composed of the following: David Cox, W. S. Barnett, John Foley, John I. Yeond and Bruce Farrell.

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED NOVEMBER 26, 1906.

415,693. LANTERN. A. L. Baron, Tiffin, Ohio.
415,711. BOLT LOCK. E. D. Galbreath, W. Dunkle and S. Chapman, Linden, Ind.
415,729. HAY FORK. L. Y. Myers, Canton, Ohio.
415,828. WASHING MACHINE. W. Whitcomb, Gardner, Mass.
415,865. WASHING MACHINE. S. Hake, Fort Atkinson, Wis.
415,903. CARPET SWEEPER. W. J. Drew, Grand Rapids, Mich.
415,988. EXTENSION BIT. W. S. Whiting, Waterbury, Conn.

PATENTS ISSUED NOVEMBER 27, 1906.

836,663. GAS SOLDERING IRON. H. Berg, Orange, N. J.
836,711. COMBINATION TOOL. S. Rothschild, Little Falls, N. Y.
836,810. WINDOW FASTENER. E. F. Kapus, St. Joseph, Mo.
836,824. ROCK DRILL BIT. J. B. Pace, New York, N. Y.
836,983. COOKING UTENSIL. F. Millwee, Marlow, Ind. Ter.
837,011. LOCK AND LATCH MECHANISM. H. G. Voight, New Britain, Conn.
837,204. WINDOW SCREEN. M. M. Eidsmore, Blanchardville, Wis.
837,254. WRENCH. M. Wenger, New Holland, Pa.

PATENTS EXPIRED DECEMBER 3, 1906.

416,154. NUT WRENCH. P. Cosette, Crystal Falls, Mich.
416,163. MOP. H. G. Hanson, Trevor, Wis.
416,175. COMBINATION STEP LADDER. G. A. Miller, Butler, Pa.
416,181. LOCK. A. O'Keefe, New York, N. Y.
416,208. BOX OPENING TOOL. E. W. Bullard, Barre, and C. E. Bullard, Worcester, Mass.
416,268. PERMUTATION PADLOCK. J. Kubler, Hot Springs, Ark.
416,281. SAW. A. Weymar, Brooklyn, N. Y.
416,309. LATCH. E. S. Winchester, Dorchester, Mass.
416,310. KNOB ATTACHMENT. E. S. Winchester, Dorchester, Mass.
416,311. KNOB ATTACHMENT. E. S. Winchester, Dorchester, Mass.
416,312. LATCH. E. S. Winchester, Boston, Mass.

PATENTS ISSUED DECEMBER 4, 1906.

837,272. WRENCH. W. A. Allen, Lecanto, Fla.
837,291. RATCHET WRENCH. C. L. Elliott, Keene, Ohio.
837,298. LATCH. J. E. Gloekler, Pittsburgh, Pa.
837,322. TAPER SHANK FOR DRILLS AND LIKE TOOLS. A. A. Miller, Franklin, Pa.
837,350. WINDOW SCREEN. T. S. Smith, Watervliet, N. Y.
837,352. WAGON JACK. G. L. Snediker, Woodstown, N. J.
837,360. LOCK AND LATCH MECHANISM. H. G. Voight, New Britain, Conn.
837,432. EGG BEATER. N. Stromer, Gillett, Wis.
837,439. SAW. T. L. Wallace, Indianapolis, Ind.

AMERICAN RING CO., Waterbury, Conn., have recently issued a catalogue of Bath Room Fixtures, which include a line of Soap Dishes, Comb and Brush Trays, Tooth Brush, Sponge, Whisk Broom and Tumbler Holders, Towel Bars, Pins, Bar Posts and Rings, Toilet Paper Boxes and Rollers, Robe Hooks, Shower Rings, Bath Sprays and Match Holders, as well as a line of Cabinet Handles, Ring Pulls, Match Boxes, Screen Handles, Wall and Cup Hooks, Corner Plates, etc. This company are also large manufacturers of Drawer Pulls, Escutcheons and other Furniture Trimmings, Sleigh Bells, Gilt Upholstery Nails and Brass Trimmings for brass and iron bedsteads. Seperate catalogues will be sent on application.

WM. ELLIOT & CO., RAZORS

are made of the finest grade English steel, highly and correctly tempered, hollow ground and concaved, and finished by the most efficient German cutlers

"Elliot" razors are universally considered to be the best razors manufactured and sell strictly upon their merits. *Write for our new catalog. The most comprehensive exclusive razor catalog published.*

POPULAR TALKS ON LAW

Copyrighted 1905, by William C. Sprague, President The Sprague Correspondence School of Law.

CONTRACTS.

NO. 9—CONTRACTS OF INSANE PERSONS AND DRUNKARDS.

Our readers who have followed this series of talks will have learned the rule as to the contracts of persons not yet of legal age, to the effect that generally speaking an infant's contracts are voidable by him, with the one great exception that where under certain circumstances he makes a contract for the necessaries of life it is good.

The law with reference to the contracts of insane persons and drunkards is based upon the same theory as is that of the law with reference to the contracts of infants—namely, that the law ought to protect the weak or such as have not sufficient mind, against the strong or the mentally sound. Insanity, generally speaking, is a weakness or derangement of mind. It is such a state of mind that the person afflicted cannot think rationally, is incapable of protecting himself or his property, and cannot foresee the results of his acts. In this sense an idiot is an insane person.

In order for one to make a valid contract he must understand its terms and give his assent to them. An insane person, generally speaking, is incapable of understanding and of giving rational assent. It would, therefore, be the height of injustice to hold a person to a contract made during his insanity.

There are cases, however, where persons are insane on some one subject, and perfectly sane on others. Such persons are called monomaniacs. Or, they may be insane upon all subjects but one. If this condition can be clearly proven the law will hold the person to his contracts made in relation to matters concerning which he is entirely sane. There are persons who, while nominally insane, are sane at intervals. If a contract can be proven to have been made during an interval of sanity it will stand. It is even held that where one has general capacity he will be held incapable if, when he made the contract, he labored under a delusion as to the particular matter which enthralled his judgment and will.

We have learned that infants are bound by contracts for the necessaries of life where these are not furnished them by parents or guardians or otherwise. The same rule holds with reference to insane persons and idiots. In the case of infancy the necessaries must be such as concern his person, as, for instance, medicine, food, clothing. In the case of the insane, however, the contract may be such as concerns his estate or property as well as his person, the contract holding if it is shown to be necessary for the preservation of the estate.

Generally speaking, an insane person's contracts are not void, but, as in the case of infancy, such contracts are voidable, that is, he may carry them out or not as he chooses. However, such contracts are binding upon him if, after his reason has returned, he affirms them, or if during his insanity his guardian or those having legal authority over him ratify them. If the person after becoming sane, or if his guardian, before he becomes sane, disaffirms a contract, and refuses to abide by it, he must return whatever he has received on the contract provided he can do so. He cannot disaffirm the contract and keep the proceeds. He may disaffirm the contract without returning anything if what he has received is lost or has in any way passed out of his control.

The following exception to some of the rules stated must be noted: When a guardian or a committee has been appointed by a court over a person adjudged to be insane his contracts from that time on are void, excepting where they are for the necessaries of life, and then he is bound, not on the contract, but for the reasonable value of what he has purchased. It should be said, too, that where one has been adjudged insane his contracts, even though made at lucid intervals, or while such judgment is in force, have no binding effect.

Where it is a question whether or not a person was insane, the jury will be instructed to look into the nature of the contract and the influences that led to the making of the contract. They will be asked to consider whether it was fair or just; whether the consideration was adequate; whether the other party knew of the mental derangement; whether the other party sought an advantage in consequence of such knowledge; whether there was any undue influence used or fraud; whether the supposed insane person had advice—what was its nature and who gave it to him. These questions being answered the jury will be asked to declare whether or not the contract was the offspring of a sane mind. The sane party to a contract will be held whether he knew of the insanity of the other person or not, if the insane person, or his representatives, so elect.

Drunkenness is a species of insanity, and while it is not a good defense to a criminal charge, it may be pleaded as a defense in a suit on a contract made when the person sued on the contract was drunk at the time he made the contract. It follows, therefore, that a contract made by a person when drunk, if it can be proved that at the time he was bereft of reason, is voidable; it makes no difference whether the drunkenness was voluntary or involuntary.

The same rule holds good with reference to the matter of the necessaries of life as in the case of insane persons, a drunkard being held liable to pay for the reasonable value of the necessaries of life used by him when drunk. He may, when sober, return such as he has not consumed and disaffirm the contract to that extent. If he keeps what he purchased during his drunkenness an unreasonable time after he becomes sober he will be held to have ratified the contract. The contract of an habitual drunkard is good if made in a sober interval. Mere drunkenness will not impair a contract. To have the effect of impairing a contract it must be proven that the party was non compos mentis at the time. Insanity brought on by long-continued drunkenness does not differ in legal effect from any other sort of insanity.

(To be continued.)

AN OPEN SHOP.

"Somebody left the faucet of the vinegar barrel open last night, said the grocer's clerk, and there ain't a drop left."

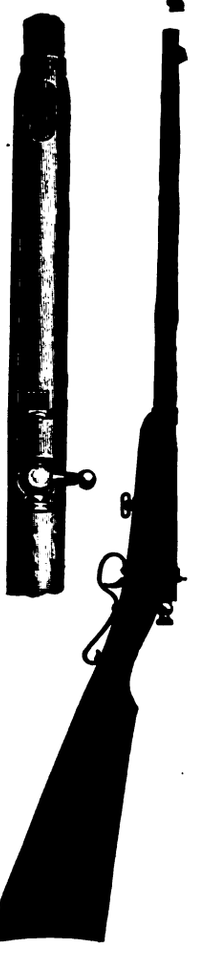
"H'm! That's too bad. Tell the bookkeeper to enter in under the head of running expenses."

TOUGH!

Not long ago, at a dinner, there was a Biblical argument. When the argument was over a young lady said.

"I enjoyed that discussion splendidly. But, you know, I always thought that Sodom and Gomorrah were man and wife."

Another young lady commented:



"Oh, well, I suppose they ought to have been if they were not."

Absolute Accuracy

beautiful finish and strength of shooting is shown in the

FAMOUS

Hamilton Riflos

MODEL No. 23

Retail Price $3.00

Full length 35 in. Barrel and action 21¼ in. long, Take-down, Bolt-action Model. Stock Genuine Walnut. Barrel finely tapered and beautifully finished in blue-black gun finish. Automatic action in loading and ejecting exploded shell.

MODEL No. 19

Retail Price $2.00

Like No. 23, combines simplicity, beauty of finish, strength and shooting power. Simple loading process; improved extractor, rapid and perfect in action, convenient "take-down" features.

MODEL No. 15

Price $1.50

is made like No. 19, except the barrel is 4 in. shorter.

This superb line of 22 calibre Rifles, ideal for target practice or hunting small game, was never offered at the prices we quote.

HARDWARE DEALERS RECORD

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Lowell, Mass.—E. A. Cheney & Son and John A. Thompson & Co., local Hardware concerns, have consolidated, having formed a new corporation to handle Hardware, mill supplies, etc. The new firm name will be Cheney & Thompson Co. F. W. Cheney and John A. Thompson are old partners, having been in business from 1889 to 1900 under the firm name of F. W. Cheney & Co. They are now located at 547 Middlesex Street.

Milwaukee, Wis.—The Falkenhainer-Kenkel Hardware Company has been incorporated with a capital of $10,000; incorporators, Julius E. Kenkel, August H. Falkenhainer and George Falkenhainer.

New York, N. Y.—Benjamin Gillespie Company has been incorporated to deal in Hardware; capital, $10,000. Directors—Sarah Craig, Rensselaer Falls, and L. F. Dodd and George Rosendale, New York.

Omaha, Neb.—The New Paddock-Hawley Company, which will also maintain an office at St. Louis, has been organized under the laws of Nebraska, and its charter enables it to issue $700,000 of stock. D. A. Daniels, Jr., and J. E. Baum are the officers of the firm, which will also manufacture Hardware and iron implements.

Passaic, N. J.—Forsyth Hardware Co., No. 356 Passaic Street, has been incorporated to deal in Hardware, tools, milling supplies, house furnishing goods, etc.; capital, $7,000. Incorporators: Richard Binger, No. 184 Main Avenue; Joseph P. Mueller, No. 171 Sherman Street; Donald Lefferts, No. 61 Bloomfield Avenue, all of Passaic, N. J.

St. Louis, Mo.—Stock-Daniel Hardware Company has been incorporated; capital, $24,000, all paid. Incorporators—Bernard Stock, Joseph F. Stock, John B. Daniel and William J. Calhoun.

Trenton, N. J.—Corbett-Taylor Co., No. 143 North Warren Street, has been incorporated to deal in Hardware, contractors' supplies, etc.; capital, $100,000. Leslie C. Pierson, No. 493 West State Street; Ellsworth A. Corbett, No. 497 West State Street, both of Trenton, N. J.; James Taylor, No. 1021 Spruce Street, Camden, N. J.

Windfall, Ind.—K. O. Chandler is establishing a Hardware business at Windfall.

Changes and Improvements.

Armada, Mich.—H. M. Scott, of Marine City, is successor to E. P. Cordworth in the Hardware business here, having bought the stock of Mr. Cordworth. He has taken possession.

Beaver, Pa.—T. A. Clifton, of Beaver, and Mr. Oscar Robertson, of the South Side, have purchased the entire stock of Hardware, consisting of stoves, house furnishings, farming implements and fixtures, of the Beaver Hardware Company, of which T. L. Minesinger and S. J. Fair are the proprietors.

Black Creek, Wis.—Mr. Goodrich has sold his interest in the Hardware store to his partner, Mr. Wood.

Cameron, W. Va.—J. D. Owens has sold his interest in the store of the J. D. Owens Hardware Company to his partners, H. W. and H. S. Sinsel. The style of the new firm will be the Sinsel Hardware Company. H. W. Sinsel has been manager of the store since it was opened here.

Chattanooga, Tenn.—The Magill Hardware Company has increased its capital stock, doubling that under which the corporation has heretofore done business. An amendment to the charter has been filed for this purpose. The capital stock was authorized by the amendment to be increased from $22,500 to $45,000. Incorporators of the company are W. L. Magill, J. B. Milligan, C. H. Magill, C. L. Ford and H. G. McGhee.

Cooksville, Ill.—H. W. Crumbaker has traded all his real estate and Hardware and implements, etc., to a party in Kankakee.

Danville, Iowa.—E. S. Bonnell, a Hardwareman of Wellman, Iowa, has bought an interest in the local Hardware store owned by William Shepherd and will move his family here the last of the year.

Elba, N. Y.—H. F. Peck & Son, of Rochester, have taken possession of the Hardware store which they recently purchased of G. W. Munce.

Ellisburg, N. Y.—T. W. Matteson has sold his place in this village to A. E. Lee and has bought a business block in Pulaski and will move there soon. Mr. Matteson and son, Lynn, will conduct a Hardware and plumbing establishment in that village.

Fulton, Va.—E. M. Bell, a well-known merchant of Fulton, has bought out the stock of the Hardware firm of W. P. Turner & Co., and has taken charge of the property. Mr. Bell will move his stock of goods to the store occupied by W. P. Turner & Co.

Galesburg, Mich.—A business transfer took place recently by which A. B. Cadwallader, now of Hickory Corners, will assume the Hardware business at present conducted by W. A. Elsey.

Havana, Ill.—H. C. Harpham has sold his interest in the Harpham Hardware store to George Sloan.

Hull, Ill.—L. H. Kenady & Son, who have been in the Hardware business, have closed out and gone out of the business. It is expected a new firm will open up.

Kenton, Ohio.—P. V. Wagner, the elder member of the well known Wagner Hardware firm, has retired from the business, selling his interest to W. D. and C. H. Wagner.

Morgantown, W. Va.—The Secretary of State has issued a permit to the H. C. Baker Hardware Company allowing them to increase their capital stock from $25,000 to $50,000.

Oriskany Falls, N. Y.—C. M. French, who a short time ago bought out the Henty Hardware store, has disposed of the same to F. B. Benjamin of Sherman, N. Y., who has already taken possession.

Sprague, Wash.—The Western Mercantile Company has taken over the L. C. Fisher & Co. Hardware and implement stock. The deal involves a consideration of more than $35,000.

San Diego, Cal.—Papers have been filed by which the business of Samuel Gordon Ingle has been closed out as a private concern and will be divided and incorporated as two concerns. The main business is incorporated under the firm name of Samuel Gordon Ingle Company, with a capital stock of $150,000. The directors of the company and the amount of stock subscribed by each is as follows: Samuel Gordon Ingle, $90,000; Roscoe E. Hazard, $5,000; Elwyn B. Gould, Jr., $5,000; Herbert D. Field, $5,000; Herbert W. Sherman, $5,000.

South Bend, Ind.—G. E. Meyer & Son, a well known and long established Hardware firm doing business at 117 North Michigan Street, have leased the three-story brick building, located at 115 and 117 West Jefferson Street and will occupy the place with a complete Hardware stock as soon as the remodeling is finished, which will begin at once.

Table Rock, Neb.—The Nemechek Bros.' stock of Hardware has been traded to Arthur Robertson of Newman's Grove in exchange for a section of land in Antelope County, Nebraska. The trade includes the store building of the Nemechek Bros.

Traverse City, Mich.—The S. F. Saxton Hardware Company has disposed of its business on East Front Street to J. A. and Herbert Montague. There will be no change in the store this Winter, the two members of the firm running both the Saxton store and the Hardware store of J. A. Montague. About March 1 it is expected that a new two-story brick building will be commenced on the Saxton site, 27 by 162 feet.

Valley, Neb.—Charles Parsons, who has been running a Hardware store the past two years, has sold his stock to L. P. Byars.

Victoria, B. C.—A few days ago the old-established Hardware business of Nicholls & Kenouf changed hands, the purchasers being new arrivals from the Northwest.

Walla Walla, Wash.—The Hardware firm of Cox & Barnett, now doing business at the corner of First and Alder Streets, will soon be succeeded by a corporation composed of local business men and Walla Walla Valley farmers, with a capital of $100,000. The company will soon file articles of incorporation, and is composed of the following well-known men: David Cox, W. S. Barnett, John Foley, John I. Yeetd and Bruce Ferrell.

Washington, D. C.—Albert L. Johnson, who has been connected with Morsell's Hardware store for the past twenty years, and for the last five years as general manager, has bought the business and will hereafter run it as his own. It was announced the business would be conducted along the old lines with as little change as possible.

Williamsport, Ind.—E. D. Scott has traded his stock of Hardware for a farm in Michigan, near Sturgis.

Youngstown, Ohio.—The Stambaugh-Thompson Company has acquired the business of the Morris Hardware Company. It has been learned from a reliable source that the Stambaugh-Thompson company secured the Morris concern for $341,000.

YOU CAN FOOL

Some painters all of the time, and some painters some of the time but—you can't fool all painters all the time on Turpentine. Nor can you fool Father Time. He'll expose you quicker than a wink.

Adulterated Turpentine mixed with Paint will make it "powder" and blow away. The paint won't last, nor protect, nor wear. 90% of so-called "Turpentine" is adulterated with petroleum—benzine—naphtha or gasoline.

You can't afford to sell it, Mr. Dealer, but it'll pay you twice over to stock up and sell "Allpine" Painter's Turpentine, because

*

It is guaranteed to be free from adulterants and is an "unsaturated" compound—will change from a thin to a thicker liquid, and finally to a smooth, resinous, glassy substance. It will produce the finest and most lasting work. If it's profits you're after, sell

HARDWARE MANUFACTURERS' RECORD

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, etc.

Alexis, Ill.—Alexis Hardware & Implement Company has been incorporated for the purpose of manufacturing; capital, $2,500 Incorporators: G. B. Odell, Harry P. McMullin and Alfred W. Blythe.

Bay City, Mich.—The Michigan Tool & Novelty Works has filed articles of association, naming the capital stock at $2,000. The office shall be in Bay City and the stockholders are F. L. Schrefferman, F. J. Powell, E. C. Biggam, C. Moses, William Catlin, F. W. Youngs, H. O'Dell, Pat McLean, A. B. Flagg, Charles Mitchell, F. W. Youngs, trustee.

Boston, Mass.—Boston Brass Andiron Company has been incorporated with a capital of $25,000; Charles A. Pearce, Frank W. Douglass, Solon W. Bingham.

Buffalo, N. Y.—Model Brass Foundry has been incorporated to manufacture castings, tools, etc.; capital, $5,000. Incorporators: Pauline Popp, No. 277 Moeller Avenue; John Popp, No. 273 Strauss Street; Philip Epp, No. 24 Goodyear Avenue, all of Buffalo, N. Y.

Camden, N. J.—The Conover Machine Co. has been incorporated; objects, to manufacture and deal in all kinds of agricultural machinery; capital, $500,000. Incorporators, William G. Conover, William P. Conover, Jr., John A. MacPeak.

Columbus, Ohio.—The Columbus Plow Company has begun operations at its new plant on Davis Avenue and the railroad tracks, and a large force of men is employed. The capacity of the plant will be 1,000 plows and 2,000 harrows a year.

Fort Worth, Tex.—A new manufacturing enterprise is being installed in North Fort Worth. The articles to be manufactured are the newly patented one-minute dish-washing machines. C. W. Darnell & Son are the proprietors of the new enterprise. Several skilled workmen will be required to start the work, and it is expected that as soon as the work is started the force will be greatly increased. The machinery is now being installed and the work of manufacturing the machines will be in progress within a few days.

Galesburg, Ill.—Wetmore Manufacturing Co. has been incorporated; capital, $2,500; manufacturing tools, machinery. Incorporators—G. A. Smith, Theodore L. Wetmore, G. A. Smith.

Greenfield, Mass.—The A. J. Smart Manufacturing Co. has been incorporated in Massachusetts to manufacture taps and dies. The officers are: President and treasurer, A. J. Smart; vice-president, R. S. Bascom, and secretary, R. H. Smart. The company proposes to build a factory in the vicinity of Greenfield within a year or so, and will prepare to make tools and special machinery for the manufacture of taps and dies.

Lisbon, Ohio.—A company capitalized at $100,000, with an enameling plant at Lisbon, Ohio, has been formed by F. M. Brown and W. H. Cochrane of the Bindley Hardware Company. The new plant will employ 500 persons.

Lamont, Ill.—American Aluminum Manufacturing Company has been incorporated with a capital of $5,000. Incorporators—George S. Walker, William Dougall and J. L. Gallagher.

Lowell, Mass.—Victor Mangle Company has been incorporated with a capital of $20,000. John S. Langworthy, Herbert O. Allen, Frank K. Stearns.

Millington, N. J.—Duane H. Nash has incorporated to manufacture farming implements, mill supplies, etc.; capital, $100,000. Incorporators: Alfred T. Nash, D. Howard Nash, Anna Nash Teff.

New York, N. Y.—Electric Floor Surfacer Co. of New York has been incorporated to manufacture machinery for polishing floors, etc.; capital, $10,000. Incorporators: G. F. Hall, Providence, R. I.; E. F. Mardock, East Orange, N. J.; H. L. Mardock, New York City.

New York, N. Y.—The Consolidated Handle Company has been incorporated to manufacture hickory and iron handles and woodmen's and mechanics' tools. Directors—Edward E. Robbins, Greensborough, Pa.; William J. Balmer and Michael Balmer of Manor, Pa.; Michael R. Grace of Memphis, Tenn.; William A. Chapman of New York, and Harry W. Davis of Wilmington.

Perth Amboy, N. J.—National Nail Driving Machine Co., No. 136 Smith Street, has been incorporated to manufacture nail driving machines; capital, $50,000. Incorporators: Frederick Yepsen, George W. Yepsen, John A. Milliken, Perth Amboy, N. J.

Reading, Pa.—C. G. Derr will apply for a charter for the incorporation of the American Die & Tool Company, which proposes to operate under the laws of Pennsylvania in the future. The firm conducts a large plant at Second and Buttonwood Streets, which is devoted to the manufacture of dies and tools, grinding machines, brass hand pumps and whistles, lawn mowers, etc. The capital stock will be $60,000. The incorporators are J. H. Sternbergh, Herbert M. Sternbergh, Edwin S. Smith and C. S. Dundore.

South Marion, Ind.—The Hoosier Store Company have started a small force of men to work for the first time. The company expects by the first of December to have the whole plant in operation.

Syracuse, N. Y.—Essex Law Machine Tool Company has been incorporated: capital, $50,000. Directors—J. L. Law, Jr., W. T. Gray and J. A. Anderson, Syracuse.

Changes and Improvements.

Augusta, Me.—George E. Gay, manufacturer of Gay's ratchet screw drivers, owing to the increased demand for his products, has materially enlarged his plant.

Bristol, Conn.—The Wallace Barnes Co., manufacturers of small springs of all descriptions, have nearly completed their new factory building, which will give 24,000 square feet of additional floor space. New machinery, together with the rearrangement of that already in operation, will enable the company to take on heavier work. Its automobile department will be doubled.

Cincinnati, Ohio.—The Stewart Iron Works Co., owing to the large increase in the demand for its iron fencing, is building an addition to its plant, 100 by 100 feet, two stories high, brick, which will enable the company to employ from 75 to 100 additional men. The building is expected to be completed by February 1 next.

Dayton, Ohio.—The Burkhardt Manufacturing Company of Springfield, organized about six months ago for the purpose of manufacturing a meat-slicing machine, has sold out its business to I. J. Cushing of Dayton, manager of the Boston Scale Company, and the business will be transferred to Anderson, Ind., to which place the machinery is now being shipped.

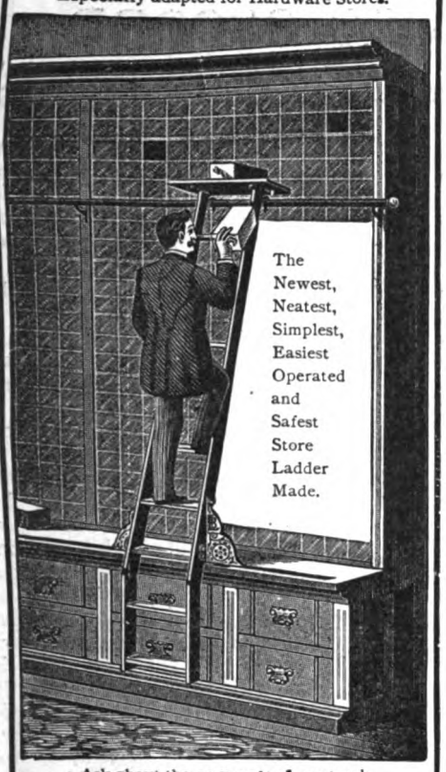
Dixon, Ill.—The Clipper Lawn Mower Co., manufacturers of hand and pony mowers and modern gasoline engines from two to eight horsepower, has recently completed a new plant, 40 by 150 feet, two stories high, with a finished basement. A warehouse is also to be erected, 30 by 95 feet, and the site, which is 700 feet long and 60 feet wide, provides ample room for future extensions.

East Douglas, Mass.—Ethan Rogers, general superintendent of the American Axe & Tool Co., has called for plans for a shop to replace the burned buildings. Supt. William J. Griffin states: "The total loss to the East Douglas plant in the fire of October 17, as figured by the directors of the company approximates $41,000. The amount paid by the insurance companies was about two-thirds of the loss."

Epping, N. H.—James W. Shepard of Strafford has leased the Moses G. Nichols plant and will engage in the manufacture of axe and hammer handles.

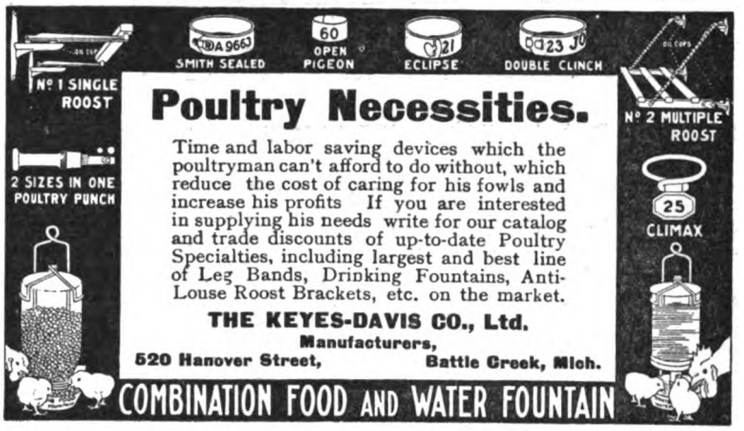
Franklin, Pa.—The Colburn Machine Tool Co. has built an addition to its plant, 30 by 60 feet, which will be used as a pattern shop, the building formerly used for this purpose now being operated as a machine shop.

Hoopeston, Ill.—The Hoopeston Horse Nail Co. will enlarge the plant to fill contracts now on their books. Special machinery is being built by the Henry Perkins Co., of Bridgewater, Mass. This equipment will be ready about January 1. It will also be necessary to increase the power plant, as well as to add to the machine and tool department.



Ingersoll, Ont.—The purchase by the John Morrow Machine Screw Co., Limited, of the plant of the Standard Bolt & Screw Co. of Toronto is looked upon as of considerable importance to this town. The new plant, which was valued at about $28,000, will be used to supplement the plant here. It will necessitate the employment of much more labor.

Keyport, N. J.—Sherman & Co. of New York, makers of the Sterling razors, have purchased the large cutlery manufacturing plant, formerly owned and operated by the American Cutlery Co., and occupying an entire block. The equipment represents an investment of $90,000.



Muncie, Ind.—Kitselman Brothers, manufacturers of woven wire fence, ornamental fence and gates and plain and coiled spring wire, have in course of erection two separate additions. One of them is 50 by 75 feet and the other 100 feet square. Both of them will be of steel construction throughout and the machinery installed will be of the company's own manufacture. Electric motors will be used for power.

BICYCLE AND SPORTING GOODS RECORD

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Boulder, Colo.—The F. E. Wilson Hardware Co. have incorporated with a capital stock of $20,000 to conduct a retail business in sporting and athletic goods and Hardware.

Charlotte, N. C.—The Relay Mfg. Co. has been incorporated with $125,000 capital, to manufacture bicycles, parts and accessories. The company will begin business with $4,000. The incorporators are G. V. Keller, M. F. Trotter and Morris E. Trotter, all of Charlotte.

Cleveland, Ohio.—The Hydraulic Pressed Steel Co. is the style of a new concern which has commenced business in Cleveland, Ohio, and which is making a bid for the trade in bicycle sprockets. Its general manager, James H. Foster, was formerly identified with Parish & Bingham.

Denver, Colo.—The Denver Bicycle Cement Co. has been incorporated with $5,000 capital. Harry E. Gougar, George F. Fridwell and J. F. Jones are the corporators.

Durham, Ont.—Oscar S. Hunter is to establish a Hardware and sporting goods store.

Hamlin, Tex.—The Riter Hardware Co. have incorporated with a capital of $10,000. They will carry on a retail business in sporting goods.

Jersey City, N. J.—Jersey City Sporting Goods Co. has been incorporated to manufacture and deal in sporting goods, etc.; capital, $10,000. Incorporators: Evert Van Slyke and Elizabeth J. Van Slyke, 253d Street, Riverside-on-the-Hudson, N. Y.; John O. Van Slyke, Jersey City, N. J.

Keene, N. H.—A. W. Dickerman of Gloucester, Mass., is to open a sporting goods store in Petts' block on Church Street.

Midale, Sask.—J. F. Wright has opened a Hardware store at Midale, Sask., and G. R. Fogg, another at Togo, Sask. Both will carry a line of sporting goods suitable for sale in the new settlements of the Canadian Northwest.

Montreal, Can.—The Gillette Sales Company have their new Canadian razor factory in full operation, with A. A. Bittnes as manager.

Patchogue, N. Y.—O. B. Slatterly has opened a repair shop on Roe Court.

Richmond, Va.—Wilmer M. Batten, formerly of Millville, N. J. has opened a store on Broad Street.

St. Louis, Mo.—Articles of incorporation have been filed by the Hurck Cycle Co., who will hereafter be known as the Hurck Motor & Cycle Co. The capital is $5,000.

Vancouver, B. C.—Thomas Dunn, the pioneer Hardware merchant, is to establish the first Hardware store at Prince Rupert, the Pacific terminal of the Grand Trunk Pacific, the new transcontinental railway.

Welland, Ont.—A new Hardware and sporting goods store is to be opened by T. Kitely.

Bentley, Iowa.—P. H. Heft is the successor to Heft & Timberman, who handles sporting goods.

Changes and Improvements.

Angola, N. Y.—The Emblem Mfg. Co. for the first time will include motor cycles in their 1907 lines. The Emblem machine will employ the Thor 2¼ horsepower motor and other Thor components.

Boston, Mass.—Owing to a change in the policy of the Pope Mfg. Company, which has decided to give up their Boston branch, its bicycle interests in the future will be taken care of by Alonzo D. Peck, so long connected with this concern, at its old stand, No. 223 Columbus Avenue, Pope Building, in part of the store occupied by the Dodge Motor Vehicle Company, who will handle the full Pope line of automobiles.

Chicago, Ill.—The Fischer Rod Mfg. Co., 50 North Canal Street, have purchased several lots in South Elgin, Ill., and will erect a large factory for the manufacture of their New Century telescopic steel fishing rods. With the improved facilities afforded in the new quarters, the output will be greatly increased.

Chicago, Ill.—The Pope Mfg. Co. has leased quarters at the corner of Clark and Monroe Streets—in the heart of the downtown business district—and opened a sales office at that address on December 1st.

Chicopee Falls, Mass.—At the annual meeting John C. Cole, for many years superintendent of the Fisk Rubber Co., was elected to an additional vice-presidency that was created. All other officials were re-elected.

Dickens, Iowa.—J. T. Cronk has succeeded to the Hardware and sporting goods business of William McCurdy.

Faribault, Minn.—Walter Scott has purchased half interest in Faribault Cycle Co., Mr. Thomas retiring; new style, Auto Supply Co.

Glencoe, Ont.—John Henry & Son have purchased the Hardware store of D. McLachlan. They will have a sporting goods department.

Girard, Kan.—D. I. Spence has sold his business there to E. C. Hiett, and has opened up another business, which includes sporting goods, in Frontenac, Kan.

Hamilton, Ont.—Boulter & Gilmour have sold their Hardware store to Stanley Mills & Co., who do a good trade in sporting goods.

Hartford, Conn.—The Anglers Company, who have heretofore confined their operations to the manufacture of fishing tackle, have leased a large store at 725 Main Street and after making extensive alterations, are conducting a wholesale and retail sporting goods and photographic supply house. At the head of the concern, which is known as The Sportsman's Shop, is W. R. Newsome, who has been president of the Anglers Company since its organization.

Howe, Neb.—C. A. Keel has succeeded to the business of W. H. Lohr. He carries a representative line of sporting goods.

Kimball, Kan.—V. S. Kelsey has purchased the sporting goods business of the Kimball Hardware Company.

McPherson, Kan.—N. Fields has sold out to O. W. Johnson.

Montreal, Canada.—The increase in their business during the past year has compelled the Dominion Cartridge Co. to undertake certain improvements in building and facilities in order to take care of the output in 1907 which promises to double that of the present season. Considerable construction work is being carried on at the factory and a great deal of new machinery is added. The announcement was recently made that C. Edward Wood, who was appointed United States sales manager several months ago when the company opened a department for the trade in this country, has now taken over the Canadian and foreign business of the firm with the title of general sales manager.

New York, N. Y.—Announcement has been made to the trade that the merchandise and good will of the Bridgeport Athletic Mfg. Co., 311 Broadway, have been sold to Wright & Ditson, Boston, Mass., the large manufacturers of lawn tennis supplies. On November 15, V. M. Delano, president of the Bridgeport concern, assumed the duties as manager of what will be known as the New York branch of Wright & Ditson, at the above address. There a wholesale trade will be conducted and trade will be supplied in New York, Philadelphia and vicinity. In addition to their established lines they will continue the B. C. I. lawn tennis rackets, golf clubs and other articles formerly identified with the Bridgeport Athletic Mfg. Co.

Richmond, Va.—Charles W. Vaughn has moved into more commodious quarters at 2 East Broad Street. He will continue his retail business in sporting and athletic goods.

Shelby, Ohio.—The Shelby Steel Tube Co. is erecting an additional mill at Elwood City, Pa., which it is expected will be completed and in operation by February next.

Theresa, N. Y.—A branch of the Skinner fishing tackle manufactory will be located here in the near future.

We Are the First!

Yes, we are the first of the manufacturers of Terne Plates to suggest and adopt the plan of stamping the amount of coating carried by our brands of Roofing Tin, and of stamping all wasters as such.

This is the "square deal" which all Jobbers, Architects, Roofers and Property Owners have needed for so long—and already the move has shown a good effect.

In future, don't merely specify American Ternes, American Extra, American Special, American Old Style A, 2A, 3A, 4A, 5A, MF, or U. S. Eagle New Method—but examine the boxes when these arrive and see that the contents indicate exactly what you purchased. If the sheet isn't stamped with the coating, look along the edge for the mark "Waster."

If you'll use these precautions you'll find Roofing Tin to be the most satisfactory roof covering you can use—but you can't expect an 8-lb. Terne to do the work of the old time or present day 30 to 40-lb. coated plates.

Send for our booklet "From Underfoot to Overhead" if you would know how a high grade Terne Plate is made, and use MF ROOFING TIN, "The Terne which turns the elements," if you want the best Roofing Tin that can be had.

AMERICAN
SHEET & TIN PLATE
COMPANY,

FRICK BUILDING **PITTSBURGH, PA.**

"TRADE ● MARK **Bristol**"

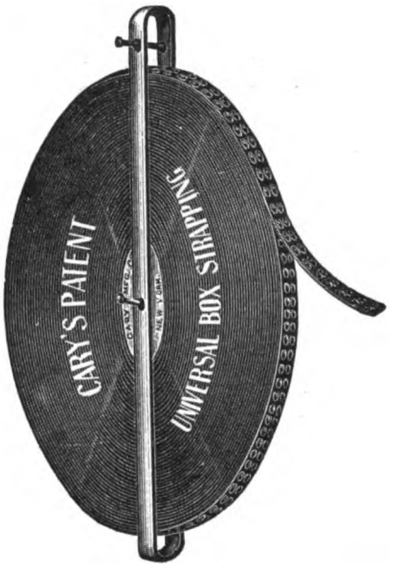
RODS THAT CATCH CUSTOM

Are the "Bristol" Steel Fishing Rods, so well known, and widely advertised that they almost sell themselves. Anyway, each one sold sells others, and the Dealer giving satisfaction is sure to get the tackle trade.

The very liberal discount we allow, enables Dealers to retail the rods at low prices, yet leave good margin of profit.

As to the superior quality of the "Bristol" Rods, to prove our faith, and furnish you with the *strongest possible selling argument* we give absolute guarantee against breakage due to defective material or poor workmanship for THREE YEARS after a rod leaves our factory. Remember it pays to keep a full, assorted stock.

Is your name on our list? We can send you occasional advertising matter which will help make sales, *and refer* inquiries to you.



Look for our name and trade mark "Bristol" on every reel seat. Ours are the ORIGINAL Steel Fishing Rods; we have been manufacturing them for nearly twenty years.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.
